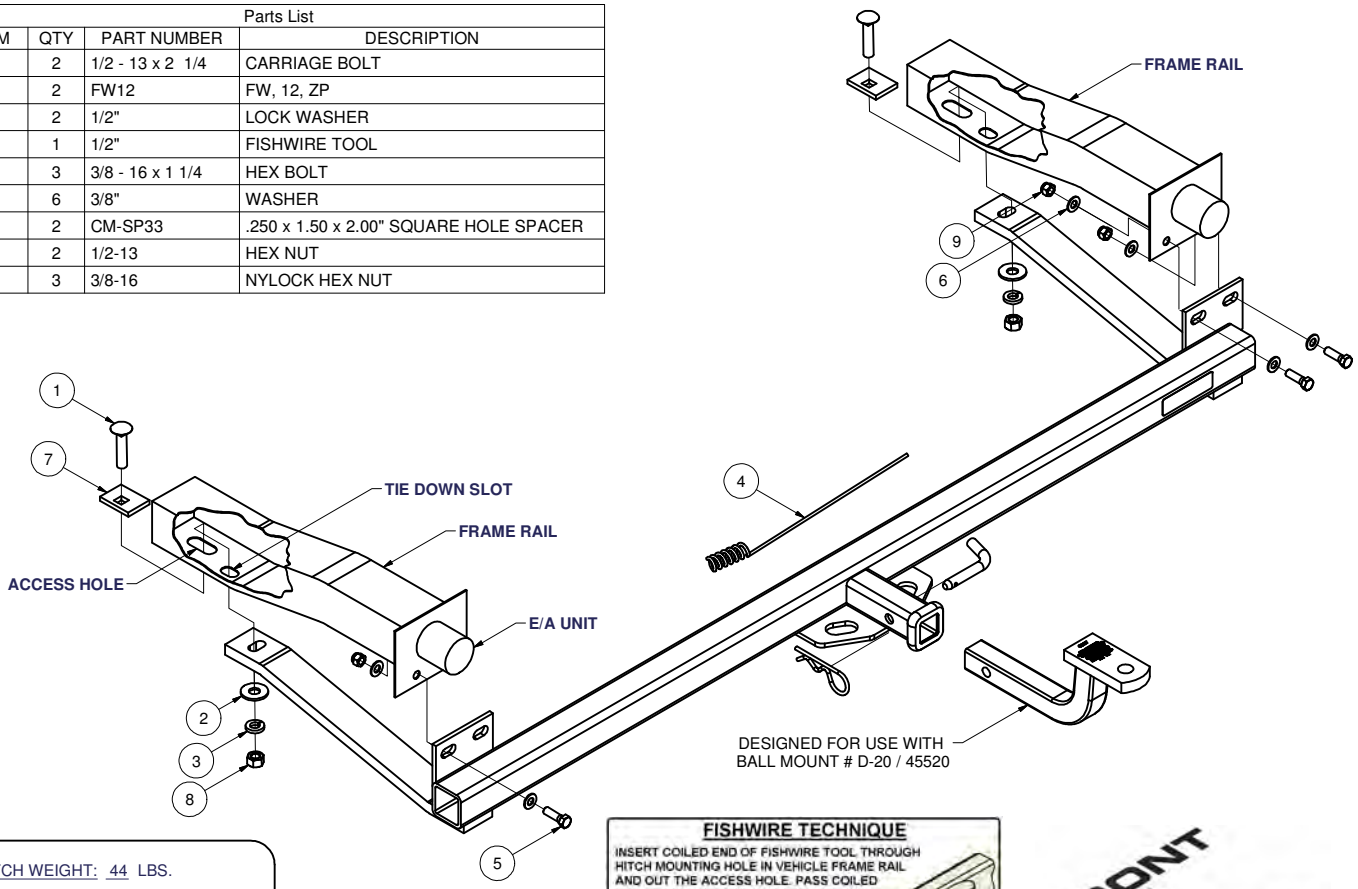
9	3	3/8-16	NYLOCK HEX NUT



HITCH WEIGHT: 44 LBS.

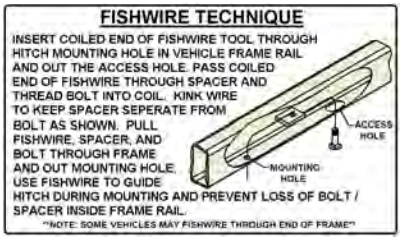
INSTALL TIME

PROFESSIONAL: 45 MINUTES

NOVICE (DIY): 90 MINUTES

INSTALL NOTES:

HOLE ENLARGEMENT REQUIRED



INSTALLATION STEPS

1) Remove three lower bolts which attach the E/A unit to frame. Two are on passenger side and one on driver side. **(Note: On station wagon models, remove the center most bolt from the bottom of the bumper.)**

2) Enlarge E/A bolt holes with a 3/8 drill bit.

3) Position on vehicle. Install 3/8" bolts and washers through hitch and enlarged E/A attachment holes as shown. Loosely install flat washers and locknuts as shown.

4) Fishwire 1/2" carriage bolts and spacer blocks up through frame access holes and down through tie down slots in each frame rail. El Camino and Caballero models require bumper to be removed with E/A assembly so the bolts can be fishwired from the rear frame opening. Install remaining fasteners as shown.

5) Torque 1/2" fasteners to 110 lb.-ft. Torque 3/8" fasteners to 45 lb.-ft.

PERIODICALLY CHECK THIS RECEIVER HITCH TO ENSURE THAT ALL FASTENERS ARE TIGHT AND THAT ALL STRUCTURAL COMPONENTS ARE SOUND.

Curt Manufacturing Inc., warrants this product to be free of defects in material and/or workmanship at the time of retail purchase by the original purchaser. If the product is found to be defective, Curt Manufacturing Inc., may repair or replace the product, at their option, when the product is returned, prepaid, with proof of purchase. Alteration to, misuse of, or improper installation of this product voids the warranty.
