ROTOPAX™

Page 868 - 871 in Fuel & Intake

- **FUEL CONTAINERS** All of the gas containers Rotopax manufactures for the United States are molded using our patented 3 layer design. This state of the art molding technique exceeds the EPA (Environmental Protection Agency) and CARB (California Air and Research Board) requirements. Making Rotopax the only Rotational molded EPA and CARB compliant container on the market.

- **WATER CONTAINERS** Like the gas containers, our water containers are rotationally molded and great for storing any potable liquids as well as being frozen for nice cold water all day long. However, the plastic compound is a food grade plastic so it is safe for drinking. Not recommended for gasoline. The Rotopax potable water containers are available in three sizes: 1 gallon, 1.75 gallon, and 2 gallon. Frozen for ice cold water all day long

DYNAMIC BMS.
Equipped with an auto-enabled, advanced battery management system that provides maximum protection, performance and bi-directional cell equalization for long lasting stability. No BMS reset needed.

ACTIVE PROTECTION.
Protects engine against over-charge, extreme heat, short circuit, over discharge, extreme cold and over-current.

NEW

DIRT COMMANDER 2.0

The All-New Dirt Commander 2.0 is GBC's newest SXS tire that features a bold redesign of the popular Dirt Commander. The 2.0 showcases a strong square shoulder profile that maintains grip and bite even during extreme speeds and cornering. Plus, the sidewall protection is even greater than before courtesy of the elongated sidewall lugs, which enable you to power through tight paths and obstacles with confidence. The flatter profile across the tread face allows maximum acceleration and braking power, even in the most challenging conditions. GBC also redesigned the tread blocks for easier clean-out and added deeper sipes for greater tread flex. The Dirt Commander 2.0 is ready to take on all kinds of adventures, from rocky trails and desert driving to soft and intermediate terrains.

- It's time to take your ride to the next level with the Dirt Commander 2.0!
- Radial construction provides a smoother ride
- Strategically placed lugs for exceptional grip in all types of terrain
- Square shoulder profile for maximum acceleration and braking power
- Long side lug for enhanced sidewall protection

HOW TO CLEAN WHEELS

- **Probably the single biggest mistake when cleaning wheels is to use industrial cleaners, which can contain harsh abrasives. Mild soap and warm water is sufficient for routine cleaning.**
- **After cleaning chrome-plated wheels, you can apply a non-abrasive wax or cream to prevent surface corrosion. If you have clear-coated wheels, skip this step.**
- **Don't let tire cleaners come in contact with your wheels, and try not to spray cold water on hot wheels.**
- **If you go to the car wash, don't use steam cleaners or strong chemicals on your wheels.**
- **To brighten up your polished wheels (wheels without a clear coat finish) use a polishing cleaner.**
- **To sustain this great look, apply some wax to keep the weather out.**

IMPORTANT NOTICE After installing Ride-On TPS Motorcycle Formula sealant into your tires you may notice a slight vibration until the sealant has warmed up and distributed evenly in your tires. This process usually takes 2 to 5 miles. Please DO NOT attempt to rebalance tires after the installation of Ride-On TPS Motorcycle Formula. Ride-On TPS is a balancing compound. Ride-On TPS will act as a balancer and will result in erroneous readings from a dynamic spin balancer that does not compensate for tire deflection, weight of the bike, brakes, or other suspension components. Ride-On is TPMS friendly, however it is not recommended for use in 2009, 2010, and 2012 Honda Gold Wings as their TPMS Sensors are not hermetically sealed.

BALANCE With one installation of Ride-On, lead weights become a thing of the past. While Ride-On works in conjunction with traditional weights, you won't need them anymore. Ride-On is specially formulated to hydrodynamically balance high-speed tires and dampen road noise and vibrations that cause a rough ride. The great thing is Ride-On will continue to adjust and literally rebalance your tires as you ride for the legal life of the tires. So go ahead, pop off those wheel weights, shine your wheels, and enjoy the smoothest ride you have ever experienced on your bike.

