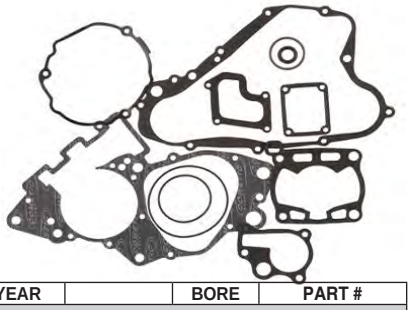
COMETIC ENGINE GASKETS



- The highest quality gaskets available
- Cometic gaskets are constructed from spring steel or graphite
- Spring steel gaskets are made from a stainless steel shim design coated with a .0001" thickness of silicone on both sides
- Graphite material is impervious to fuels, coolants and oils
- Engine case rebuild gasket kit include all gaskets needed for a lower end rebuild (base gasket not included)

CYLINDER WORKS CYLINDER KITS

As an alternative to costly OEM cylinders or the time consuming process of re-plating existing cylinders, Cylinder Works offers enthusiasts access to a complete line of OEM quality dirt bike and ATV replacement cylinders and cylinder kits. In addition to standard bore, stock compression replacement cylinder kits, Cylinder Works also turns up the horsepower with a full line of high-compression and big bore cylinder kits that look just like stock. Each kit comes complete with piston, rings and gaskets to get back on the trail quickly.

Cylinder Works OEM Replacement Cylinders and Cylinder Kits (standard bore/stock compression)
Re-plating or repairing an OEM cylinder takes time, And replacing an OEM cylinder with another OEM cylinder takes money - plenty of it. But Cylinder Works has a better answer: Get new now, get Cylinder Works!

Each Cylinder Works replacement cylinder is:
Stock in appearance • Precision hones • Nickel silicon carbide plated • OEM quality without the OEM price.

Cylinder Works replacement cylinder kits also contain:
Gaskets and seals needed for installation • Hand fitted, premium quality Vertex piston kit complete with piston rings, wrist pin and circlips.

Cylinder Works High-Compression Kits (standard bore/high compression)
As we all know, higher compression equals more horsepower and that's exactly what Cylinder Works high compression cylinder kits provide. Just like out OEM replacement cylinders, our high compression cylinder kits look like stock, but they're not. In addition to their stock appearance, Cylinder Works high compression cylinder kits also feature precision honing, nickel silicon carbide plating and a price that's hard to beat.

With the exception of a mechanic, the Cylinder Works big bore kits provide everything you need to transform a bike or ATV from modest to monster in one box. In addition to the stock appearance, nickel silicon carbide plated, precision honed, big bore cylinder, each kit contains: All needed gaskets and seals to complete the installation • A Vertex big bore piston, complete with piston rings, wrist pin and circlips.

HOTCAMS
UNLEASH THE POWER WITHIN™

HOT CAMS CAMSHAFTS & COMPONENTS

As the leader in innovation, design and development of aftermarket dirt bike and ATV high-performance camshafts, a set of Hot Cams is certain to give the added boost that dirt bike and ATV enthusiasts are looking for. CNC crafted from billet steel and with multiple stages to choose from for many applications, Hot Cams delivers the performance and feel of a custom cam for a fraction of the price. Ease of installation is also a big benefit when it comes to Hot Cams, as nearly all cams require no additional machine work and utilize the stock valve springs. And, as has always been the policy at Hot Cams, you can keep your original cams since a core exchange is never required.

MUDBUSTER CAMS

Hot Cams Products, Inc. makes cams for many play bikes and for many utility ATVs with our Mudbuster line. With a Mudbuster cam, utility 4x4 ATVs will enhance the low-end engine performance, with no top-end performance loss. Honda Rubicon, Rincon, Prairie 650 & 700, Grizzly 660, and Polaris Sportsman 700 are just some of the Mudbuster cams.

