Apparently an advanced grade
1897-99
Boys & girls

1897.
Sept. 30.

During this month there have been only eleven days of regular school work in this room owing to the changes made in the school department. Five of the eleven days were spent in letter writing.

Fred Bally has read in "Andersen's Fairy Tales" from page 238 through page 257. Three lessons have given him 60 new words to spell and define. In history Fred has had the work in the text book from page 124 to page 136. the first two years of the Civil War and what led to it. In geography Fred has taken up pages 92 and 93 in the text book - having in addition written work upon "Cotton". In Arithmetic Book III. Fred has done the work on pages 49 and 50 - to the seventh problem on page 51. Fred's grades for the time are as follows:

Spelling 8.
Reading 7 5/6
History 8
Geography 7½
Arithmetic 8⅓.

Theodore Boehland has read in the St. Cyr third reader from the first page through the teach, marking and spelling the 36 new words. He has woven into sentences 24 of these words. In Book I. Prince's arithmetic Theodore worked the examples from page 83 through page 86 - finishing the book and in Book II. has worked from page 1 through page 4. His standing for the time is as follows:

Spelling 8½
Reading 7
Arithmetic 7 4/5
Language 6½

1897
Sept. 30.

Eddie Vennevest has read in St. Cyr third reader from the first page through the tenth, marking and spelling the 36 new words. He has written sentences using 24 of these words. In arithmetic Prince's arithmetic Book I. he has worked the examples from page 83 through page 86 - finishing the book and in Book II. from page 1 through page 4. Arithmetic seems difficult for Eddie. His standing for the time is as follows:

Spelling 9
Reading 7½
Arithmetic 9
Language 6¾.

Ray Downey has read in "Andersen's Fairy Tales" from page 238 through page 257. These lessons have given him 60 new words to spell and define. In history Ray has had the work in the first book from page 124 to page 135 - covering the ten years before the Civil War - and the first two years of the war. In geography he has had the work on pages 92 and 93 - having extra written work on "Cotton". In Prince's Arithmetic Book II. Ray has worked the examples from page 46 through page 49 involving addition, subtraction, multiplication and division of fractions. His average standing for the time is as follows:

Spelling 10
Reading 8½
History 9¾
Geography 9
Arithmetic 9⅜.

Harry Sales has been in the room only three days; has been transferred to Sunnyside.

1897.
Sept. 30.

Joe Hatch has read in the St. Cyr third reader from the first page through the tenth - marking and speling the 36 new words. He has used 24 these words in written sentences of his own. In Prince's Arithmetic Book I. Joe worked the examples from page 83 through page 86 - finishing the book - and in Book II has worked from page 1 through page 4. The work in Book II. has been a review of the addition subtraction, multiplication and division of the numbers up to 20. His average standing is as follows.

Spelling 6⅞.
Reading 7.
Arithmetic 10.
Language 6½.

Henry King has read in "Andersen's Fairy Tales" from page 238 through page 257. These lessons have given him 60 new words to spell and define. In history Henry has had in the text book - Gordrich's History - the work from page 124 to page 135 covering the first two years of the Civil War - also the ten years preceding the War. In Arithmetic Henry has worked the examples in Prince's Arithmetic Book I. from page 83 through page 86 - finishing the book - and in Book II. from page 1 through page 4. His average standing for the time is as follows:

Spelling 6.
Reading 8½.
History 7.
Arithmetic 10.

Theodore Maas has read in "Andersen's Fairy Tales" from page 238 through page 257. These lessons have given him 60 new words to spell and define. In history - Gordrich's - he has had the work from page 124 to page 135 - covering the first two years of the Civil War and the ten

1897
Sept. 30.

preceding years. In Frye's geography he has had the work on pages 92 and 93. with additional written work on "Cotton". In Prince's Arithmetic Book IV. Theodore has worked the examples from page 46 through page 49. Theodore's work is intelligent and satisfactory. His average standing for the time is as follows:

