MR. FUNNEL

REMOVES WATER FROM FUEL

The Fuel Filter Funnel by Mr. Funnel is a heavy-duty, anti-static, and fast flow funnel with built-in filter technology. When fuel is poured through the Fuel Filter Funnel, water and debris will not pass through the filter's fluoropolymer-coated stainless steel filter. Only filtered fuel flows through to your engine, improving its efficiency, durability, and proper operation. The sump area collects the deflected water and debris for proper disposal. Filters gasoline, diesel, heating oil, kerosene and 2-cycle mixed gas.

What Model Do I Need?

The Mr. Funnel Fuel Filter comes in four different fast-flow models (See below). Models differ mainly on flow rate. If your need is to transfer five gallons or less of fuel, then the F1 and F3 are for you. If you are transferring more then 5 gallons, then the F8 and F15 are right for you. Our F15 is our fastest flow model at up to 15 gallons per minute! This model can also be used at a fuel pump. Get your Mr. Funnel Fuel Filter today, and keep your engine running smooth!

BOYESEN ACCELERATOR PUMP COVERS

Stock accelerator pump covers permit only a 60% - 70% fuel charge in the pump chamber. Turn the throttle and air trapped in the chamber is compressed disrupting fuel delivery. All the while tuning the squirt means a complicated change of the leak jet.

YUASA BATTERIES

Not all snowmobiles have an electric start, but if you are lucky enough to own a model that does, you know one thing: you want it to start when you push that button. And so does the manufacturer. That is why they choose Yuasa. Some of Yuasa's most heavy-duty batteries live under the hoods of some of the biggest and fastest snow machines in the country. Just ask Arctic Cat, Bombardier (Ski-Doo), Kawasaki, Polaris and Yamaha. Manufacturers demand the best and they overwhelmingly choose Yuasa. So should you.

MAINTENANCE FREE

Absorbed Glass Mat (AGM) Technology is an advanced battery design used in Yuasa's Maintenance Free Batteries that eliminates water loss. Once it's filled with acid the battery is permanently sealed - so you'll never need to fill it with water or check the acid level.

Long Life
Because of its lead calcium design, the AGM battery will hold its specific gravity more than three times longer than conventional lead antimony types. This means much longer periods between charges when the battery is used in a standby mode, like winter storage.
And to remain factory-fresh the AGM battery is shipped dry along with its own pack of high-gravity acid that's added at the time of installation.

Sealed, Non-spillable
Once filled with acid from its special packs, the AGM battery is virtually maintenance free. It's totally sealed and all of the acid is absorbed in the special plates and separators, so there is no need to worry about acid leaks on valuable vehicle parts and accessories.

YUASA BATTERIES

Not all snowmobiles have an electric start, but if you are lucky enough to own a model that does, you know one thing: you want it to start when you push that button. And so does the manufacturer. That is why they choose Yuasa. Some of Yuasa's most heavy-duty batteries live under the hoods of some of the biggest and fastest snow machines in the country. Just ask Arctic Cat, Bombardier (Ski-Doo), Kawasaki, Polaris and Yamaha. Manufacturers demand the best and they overwhelmingly choose Yuasa. So should you.

YUMICRON

The Yuasa YuMicron gives you a powerful advantage. It's high technology separators allow two extra plates per cell to be installed, for a 30% improvement in cranking performance

The Power Advantage
This added power is an outstanding benefit for heavily accessorized machines or high compression engines. It's high cranking power is also a real bonus for easier starting.

YUMICRON CX

The YuMicron CX was the first small engine starting battery to use "lead calcium" technology. This special technology means the YuMicron CX generates more power, requires less maintenance, and lasts longer than any other conventional battery.

More Power
Because of it's unique design, the CX will generate 5% to 8% more cold cranking amperage than our own high-output YuMicron lead-antimony battery. For high compression machines, this means greater reserve capacity and more starting power.

Less Maintenance
The YuMicron CX lead calcium technology also reduces water loss, so the CX requires servicing (water filling) only about one-eighth as often as ordinary lead-antimony types.

Longer Life
The YuMicron CX holds it's specific gravity more than three times as long as lead-antimony type batteries resulting in a longer shelf life. This feature means longer periods between charges, especially during winter months.

TYTANEUM BATTERIES

Tough. Reliable. Whether you ride daily, seasonally, or just on weekends, you'll get more enjoyment out of your motorcycle, ATV, PWC or snowmobile with a TYTANEUM battery. Our batteries perform reliably during off-road, over water and cold weather use, and keep their charge even after months of storage. Available in traditional flooded or the new sealed AGH designs, TYTANEUM batteries are built to withstand punishing vibration, salt spray, gas and oil, and protect against equipment-damaging spills, corrosion and seepage. And because nothing ruins a weekend faster than a dead battery, we use advanced designs and manufacturing techniques to shorten current paths and reduce resistance, giving you higher cranking power and maximum battery life.

