PRO X CLUTCH BASKETS

ProX Clutch Baskets are precision machined from heat treated aircraft Billet 7075-T6 aluminium alloy to O.E. precision standards. Sophisticated hard-anodising guarantees extended life under severest racing conditions. Each kit comes with the necessary hardware to make installation a snap.

Our clutch baskets are designed to maximize strength through “feature aligned grain flow” and utilizes as-forged features that can only be produced using our precision process. We are able to produce higher mechanical properties and resistance to impact and fatigue.

All our clutch baskets are hard anodyzed to produce an ultra tough abrasive resistant surface and ensures a long life of smooth clutch operation through the elimination of wear on the sides of the clutch basket tabs.

The special added Teflon coating seals the coating to create a near frictionless surface for the clutch plate tabs to glide upon. All our clutch baskets comes with pre-applied thread locker fasteners and an inbus tool.

WISECO CLUTCH COMPONENTS

CLUTCH BASKETS, INNER HUBS & PRESSURE PLATES

Wiseco leads the clutch aftermarket with high performance FORGED clutch baskets, inner hubs, and pressure plates. OEM clutch components are made from inexpensive die-castings that quickly wear out and become easily notched. Wiseco offers the only forged clutch components in the aftermarket for off-bike and ATV applications. The feature aligned grain flow in the aluminum adds strength and toughness to the parts that are unparalleled through other manufacturing processes.

The finished parts are hard coat anodized and Teflon coated to offer superb wear resistance, and a long life of smooth clutch operation. Every new clutch basket is supplied with new components used during assembly, including new fasteners with pre-applied thread locker.

FRICTION PLATES

Wiseco friction plates are designed to offer longevity and endurance in extreme riding conditions. Made to exact OEM specifications from premium materials, Wiseco friction clutch plates offer the same feel and durability as the stock frictions. These plates hold up best for the widest application range.

- Manufactured to exact OEM specifications
- Feature long life and performance without sacrificing durability

CLUTCH SPRINGS

Wiseco clutch springs are manufactured from premium steel and then shot-peened and heat-treated. These replacement springs are stiffer to ensure a positive clutch lockup every time. Keep your clutch from slipping with Wiseco clutch springs.

CLUTCH COVERS

Wiseco clutch covers offer improved puncture resistance over the stock cast covers, especially in extreme driving conditions. They're CNC-machined from Aerospace-grade aluminum alloy and are hard-anodized for maximum protection and wear resistance. Make the wise choice--equip your ride with Wiseco high performance parts and accessories.

CLUTCH COVER GASKETS

These Wiseco clutch cover gaskets are designed to keep your motorcycle or ATV in peak condition or improve its ride and your enjoyment of the ride. CLUTCH PACK KITS

Clutch Pack Kits contain everything you need to upgrade your worn out clutch plates and springs. Each kit comes with new frictions, steels, and clutch springs, all made from premium grade materials. The frictions and steels are made to exact OEM tolerances and specifications, and produce the same feel and wear resistance of OEM plates. Wiseco clutch springs are 8-10% stiffer than stock to ensure a positive clutch lockup every time. Clutch pack kits are an easy solution to worn or slipping clutch packs.

PERFORMANCE CLUTCH KITS

Performance Clutch Kits take the clutch pack kits one step further by including a Wiseco forged clutch basket and new rubber cushions. Wiseco forged baskets are tougher and stronger than stock, and achieve higher fatigue properties than any other clutch on the market. The hard coat anodizing wears like iron, and greatly extends the life of the basket against notching. Also included is a full set of frictions, steels, and clutch springs made from premium grade materials. Refresh your worn out clutch and notched basket with the ultimate in high quality Wiseco clutch components.

