Who This Programme Is For

The programme is suitable for:

- **01 Academics and Lecturers**
  Individuals seeking to build capacity for career advancement, teaching, research, postgraduate supervision, and leadership in higher education.
- **02 Data and Information Researchers**
  Professionals who want to deepen their expertise and advance their research skills.
- **03 Senior Technology Professionals**
  Professionals in information systems, artificial intelligence, cybersecurity, and digital innovation who want to conduct applied research.
- **04 Information and Knowledge Leaders**
  Professionals in libraries, archives, records management, knowledge management, digital resources, information governance, and related fields.
- **05 Policy and Development Researchers**
  Professionals working in government, non-governmental, public policy, international development, and capacity-building organizations.

WHAT YOU WILL STUDY

What You Will Study

The Ph.D. Data and Information Science combines advanced coursework, research methodology, a substantial doctoral dissertation, and independent scholarly research.

- 01 Advanced Research Methodology
- 02 Technical Writing and Presentation
- 03 Research and Quantitative Methods for Information Professionals
- 04 Organization of Data and Information Sources
- 05 Productivity Software Skills Development
- 06 Design and Marketing of Information Products
- 07 Seminar Paper
- 08 Dissertation

These courses support advanced research preparation for the Ph.D. Data and Information Science.

Students may specialize in one of ten pathways: Economics, Education, Engineering, Environmental Studies, Health Informatics, Internet Technology, Knowledge Management, Organization & Retrieval of Information, Science & Technology Studies, Speech & Language Technology, or Statistics.

LEARNING EXPERIENCE

Learning Experience

A Rigorous and Flexible Doctoral Journey

- **01 FULLY ONLINE LEARNING**
  Study from anywhere with flexible, self-paced coursework delivered entirely online through the UI eCampus platform.
- **02 ACADEMIC SUPERVISION**
  Work closely with experienced supervisors who will guide your research and development to final dissertation.
- **03 RESEARCH SEMINARS**
  Present your work, receive feedback, and engage with fellow doctoral researchers.
- **04 PROFESSIONAL FLEXIBILITY**
  Balance doctoral study with work and personal responsibilities.
- **05 DISSERTATION RESEARCH**
  Conduct original research that contributes new knowledge to your field.
- **06 SCHOLARLY DEVELOPMENT**
  Strengthen your capacity to publish, present, supervise students, and engage in academic leadership.
- **07 CAPSTONE DISSERTATION**
  Complete a substantial, original research project that demonstrates mastery of your chosen specialization.

ENTRY REQUIREMENTS

Entry Requirements

- Applicants must hold a Bachelor's degree and a Master's degree in a relevant field, with Second Class Upper.
- Applicants must have five (5) O'Level credits at one sitting or six (6) at two sittings, including English Language and Mathematics.

per month · 36 payments	Per month · 36 payments
Tuition is billed monthly and paid in advance. Includes all credit programme, examination and graduation fees.	Tuition is billed monthly and paid in advance. Includes international students fee, all credit programme, examination and graduation fees.

All programme require an application fee. Tuition shown excludes additional charges such as technology and administrative fees, which may apply.

CAREER OPPORTUNITIES

Career Opportunities

The Ph.D. Data and Information Science prepares graduates for high-level research, scholarship, consulting, policy, and leadership roles.

Potential Career Paths

- 01 University Lecturer
- 02 Professor
- 03 Academic Researcher
- 04 Data Governance Advisor
- 05 Knowledge Management Consultant
- 06 Information Policy Specialist
- 07 The Ph.D. Data and Information Science prepares graduates for high-level research, academic, consulting, policy, and leadership roles.
- 08 Research Director
- 09 Postdoctoral Researcher
- 10 Information Systems Researcher
- 11 Digital Transformation Strategist
- 12 Research and Innovation Manager

Graduates may pursue opportunities in universities, research institutions, government agencies, technology organizations, financial services, telecommunications, healthcare, international development, consulting, public policy, information services, data, and analytics organizations.

SKILLS YOU WILL DEVELOP

Skills You Will Develop

Graduates should develop the ability to:

- 01 Produce original research
- 02 Advance theories or conceptual frameworks
- 03 Design complex research studies
- 04 Apply advanced quantitative and quantitative methods
- 05 Critically evaluate scholarly literature
- 06 Analyze complex information problems
- 07 Defend research decisions and findings
- 08 Communicate through publications and presentations
- 09 Supervise and evaluate research

ASSESSMENT & ACADEMIC STANDARDS

Assessment and Academic Standards

Qualitative and quantitative research

Individual projects

The programme is designed to ensure that students demonstrate both academic understanding and practical application of knowledge.

PROGRAMME BENEFIT

Studying through UI eCampus allows you to earn a world-class doctorate while maintaining your professional, academic, professional, and institutional responsibilities.