CAMSHAFTS STAGE 1

This camshaft boosts horsepower substantially in the mid-range and perks up throttle response. Package includes bearings, thus, utilizes the O.E.M. sprocket and auto-decompression mechanism and does not need spring change or head adjustment. Required valve modification and jetting is minimal and similar with all the other Hot Cams products, this camshaft is built out of all new billet materials. In short terms, customer nee not have to replace a core.
Single-cam motor. Excellent midrange and top-end power increase. Uses stock valve springs and rockers. *Does not use auto-decompression mechanism.

CAMSHAFTS STAGE 2

This high-performance camshaft increases horsepower considerably from mid-range to top-end and enhances over-rev. It comes complete with bearings, utilizes the O.E.M. sprocket, and requires no spring change or head modification. Required valve adjustment and jetting is minimal as well. This camshaft is made of all new billet materials. The customer does not have to exchange a thing.
Single-cam motor. More top-end power than Stage 1 with midrange gain. Uses stock valve springs and rockers. *Does not use auto-decompression mechanism.

CAMSHAFTS STAGE 3

This high-performance camshaft increases top-end horsepower and over-rev substantially over the Stage 2 and is ideal for Supermoto, desert, big-bore and stroker applications. It is available in a complete package with bearings. It utilizes the O.E.M. sprocket and does not demand any spring change or head modification. Created out of all new billet materials, it does not require valve adjustment and jetting is at minimum. Similar with other camshafts, there's no need to alter anything.

HOT CAMS

COMPLETE SHIM KITS AND REFILL PACKS

Made from 4140 cold rolled steel, Hot Cams shim kits and refill packs make the perfect addition to any tool-box for keeping any valve train in perfect workingorder.

Complete kits are available in 7.48mm and 9.48mm for modern Japanese 250 and 450Fs, KTMs using 8.90 and 10.0mm shims as well many popular Japanese street bikes.

Should you start running low, Hot Cams also offers all of their shims in a variety of convenient refill packs.

BRONCO ATV COMPONENTS

BRONCO ENGINE VALVES

- Bronco® offers OEM Replacement valves for both utility and sportmodel ATV's.
- OEM Replacement valves are made of durable SUH35B heat resistant steel that also come with fill Nitride finish for further durability and resistance to corrosion.
- Performance valves receive a swirl polish, smooth stem treatment, and are made of 21-4N/SUH35HT stainless steel.
- Performance valves are generally reserved for high performance/reving machines so these valves are forged with with Stellite-tipped valve stems.
- All valves are manufactured under ISO 9001 certified factory.
- All valves are stocked in both USA and Taiwan for immediate delivery.

Vesrah®

VESRAH INTAKE & EXHAUST VALVES

Vesrah valves are manufactured from top quality materials that meet or exceed OEM specifications. All valves are treated with the tuftrid method to give additional corrosion resistance and mechanical strength.

PRO X ENGINE VALVES

PROX Valves are made in Europe to high quality standards. By using a forged one-piece titanium alloy with several integrated material micro structures, specific and different material properties are created in area's where needed. The high tech Ti3Al alloy has also very good material properties at high temperatures. The special coating creates considerably lower friction between the valve and other parts like valve guides. Therefore the PROX valves exceed OE specifications in dimensions and reliability.

CONNECTING RODS

Hot Rods connecting rods are one of the most durable rods that enthusiasts and engine builders can buy. However, a rod is only as good as its supporting parts and that's why a Hot Rods kit features only the most advanced and durable bearings, crank pins and thrust washers. Case hardened, silver coated, flat profile KU bearings are used throughout our entire line and high-quality, long shouldered KZ bearings are used in our two-stroke wrist pin bearing applications. In short, our bearings are just as tough and reliable as our rods. Even our crank pins are subjected to the same rigorous standards as our rods and bearings. Each Hot Rods crank pin is created from hot-rolled ASTM 4115 steel and case-hardened to a level of 58–62 Rc.

BOTTOM END REBUILD KITS

FORGED BOTTOM END ADVANTAGE

The foundation of any bottom end rebuild is a solid forged crankshaft assembly, which provides strength and reliability far surpassing any cast part that lacks consistency. Forged crankshafts due to their lighter weight, more compact dimensions and better inherent dampening, rev higher and run smoother than their cast counterparts.

