THE TOWNSHIP OF MILLSTONE
COUNTY OF MONMOUTH
STATE OF NEW JERSEY

Mayor's Office

FOR IMMEDIATE RELEASE

MAYORAL STATEMENT: Thanksgiving Coastal Storm Briefing

Dear Residents, **DATE:** November 24th, 2026

The Township is closely monitoring a coastal storm expected to bring significant wind, heavy rainfall, and potential utility disruptions from **Wednesday, November 25 through Friday, November 27**. All residents are urged to take precautionary measures ahead of the holiday.

Expected Storm Timeline & Impacts

- **Wind Conditions:** Strong east-northeast winds will begin increasing **Wednesday night**, reaching peak intensity during the day on **Thursday** with inland gusts of **50–60 mph** possible. Winds will subside Thursday night, though breezy conditions with gusts of **40–50 mph** are expected to continue into **Friday**.
- **Rainfall & Localized Flooding:** Widespread rain will begin **Wednesday** and persist through **Friday**, with the heaviest rainfall occurring **Thursday through Thursday evening**. Total rainfall amounts of **1 to 3 inches** are expected, with localized totals up to **4 inches** possible. Fallen autumn leaves clogging storm drains may lead to localized roadway flooding.
- **Trees & Power Infrastructure:** Saturated soils combined with high winds significantly increase the risk of downed trees, broken limbs, and widespread power outages. JCP&L is actively bringing in out-of-state utility crews to bolster local restoration capabilities.

Resident Safety & Preparation Guidelines

- **Prepare for Power Outages:** Charge all mobile devices, medical equipment, and backup batteries prior to Wednesday evening. Keep flashlights, fresh batteries, and emergency supplies easily accessible.
- **Generator Safety:** Verify that stationary standby generators have been properly maintained and tested. If using a portable generator, ensure you have an adequate supply of fuel on hand. **Never operate a portable generator indoors, in a garage, or near open windows and doors** due to the risk of fatal carbon monoxide poisoning.
- **Clear Storm Drains:** If safe to do so before the storm arrives, please clear autumn leaves and debris from catch basins near your property to help prevent street flooding.
- **Downed Wires & Reporting: Treat every downed wire as if it is live and dangerous.** Stay well back and call **9-1-1** immediately to report downed wires, hazardous conditions, or power outages.

Please exercise caution if traveling for the Thanksgiving holiday, secure loose outdoor items, and check on elderly or vulnerable neighbors. Further updates will be issued through official Township channels as conditions develop.

Thank you.

Sincerely,

Al Ferro