MAINTENANCE FREE HIGH PERFORMANCE

SEALED MAINTENANCE FREE

Once these batteries are put into service, they become a completely sealed unit requiring a lot less maintenance than Conventional Batteries. Although the battery still needs to be charged on a regular basis if your vehicle is not in use, there is no need to monitor the fluid level in this battery type. Unlike the Conventional Battery, once this type battery is sealed, it becomes spill proof, which can eliminate damage from battery acid that can occur from using a flooded battery.

FACTORY ACTIVATED MAINTENANCE FREE

The same convenience and technology as the Sealed Maintenance Free Batteries mentioned above, except this battery is sealed and activated at the time of manufacture. Very convenient to the point that all that needs to be done is put the battery into your vehicle and you are ready to ride. The only downside of this type of battery is that all batteries once activated have a shelf life, and if this battery is not going to be used right away, or be put in a vehicle that is not going to ridden on a regular basis, the battery will need to be kept charged on a battery maintainer.

TYTANEUM BATTERIES

CONVENTIONAL

This type of batteries has flooded electrolyte and is very accessible. These batteries have to be carefully and periodically maintained. The conventional batteries are normally less expensive than the other types mentioned, but with the cost savings come more maintenance. You will need to add distilled water from time to time to prevent the battery from sulfating. Water loss is a normal characteristic of this type of battery because of the high temperature inside, and the process of electrolysis and evaporation. This means the fluid level of the battery needs to be checked on a regular basis. Conventional batteries also tend to discharge more rapidly than AGM type batteries.

CDI BOX / REV KIT

Our improved CDI Box will drive your machine faster than ever!

How It Works?

1. We have built in the best ADVANCED timing curves ready to plug in and go.
2. Increased additional 1,000+ RPMs over stock CDI.
3. Stronger spark energy for easier start

RECTIFIER

Improved Rectifier / Regulator - Increases Horsepower up to 8%

Q: How does the re-designed Rectifier increase horse-power?

A: We built an extra sensor and switch in the unit. When the battery is near fully charged, the sensor instructs the Magneto Rotor to run without cutting the magnet field. The rotor then runs lighter and saves the power to the engine. The engine gains more horsepower to drive your ATV faster!

POWERJET

The PowerJet Fuel Controller allows you to adjust the fuel map from -4% to +10% by selecting one of 10 settings. We even incorporated a stock setting which means no change compared to stock. It measures the outside air temperature very close to where the stock sensor is located, and adjusts the signal from the OEM air temperature sensor to the ECU to make use of the built in Air Temperature Correction factor that is built into every stock ECU. What this accomplishes is that the ECU is told that the intake air is a little cooler than it is, and the ECU will respond by injecting a fraction more fuel depending on the PowerJet setting. You will notice a substantially improved engine response when you twist the throttle. Under constant load (constant speed) the oxygen sensor in the exhaust will make the ECU correct the fuel/air ratio back to stock! However, as soon as the system notices an increase in power it switches from closed loop (oxygen sensor feedback) back to open loop (no feedback) and will correct the fuel/air ratio by the amount you selected on the PowerJet.

Installs easily by plugging it in between the stock AIT sensor which is usually located somewhere on the airbox and the bike's wiring harness. Each PowerJet comes with the exact plug in connectors and installation will normally only take a few minutes. Finding the air temperature sensor usually takes more time than plugging in the PowerJet. You can leave the PowerJet sitting under the bodywork somewhere as it is designed to be rugged and waterproof. After figuring out what setting works best with your specific engine/exhaust/intake combination you typically do not need to adjust it any more.

PowerJet comes with a full one year warranty.

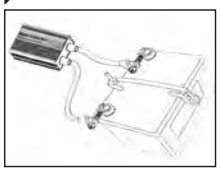
MAGIC POWER BOX

A New Concept of Power!

POWER



Installation is very easy. Just attach the leads to your battery mounts.

773-400
99.00

Compatible with any ATV, Motorcycle, Watercraft or Snowmobile with an electric start!

Concept of the Magic Power Box: Without the Magic Power Box, when you throttle up your machines, the battery output voltage is unstable; it changes between 11V and 15V, the spark energy is inconsistent and your machine lacks power. With the Magic Power Box, the output voltage will be almost 100% stable. Your machine can reach the maximum power.

• Increase Horse Power • Increase Torque • Quicker Throttle Response • Increase Spark Energy • Improve Fuel Efficiency • Easier Start & Runs Cleaner • Less Spark Fouling • Brighter Headlights • Longer Battery Life • Reduce the Radio Noise

WATER TEMPERATURE SENSORS

Temperature sensors work with the machine's computer system to measure/monitor engine temperatures including the lube/oil and coolant in order to control radiators, cooling fans and thermostats. If the sensor fails, a warning light will usually show up on the machine's gauge and can cause overheating which can lead to serious issues if not replaced.