This part of the engine has a huge amount of stress due to twisting and bending 1000's of times a minute while running under load, you don't want an inferior product here to ruin a motor. Wiseco engineers have designed our crankshafts to meet or often exceed OEM tolerances giving you the best base for your bottom end.

CRANKSHAFTS / CONNECTING RODS

Wiseco powersports crankshafts feature a double forged connecting rod made from dedicated forgings. The rods maintain superior strength, durability, and dimensional consistency through improved grain flow. Shot peening eliminates residual stress and oil slots are located to maximize lower rod oiling and extend bearing life.

Coated bronze thrust washers have a dimpled design to increase oil retention and reduces stress between the connecting rod, washer, and crank web. Double-drilled small ends provide the piston pin with extra lubrication and cooling, reducing distortion of top end due to thermal transfer from the piston.

BOTTOM END KIT FEATURES

- Each kit contains everything you need to complete your rebuild the right way, the first time- crankshaft and connecting rod, all applicable bearings, and complete bottom end gasket kit made to meet or exceed OEM.
- Wiseco connecting rods are double forged from a dedicated forging and feature shot peening, oil slots, and coated bronze thrust washers.
- Bottom end gasket kits are made from premium materials, exceeding OEM standards, to provide exceptional seal between critical mating surfaces.
- Main bearings are manufactured to the highest quality standards. Each is case hardened for maximum life and smooth operation at high RPM's.
- Corrosion resistant surface treatment to prevent corrosion and pitting over long term use or storage. This will add to the life as well the strength of the assembly.
- Top end of rod is bushed for oil retention and eliminates pin galling. The bottom end rod bores are case hardened to 58-62 RC to optimize bearing running surface.
- The crank pin bearings are manufactured from the highest quality, hot rolled steel case hardened to 58-62 RC to extend the lifetime of the assembly.
- Caged needle roller bearings to provide the highest possible RPM.

HOT RODS CRANKSHAFTS

Hot Rods crankshafts are regarded as the premier alternative to costly manufacturer cranks. But, in addition to being a cost effective alternative, Hot Rods crankshafts also bring a level of uncompromising quality, design and innovation not seen in its competitors. One such innovation would be the Hot Rods line of drop-in stroker crankshafts. Not only do these stroker cranks bring about a heightened level of performance, but do so without costly case machining, custom cam chains and spacer plates. Better yet, many Hot Rods stroker cranks even utilize the engine's stock piston.

HEAVY DUTY DROP-IN STROKER CRANKSHAFTS

Hot Rods also offers a full line of drop-in stroker crankshafts. Not only do these stroker cranks bring about a heightened level of performance and increased displacement, but do so without costly case machining, custom cam chains or spacer plates. Better yet, many Hot Rods stroker cranks even utilize the engine's stock piston.

HIFLOFILTRO®

PREMIUM FILTERS

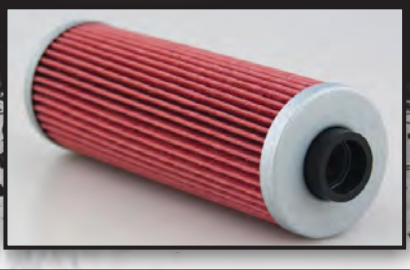
Why Hiflo?

Providing unbeatable performance and exceptional value, Hiflofiltro is the best-selling brand of aftermarket filters for motorcycles, scooters, and ATVs worldwide. The filters are also supplied to original equipment manufacturers as well as private label brands.

- **Materials**
  To achieve our quality aims and to ensure the consistency of our products, we use only premium materials from well known manufacturers: steel from Toyota Tsusho and NKK Japan, glue from Henkel Germany, filter paper from Ahlstrom Filtration Finland, Hollingsworth & Vose USA and Awa Paper Japan.
- **Production**
  The Hiflofiltro-Thai Yang Kitpaisan factory was founded in 1955 and has been manufacturing filters for the OEM motor industry since 1963. With the experience of more than four decades, continuous research and development and modern production facilities, we manufacture some of the best quality filters in the world.
- **Quality Control**
  Every oil filter goes through 16 individual quality control checks before it is ready to leave the factory. The whole manufacturing process, including the checking of raw materials, individual filter testing, is regularly audited and verified independently by TÜV SÜD.