SAFETY FIRST With Ride-On TPS tire sealant, your tire literally fixes itself! If your tire is punctured, the centrifugal force of the rotating tire and the internal air pressure force Ride-On into the hole, sealing it virtually instantly. Since it helps eliminate porosity leaks that cause tires to deflate over time, your tires stay properly inflated, last longer, your bike handles better and gets more miles per gallon.

WORKS IN TUBE AND TUBELESS TIRES Ride-On TPS eliminates 85-95% of flats in tubeless tires from objects up to 1/4" (1/8" for tube tires) that penetrate the contact patch of the tire. Since puncturing objects often tear tubes, Ride-On's efficiency in tube tires is reduced to 55-65%. If the puncturing object remains in the tire, it is vital to remove it as soon as possible to prevent further injury to the tire or tube. Our company takes the position that any repair in a motorcycle tire should be treated as temporary.

LED SMART CAPS

DESCRIPTION	PART #	
LED SMART CAPS		
LED Smart Cap Small Display w/Wired Cap	650278	33.95

The LED Smart Cap Tire Pressure Monitor (TPMS) valve cap is a must for people that want to make sure that their tires are properly inflated. Once installed the LED Smart Cap TPMS valve cap will alert you if the tire pressure drops by a setpoint pressure. The Light Vehicle version of the Smart Cap Tire Pressure Monitor system is available for automobiles, SUVs, light trucks, vans, motorcycles, scooters, trailers, ATVs, etc. with a pressure range of 10 to 70 psi and a low pressure warning trigger of 4 psi (with a +/- 10% accuracy).

- Easy to Install - Simply screw valve caps onto tire valve stems.
- Bright blinking LED light that is visible in daylight and night time
- Self-Calibrating - Automatically calibrates to pressure the tire was set at when the cap was installed. The same valve can be used with tires from 10 psi to 70 psi (Auto and Motorcycle Version with a 4 psi pressure drop alarm) or 30 to 170 psi for commercial version (available in 4 psi or 8 psi pressure drop alarm)
- Automatically compensates for ambient temperature changes to avoid false alarms.
- Comes with integrated anti-theft device.
- Long lasting low pressure alert - blinking red light alerts of low pressure for 750 hours (more than a month).
- Low battery alarm - the led valve cap will blink yellow for up to 100 hours to alert you that the batteries are running low.
- Long Lasting 3 year battery shelf life.
- Great compliment to Ride-On TPS filled tires - 100% compatible and now you can be alerted of a slow leak.
- Proper tire inflation pressure helps extend tire life.
- Proper tire inflation pressure helps optimize fuel economy and save up to 3% in fuel.
- Available in 2 and 4 pack blister Packaging, as well individual and bulk packaging.

FIRESTIK WHIPS SAFETY FLAGS

These FireStiks have a special blend of fiberglass and resin that offers strength and durability that is always flexible, never brittle.

Each whip is shrink-wrapped in a protective layer of PVC tubing that eliminates sun-splintering and deterioration. Other benefits are increased durability and enhanced color visibility. The 3/8" - 24 threaded base is compatible with a large variety of brackets, mounts, springs, quick disconnects and other mounting hardware.

The 12" x 8" orange rectangular safety flags are made 100% oxford polyester: a durable fabric proven to resist fraying and color fading better than nylon or vinyl. Flag is removable and/or replaceable and rotates freely on the rod.

HAYNES SERVICE MANUALS

What sets Haynes Manuals apart is the attention to detail that goes into the production of each book. Every manual is written from hands-on experience based on a complete teardown, which is the step-by-step procedure of dismantling a particular vehicle part-by-part. This is followed by the detailed rebuilding of the specific model it documents. Writing each manual takes 30 man-weeks, with authors working as teams to shorten the production time and avoid fatigue during the difficult process. Hundreds of photographs accompany each manual's step-by-step instructions. The books are written from the actual experience of Haynes' own expert personnel using only a basic set of tools and presented in a style that any DIYer can follow, even a beginner. The DIYer can save a great deal of time and money, not to mention feeling proud of the job, by using a Haynes book..