PULL STARTER LEAK SHIELD

The Honda Pull Starter Leak Shield by High Lifter shields your engine from water and mud. If you ride a Honda ATV, then you are at risk. After a period of time and only moderate use, many Honda owners experience oil and smoke from the exhaust and/or loss of power. This can lead to hefty rebuilding costs, not to mention lost time on your ATV.

Kit Contains: Lexan shield (stronger than plexi glass), one gasket, one recoil adapter and mounting hardware.

NYLON STARTER ROPE

HALOGEN HEADLAMP BULBS

ARCTIC CAT | POLARIS | SKI DOO | YAMAHA - SEE APPLICATION GUIDE ON OPPOSITE PAGE

ALL WEATHER
(AW) These bulbs are designed for rain, fog and snow and are just as bright as standard halogens. The all weather dichroic coating keeps the glare down from the elements.

ALL WEATHER BLUE
(AWB) Same advantages as the all weather, plus the blue coating is more noticeable to oncoming traffic. Note: The coating does decrease the light output slightly.

GOLD
(G) The biggest advantage is its ability to be seen by oncoming traffic.

XENON BOOSTED
(XPB) Best performing lamp on clear nights, the xenon gas increases the light output to compensate for the special vycor blue coating. These combinations bring the light as close to daylight as possible.

** Note – This kit will eliminate the EBS function. Removing EBS results in a more performance oriented driving experience. If you wish to keep the EBS function please contact EPI directly, as a different helix is needed.

*** Reduces engine braking and greatly reduces how aggressive the engine braking is.

**** This kit does not include a helix. Stock helix will be used.

***** This kit includes adjustable weights, 1 primary spring and 2 secondary springs. Stock helix will be used.

*Due to the wide range of wear issues occurring with RZR 900 & 1000 model primary clutches / these rebuild components may provide varied results.We've seen extremely worn clutch towers and out of spec tolerances on RZR primary clutches of all mileages. Rebuilding a clutch that is beyond acceptable tolerance will result in premature failure of these rebuild kit components. Due to this / no warranty on these rebuild kits is provided.

**Will replace the square slider on the outside of the clutch and the round roller on the inside of the clutch.

*** Will also work on the OE Polaris updated spider part #1323400

BRONCO DRIVE CLUTCH REBUILD KIT

125549

125550

- Cam shoe, and plastic washer are made with Nylon PA66 + Teflon (PTFE) 20% + Fiber Glass 30% + Molybdenum disulfide (MoS2) 3% to have better wear resistance.
- The O.E. clutch roller was in plastic, which resulted premature failure rates. Our clutch roller is made of SCM415 Steel, and the inner liner is made up of Premium German Imported fiber. This increased the roller hardness to HRC 54 (+4); Far Superiour to standard OEM Fiber. We do this improvement to make our Bronco Cam Kit last longer than conventional O.E.M plastic rollers.
- Every kit will be packed by Bronco polybag

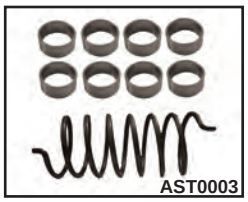
TEAM - STOCK TIRE CLUTCH KIT

These kits are high performance trail kits that improve throttle response and increase backshafting. The components provided in the kit supply the most aggressive up shift and acceleration possible. This kit also allows improved belt squeeze to reduce slippage and excessive clutch heat.



TEAM - BIG WHEEL CLUTCH KITS

Deep mud and big tires, grab the throttle and hang on. These kits are designed for maximum bottom end and mid range pull. Each kit includes a set of custom weights and springs to prevent belt slippage and improve the acceleration of your ATV. These kits were designed for ATVs using 27" or 28" aggressive tread tires.

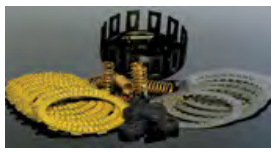
WISECO CLUTCH COMPONENTS

CLUTCH PACK KITS

- **Clutch Pack Kits contain everything you need to upgrade your worn out clutch plates and springs - each kit comes with new frictions, steels, and clutch springs, all made from premium grade materials.**
- **The frictions and steels are made to exact OEM tolerances and specifications, and produce the same feel and wear resistance of OEM plates.**
- **Wiseco clutch springs are 8-10% stiffer than stock to ensure a positive clutch lockup every time.**
- **Clutch pack kits are an easy solution to worn or slipping clutch packs.**

PERFORMANCE CLUTCH KITS

- **Performance Clutch Kits take the clutch pack kits one step further by including a Wiseco forged clutch basket and new rubber cushions**
- **Wiseco forged baskets are tougher and stronger than stock, and achieve higher fatigue properties than any other clutch on the market**
- **The hard coat anodizing wears like iron, and greatly extends the life of the basket against notching. Also included is a full set of frictions, steels, and clutch springs made from premium grade materials.**
- **Refresh your worn out clutch and notched basket with the ultimate in high quality Wiseco clutch components**



