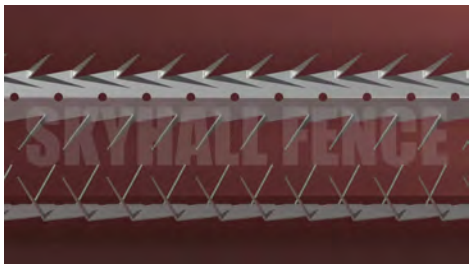
We Make Fence Ideal~

SMALL SIZE WALL SPIKE

Enhance Perimeter Security by Anti Climb Wall Spikes

PRODUCT DETAIL



Features & Benefits

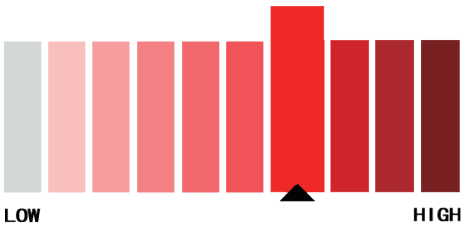
Brief Introduction

Wall spikes are also known as anti climb fence spikes, wall security spikes, razor spikes, and spike nails. They are designed to be mounted on a wall or fixed along the top edge of fences to deter any intruders.

Anti climb fence spikes are usually made from stainless steel plates or galvanized steel plates to provide wear-resistant and anti-corrosion performance. The optional surface treatment of polyester powder coating enables anti climb wall spikes beautiful and resilient to rust and dust.

Skyhall Fence provides different shapes of wall spikes at big, medium, and small sizes. Big-sized anti climb spikes feature four stretching-out sharp thorns, which is similar to a cactus. That's why they are often called four-corner nails. The structure of medium and small-sized wall spikes are comparatively simple, which are essentially metal strips with edgy spikes along both sides.

Protection Level



Applications

Functionalities

HIGH SECURITY

Sharp spikes deter any would-be intruders and present a physical barrier to prevent intruders from gaining access to a property. Combing anti climb spikes to existing metal fences will definitely add extra security to your barrier. Whether fixed along the top edge or on the barrier body, the wall spikes will give full play to their anti-climbing function.

HIGH DURABILITY

Made from stainless steel plate or galvanized steel plate, wall spikes are resilient to corrosion and oxidation, which largely prolong their service life. The use of reinforcing ribs largely increases the spikes' bending strength, promising a sturdy and durable structure.

EASY INSTALLATION

It's easy to install wall spikes as you can fix them in place via pre-drilled mounting holes. Alternatively, they can be welded in place where appropriate. Whatever anti climb barriers you are planning, care and consideration is essential. And the wall spikes should never be installed lower than 2.2 meters from the ground. In some circumstance, higher height restrictions may exist so it's always important to check.

WALL SPIKE	
TYPE	SKH-336
LENGTH	1250 MM
THICKNESS	2 MM
BARB LENGTH	67 MM
BARB SPACING	50 MM
BOTTOM WIDTH	60 MM
SURFACE TREATMENT	PRE HOT DIPPED GALVANIZED, PVC COATED, SS304

CUSTOMIZED specifications acceptable.

BEAUTIFUL APPEARANCE

Although designed as tools to enhance the security of barriers, the aesthetic value of wall spikes should never be neglected. Unlike conventional shapes of diamonds, squares, and rectangles, the wall spikes look more agile and creative, like groups of dancing elves.

Thanks to the powder coating surface treatment, the original dull and mechanical wall spikes are presented with various attractive colors. You may customize appropriate colors to match well with the already existing barriers and surroundings.

LOW COST

Wall spikes are bound to be economical because of the easy-to-get raw materials and effective mechanized production. Additionally, you don't need to pay for high manpower expenditure to install the spikes as you can fix it easily by yourself.