CANYON DANCER BAR HARNESS II

- The cross straps are held farther away from the switch gear
- The "cups" eliminate possible damage to grips
- The new cups hold the cross straps and your tie downs further out on the bars to better clear a wider variety of fairings
- The new cup is even easier and quicker to install correctly
- The cups are sized to fit the fattest grips in the industry
- The steel D-ring "lay-ins" prevent losses even after many years of weather and abuse begin to weaken the Polycarbonate cup
- We are using heavier thread with more stitches in the pattern for greater strength and the contrasting thread color aids in detecting flaws or damage

STRAIGHT PLOW BLADE

DESCRIPTION	PART #	
72" STRAIGHT BLADE	WR79958	581.96
66" STRAIGHT BLADE	208196	533.65

Get your UTV ready for plowing with the WARN ProVantage Plow System. The system has been engineered from the ground up and extensively tested to give the product years of service, so you and your vehicle can plow season after season.

The ProVantage UTV Plow system has the same rapid connection system as the ATV system, but it uses a big UTV specific 72" plow blade to move material. Just add the UTV blow base, your plow lift mechanism (either the ProVantage Power-Lift of a WARN XT40 or XT30 winch), order your accessories of choice and you're ready to get to work!

UTV STEP 2) ORDER YOUR PLOW BASE/PUSH TUBE ASSEMBLY UTV

The WARN Plow Push Tube assembly features an extra-wide design for increased stability and durability, a forward trip system, and an interlocked rotating base plate for great strength, outstanding durability, and excellent impact resistance.

CENTER MOUNT
ATV PLOW SYSTEM

ATV STEP 1) PICK YOUR PLOW BLADE ATV

- Warn Plow blades are made from high-strength low alloy steel with 3/16" outer blade ribs to provide superior strength and rigidity. These ribs also allow a weight reduction that gives you better handling and performance while plowing.
- Warn uses large bushings - 6" in the base and 1-1/2" in the blade ribs - to dramatically reduce wear and absorb the shock of plowing. A large, replaceable wear bar and adjustable gravel skids make fast work of difficult jobs.
- And, with the Warn Integrates Accessories Systems, you can change blade widths without buying new mounting kits, lift mechanisms or base/tube assembly.

The handle itself is padded, height and width adjustable for operator comfort. New, stronger 3/8" short lift rod, no longer 5/16"!, New cable lift design. BOOT GUARDS

AMERICAN MANUFACTURING

You can't bend 'em or smash 'em. CV joints, rubber boots, and drive shafts on ATVs are expensive and they need to be protected. Typical boot guards are installed with U-Bolts, this makes it difficult to install and the exposed threads are usually bent or smashed. These boot guards are designed with weld on clamps specifically located to fit to your quad. They are fastened with flat headed bolts. 10 and 12 gauge steel.

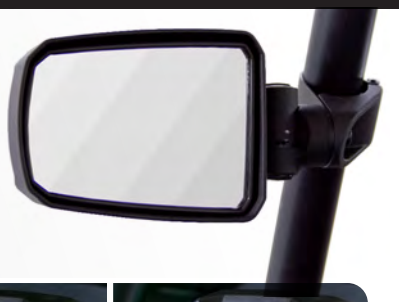
Pursuit NIGHT VISION SERIES

PURSUIT NIGHT VISION SERIES SIDE VIEW MIRRORS WITH DUAL MODE LEDS



With White & Green Cree LED Chips

The Seizmik Pursuit Side View Mirrors with Dual Mode LED Night Vision come equipped with white and green Cree LED chips which provide peripheral illumination to the mid-forward and side ground areas around the UTV. Night Vision Mode may be used for better visual acuity at lower light levels as the eyes adjust to the surrounding darkness quicker while using green light. This mode also helps avoid attracting attention from game and wildlife. The White Light Mode is used for maximum illumination, providing bright lighting around the vehicle when needed. The Pursuit mirrors are easily serviceable and the independent convex safety glass may be replaced without having to replace the whole mirror.

