

RETRO

LT 1200 93 835/840/850 WB ML WH Light carrier 1200mm

The RETRO LED trunking system is specifically designed for the tool-less and time-saving upgrade of existing T8 and T5 fluorescent lamps. Thanks to the intelligent click design, the light module can be changed in less than a minute - without any conversion or additional materials. RETRO is compatible with all standard trunking systems from leading manufacturers. With an outstanding efficiency of up to 190 lm/W and a lifespan of 100,000 hours, the system is also economical. The integrated power and CCT switches allow light output and colour (3,000K, 4,000K, 5,000K) to be set on site - ideal for flexible use in industrial halls, warehouses or production environments. Available in two lengths (1200mm and 1500mm), in DALI and ON/OFF versions and with four different optics, RETRO offers maximum adaptability - both in terms of lighting technology and design. The WB-optic ensures wide-area illumination at low ceiling heights, e.g. in sales or ancillary areas. The modules can also be fine-tuned to different lengths, allowing them to be precisely matched to existing systems. RETRO is the future-proof solution for demanding refurbishment projects - high output, efficient and easy to install. We will be happy to advise you!