Spelling 10
Reading 9½
History 10
Geography 10
Arithmetic 9¾

George McGraw has read in "Andersen's Fairy Tales" from page 238 through page 257. These lessons have given him 60 new words to spell and define. In Goodrich's History he has had the work from page 124 through page 135- covering the ten years preceding the Civil War and the first two years of the war itself. In Frye's geography he has had the work upon pages 92 and 93- upon Cotton and Corn- with additional written work upon Cotton. In Prince's Arithmetic Book I. George has worked the examples from page 83 through page 86- finishing the book and in Book II. the examples from page 1 through page 4- the latter being a review of the numbers up to 20. George finds his work in arithmetic quite difficult. His average standing is as follows:

Spelling 10
Reading 8¾
History 8¾
Geography 8
Arithmetic 7

Louis Miller has read in the St Cyr third

1897
Sept. 30

reader from the first page through the tenth. He has had 36 new words to mark, spell and define. In Prince's arithmetic Book I. Louis has worked the examples from page 83 through page 86- finishing the book- and in Book II. has worked the examples from page 1 through page 4- the latter work being a review of the numbers from 1 to 20. His average standing is as follows:

Spelling 9
Reading 8
Arithmetic 9
Language 9

Frank Parke has read in "Andersen's Fairy Tales" from page 238 through page 257. These pages have given him 60 new words to spell and define. In Goodrich's history he has had the work from page 124 through page 135- covering the ten years preceding the Civil War and the first two years of the war. In Frye's geography he has had the work upon pages 92 and 93- subjects "Cotton" and "Corn"- He has had extra written work on "Cotton". In Prince's Arithmetic Book III. Frank has done the examples on pages 49 and 50 and half of the examples on page 51. These problems are in the line of business transactions- requiring quite a little reasoning power. His average standing is as follows:

Reading 9
Spelling 10
History 8
Geography 6¾
Arithmetic 8

Martin Polchow has read in "Andersen's Fairy Tales" from page 238 through page 257. These pages have given him 60 new words to spell and define. In Goodrich's history

1897
Sept. 30.

he has had the work from page 124 through page 135 - covering the ten years preceding the Civil War and the first two years of the war. In Frye's geography he has taken page 92 and 93 the subjects being "Cotton" and "corn". He has had extra written work on "Cotton". In Prince's arithmetic Book III. Martin has worked the examples on pages 49 and 50 and half of those on page 51. These problems in business transactions have required considerable reasoning power. His average standing is as follows:

Spelling. 9½
Reading 8
History 8
Geography 8½.
Arithmetic 8

Bertha Atkins does no school work whatever and seems to take no interest in what goes on in the room.

Borthilda Cliffey has read in the Cyr third reader from page 1 through page 10. She has had 36 new words to mark and spell. 24 of which she has woven into sentences of her own. In Prince's arithmetic Book I. Borthilda has done the work from page 2 through page 6 - taking the numbers from 1 to 8. This is the first work Borthilda has done in this room and grade. She has seemed half afraid - and so has not done as well as she seems capable of doing. Her average standing for the time is as follows:

Spelling 6½
Reading 7
Arithmetic. 5
Language. 5

1897.
Sept. 30.

Ida Erno has read in "Andersen's Fairy Tales" from page 135 through page 158. These lessons have given her 72 new words to spell and define. In history she had in the text-book - Goodrich's - the work from page 100 to the middle of page 104 - the causes of the war of 1812 - and a part of the war itself. In Frye's geography she had had the work from page 55 through page 58 - with reference to the people of Southern Africa - and of Japan. In Prince's Arithmetic Book III. she has worked the examples on pages 49 and 50. Her average standing for the time is as follows:

Spelling 8⅘
Reading 8½
History 9
Geography 7½
Arithmetic. 8

Ella May Floyd has read in the Cyr third reader from page 1 through page 10. She has had 36 new words to mark and spell. 24 of which she has used in written sentences of her own. In Prince's Arithmetic Book I. she has done the work from page 2 through page 6 - involving the numbers from 1 to 8. Her average standing for the time is as follows:

