Why choose DNV certification?

A **DNV certification for DPO's** offers global recognition and proves that you meet the most stringent international standards for professional competence and safety in the maritime sector. Thanks to its registration in the online DNV database, your certificate can also be easily verified digitally by employers anywhere in the world.

DNV certification is carried out in accordance with the requirements set out in the Competence Standard for Dynamic Positioning Operators (DNV-ST-023)

You can obtain one of the following DNV/DP certificates (notations) through our VDAB Certification Body of Persons.

- DNV Limited (AJ/AutH): suitable for working on vessels with limited DP capacity (e.g. DP1 class). The focus is on mastering the basic skills and carrying out operations with a lower risk profile
- DNV Unlimited (AJ/S/FT-AT): this is the highest level you can achieve, enabling you to serve on all DP vessels. You will be trained to deal with advanced scenarios.

This certificate is valid for 5 years and can also be renewed through the VDAB CB of Persons.

The various steps in the certification, revalidation or upgrade process can be found via the links to the schemes on the site.
