HIGHLIFTER

POLARIS SPRING HELPER

High Lifter Tender Springs are designed to maintain load on the main spring at full travel. These are sometimes referred to as Helper Springs. High Lifter Helper/Tender Springs eliminate suspension sag and add up to 2" of lift to any lift kit.

These only fit the 2017 High Lifter Edition. These springs also substantially improve the ride of any lift that currently uses solid spacers.

HIGH LIFTER ATV LIFT KITS

GET UP TO 2 MORE INCHES OF GROUND CLEARANCE!

For every model, the lift kit is a simple bolt-on system that comes with all of the necessary brackets, bolts and complete instructions. The lift kit design lowers the front A-arms. In addition to the increased ground clearance, the space between the fenders and tires is also increased. The lift also allows larger tires to be installed by reducing tires rubbing fenders and mud flaps. As with any lift kit, C.V. joints will operate at a slightly increased angle, which will increase maintenance requirements and wear.

If you are running wide tires a 1.5" Or wider spacer may be required depending on the width of the tire for tire to shock clearance at full lock steering. NOTE: if you have upgraded or plan to upgrade to our pro series tie rod/rack end kit you will need our part# (psak-1) alignment cone kit for 1/2" diameter bolts. Our psak-1 alignment kit comes with 2- alignment cones and all of the hardware required to upgrade both sides of your ranger and is used to help correct your tie rod angles. NOTE: be sure to ask if the customer has our high lifter forward a-arm kit that now includes our psak-1 alignment cone kit for 1/2" bolts. If they do they can install our hd ranger tie rod kit with no additional purchases. NOTE: new aftermarket heavy duty cv axles are recommended for the 2011-2014 ranger before installing any brand of lift kit. The 2011-2014 model rangers have lighter duty rear axles than previous year models and are more prone to breakage. All customers should be aware of these risks before installing a lift kit on a 2011-2014 ranger, as high lifter will not warranty or replace any broken cv axles. NOTE: 1.5" Spacers are recommended, but a minimum of a 1" wheel spacer is required on the front if you are running 12" diameter factory or aftermarket wheels for the wheel to clear the tie rod with the alignment cones installed. If you are running wide tires a 1.5" Or wider spacer may be required depending on the width of the tire for tire to shock clearance at full lock steering.

NOTE: this new kit gives you the option of running your standard RZR 900 xp 2 seater models (non walker evans editions) in the 5" lifted position for optimal ground clearance or you can change back to the stock height location on the lift brackets for hardcore trail riding without having to remove your lift kit from your 900 xp. Please note this kit is not adjustable on 2012-2014 xp "4" or any 2 seater walker evans editon RZR900 xp due to the larger shock body on the walker evans edtions!!! See our instructions for full details on the install and 5" lift/stock height options. NOTE: some grinding on rear trailing arm is requred for factory cv boot clearance. This is detailed and shown in our instructions. If you add a heavy duty aftermarket axle you will have to grind a larger portion due to the larger diameter outer cup/cv boot. You must rotate the shock reservoir 180 degrees for proper installation and clearances on all of the standard RZR 900 xp 2 seater models. See our lift kit instructions for details on rotating shock reservoir. NOTE: you cannot install bumper-RZR9 on any walker evans edition models (2 or 4 seaters) with this lift kit installed...Unless you purchase our optional bumper bracket...See part# (bumper-brkt-1) NOTE: we recommend a set of our max clearance radius bars...They offer major upgrades in quality and a significant gain in ground clearance...They are a must for every 900 xp. See part# psra-RZR9 (also see our matching top hd radius bars...Part# psra-RZR9-1) NOTE: the new 2011-2014 pol. 900 RZR xp is a very powerful machine and is subject to break axles (front and rear) with or without a lift kit and big aggressive tires. Front and rear axles are subject to break with or without a lift kit, but the rear axles are especially subject to breakage when accelerating hard in reverse while you are stuck, in a bind....Etc. And the suspension is at full or close to full extension.