PREMIUM OIL FILTERS

Hiflofiltro is the world's first TÜV approved oil filter. Constructed using the best materials available, all Hiflofiltro oil filters meet or exceed original equipment performance levels.



OE REPLACEMENT AIR FILTERS

Hiflofiltro air filters are manufactured to fit the factory air box and are a direct replacement for original equipment filters. Top quality powerflow filtering media, developed for modern high performance engines.

DUAL-STAGE RACING FOAM AIR FILTERS

Competition off-road air filters manufactured in the Netherlands using a special dual-layer foam, formulated for maximum filtration and optimum air flow for improved power. Top quality materials and superior construction allow the filter to be used over and over again without any loss of performance.

READY TO USE FOAM AIR FILTERS

When you get ready to change your filter, change to ProFilter. A new perfectly oiled ProFilter Air Filter provides maximum airflow and increased horsepower.

- Dual Stage Open Cell Foam
- Plush 13mm Sealing Foam
- Pre-Oiled with Maxima FFT
- Complete with Disposable Gloves!

PREMIUM AIR FILTERS

PRO FILTER Premium Air Filters are made of chemical resistant, high quality polyester based foam. Dual-stage design allows for superior filtration by eliminating the passage of fine dirt and dust, while helping to prevent air flow blockage. Special reticulation process offers unsurpassed air flow and filtration. Industrial strength, resin bonded seams increase the integrity of the filters wash after wash. Packaged individually in a re-sealable bag.

- Chemical resistant, polyester based foam
- Dual stage, reticulated foam
- High strength industrial seams
- Reusable

K&N PERFORMANCE FILTERS

Stock jetting is not recommended. K&N has taken the guess work out of the equation. These powerlids come with the appropriate main jet for your quad to perform at it's full potential with the Xstream powerlid. Replaces stock airbox lid. Snaps in place • Allows increased airflow for more horsepower • Eliminates restrictive intake snorkels • Dyno tested • Main jet included * All POWERLID kits include a Precharger wrap.

K&N DIRECT MOUNT FILTERS

Remove your airbox and mount this filter directly to your factory carburetor.

FILTER CHARGER OIL

K&N Air Filter Oil is the only oil specially formulated to work in combination with the cotton fabric in K&N Filtercharger elements providing a superior air filtration system. When used as directed, it quickly penetrates the filter pleats, where it remains suspended in the cotton fabric. Saturation is maintained until the element is cleaned with K&N Air Filter Cleaner.

AIR FILTER CLEANER & DEGREASER

NOTE: Do not use on polished or anodized aluminum.

K&N Air Filter Cleaner is the only cleaner formulated to clean K&N Filtercharger elements. K&N Cleaner works to dissolve the dirt build up and old filter oil, and can be washed away with water. It is biodegradable and safe on paint, chrome, cast aluminum, plastic, rubber and vinyl when used as directed.

UNI AIR FILTERS

FACTORY REPLACEMENT UNI AIR FILTERS - ATV / UTV/ SXS

The principal of how foam air filters work is simple: "open cell" polyurethane foam is wetted with specially developed filter oil. The "sticky" filter oil is suspended in the path of the dirty air on the strands of the web-like cell structure of the foam. This makes it impossible for dirt to pass through the depth of the filter without sticking to the strands. As the outer strands become loaded with dirt particles, the wetted strands down stream start trapping dirt, allowing the entire thickness to be utilized. This prevents surface loading or air restriction for 80% of the surface life of the air filter element. When the filter is sufficiently dirty it can be easily washed, re-oiled and re-used.

