Key: ● Good performance ◆ Area of concern

Deprivation score (Multiple): measures the deprivation for small areas across England, based on seven domains of deprivation (Income; Employmet; Education, Skills & Training; Health & Disability; Crime; Barriers to Housing & Services; Living Environment). Each area is given an Index of Multiple Deprivation Score. A higher score indicates a greater level of deprivation.

Alcohol related hospital admission (narrow definition): admission to hospital where the main reason for admission to hospital was attributable to alcohol.

Alcohol related hospital admission (broad definition): admissions to hospital where the primary reason for hospital admission or a secondary diagnosis was linked to alcohol.

Domains of Deprivation - Health Deprivation and Disability: measures the risk of premature death and the impairment of quality of life through poor physical or mental health.