JT DRIVE CHAIN TECHNICAL SPECIFICATIONS

- **Connecting Link Reference** - SL: Spring/Clip Link, RL: Rivet Link, DL: Dual Link (contains both link types)
- **Pin Riveting** - Pressed four times for an extra strong rivet that resists powerful lateral forces on the outer plate
- **Solid Bush** - Solid bushes provide enhanced resistance to distortion from repetitive shock loading
- **Riveted Bush** - All 520 HDR/HDS/X1R/X1R2 have riveted bushes that resist powerful lateral forces on the inner plate
- **X-Ring Seal** - X-Ring seals offer better sealing than the conventional O-Ring and produce far less friction. All sealed JT chains are equipped with X-Rings

MVXZ SERIES

OUR SUPREME QUADRA-X RING CHAINS, THE IDEAL OE REPLACEMENT.

EK's MVXZ Quadra-X Ring chain is the ideal replacement chain for any 600 to 1000cc street bike. Features like lightening holes in the sideplates,large-diameter pins, and friction-reducing Quadra-X Rings help ensure high-performance and from 1 1/2 to 2 times increased wear life when compared to a standard O-Ring chain. Every MVXZ chain features EK's Quadra-X Ring design. This innovative sealing technology results in reduced friction and increased chain life. Lab tests show that a Quadra-X Ring chain can last from 1 1/2 to 2 times longer than a standard O-Ring chain.

- Recommended application: up to 1000cc/100hp for 520MVXZ; up to 1000cc/130hp for 525MVXZ; up to 1000cc/145hp for 530MVXZ
- Available colors: gold, chrome,
- Tensile strength: 9000 lbs. for 520MVXZ; 9300 lbs. for 525MVXZ and 530MVXZ
- Available lengths: Up to 120 links for 520MVXZ; up to 130 links for 525 and 530MVXZ
- Zero Stretch Technology available as an option on some MVXZ chains

PROX DRIVE CHAIN

ProX has developed a premium line of Roller Chains to team up together with the ProX front and rear sprockets. The ProX Roller Chain is a top quality chain, exclusively manufactured for ProX by the reputable and leading OEM factory in Japan. All ProX chains are made using highest grade Japanese steel.

The MX chains are assembled out of various different components that all have their specific and crucial function to make the chain a high quality product. Pins do feature an exclusive pin treatment providing an extremely hard outside coating, leaving a softer inside to increase strength while reducing overall chain wear. The pins are heavy press fitted and do feature quad staked riveting for ultra-strong connection.

The solid bush inside the shot-peened, solid roller and plates are all heat treated to offer an incredible tensile strength in combination with low friction and high wear resistance. Inner plates are designed in a specific shape allowing less material to be used which in combination with the unique lightning holes results in a 3% overall lighter chain without compromising tensile strength.

All ProX chains are pre-stressed and pre-stretched to reduce initial chain stretch and immediate performance and come with a clip type chain link as standard.

SEALED (O-RING) DRIVE CHAIN

Specifically designed with sealed-in lubrication, makes KMC sealed chain work to its optimum life. Superior alloy steel is used and heat-treated to provide best performance in strength. In addition, specially formulated grease contained by using a durable ring in between solid bushing and hardened pin, keeps constant lubrication and eliminates friction during operation. Least wear results in least chain stretch and prolongs its service life.

CHAIN GUIDES

If you've ever ridden a single-speed bicycle with a loose chain on a bumpy surface, you know that the chain will bounce around and make noise until it finally derails. In that case, you would have to tighten the chain to fix the issue. On motorcycles, a chain guide is used to feed the chain onto the rear sprocket. If the chain were allowed to float back, without the lift and direction that the chain guide provides, it would be susceptible to bouncing itself out of line and lodging itself between the chain and the rear sprocket. Psychic chain guides are an important addition to your dirtbike or adventure bike, especially if you plan to take it off-road or have a longer suspension.

PRESS-FIT CHAIN LINK TOOLS

Since about 1990, most new chains use press-fit type side plates on the connecting links. On this type of link, the side plate can not be installed properly without the aid of a special tool. The chain manufacturers have decided the press fit adds strength to the connecting link and should always be used. The Motion Pro chain press tools below are designed to install the press-fit connecting links on 520-530 standard and O-ring chains.