Spelling 8
Reading 7½
Arithmetic 7½
Language. 5

Flossie Floyd has read in the Cyr third reader from page 1 through page 10. These pages have given her 36 new words to mark and spell. 24 of which she has woven into written sentences of her own. In Prince's arithmetic Book I. she has

1897
Sept. 20.

done the work from page 2 through page 6. using the numbers from 1 to 8. Her average standing for the time is as follows:

Spelling 9
Reading 8½
Arithmetic 8¾
Language. 7½

Esther Gallentyne has read in the Cyr third reader from page 1 through page 10. She has had in these lessons 36 new words to spell, mark and define. 24 of these she has woven into written sentences of her own. In Prince's arithmetic Book I. She has worked the examples from page 2 through page 6. using the numbers from 1 to 8. Her average standing for the time is as follows:

Spelling 9½
Reading 8½
Arithmetic 9
Language. 7½

Nellie Garvey has read in "Andersen's Fairy Tales" from page 132 through page 158. These lessons have given her 81 new words to spell and define. In Goodrich's history Nellie has had the work from page 100 to the middle of page 104. covering the causes of the war of 1812 and a part of the War itself. In Frye's Geography she has had from page 55 through page 58, the work being in regard to the people of Southern Africa and Japan. In Prince's Arithmetic Book IV. Nellie has worked from page 46 to the middle of page 49. The examples are in addition, subtraction multiplication and division of fractions and of mixed numbers. Her standing for the time is as follows:

1897
Sept. 20.

Spelling 9¾
Reading 8½
History 9
Geography 9
Arithmetic. 9

Gladys Holman has read in the Cyr third reader from page 1 through page 10. These lessons have given her 36 new words to mark, define and spell. 24 of these words she has used in written sentences of her own. Gladys is a poor penman and her language work suffers because of it. In Prince's Arithmetic Book I. Gladys has worked from page 2 through page 6. the work being upon the numbers from 1 to 8. Her average standing is as follows:

Spelling 9
Reading 8½
Arithmetic 7½
Language. 6

Julia Saunders has been in the hospital quite a little during this half month but has in spite of that taken hold of the work with a good deal of interest. In the Cyr third reader she has read from page 1 through page 10. These pages have given her 36 new words to spell and define. She has used 24 of these in written sentences of her own. In Prince's Arithmetic Book I. she has worked from page 1 through page 6. examples involving the numbers from 1 to 8. Her average standing is as follows:

Spelling 9
Reading 8
Arithmetic 6
Language. 6

1897.
Sept. 30.

May Little has read in "Andersen's Fairy Tales" from page 132 through page 158. These lessons have given her 81 new words to spell and define. In Goodrich's history she had had the work from page 100 to the middle of page 104. upon the causes of the war of 1812 and a part of the war itself. In Dryer's geography she has had from page 55 through page 58, the work being in regard to the people of Southern Africa and Japan. In Prince's Arithmetic Book IV. May has worked from page 46 to the middle of page 49. work upon fractions - and mixed numbers. May is quite dependent in her arithmetic seldom seems sure that she has her work correct. Her standing is as follows:

Spelling	9
Reading	8½
History	7
Geography	7
Arithmetic	7½

Bertha Maurer has read in the 6th third reader from the beginning through the tenth page. She has had 36 new words to mark, spell and define. She has used 24 of these words in written sentences of her own. Bertha writes very nicely. Her language work is always neatness itself - and has merit also as language work. In Prince's arithmetic Book I. She has had from page 2 through page 6. the work being upon the numbers from 1 to 8. Her average standing is as follows:

Spelling	9⅔
Reading	7½
Arithmetic	7¾
Language	7½

Nena Miller has read in "Andersen's

1897.
Sept. 30.

Fairy Tales" from page 132 through page 158. These lessons have given her 81 new words to spell and define. In Goodrich's history she has had from page 100 to the middle of page 104. upon the causes of the War of 1812 and a part of the war itself. In Dryer's geography she has had from page 55 to page 59. the work being in regard to the people of Southern Africa and of Japan. In Prince's Arithmetic Book III. She has worked the examples on pages 49 and 50. the work being upon U.S. Money. Her average standing is as follows:

Spelling	9½
Reading	8
History	8
Geography	7¾
Arithmetic	8½

Hattie Metz has read in "Andersen's Fairy Tales" from page 132 through page 158. These lessons have given her 81 new words to spell and define. In Goodrich's history she has had from page 100 to the middle of page 104. upon the causes of the War of 1812 and a part of the war itself. In Dryer's geography she has had from page 55 to page 59, the work being upon the people of Southern Africa and of Japan. In Prince's Arithmetic Book III. She has worked the examples on pages 49 and 50. expressing fractional parts of a dollar in U.S. money and then performing the required operations. Her average standing is as follows:

Spelling	9½
Reading	9
History	7¾
Geography	8½
Arithmetic	9½

Mary Pourrier has read in "Andersen's

1897
Sept. 30.

Fairy Tales" from page 132 through page 158. These lessons have given her 81 new words to spell and define. In Goodrich's history she has had from page 100 to the middle of page 104- the causes of the war of 1812 and a part of the war itself. In Frye's geography she has had from page 55 to page 59- work upon the people of Southern Africa and of Japan. In Prince's Arithmetic Book I. She has worked from page 2 through page 6. the work being upon the numbers from 1 to 8. Her standing is as follows:

Spelling 9
Reading 8
History 7 3/4
Geography 7
Arithmetic 10

Mary Pierce has read in "Andersen's Fairy Tales" from page 132 through page 158. These lessons have given her 81 new words to spell and to define. In Goodrich's history she has had from page 100 to the middle of page 104- the causes of the civil war and a part of the war itself. In Frye's geography she has had from page 55 to page 59- work being upon the peoples of Southern Africa and of Japan. In Prince's Arithmetic Book III. She has worked the examples on pages 49 & 50- changing fractional parts of a dollar to U.S. Money and then performing the required operations. Her average standing is as follows:

Spelling 9 4/5
Reading 8
History 7 1/2
Geography 8 3/4
Arithmetic. 9 1/2

Mary Porter has read in the 6th third read-

1897
Sept. 30.

er from the beginning through the tenth page. These lessons have given her 36 new words to mark, spell and define. She has used 24 of these words in written sentences of her own. She seems to have a good understanding of things in general as does her language work shows. In Prince's Arithmetic Book I. she has worked from page 2 through page 6- the work being upon the numbers from 1 to 8. Her average standing is as follows:-

Spelling 8 1/2
Reading 7 1/2
Arithmetic 9
Language- 8

Mary Riles has read in the 6th third reader from page 1 through page 10. These pages have given her 36 new words to spell- define and mark. She has used 24 of these words in written sentences of her own. In Prince's Arithmetic Book I. she has worked from page 1 through page 6- operations upon the numbers from 1 to 8. Her average standing is as follows:

Spelling 9
Reading 8 1/2
Arithmetic 9
Language- 7 1/2.

Oct. 29

Fred Batty has been in school twenty days this month. He has read in Andersen's "Fairy Tales" from page 257 through page 280- thus finishing the book. These pages have given him 69 new words to define and spell. In Goodrich's history Fred has had from page 136 through page 164- finishing the book. with additional work from other histories. This has covered the history from 1863 to the

1897
Oct. 29

present administration. In Frye's Primary Geography he has had work upon different products of the U. S. through page 98. In Prince's Number III. arithmetic he has done the work from the Seventh Problems page 51 through page 57. the work being in bills and other problems in U. S. currency, and in the tables of weights and measures. Fred has written one letter and has a second one nearly finished. Fred writes a good hand & makes but few mistakes of any kind in writing a letter. His letters are inclined to be a series of questions. His average standing is as follows:

Spelling	6
Reading	8
History	8
Geography	9½
Arithmetic	9½
Letter-writing	9

Theodore Boehland has been in School 21 days this month. In the Cyr "Third Reader" he has read from page 11 through page 29. These lessons have given him 50 new words to mark, define and spell. He has woven the 50 words into written sentences of his own. In Prince's "Number Two" arithmetic Theodore has worked from page 4 through page 23. dealing with gills, pints and quarts - also tens and units. Theodore has written 4 letters this month. His letters are short but well composed and neatly written. His average standing is as follows.