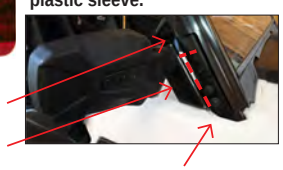
This is what you have to cut to make their windshield work with regular 1.75” round tube clamp.

This is the mirror mount.

These mirror mounts eliminate the need to cut the plastic sleeve.



THE PROBLEM

Pure Polaris full windshields for RZRs have a plastic sleeve that covers almost all of the roll cage A pillar.

If you want to use the Pursuit mirrors, you have to cut the plastic sleeve to make room for our clamp.

Our mirror mount gets the mirrors off the roll cage tubes by attaching to the existing holes, using existing bolts.

Seizmik's VersaVent windshield comes equipped with two cleverly designed vents that let the driver and the passenger independently control the amount and direction of airflow.

The VersaVent windshield also features a defog mode. No other windshield offers all these features. The vent is made of glass filled nylon, so it's incredibly durable. The scoop on the front gathers up air off the hood and re-directs it to inside the vehicle so even at very slow speeds there is a surprising amount of air that can come through the vent. The design of the scoop and the gasket between it and the windshield keeps precipitation out while still allowing airflow in—as much or as little as either the driver or passenger desires.

SOFT TOP & REAR PANEL COMBO

SOFT TOP & REAR PANEL COMBO

The RTV900 Soft Top has a best in class fit courtesy of Seizmik's new "Quikfit" tightening system. The tightening system uses two straps that wrap around the roll cage and buckle inside the cab. This reduces the installation time of the top and provides the best fit of any top in the industry. The system uses two straps that reduce the installation time of the tops and provide a tighter fit. What really sets these tops apart is their ability to be left on vehicles that are trailered. This is possible because the tops are wrapped around the roll bar and velcros into place, creating a snug fit that eliminates any loose flaps.

- Built Tough—Constructed with durable heavy-duty waterproof PVC coated denier nylon textile with UV protection
- Maintains Visibility—Integrated large rear window conveniently rolls up
- Trailerable—ONLY with rear window open and top properly secured. MAX SPEED: 55 MPH
- Easy Installation—Installs and removes easily with no drilling or tools required

SOFT REAR DUST & WINDOW PANEL

SOFT REAR DUST & WINDOW PANEL

Trailerable up to 65 mph when rolled up

Seizmik's Dust Panel is a rear panel that rolls up out of the way when not in use. It prevents the back draft that occurs when a windshield and hard top are used. This back panel makes riding in an RTV under adverse conditions much more comfortable because it keeps out dust, wind, and rain from entering the cab. Fastens securely around the roll cage with velcro.

- Prevents wind, dust and rain from entering the cab when the vehicle is outfitted with a hard top
- Constructed from tough UV-resistant PVC coated denier nylon
- Installs easily without drilling
- Rolls up and out of the way when not in use
- Huge window increases visibility

FITMENT:	POLARIS
RZR 1000XP 2 seat models (2014 - 19);	
RZR Turbo 2 seat models* (2016 - 19)	
* DOES NOT FIT the Turbo S	

The Armory R1 Rack works in tandem with the Armory SST gun case to store and transport a weapon (requires one Armory SST case and one Armory R1 Rack). The design of the system positions the case over the rear roof line of the RZR. With the case locked in place on the rack, the gun is always pointed up and away for superior muzzle control.

The Armory SST case is easily installed or removed from the Armory R1 Rack without the need for tools. A durable, glass-filled nylon lever is large enough to easily operate with gloves or mittens, and once released, the case lifts right out. With the Armory R1 Rack attached to the vehicle, its stiff, rigid, and strong—staying securely attached to the vehicle no matter how aggressive the terrain gets.

- Rack holds 1 gun case (sold separately)
- May be mounted behind either driver or passenger side,
- Heavy gauge steel frame holds gun case steady under tough conditions
- Spring loaded binding for quick and secure case load and release

PowerMadd

PowerMadd

PowerRiser from PowerMadd. This one piece design offers superior strength at an unequaled price. The PowerRiser provides dual pivot points so you can position the riser front to back, while positioning your bars up and down for the perfect bar placement. The PowerRiser comes in two widths – 3.25" for snowmobiles as well as Can Am and Polaris ATVs, and 4.75" for ATVs and motorcycles. Both widths allow you to use standard 7/8" bars or oversize 1 1/8" bars.