- Versatile enough to be used on cam chains or drive chains
- Will break chains from #35 to #630
- For chain 520 and up, it is recommended to grind to rivet head
- Each kit includes 3 pin sizes to fit most chains
- Features new & improved investment-cast-hardened body and redesigned body bolt
- Now the kit includes press places
- Recommended for light to medium duty use

DIRT BIKE WHEEL BEARING UPGRADE KITS

Wheel bearings typically fail from water and dirt contamination. The All Balls Rear Wheel Bearing Upgrade Kit was developed in partnership with KML Bearing and is designed for the difficult operating environment of the powersport industry.

- Kit contains 2 ball bearings, 3 wheel spacers and 2 seals
- Rubber sealed bearings for additional protection from water and dirt
- Chevron SR1-2 grease - Hi-performance rust and oxidation inhibitors (-29°C to 177°C)
- Bearings - Precision high-speed bearings manufactured to ABEC3 standards
- Double-lip seal - Type TC

- An excellent, economical choice for replacing OEM sintered metal brake pads
- Pad consists of 50-60 percent copper combined with carbon, ceramic, tin and abrasives
- Iron backing plate is plated with copper to make it a stronger bond with the pad friction material
- Powerful stopping power in wet or dry conditions
- Excellent initial pad bite, lower lever effort and minimal pad bed-in time required
- Can be used with stainless steel rotors
- Pad material is aramid fiber, metals, abrasives and lubricants mixed with Phenol Resin
- Metal powder components exceed 50 percent of pad material
- Excellent pad life
- Can be used with stainless steel rotors
- Give superior stopping power with no fade
- Excellent initial brake pad bite
- Good feel at the lever
- No bedding-in is required
- Hard brake pad backing plate will not warp, even under extreme use
- Superior stopping power with no fade
- Excellent initial brake pad bite that is not as aggressive as the RJL compound
- Slightly more progressive feel at the lever

CERAMIC SEMI-METALLIC PADS

- Many fibers, natural and man-made have been researched and combinations of several fibers like Aramid fiber, Ceramic fiber, Carbon fiber and Metal (copper and brass powder) fiber etc.
- Soft –mild braking control, Controllable pad on first braking with safety
- Good initial bite
- HH stopping power pad (Ameca test result)
- Low disc attack
- Long life pad

WILD BOAR DIRT BIKE BRAKE PADS & SHOES

We offer a pad option for all riders.

When looking for brake pads, the thing to remember is the coefficient of friction rating for that pad. This is a 2 letter rating system (*see graph at right*). The grades of brake pads available range from e,f,g through to h rating, each grade being a 20% step up in friction delivery.

Semi-metallic: semi-metallic brake pads and shoes are composed of a non-asbestos, semi-metallic carbon kevlar aramid fiber from dupont and have a dot rating of "FF" coefficient of friction (C.F.) At 250° and 600°: 0.44-0.45 Both temps.

These provide riders with a long pad life, low dust and brake disk wear, great stopping power and fade resistance, and an economical price.

Full metal: the best selling pads we offer. The full metallic high-density material consists of: copper, carbon, tin, lead and other metallic elements and have a dot rating of "FG". FG coefficient of friction (C.F.) at 250° and 600°: 0.44-0.45 At 250°F, 0.45-0.50 At 600°F. These will provide a longer life than similar compounds from competitors, excellent performance and stability at all temperatures, reduced corrosion, and work equally well in wet and dry conditions, and are recommended for utility, mud, and sand applications.

- Manufactured by a ISO9002, QS9000 and TS16949 accredited factory
- The biggest friction material manufacturer in Taiwan
- All brake shoes or pads are non-asbestos, semi-metallic kevlar/carbon fiber
- Full metal brakes contain copper, carbon, tin, lead and other metallic elements
- Full metal brake pads are "GG"rated-hi torque and friction for hi-performance machines
- Semi-metallic pads and shoes are "FF" rated.

