- Sales/MSL
- Health Economics and Market Access
- Regulatory Affairs
- Investment Analyst
- Others

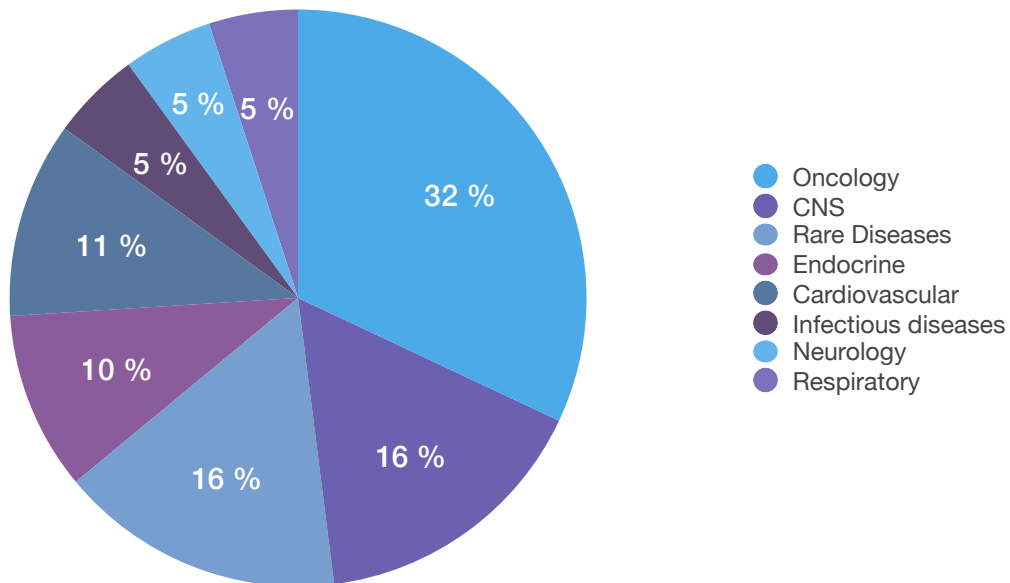

Within this sector, the range of professional opportunities is broadened for our students' profiles. The industry requires scientists with knowledge in business and management, capable of working in the pharmaceutical and biotechnological sector. Roles as project manager, marketing manager or innovation officer are some of the most required ones in drug discovery.

Type of Company

Barcelona offers a leading ecosystem in Life Sciences; our students join companies within the international healthcare sector. The type of companies and career opportunities for this type of profile are in the pharmaceutical industry and biotechnology-based companies, as well as others such as investment funds, consultancies and technology transfer offices from the best research institutions of Catalonia.

Therapeutic areas

Under the discover and transfer agreement our students participate in real drug candidates and develop projects in collaboration with three reference research centers in Barcelona. Some of the therapeutic areas we have been working in with our students are oncology, rare diseases and central nervous system.