NOTE: if you want to install this lift kit on any RZR 900 xp 4 (4 seater) or walker evans edition RZR 900 xp (2 seater or 4 seater) that also has our bumper-RZR9 or emp RZR 900 winch bumper installed... You must buy our "optional" bumper mounting bracket part# (bumper-brkt-1). See part# bumper-brkt-1 for additional notes. NOTE: this lift kit fits fine if the customer does not have a front winch bumper installed on their RZR900 xp (2seater or 4 seater) that has walker evans shocks. NOTE: this new kit gives you the option of running your standard RZR 900 xp 2 seater models (non walker evans editions) in the 5" lifted position for optimal ground clearance or you can change back to the stock height location on the lift brackets for hardcore trail riding without having to remove your lift kit from your 900 xp. Please note this kit is not adjustable on 2012-2014 xp "4" or any 2 seater walker evans editon RZR900 xp due to the larger shock body on the walker evans edtions!!! See our instructions for full details on the install and 5" lift/stock height options. NOTE: some grinding on rear trailing arm is requred for factory cv boot clearance. This is detailed and shown in our instructions. If you add a heavy duty aftermarket axle you will have to grind a larger portion due to the larger diameter outer cup/cv boot. NOTE: this kit is only adjustable on the 2011-2014 RZR 900 xp standard cab 2 seat model. NOTE: this kit is not adjustable on the 2012-2014 RZR 900 xp "4" 4 seat model or any 2 seater walker evans editon RZR 900 xp due to the larger shock body on the walker evans edtions!!! NOTE: our new plk900RZR-51 "adjustable" kit does allow you to install the high lifter or emp RZR 900 xp front winch bumper without clearance issues on the bumper brackets on the standard RZR900 xp 2 seater models (non walker evans editons). You must rotate the shock reservoir 180 degrees for proper installation and clearances on all of the standard RZR 900 xp 2 seater models. See our lift kit instructions for details on rotating shock reservoir. NOTE: you cannot install bumper-RZR9 on any walker evans edition models (2 or 4 seaters) with this lift kit installed...Unless you purchase our optional bumper bracket...See part# (bumper-brkt-1)

S100 TOTAL CYCLE CLEANER

If you've been using a bucket of car suds or a quick detailer, chances are you been missing the most important and threatened places on your bike…those hidden nooks and crannies where dirt can hide. Why isn't that ok? Dirt traps moisture and the moisture can't dry out. The result is corrosion, rust and tarnish and you can't even see it happening! S100 Total Cycle Cleaner works differently by creeping to find the hidden soils you can't see, then penetrating and loosening them so a sharp stream of water can remove them. The result is a bike that is clean everywhere, not just where can see. Simply put, it's better for your bike. (You don't have to tell your friends it's quick too.)

S100 SHINE-ENHANCING CLEANSER AND S100 CARNAUBA PASTE WAX

Ready to get the ultimate shine? Experts agree that waxes with cleaners in them are compromise products, that the cleansing and waxing steps must be done separately, so that's what we've done. Use our two step S100 Cleanser and S100 Paste Wax system, we can virtually guarantee you can put your bike in a show! Get your bike clean and dry, then begin with our S100 Shine-enhancing Cleanser. Professional painters and detailers agree that proper surface preparation is fundamental to getting the ultimate shine. The S100 Cleanser gently removes water spots, small swirl marks and imbedded road film to set up the surface for the ultimate shine, all without scratching even sensitive clear coats! Now you're ready for the ultimate wax job with our S100 Carnauba Paste Wax. Free of abrasives and cleaners and made with a unique blend of carnauba (the world's hardest wax) and beeswax, you will be amazed at the depth of shine and darkening of dark colored surfaces. And we've eliminated two common annoyances, powdering during rubout and white stain residues on plastics and rubber! And it's so easy to apply and remove, some bikers tell us it's as easy to use as a liquid!

S100 DRYING TOWEL

There's not much point in getting a bike washed quickly, if you can't get it dried quickly. That's why we introduced the amazing S100 Drying Towel. More drying power than a natural chamois, yet it never gets stiff so it's always ready to use. Lint free, it stores in its own plastic pouch so it's ready to pull out of the saddlebag. Made from 100% biodegradable materials without using CFC's or formaldehydes.

S100 DETAIL + WAX

OK, we know there are some times when your bike isn't really that filthy, maybe just a bit dusty, rain-spotted or covered with bugs. We've got something for that, too. S100 Detail + Wax removes that dust, those spots, and the bug residue. And its unique carnauba and beeswax ingredients replace them with a "gangbusters" shine. Just think of it as a wash and wax in one! It's easy to use, too. Just spray a bit on a soft cloth or onto the bike's surface and rub to a high gloss. Pack a can in the saddlebag and you're ready for a dusty road or that surprise rain shower. No wonder an independent test rated S100 Detail + Wax "... the most consistent performer of all".

S100 DETAILING SET & S100 DETAILING SWABS

If you're fussy about caring for your bike, it's important not to skip the details! The S100 Detailing Set enables you to get into those tough to reach nooks and crannies. The 25 USP grade swabs are so flexible they can be bent 90° to reach around corners. Use them to apply other S100 products such as S100 Total Cycle Cleaner or S100 Corrosion Protectant, too. The S100 Detailing Set also includes an ultra-soft polishing cloth for dusting, rubbing out polishes, waxes, etc. Refill the Detailing Set with the 50 piece Detailing Swabs pack.