BRAKE SHOES ARE AVAILABLE IN A STANDARD AND A GROOVED LINING

RATING	Coefficient Of Friction (C.F.) At 250°f And 600°f	COMMENTS	GENERAL APPLICATIONS
EE	0.25-0.35 both temps	0.25% Fade possible at 600°F	Not Recommended for Performance applications as it shows poor C.F. in hot & cold temps.
FE	0.35-0.45 at 250°F 0.25-0.35 at 600°F	2-44% Fade possible at 600F	Not Recommended for Performance applications. Though it shows better C.F. in cold temps, and has a high possiblilty of brake fade at warm temps.
FF	0.44-0.45 both temps	0-22% Fade possible at 600F	This pad is well suited for most conditions. It has minimal fade at high temps and is good for performance applications.
FG	0.44-0.45 at 250°F 0.45-0.50 at 600°F	Fadding Very Rare	This pad is great for most conditions, as it is softer than HH rated pad and will bed quicker on worn disks. This rating is good for performance applications.
GG	0.45-0.50 both temps	Fadding Very Rare	This pad is great for most conditions, as it is softer than HH rated pad and will bed quicker on worn disks. This rating is good for performance applications.

PROX BRAKE PADS

ProX sintered brake pads are produced under a very strict sintering process. During this sintering process, metallic particles are fused by a combination with heat and pressure. Sintered brake pads in general have superior material properties, which very well resist high temperatures during heavy braking and offer greater durability over organic brake pads. The ProX sintered brake pads offer strong controllable brake power in combination with long life. The pads are designed to come as a softer compound front pad and little harder compound pad for the rear pads. A complete range of sintered brake pads for MX, Dirt bike and ATV is available from stock.

ProX Sintered Brake Pad features:

- High resistance against high temperatures
- Greater durability than organic brake pads
- Super controllable brake power
- Complete range of sintered brake pads for MX, Dirtbike and ATV available from ready stock

RUSSELL CYCLEFLEX BRAKE LINES

CYCLEFLEX RUSSELL

Russell's Cycleflex Off-Road/Dual-Sport/Motocross brake hoses are engineered to deliver optimum performance and reliability.
Cycleflex hoses feature our PowerFlex Hose Series that utilizes a Teflon® inner liner supported by a rugged 308 stainless steel outer jacket.
This combination ensures a lightweight assembly that withstands. prolonged flexing, aging and vibration without expansion, delivering enhanced brake performance.
A section of hard tube prevents the hose from fouling the wheel or fender during suspension travel.

FRONT FORK BUSHING OIL & DUST SEAL KITS

- Patented fork seal features a balanced 3 lip design that evenly distributes the pressure reducing operating temperature, wear and friction
- Custom Elastomer fork seals have been tested to outlast OEM fork seals. Extends typical seal life by 3 to 5 times over OEM seals

- Stiction (friction) measures from 1/3 to 1/2 less than OEM seals for smoother fork action
- Lower stiction, longer life! It doesn't get any better than this
- Plus, the only complete line of dust wipers! Wipers should be replaced with the fork seals to assure peak performance

S100 TOTAL CYCLE CLEANER

If you've been using a bucket of car suds or a quick detailer, chances are you been missing the most important and threatened places on your bike…those hidden nooks and crannies where dirt can hide. Why isn't that ok? Dirt traps moisture and the moisture can't dry out. The result is corrosion, rust and tarnish and you can't even see it happening! S100 Total Cycle Cleaner works differently by creeping to find the hidden soils you can't see, then penetrating and loosening them so a sharp stream of water can remove them. The result is a bike that is clean everywhere, not just where can see. Simply put, it's better for your bike. (You don't have to tell your friends it's quick too.)