BOYESEN ATV PRO SERIES REEDS

Q: What advantage do Pro Series Reeds have over Power Reeds?
A: Pro Series dual-stage reeds combine a carbon-fiber top reed with a fiberglass bottom reed for unrivaled performance. The Pro Series Reeds are more responsive than our traditional Power Reeds. The carbon-fiber top reed has excellent response characteristics that provide even quicker acceleration, stronger throttle response, and more over-rev than our standard Power Reeds. The fiberglass bottom reed provides stability and longer reed life.

THE VFORCE4 REED VALVE SYSTEM

The all-new VForce4 is built upon the solid foundation that has made the VForce3 such a success for the last 10 years. While the VForce3 has been continually refined over the years, this is a complete redesign of the entire system. While the most obvious change on the all-new VForce4 is certainly the full-length reed stops, let's take a look at some of the other significant changes as well.

- All-new reed petal resin system, carbon fiber and lay-up
- Pre-curved reed petal ensures better seal at tip
- Wider reed cage for maximum airflow
- Combined reed tip area increased by 10.5% resulting in increased total air flow
- Airfoil shape added to cage tip to increase air velocity from outer ports
- Long reed stops added to progressively slow petal tip velocity, for increased petal durability
- Reduced frontal area of central wing by 15.6% combined with a more aerodynamic shape

The TMX features a flat slide design in a smooth bore Venturi to provide improved throttle response and wider powerband. The float system with independently moving floats, working with a main jet enclosed in a baffle chamber, allows the TMX to perform smoothly without hesitation on the roughest terrain. TMX Series Carburetors are available in 35mm bore sizes for 125cc race engines, and in 38mm bore sizes for use in 250cc race engines.

Mikuni TMX Series Carburetors are intended for off-road riding and racing use only. Not legal for sale or use in California or other locations where similar pollution laws may apply.

VMPJK 25.25

POWER JET KIT

Power Jet Kits are used in two-stroke engine applications to improve midrange throttle response and add additional fuel to wide open throttle running conditions, especially with snowmobile clutches. Kits may be installed easily on Mikuni TM and VM Series carburetors.

The Jet Needle controls the fuel mixture in the mid-range 1/4-3/4 throttle position. The taper of the needle determines the amount of the fuel. For example: the thinner the diameter of the needle, the more fuel will be drawn. The thicker the diameter of the needle, the less fuel can be drawn.

MIKUNI NEEDLE JET • PRIMARY TYPE

The needle jet is the main fuel passage to the main bore of the Mikuni carburetor. Depending on the inside diameter of a specific needle jet, this will also affect the function of the needle. Therefore, needle jets and needles act together as the main system in controlling the amount and mixture of the fuel which is drawn in mid-range 1/4-3/4 throttle operation.

LEVER CHOKE CONVERSION KIT

GENUINE

VMLCK 29.30

CABLE OPERATED CHOKE CONVERSION KIT

FOR 30MM - 44MM

Includes all parts necessary to convert lever operated choke carbs to cable operation. Installation of this kit is quick and easy.

GENUINE

VMCK 11.70

POWER JET KIT

Power Jet Kits are used in two-stroke engine applications to improve midrange throttle response and add additional fuel to wide open throttle running conditions, especially with snowmobile clutches. Kits may be installed easily on Mikuni TM and VM Series carburetors.

THROTTLE VALVES

To determine a left hand or right hand throttle valve you must look at it from the intake side (cutaway facing you) to see what side your idle adjustment is on. If it is on the left side, it is a LH throttle valve and if it is on the right side it is a RH throttle valve.
Made of Brass (chrome plated. *Made of aluminum.

MIKUNI CARBURETOR TOOL KIT

LP15866 24.95

* All machines to be converted must have an external crankcase impulse line to operate the Mikuni Fuel Pump. This is a universal kit containing all of the major components necessary to convert to Mikuni Carburetion. Because of the variety of machines that used the Tillotson and Mikuni carburetors, this is not a bolt on direct replacement kit. Jetting, fuel pump installation, cable installation to controls, fuel and impulse line installation are all part of the dealer's custom installation.

visu-filter®

A BETTER FUEL FILTER FOR ALL GAS-POWERED ENGINES

What is Visu-filter®?