S100 WHEEL CLEANER

Sometimes those road wheels need some extra cleaning power to get them back to that "like new" look. And, worse yet, that brake dust (it contains metallic particles!) can become corrosive if allowed to stand for awhile. If you find that brake dust build up is hard to keep up with, we recommend you try our S100 Special Performance Gel Wheel Cleaner. It provides up to 50% more cleaning power than our Total Cycle Cleaner thanks to the clinging power of its unique gel formulation. Spray on and allow to stand (you control the amount of cleaning you need, see directions on bottle), then rinse thoroughly. Neither acid, nor lye-based like cheaper products, S100 Wheel Cleaner provides complete surface safety for any type of wheel or wheel finish, including those tricky anodized finishes.

S100 CORROSION PROTECTANT

No matter how clean you keep your bike, you always have to be on the lookout for that dreaded "enemy number one", corrosion. Unless you live in the desert, humidity, salt air, spring road salt and plain old pollution threaten your bike's "precious metals". That's why we developed S100 Corrosion Protectant. Just spray on a clean, dry bike (or into a cloth) and rub into the areas you want to protect, those sensitive areas like fork tubes, case covers and wheels (and don't forget those hidden areas you can't reach.). You'll find that S100 Corrosion Protectant won't rub off easily in the rain and so its protection really lasts. It even dramatically out-performed a famous so called "corrosion fighter", so this is really the way to protect your investment!

Important note: This is the perfect product for winter lay up and long term storage. Spray directly on all sensitive areas and allow to dry.

For small areas, our S100 Finish Restorer is the perfect solution. It can renew tarnished metals (aluminum, stainless, chrome etc.) to a brilliant shine, even often take small scratches out of plastics. It rubs out easier than ordinary polishes and doesn't come with that ugly ammonia smell, either! No wonder Motorcyclist Magazine called it "the nearest article to a miracle finish maintenance product…"

S100 SPECIAL SURFACES CLEANER

Dirty, dull plastics ruin the look of a bike. New S100 Special Surfaces Cleaner is a waterless spray-on, wipe off cleaner that cleans up fairings, helmets, visors, instruments and windshields in seconds. Bugs, rain spots and road film disappear instantly leaving nothing but a nice clear surface! Here's what some bikers said: "…used on my helmet visor…it appears so clear it seemed like I didn't have my visor down". "I was amazed how it gave back life to the cover on the speed and tach gauges." It contains special polymers that bond to the treated surface to help prevent the formation of future deposits. Depending on the application, Salt Off® can be sprayed directly onto the surface to be treated and then rinsed with fresh water, or simply left in place.

The formula is safe for use on all boats, vehicles, trailers, marine parts, engines, fishing and dive gear and more. It will not etch, stain or otherwise damage metal or plastic surfaces. It is ideal for removing salt water deposits from boats and fishing gear, as well as for protecting cars or trailers from the damage caused by exposure to road salt.

Salt Off® is also very effective at protecting marine engines used in salt water; when used with the Salt Off® Applicator, it will flush deposits from the engine's cooling system to help insure maximum performance and service life. The Applicator can also be used to more easily apply Salt Off® to large areas.

Salt Off®is available in convenient, Ready to Use, 22 ounce spray bottles as well as in concentrated form, in 32 ounce and 1-gallon containers.

- Ergo push button operation
- No-spill design
- Variable fluid flow rate control
- Self venting
- Over 3 gallons per minute flow rate

HIGH VOLUME FLUID DISPENSING WITH COMPLETE CONTROL

The Trigger is designed to allow variable fluid delivery over 3 gallons per minutes. Once the Trigger is installed on your utility jug the days of spilling on your expensive graphics or machine will be over. Because the Trigger is self-venting, you will no longer need to open a separate vent on your utility jug to increase your fluid flow. Leave your vent closed. Simply press the Trigger button and fluid flow. Your desired rate of flow will be determined by how far you press the button. Once you have reached your desired fill level, release the button and fluid flow will stop. The result is a clean, completely controlled delivery of fluid.

GRUNGE BRUSH™

Chain and gear cleaning has never been faster or easier! Scrub the chain with the horseshoe shaped bristles at one end of The Grunge Brush™ to clean all four sides of the chain. Use the long bristles on the other end of the brush to clean components like sprockets, derailleurs, cranksets, brakes and pedals.

Regular component cleaning prevents premature wear and tear on chain and sprockets, eliminates chain skipping caused by dirt and grunge, and assures smooth operation of drivetrain and brakes.

The Grunge Brush™ can be used dry or for deep cleaning action, use it with Citrus Bike Chain Degreaser or Multi Bike Degreaser, by simply spraying degreaser onto the chain or directly onto bristles. Grunge Brush™ scrubbing action, coupled with a Finish Line bike degreaser, will leave your drivetrain looking like new