S100 SHINE-ENHANCING CLEANSER AND S100 CARNAUBA PASTE WAX

Ready to get the ultimate shine? Experts agree that waxes with cleaners in them are compromise products, that the cleansing and waxing steps must be done separately, so that's what we've done. Use our two step S100 Cleanser and S100 Paste Wax system, we can virtually guarantee you can put your bike in a show! Get your bike clean and dry, then begin with our S100 Shine-enhancing Cleanser. Professional painters and detailers agree that proper surface preparation is fundamental to getting the ultimate shine. The S100 Cleanser gently removes water spots, small swirl marks and imbedded road film to set up the surface for the ultimate shine, all without scratching even sensitive clear coats! Now you're ready for the ultimate wax job with our S100 Carnauba Paste Wax. Free of abrasives and cleaners and made with a unique blend of carnauba (the world's hardest wax) and beeswax, you will be amazed at the depth of shine and darkening of dark colored surfaces. And we've eliminated two common annoyances, powdering during rubout and white stain residues on plastics and rubber! And it's so easy to apply and remove, some bikers tell us it's as easy to use as a liquid!

S100 DRYING TOWEL

There's not much point in getting a bike washed quickly, if you can't get it dried quickly. That's why we introduced the amazing S100 Drying Towel. More drying power than a natural chamois, yet it never gets stiff so it's always ready to use. Lint free, it stores in its own plastic pouch so it's ready to pull out of the saddlebag. Made from 100% biodegradable materials without using CFC's or formaldehydes.

S100 DETAIL + WAX

OK, we know there are some times when your bike isn't really that filthy, maybe just a bit dusty, rain-spotted or covered with bugs. We've got something for that, too. S100 Detail + Wax removes that dust, those spots, and the bug residue. And its unique carnauba and beeswax ingredients replace them with a "gangbusters" shine. Just think of it as a wash and wax in one! It's easy to use, too. Just spray a bit on a soft cloth or onto the bike's surface and rub to a high gloss. Pack a can in the saddlebag and you're ready for a dusty road or that surprise rain shower. No wonder an independent test rated S100 Detail + Wax "... the most consistent performer of all".

S100 DETAILING SET & S100 DETAILING SWABS

If you're fussy about caring for your bike, it's important not to skip the details! The S100 Detailing Set enables you to get into those tough to reach nooks and crannies. The 25 USP grade swabs are so flexible they can be bent 90° to reach around corners. Use them to apply other S100 products such as S100 Total Cycle Cleaner or S100 Corrosion Protectant, too. The S100 Detailing Set also includes an ultra-soft polishing cloth for dusting, rubbing out polishes, waxes, etc. Refill the Detailing Set with the 50 piece Detailing Swabs pack.

S100 WHEEL CLEANER

Sometimes those road wheels need some extra cleaning power to get them back to that "like new" look. And, worse yet, that brake dust (it contains metallic particles!) can become corrosive if allowed to stand for awhile. If you find that brake dust build up is hard to keep up with, we recommend you try our S100 Special Performance Gel Wheel Cleaner. It provides up to 50% more cleaning power than our Total Cycle Cleaner thanks to the clinging power of its unique gel formulation. Spray on and allow to stand (you control the amount of cleaning you need, see directions on bottle), then rinse thoroughly. Neither acid, nor lye-based like cheaper products, S100 Wheel Cleaner provides complete surface safety for any type of wheel or wheel finish, including those tricky anodized finishes.

S100 CORROSION PROTECTANT

No matter how clean you keep your bike, you always have to be on the lookout for that dreaded "enemy number one", corrosion. Unless you live in the desert, humidity, salt air, spring road salt and plain old pollution threaten your bike's "precious metals". That's why we developed S100 Corrosion Protectant. Just spray on a clean, dry bike (or into a cloth) and rub into the areas you want to protect, those sensitive areas like fork tubes, case covers and wheels (and don't forget those hidden areas you can't reach.). You'll find that S100 Corrosion Protectant won't rub off easily in the rain and so its protection really lasts. It even dramatically out-performed a famous so called "corrosion fighter", so this is really the way to protect your investment!

Important note: This is the perfect product for winter lay up and long term storage. Spray directly on all sensitive areas and allow to dry.