POWERRISER 325

The PowerRiser 325 comes in a 2" rise and will work on most snowmobiles with no cable modification. Check your cable slack for use on ATVs.
Note - One piece OE bar clamps will not work with the PowerRiser 325 - Replacement 7/8" bar clamps are required (PM15470)

STAR HANDGUARD SYSTEM

Handguards with standard removable air deflector.

SOLD PER PAIR.
MOUNTS SOLD SEPERATELY (SEE BELOW)

The strongest protection you can buy. The Star Series Handguard is designed to take a beating. The mounting brackets are tough aluminum, while the guard itself is made of two different types of plastic - a stiff spine for durability, and a softer colored body for flexibility. Designed to protect your hands from flying debris, rocks, bushes, branches, and mud, plus, keep your hands warmer by blocking the wind in cold weather. In the summer, simply snap out the removable vent cover to let air flow through. In winter, remove the optional extensions for added wind protection. Designed with a universal mount system that works on ATVs, motorcycles and snowmobiles and requires only 1/2" of bar space.

The all new Tri-Mount Kit offers another area to mount the handguards - just below the bend on the rise of the bars. This is an ideal choice when space is limited near the controls, especially on utility quads and some snowmobiles. Easy to mount because there is no need to move controls to make space. Note - works only on 7/8" bars.

The universal Hand Shifter works great on all models. Our hand operated shift levers mount to most ATV foot shift levers. Choose a long or short handle. We've developed a unique way to fasten the shifter's knob to the steel rod. Our hand shifter is sturdier than others, with stronger mountings, and a better finish. The Yamaha Big Bear is the only model we have found that our standard shifter doesn't fit. To satisfy that problem we have brought back a previous model that fits the Big Bear.

BRONCO ATV & UTV COMPONENTS

BRONCO GEARSHIFT CABLES

- Gearshift cables required in Polaris applications, rather than standard universal jointed hard linkages found in other OEM UTVs.
- Shift cables are known to stretch outside of available factory shift-point adjustments. As well as having a weak point at the wearable linkages.
- These gearshift cables are produced by the O.E.M supplier, a certified IOS/TS16949 factory.
- Made of black pvc outer insulation.
- Inner core is composed of solid steel to reduce cable stretch and compression.
- Packed in an attractive and sturdy 14'' x 14'' x 2 3/4'' Bronco box.

EXO SERIES

The EXO series is our ground up approach at building an exhaust that could handle the huge demands of the larger, more powerful motors. The unique hexagon shaped muffler and coned inlet of the EXO series allow for significantly more volume, reducing overall sound output and decreased heat. The EXO Series is our largest, most durable, and most powerful exhaust yet.

- Light weight brushed aluminum muffler
- Hexagon shaped large diameter for more volume
- Internal sound wave altering technology
- Stamped 304 stainless steel coned inlet for more volume
- TIG welded reinforced muffler bracket
- 304 stainless steel mid pipe / head pipe
- Black powder coated stainless steel end tip
- Significant horsepower and torque gains
- Removable screen-type spark arrestor included
- Handmade in the USA

EXO STAINLESS SERIES

We've taken our world-class EXO Series and made it even tougher. The EXO Stainless Series is the most durable exhaust in our lineup. Constructed of high-strength 304 stainless steel from front to back, EXO Stainless is sure to withstand even the most brutal of riding conditions and use. Using the current EXO Series design as a platform, we swapped out the aluminum muffler for a stainless muffler, replaced the aluminum base plate with a TIG-welded stainless steel plate and added a trick looking stamped stainless badge to top it off. EXO Stainless is tougher, more durable and built to last.

