An Advanced Legal Degree for Energy, Natural Resources, and Regulatory Professionals

The global energy sector is undergoing profound transformation. Governments, corporations, regulators, and international organisations face increasingly complex challenges related to energy security, climate change, sustainability, renewable energy deployment, and the governance of natural resources.

The Master of Laws in Energy Law (LL.M. Energy Law) at the University of Ibadan is designed for legal professionals who want to develop specialised expertise in this rapidly evolving area of law. The programme combines rigorous academic training with practical, industry-focused learning to equip graduates with the knowledge and skills to address contemporary energy challenges.

Delivered entirely online, the programme is flexible enough to accommodate working professionals while maintaining the high academic standards associated with the University of Ibadan.

Why Choose the University of Ibadan LL.M. Energy Law?

The University of Ibadan is Nigeria's first university, with a long-standing reputation for excellence in legal education and research.

The Faculty of Law has taught many of Nigeria's leading lawyers, judges, and public officials, and continues to produce graduates who shape the country's legal landscape.

This programme is delivered by experienced academics and practitioners who bring real-world insight into the classroom, ensuring that learning is both theoretical and practical.

A Flexible LL.M. Designed for Energy and Legal Professionals

Study at the University of Ibadan, anywhere in the world.