S100 FINISH RESTORER AND S100 POLISHING SOAP

For small areas, our S100 Finish Restorer is the perfect solution. It can renew tarnished metals (aluminum, stainless, chrome etc.) to a brilliant shine, even often take small scratches out of plastics. It rubs out easier than ordinary polishes and doesn't come with that ugly ammonia smell, either! No wonder Motorcyclist Magazine called it "the nearest article to a miracle finish maintenance product…"

Salt Off® Concentrate is specifically formulated to quickly and effectively remove salt deposits from metal, fiberglass, plastic or painted surfaces. It contains special polymers that bond to the treated surface to help prevent the formation of future deposits. Depending on the application, Salt Off® can be sprayed directly onto the surface to be treated and then rinsed with fresh water, or simply left in place.

The formula is safe for use on all boats, vehicles, trailers, marine parts, engines, fishing and dive gear and more. It will not etch, stain or otherwise damage metal or plastic surfaces. It is ideal for removing salt water deposits from boats and fishing gear, as well as for protecting cars or trailers from the damage caused by exposure to road salt.

Salt Off® is also very effective at protecting marine engines used in salt water; when used with the Salt Off® Applicator, it will flush deposits from the engine's cooling system to help insure maximum performance and service life. The Applicator can also be used to more easily apply Salt Off® to large areas.

Salt Off® is available in convenient, Ready to Use, 22 ounce spray bottles as well as in concentrated form, in 32 ounce and 1-gallon containers.

Plexus actually seals the pores of the plastic. It makes small scratches less visible, leaving a surface that is fresh, lustrous and protected. Plexus dries perfectly, no smears, no scratches, no smudges and no oily, tacky or sticky residue. It's anti static and can be applied in seconds.

Around your house try using Plexus on your counter tops and appliances. Keep your refrigerator, dishwasher, ovens, even your microwave shinier and cleaner. Anyplace that might contain plastic, use Plexus!
Use Plexus on your computer screen to keep it clean and fingerprint-free. Or use it on your eyeglasses to keep them clean. (Don't forget about your sunglasses too!)

HIGH VOLUME FLUID DISPENSING WITH COMPLETE CONTROL

The Trigger is designed to allow variable fluid delivery over 3 gallons per minutes. Once the Trigger is installed on your utility jug the days of spilling on your expensive graphics or machine will be over. Because the Trigger is self-venting, you will no longer need to open a separate vent on your utility jug to increase your fluid flow. Leave your vent closed. Simply press the Trigger button and fluid flow. Your desired rate of flow will be determined by how far you press the button. Once you have reached your desired fill level, release the button and fluid flow will stop. The result is a clean, completely controlled delivery of fluid.

MR. FUNNEL FLO TOOL

REMOVES WATER FROM FUEL

The Fuel Filter Funnel by Mr. Funnel is a heavy-duty, anti-static, and fast flow funnel with built-in filter technology. When fuel is poured through the Fuel Filter Funnel, water and debris will not pass through the filter’s fluoropolymer-coated stainless steel filter. Only filtered fuel flows through to your engine, improving its efficiency, durability, and proper operation. The sump area collects the deflected water and debris for proper disposal. The Fuel Filter Funnel by Mr. Funnel will filter gasoline, diesel, heating oil, kerosene and 2-cycle mixed gas.

GRUNGE BRUSH™

Chain and gear cleaning has never been faster or easier! Scrub the chain with the horseshoe shaped bristles at one end of The Grunge Brush™ to clean all four sides of the chain. Use the long bristles on the other end of the brush to clean components like sprockets, derailleurs, cranksets, brakes and pedals.

Regular component cleaning prevents premature wear and tear on chain and sprockets, eliminates chain skipping caused by dirt and grunge, and assures smooth operation of drivetrain and brakes.

The Grunge Brush™ can be used dry or for deep cleaning action, use it with Citrus Bike Chain Degreaser or Multi Bike Degreaser, by simply spraying degreaser onto the chain or directly onto bristles. Grunge Brush™ scrubbing action, coupled with a Finish Line bike degreaser, will leave your drivetrain looking like new