- High-strength 304 stainless steel muffler
- Hexagon shaped large diameter housing for more volume
- Internal sound wave altering technology
- Stamped 304 stainless steel coned inlet for more volume
- TIG welded reinforced muffler bracket
- Precision TIG welded and CNC bent 304 stainless steel mid pipe / head pipe
- Black powder coated stainless steel end tip
- Significant horsepower and torque gains
- Removable screen-type spark arrestor included
- Handmade in the USA
- 1 Year Limited Manufacturer's Warranty

EVO RACE SERIES

The Big Gun EVO Racing Series was designed to deliver maximum horsepower & torque gains throughout the RPM range. Made from .049 stainless steel tubing & an aluminum muffler canister, the EVO exhaust system is much lighter than stock units. Our sleek muffler design also allows for maximum clearance to avoid your exhaust from hitting the rear brake caliper.

EVO UTILITY SERIES

The Big Gun EVO Utility Series was designed to deliver raw horsepower & torque gains for utility ATVs & UTVs. All Utility slip-on & full systems are made from .049 stainless steel tubing & an aluminum muffler canister. The Big Gun Utility is much lighter than a stock unit. Our sleek muffler design allows for maximum clearance to avoid collisions with the rear brake caliper.

EVO MINI SERIES

Our EVO M series has been a Big Gun staple for over a decade. Though there have been slight changes and improvements over the years the goal has always been to produce noticeable performance gains. We can't forget to mention the nice, deep tone that comes out of the EVO M series mufflers which is sure to make even a grown man feel like a kid again.

TWO BROTHERS RACING
M-7 ATV/UTV EXHAUST CANISTERS

- Our M-7 V.A.L.E.™ exhaust systems feature our exclusive Teflon coated, blunted, cast magnesium outlet and our exclusive X-Lite™ retaining ring. These exclusive Two Brother Racing features not only look great, but also significantly reduce the weight of the exhaust system.
- The V.A.L.E.™ inlet design eliminates the use of springs and creates an adjustable mount that is rock solid when fixed in place. The system also features a precision mandrel bent, thinwall s-bend tube, and for a full system, a header pipe custom fit for each model.

PISTON KITS

• MOS2 (Teflon/Molybdenum) Coated Skirts
A rolled on application process provides a bond that is 10 times stronger than other spray on coatings. Benefits include increased heat transfer, reduced friction and helping to eliminate cold seizures.

• Machined Smooth Heads
Reflects combustion heat and reduces carbon buildup, protecting the top of the piston. Some tests have shown this feature can increase horse power and fuel economy by up to 6%

• Anodized Domes
Increases heat resistance and durability; pistons with anodized domes are 75% stronger than non-anodized pistons

• Hypereutectic Casting Process
Provides higher silicon content for reduced expansion rates and additional wear resistance; it also has an ability to withstand higher cylinder temperatures

GASKET KITS

Designed and produced using performance materials to provide greater reliability and durability to withstand the needs of today's hardest working engines.

TOP END REPAIR KITS

Provides you with all the necessary components to complete your rebuild: these include a Top-End Gasket Set, Pistons, Rings, Wrist Pins, Circlips and Silver Coated SCM415 High Strength Chromoly Needle Bearings where needed.

NAMURA CASE GASKETS

INNER CLUTCH • OUTER CLUTCH • STATOR/ALTERNATOR/GENERATOR/MAGNETO • STARTER

Namura gaskets are manufactured to OE-specs, which means no trimming or fitment issues. Each design is evaluated against rigid quality-control standards to ensure each set meets or exceeds OE performance. Clutch gaskets are available for certain applications.

Wiseco Performance Products

FORGED POWERSPORTS PISTONS

Powersports Forged Piston Advantage

Wiseco leads the performance aftermarket by producing the highest quality forged pistons for Dirt Bikes, ATV's, Snowmobiles, Outboard Marine, and Motorcycles right here in the USA. Wiseco is unique because we forge all of our own pistons in house, and produce all of our own forge tooling right here in the USA. This allows us to control all aspects of our manufacturing process from raw bar to skirt coating finished parts.

