Appendix D. CoSOM domains of impact. Based on the interviews with CoSOM participants, the Santa Ana CoSOM has impacted the domains of Society, Governance, as well as Science & Technology as defined by Wehn et al. (2021). These domains are labeled with Demonstrated. Whereas those that are beginning to take shape are categorized as Emerging.

Domain	Santa Ana CoSOM	Current Stage
Society	Two studies on soil Pb informed the community. The community members were included in obtaining and disseminating results.	Demonstrated
Governance	Soil Pb is now addressed in the city's General Plan. The NIES Office establishes a governing body to address soil Pb. Support provided from the	Demonstrated
Science & Technology	A community based sampling effort was implemented using field and lab based XRF. Research was published in a peer reviewed journal.	Demonstrated
Environment	While soil Pb has been mapped with confidence, cleanup efforts are still in the planning stage.	Emerging
Economic	OCEJ is well established as the leading organization in addressing soil Pb. Grants and funding opportunities will continue to provide economic value to the community in conjunction with NIES.	Emerging