CLUTCH BASKETS, INNER HUBS, & PRESSURE PLATES

Wiseco leads the clutch aftermarket with high performance FORGED clutch baskets, inner hubs, and pressure plates. OEM clutch components are made from inexpensive die-castings that quickly wear out and become easily notched. Wiseco offers the only forged clutch components in the aftermarket for off-bike and ATV applications. The feature aligned grain flow in the aluminum adds strength and toughness to the parts that are unparalleled through other manufacturing processes.

Each Wiseco clutch basket, inner hub, and pressure plate start as dedicated forgings built specifically to take advantage of features that can only be made through the precision forging process. Variable fillet blends and complex surfaces can be forged into the part that would otherwise be extremely difficult to produce. The raw forgings are then precision machined to very close tolerances, producing the same high quality parts as Wiseco pistons.

The finished parts are hard coat anodized and Teflon coated to offer superb wear resistance, and a long life of smooth clutch operation. Every new clutch basket is supplied with new components used during assembly, including new fasteners with pre-applied thread locker.

FEATURES & BENEFITS

- **Built on dedicated precision forgings**
- **Made from Aerospace grade aluminum alloy**
- **Hard coat anodized**
- **Teflon coated**
- **Supplied with high-quality fasteners with pre-applied thread-locker**
- **Designed to maximize strength through "feature aligned grain flow", and utilizes as-forged features that can only be produced using Wiseco's precision forging process. Produces higher mechanical properties and resistance to impact and fatigue.**
- **Certified raw materials produce the highest quality finish products.**
- **Produces an ultra tough abrasive resistant surface, and ensures a long life of smooth clutch operation through the elimination of wear on the sides of the clutch basket tabs.**
- **Seals the coating to create a near frictionless surface for the clutch plate tabs to glide upon.**

GATES ATV/UTV G-FORCE DRIVE BELTS

- Carbon Cord belts are engineered for drop-in performance utilizing the strongest material on earth for tensile cord. Combined with a specially formulated adhesion gum, edge cord pullout is virtually non-existent.
- Carbon Tensile Cord ensures the belt maintains its designed length and geometry
- Superior resistance to edge cord pull out
- Unique attributes of the Carbon cord decreases the chance of edge cord pull out
- Less likely to damage clutches during belt failure
- Enhanced long term performance
- Improved durability over G-Force Aramid
- Minimal to no stretch under load creates optimal power transmission
- Improved response during acceleration
- Consistent shift characteristics over time and through complete shift ratio
- Un-paralleled response during high load acceleration

G-FORCE™ REDLINE CVT BELT

YOUR RIDE ISN'T CONVENTIONAL.
YOUR BELT SHOULDN'T BE EITHER.

RACE-PROVEN INNOVATION

- Greater heat resistance and recovery, even under severe duty cycles
- Optimized, patented EE compound maximizes axial stiffness enabling belts to run at higher continuous torques or loads
- Innovative design results in better acceleration, higher top speed ration and energy loss in extreme off-road environments
- Improved durability, crack and wear-resistance means a longer-lasting, high-performance power transmission belt for the most demanding applications
- Reduced Environment Risk - made without harmful chlorinated compounds

EZ CLUTCH TOOL

This simple tool allows you to change the spring and weights in your Polaris primary clutch without removing it from the motor! Simply remove the clutch retaining bolt, thread the EZ Clutch Tool into the clutch shaft and tighten the adjustment bolt on the tool to compress the clutch. Now you can spin the clutch to each weight pin and change weights! Need to change the spring also? No problem! The tool is designed to allow the clutch cover to be removed also. With the EZ Clutch Tool in place, remove the cover bolts (mark the cover for reinstallation orientation first), and loosen the adjustment bolt on the tool to back the cover off and gain access to the spring. This is a must-have tool for the tuner to make quick and E-Z changes.

HIGHLIFTER

HIGHLIFTER AXLE BAR LIFT KITS

The High Lifter Axle Bar Kit replaces OEM axle bars which bind up with a lift kit installed. This kit only replaces the axle bars - riders will reuse factory axle cups and boots. After installation, you can add your Signature Series High Lifter Lift Kit and hit the trails with ease of mind.

The kit includes 2 new OEM grade custom length front axle bars and 8 new CV boot bands.

Note: A special, heavy duty banding tool is required for installation of the 3/8" wide bands included with this kit. **This kit only replaces the axle bars; these are not complete axles**. You must reuse your factory axle cups and boots Check your CV joints and all components for wear or damage and to make sure you have the proper amount of grease in the cup before re-installing the bar.