Spelling	9 3/5
Reading	8 4/5
Arithmetic	9 3/5
Language	8 1/4
Letter writing	8 3/5

1897
Oct. 29

Harlie Brockway entered school Monday Oct. 18th and has been present 8 days. In the Cyr "Third Reader" he has read from page 20 through page 29. having 30 words to mark, define and spell. He has woven these words into sentences of his own. In Prince's Arithmetic "Number Two" he has had from page 10 through page 23. dealing with pints and quarts, tens and units. Harlie is a very poor reader but seems to enjoy his number work. His average standing for the two weeks is as follows:

Spelling.	5
Reading	7
Arithmetic	8½
Language.	5

Eddie Hemorest has been in school the 21 days of the month. In the Cyr "Third Reader" he has read from page 11 through page 29. These lessons have given him 50 new words to mark, define and spell. He has used these words in written sentences of his own. In Prince's Arithmetic "Number Two" Eddie has worked from page 4 through page 23 dealing with gills, pints quarts, money - also tens and units. Eddie has written two letters this month. His letters contain items of interest and answer questions in the letters which he has received. He is however a poor penman. His average standing for the month is as follows:

Spelling	8 3/5
Reading	8 3/5
Arithmetic	9½
Language	9 1/5
Letter writing.	7

Ray Downey has been in school the 21 days of the month. In Andersen's "Fairy Tales" he has read from page 257 through page 280. These

1897

Oct. 29

pages have given him 69 new words to define and spell. In Goodrich's History he has had from page 136 through page 164 thus finishing the book. This work has covered the time from 1863 to the present administration. In geography he has had from page 93 through page 98 taking up different resources of our country. In Prince's Arithmetic "Number Four" Ray has worked from page 49 through page 59 dealing with fractions up to twelfths. He has written two letters this month. Ray writes slowly but his letters are well composed and neatly written. His standing is as follows:

Spelling	9 4/5
Reading	8 1/2
History	9/8
Geography	9 3/3
Arithmetic	9 3/5
Letter-writing	9/4

Joe Hatch has been in school 20½ days this month. He has read in the Cyr "Third Reader" from page 11 through page 29. These lessons have given him 50 new words to mark, define, spell and to use in written sentences of his own. In Prince's Arithmetic "Number Two" he has worked from page 4 through page 23 - dealing with gills, pints and quarts also tens and units. Joe has written one letter this month - Joe finds letter writing and language work of any kind quite difficult because of the spelling. His standing is as follows:

Spelling	7 1/2
Reading	8 4/5
Arithmetic	9 4/5
Language	8 3/5
Letter-writing	7/2

Henry King has been in school the 21 days of the month. In Andersen's "Fairy Tales"

1897.

Oct. 29.

he has read from page 257 through page 280. These lessons have given him 69 new words to spell and define. In Goodrich's History he has had from page 136 through page 164, thus finishing the book. This work has covered the time from 1863 to the present administration. In Fryer's Geography he has taken up different resources of the U.S. through page 98. In Prince's Arithmetic "Number Two" Henry has worked from page 4 through page 23 - dealing with gills, pints and quarts - also tens and units. His standing is as follows:

Spelling	8
Reading	8 1/2
Geography	9
History	7 7/10
Arithmetic.	10

Theodore Maas has been in school 16½ days this month. In Andersen's "Fairy Tales" he has read from page 257 through page 280 - thus finishing the book. These lessons have given him 69 new words to spell and define. In Goodrich's History he has had from page 136 through page 164, finishing the book. This work has covered the time from 1863 to the present administration. In Fryer's Geography he has taken up different resources of the U.S. through page 98. In Prince's Arithmetic "Number Four" he has worked from page 49 through page 59 - dealing with fractions up to twelfths in problems requiring quite a good deal of reasoning. Theodore has written but one letter this month. Theodore worked hard the first three weeks of the month but the last week has seemed nervously exhausted. His standing for the month is as follows:

Spelling	10
Reading	9 1/4
History	9 1/4

1897-
Oct. 29

Geography 10
Arithmetic $9\frac{3}{5}$
Letter-writing 6.