A highly reliable fuel filter system so unique that Visu-filter® signals the need for replacement in motorcycles, lawn tractors, snowmobiles, jet skis, roto tillers, air compressors, and more! The strong, high-impact nylon housing is extremely transparent for immediate viewing. Many styles and sizes available. Wide selections of filter media such as polymer-treated paper with automotive specifications, stainless steel screens and polyester screens.

- Protects engine from harmful contaminants
- No leak, high impact nylon construction
- Functions as a reservoir for trapping water
- Cleaner burning engine, less emission and less smoke
- Better throttle response; improvement in engine performance
- Some increase in power and fuel efficiency

FUEL STAR

HOSE CLAMP KIT & REFILLS

HOSE CLAMP KIT

The ultimate fuel line clamp kit! An absolute necessity for any Shop, Technician, or DIY Mechanic. This kit comes with 4 of each Fuel Star fuel line OEM replica clamps, available in sizes from 7-17mm I.D. Each clamp is an exact replica of the major OEM's fuel line clamps, and is manufactured to meet or exceed OEM performance, aesthetics, and fit. Why mess with those clumsy, cheesy appearing worm gear clamps when you can get OEM appearance and performance for a fraction of the price?

BILLET ALUMINUM OIL FILTER COVER

ProFilter Billet Oil Filter Covers are engineered to increase oil flow, helping to cool hot running 4-stroke engines.

- Built from military-grade materials.
- CNC machined 6061-T6 billet aluminum
- 3D CAD design for increased flow rates
- Sub-surface anodized finish
- Lightweight & durable
- Precision fit, available for most popular models
- Exceeds all OEM specifications

Made in the USA

K&L AIR CUT OFF VALVES

Here's an inexpensive alternative to the costly OEM assembly. To prevent "afterburn" generated by a lean fuel mixture when closing the throttle, the air cut-off valve temporarily closes the slow-jet air passage, creating an instantly richer mixture. Included in these high quality kits are all parts necessary for a complete rebuild (diaphragm, spring and o-ring). Made in Japan.

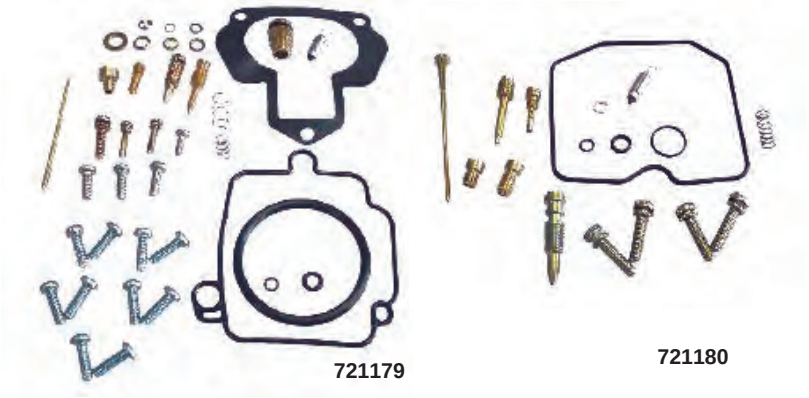
K&L CARBURETOR REPAIR KITS



Each kit contains all necessary gaskets, o-rings, float valve assembly or float needle and jets to rebuild one OEM carburetor body. Made in Japan. Carb repair kits with an asterisk (*) have no needle jet, jet needle, main jets or pilot jets in kit. **IMPORTANT NOTE:** Many kits have multiple applications - the jets and jet needles provided may not be the right sizes for your application. ***Always check and verify all jet sizes before installation. Note: Kit 721107 does not include Float Needle or Float Valve Assembly.***

BRONCO ATV COMPONENTS

BRONCO MANIFOLDS/CARBURETOR FLANGES

- All flanges are made of 1051 + 1052 aluminum
- Properly support your valuable carburetor by replacing your worn out carb flange
- OEM carburetor flanges are prone to failure due to exposure to high heat, heavy vibration due to proximity to the engine, inferior material, and exposure to the elements
- This leads to dried, cracked flanges with vacuum leaks and lean hard starting engines
