JA PreventNCD

Joint Action Prevent
Non-Communicable Diseases

Who we are

A consortium of more than 100 partners in 25 European countries, including public health institutes, ministries of health, national and local health authorities, and universities.

What we are working on

We work to support strategies and policies designed to reduce the burden of NCDs and common risk factors, addressing health at personal and societal levels.

What's the one thing we need next

We need to turn the foundations we have built into lasting impact: translating evidence into policy, scaling up effective prevention, and providing policymakers with actionable guidance.

5 years Mission Cancer:
Stronger Through Connection