George McGraw has been in school the 21 days of the month. In Andersen's "Fairy Tales" he has read from page 257 through page 280- thus finishing the book. These pages have given him 69 new words to spell and define. In Goodrich's History George has had from page 136 through page 164- finishing the book. This work has covered the time from 1863 to the present administration. In Frye's "Primary Geography he has had different resources of the U. S. through page 98. In Prince's Arithmetic "Number Two" George has worked from page 4 through page 23- dealing with gills, pints and quarts also tens and units. Number work George finds difficult. He has written two letters this month- short but well composed and quite neatly written. His standing is as follows:

Spelling 8
Reading 9
History $8\frac{1}{2}$
Geography 10
Arithmetic $8\frac{1}{2}$
Letter writing $8\frac{1}{4}$

Louis Miller has been in school 18 days this month. In the Cyr "Third Reader" he has read from page 11 through page 29. These lessons have given him 50 new words to mark, spell, define and use in written sentences of his own. In geography- Frye's "Primary" he has taken up different resources of the U. S. through page 98. In Prince's Arithmetic, "Number Two" Louis has worked from page 4 through page 23- dealing with gills, pints and quarts also tens and units. His average

1897-
Oct. 29- standing for the month is as follows:

Spelling $8\frac{1}{2}$
Reading 8
Geography 8
Arithmetic $7\frac{1}{2}$
Language- $7\frac{2}{3}$

Frank Parker has been in school the 21 days of the month. In Andersen's "Fairy Tales" he has read from page 257 through page 280- finishing the book. These pages have given him 69 new words to spell and define. In Goodrich's History he has had from page 136 through page 164- finishing the book. This work has covered the time from 1863 to the present administration. In Frye's "Primary Geography "Frank has had different resources of the U. S. through page 98- In Prince's Arithmetic "Number Three" Frank has had from the seventh problem page 51 through page 57 the work being in bills and other problems in U. S. currency also problems in weights and measures- Frank has written two letters this month. He writes a good hand- and in time produces quite a good letter- Although using a good deal of care, he is apt to make a heavy blot or make some mistake necessitating a re-writing of his letter- His average standing is as follows:

Spelling. $9\frac{1}{7}$
Reading $8\frac{4}{5}$
History $8\frac{1}{2}$
Geography $9\frac{2}{3}$
Arithmetic $8\frac{3}{5}$
Letter writing. $8\frac{3}{4}$

Martin Polchow has been in school the 21 days of the month. In Andersen's "Fairy Tales" he has read from page 257 through page 280- finishing the book. He has had 69

1897
Oct. 29

new words & spell and define. In Gordrich's History he has had from page 136 through page 164 the time from 1863 & the present administration. In Frye's "Primary Geography" he has taken of different resources of the U. S. through page 98. In Prince's Arithmetic "Number Three" he has done the work from the Seventh Problem 61 through page 67 - problems in U.S. currency and in weights and measures. He has written four letters this month - two being in German. His average standing is as follows:

Spelling	8
Reading	8⅙
History	8⅔
Geography	9⅓
Arithmetic	9½
Letter writing	8½.

Bertha Akins has been in the school-room the 21 days of the month. She has done no school work but has quietly looked over first one book and then another.