In addition, in-house dyno testing gives Wiseco the ability to develop state-of-the-art technology such as new shapes, coatings, and components, and lead the industry through rigorous R&D. Linking all segments of Wiseco's organization through design, testing, manufacturing, and distribution allows us to fulfill market needs with minimum lead-times.

Piston Engineering / ArmorGlide Coating

Wiseco ArmorGlide™

Some of our forged pistons offer our new ArmorGlide™ skirt coating, which is the result of testing, development, and benchmarking through Wiseco's rigorous in-house dyno program. The outcome is the ultimate in skirt coating toughness, lubrication, and bond technology working together to minimize friction, maximize horsepower, and provide improved wear resistance. Not only is ArmorGlide™ a high-tech lubricant that reduces friction, but it also allows the piston to be fitted tighter within the bore allowing a better ring seal and reduced noise from piston rock.

Top End Piston Kits

Wiseco's complete top end Piston Kits are offered for nearly every popular application in the powersports market. These kits contain everything you need to complete your rebuild the right way, the first time. High quality parts specifically chosen by us to match our forged pistons are included in this kit for easy one stop shopping.

- 4-stroke kits feature a 'race-ready' dome finish with smooth edges for improved combustion flow. Horizontal slot-pin oiling reduces friction and provides scuff resistance, along with a pressure seal groove for maximum ring seal.
- Most PK/SK/WK/VT kits from Wiseco feature a complete top end gasket kit that gives you everything you need to complete your rebuild from premium materials.
- 4-stroke race applications feature Wiseco's ArmorGlide™ skirt coating to provide reduced friction and noise to contribute to increased horsepower.
- Dedicated forgings used for superior strength to weight ratio utilizing aerospace alloy.
- High Performance ring kit and alloy pin included with each piston kit for extended life and sustained power.

REPLACEMENT RINGS

Some Wiseco 4-Cycle ATV pistons have been manufactured with more than one ring type. The correct replacement ring style is stamped on the dome of the piston. EXAMPLE: 4419PS will be stamped with either a "C" or a "G" to indicate the correct replacement ring style to order. **ONLY WISECO REPLACEMENT RING SETS CAN BE USED ON WISECO PISTONS**.

2-CYCLE RINGS - MOTORCYCLE & ATV

All Wiseco 2-Cycle pistons are supplied with rings and circlips. Only Wiseco replacement ring sets can be used on Wiseco pistons. The replacement ring type and bore size (in millimeters) is stamped on the dome of the piston. Refer to this information to reorder correct replacement rings. Ring styles cannot be interchanged.

PISTON KITS

PROX pistons are precision machined on the latest, state of the art CNC equipment. The same low-expansion, low-friction piston alloy is used as is used for all major Japanese engine manufacturers. PROX Piston Kits are a first class solution to replace the original piston in your Motorcycle, Scooter, Moped, ATV, Personal Watercraft, etc. PROX Piston Kits for sleeved cylinders are available in standard size and a wide range of oversizes. The availability of oversizes up to 2mm significantly helps to increase the lifespan of a cylinder by offering more re-boring possibilities. PROX pistons for plated cylinders come in standard size, as well as in A, B, C, D+ oversizes. Take advantage of the additional oversizes to extend the lifespan of plated cylinders. All PROX Piston Kits are supplied complete with Piston Rings, Wrist Pin and Circlips, ready to install!

CONNECTING RODS

PROX Connecting Rod Kits are made out of the toughest alloys available today. O.E. specifications and tolerances are meticulously maintained, a guarantee for easy installation and trouble free performance. PROX Connecting Rod Kits come complete with Crankpin, Big-End Bearing, Small End Bearing and Washers.

GASKET KITS

Precision engineering and the use of first class materials guarantee that they meet or exceed O.E. standards.

ATHENA CYLINDER KITS

Athena offers a wide range of cylinder kits with diameters and portings completely re-designed as original spare parts and/or specific boost to be used on tracks. Athena put forward three different versions of cylinder kits: 50cc Original, 70cc Sport, 70cc Racing. In particular, racing kits consist of lighter pistons with flat head, special portings, exhaust bridge, and a new cylinder head designed to increase the compression ratio and improve internal combustion.
