Press Power Button

STEP 2

Insert Into Card Slot

If LED is red, there is a hidden skimmer head

STEP 3

(while still inserted) Press Power Button Again & Remove

If LED is red, there is a hidden skimmer head

Skim Scan™ is used primarily in ATMs, fuel pumps and any card reader that requires insertion of the card. Skim Scan™ CANNOT be used in a swiping motion typically found in card readers inside convenience and retail stores.

Skim Scan™ CANNOT be used in the EVM or chip reading slot on the front of card readers typically found inside convenience and retail stores.

We recommend Skim Swipe™ for POS check-out terminals that require a swiping motion.