Flora Austin entered school Thursday, Oct. 31, and has been in attendance 7 days. She is right-handed - sees and hears well - but has made but little progress during her five years of public school work. Flora does not read well - stops frequently and repeats the last two or three words several times before going on. She writes fairly well but when given anything to copy does not do it carefully - will omit letters or words or insert letters. Her "n's" "m's" and "u's" are seldom formed correctly. She can write numbers from 1 to 100 and can do a little work in addition. Flora has read during these 7 days in the Cyr "Third Reader" from

1897
Oct. 29

page 22 through page 31 and has had 21 words to spell and define. In Prince's Arithmetic "Number One", she has done the work on pages 16, 17 and 18. Flora has written one letter - poorly composed - and with many misspelled words. She didn't write the pages in order - left spaces - etc - so her letter presented an unneat appearance. Flora is willing to try and will, without question, make considerable improvement. Her standing for these few days is as follows:

Spelling	7½
Reading	6¾
Arithmetic	9
Language	4
Letter writing	5

Bothilde Eliplef has been in school 20 days this month. In the Cyr "Third Reader" she has read from page 10 through page 31. These pages have given her 00 new words to mark, define, spell and use in written sentences of her own. In Prince's arithmetic "Number One" Bothilde has worked from page 6 to page 18 - the work being upon the numbers from 1 to 10. Bothilde is improving in her use of language. She has written 3 letters this month and has a fourth nearly finished. Her letters are of good length and neatly written but are crude in expression. Her standing for the month is as follows:

Spelling	7½
Reading	8⅓
Arithmetic	8⅞
Language	8⅗
Letter writing	8¼.

Ida Erno has been in school 21 days this month. In Andersen's "Fairy Tales" she

1897-
Oct. 29.

has read from page 189 to page 191. These pages have given her 96 new words to spell and define. In Goodrich's History she has had from page 104 to page 124- finishing the War of 1812- and taking up the Mexican War with the intervening history. In Frye's Geography she has had from page 59 to page 69- accounts of the people of Java, Lapland, the Eskimos, the American Indians and the Arabs. In Prince's Arithmetic "Number Three" Ida has worked from page 57 to page 76- bills and other problems in U.S. currency also in avoirdupois weight. Ida has written three letters. Her letters are long, neatly and yet quite quickly written. They are inclined to be flowery- aside from that are well composed. Her standing for the month is as follows:

Spelling	8 7/9
Reading	8 4/5
History	8 2/5
Geography	9 1/3
Arithmetic	8 7/10
Letter writing	9 1/4

Ella May Floyd has been in school the 21 days of the month. In the Cyr "Third Reader" she has read from page 11 to page 32. These pages have given her 50 new words to mark, define, spell and use in written sentences of her own. In Prince's Arithmetic "Number One" she has worked from page 6 to page 18- the work being upon the numbers from 1 to 10. She has written one letter this month- quite short- but neat. Her standing for the month is as follows:

Spelling	9 3/5		
Reading	8 3/10	Letter writing	7 1/2
Arithmetic	9 2/5		
Language	7 4/5		

1897-
Oct. 29-

Flossie Floyd has been in school the 21 days of the month. In the Cyr "Third Reader" she has read from page 11 to page 32- having 50 new words to mark, spell, define and use in written sentences of her own- In Prince's Arithmetic "Number One" she has ~~worked~~ from page 6 to page 18- the work being upon the numbers from 1 to 10- Flossie has written 2 letters this month- neat and quite well composed. Her standing is as follows:

Spelling	9 4/5
Reading	9
Arithmetic	9 7/10
Language	9 2/5
Letter writing	8

Esther Gallentyne has been in school 17 days this month. In the Cyr "Third Reader" she has read from page 11 to page 32 having 50 new words to mark, define, spell and use in written sentences of her own. In Prince's Arithmetic "Number One" she has worked from page 6 to page 18- the work being upon the numbers from 1 to 10. Esther has written one letter this month- short but quite neat. Her standing for the month is as follows:

Spelling	9
Reading	8 2/5
Arithmetic	9 7/10
Language	9 1/2
Letter writing	7 1/2

Nellie Garvey has been in school 20 1/2 days this month. In Andersen's "Fairy Tales" she has read from page 159 to page 191- having 96 new words to spell and define. In Goodrich's History she has had from page 104

1897.

