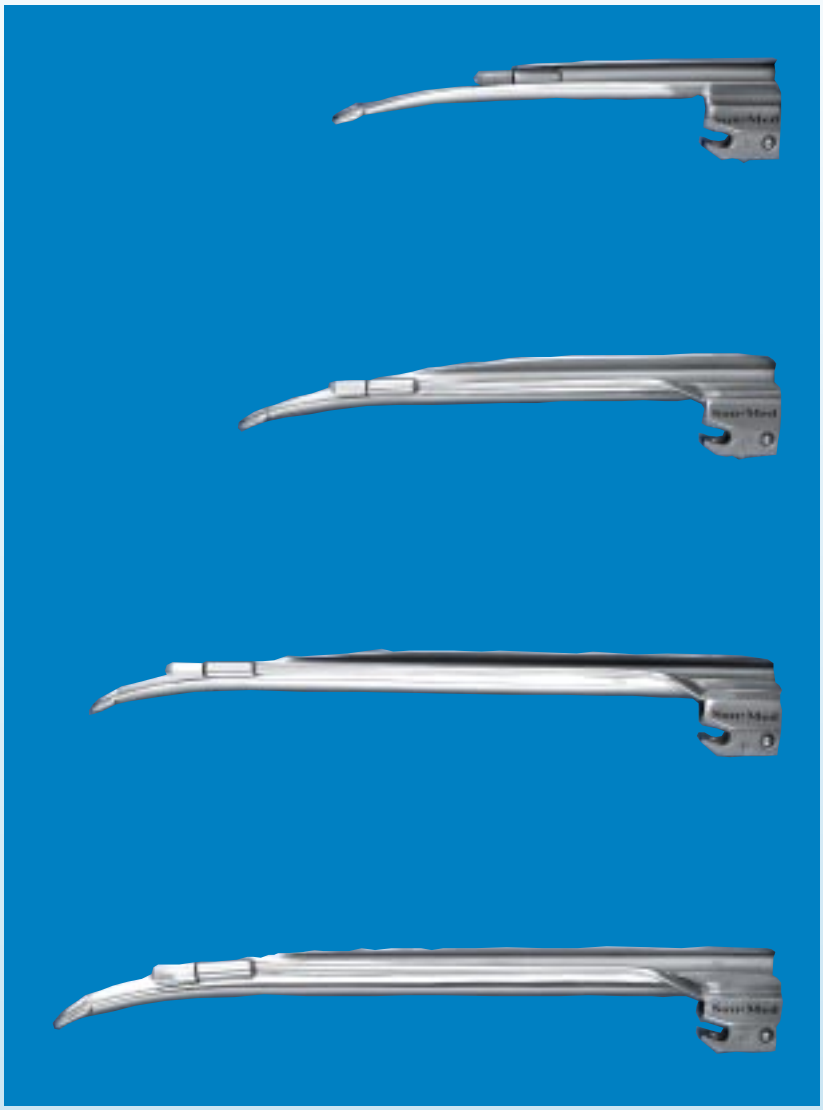
Miller Blades

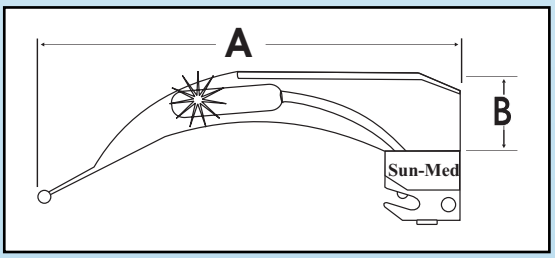
American Profile Foregger/Rüsch Type



AMERICAN PROFILE

(FOREGGER/RÜSCH TYPE)

Developed in conjunction with the late Dr. Robert A. Miller of San Antonio, Texas, it is the most popular of the straight blade types. When originally designed, the size of the flange was reduced to minimize trauma and the curve at the beak or top was extended to improve lifting of the epiglottis. These improvements facilitate greater exposure of the larynx in difficult patients. This blade is available in a variety of sizes. Blade sizes 2, 3, and 4 have lamp on right side. Blades made of surgical stainless steel.



CAT#	SIZE	DESCRIPTION	A	B
5-5062-20	00	Premature	65mm	10mm
5-5062-00	0	Neonate	75mm	10mm
5-5062-01	1	Infant	102mm	10mm
5-5062-15	1.5	Small Child	130mm	12mm
5-5062-02	2	Child	155mm	13mm
5-5062-03	3	Medium Adult	195mm	13mm
5-5062-04	4	Large Adult	205mm	14mm

REPLACEMENT LAMPS

5-0234-01 .....For Sizes #00, 0, 1, 1.5, 2, 3
5-0234-04 .....For Size #4