Oct. 29. & page 124 - finishing the War of 1812 - and having the Mexican War with - the intervening history. In Frye's Primary Geography she has had from page 59 & page 69, accounts of the Malays, the Lapps, the Eskimos, the American Indians and the Arabs. In Prince's Arithmetic "Number Four" she has worked from page 49 & page 58 - exercises in fractions up & multiples - Nellie has written 5 letters this month - all of good length - Nellie writes easily - is occasionally too free and familiar - Her standing for the month is as follows:

Spelling	9 3/5
Reading	8 9/10
History	9
Geography	9 1/5
Arithmetic	9
Letter writing	7 4/5

Gladys Holman has been in school the 21 days of the month. She has read in the Cyr "Third Reader" from page 11 & page 32. having 50 new words to mark, spell, define and use in written sentences of her own. In Prince's Arithmetic "Number One" she has worked from page 6 & page 18 - the work being upon the numbers from 1 & 10. Gladys has written four letters this month, letters of interest and of, from 2 & 3, pages in length. Her letters are filled with mistakes as m for n, r for m transposed letters etc. and this holds true even after her first copy has been corrected and her attention called to the errors. Gladys however tries and so will improve. Her standing is as follows;

Spelling	8 1/3	Letter writing	6 1/4.
Reading	9		
Arithmetic	8 3/5		
Language	9		

1897.

Oct. 29. Julia Launders has been in school the 21 days of the month. In the Cyr "Third Reader" from page 11 & page 32. having 50 new words to spell, mark, define and use in written sentences of her own. In Prince's Arithmetic "Number One" she has worked from page 6 & page 18 - dealing with the numbers from 1 & 10. Julia has written two letters this month - neat and well composed - Her standing for the month is as follows;

Spelling	9 1/5
Reading	8
Arithmetic	9
Language	8 3/10
Letter-writing	8 1/4

May Little has been in school the 21 days of the month. She has read in Andersen's "Fairy Tales" from page 139 & page 191, having 96 new words to define and spell. In Goodrich's History she has had from page 104 & page 124, finishing the War of 1812 - having the Mexican War and the intervening history. In Frye's Geography she has had from page 59 & page 69, accounts of the Malays, the Lapps, the Eskimos, the American Indians and the Arabs. In Prince's Arithmetic No. 4 she has worked upon page 49 - in addition, Subtraction, Multiplication and division of fractions up & multiples - Her work in arithmetic is very unsatisfactory - She has written 5 letters this month, 2 being very long. Her letters are made unpleasant ones by asking for money etc. and finding fault with her brothers and sisters for not writing. Her standing is as follows;

Spelling	9 1/5	Geography	8 3/5
Reading	9 1/6	Arithmetic	5
History	8 3/10	Letter writing.	7 4/5

1897
Oct. 29.

Bertha Maurer has been in school 17 days this month. In the Cyr "Third Reader" she has read from page 11 to page 32, having 50 new words to mark, spell, define and use in sentences, written, of her own. In Prince's arithmetic "number One" she has worked from page 6 to page 18. with the numbers from 1 to 10. Bertha has written two letters. Her letters are very nicely written and ideal in neatness. Her standing is as follows;

Spelling	6⅔
Reading	8½
Arithmetic	9⅗
Language	9⅖
Letter writing	9

Nena Miller has been in school the 21 days of the month. In Andersen's "Fairy Tales" she has read from page 159 to page 191, having 96 new words to spell and define. In Goodrich's History she has had from page 104 to page 124. finishing the War of 1812 - taking up the Mexican War and the intervening history. In Frye's Geography she has had from page 59 to page 69, accounts of the Malays, the Lapps, the Eskimos, the American Indians and the Arabs. In Prince's Arithmetic "Number Three" she has worked from page 51 to page 56. Bills and other problems in U.S. currency also in avoirdupois weight. Nena has written two letters this month. Her standing for the month is as follows:

Spelling	9⅗
Reading	8⅗
History	9⅕
Geography.	9⅕
Arithmetic	7½
Letter writing	7¾

1897.
Oct. 29.

Hattie Netz has been in school the 21 days of the month. In Andersen's "Fairy Tales" she has read from page 159 to page 191 having 96 new words to spell and define. In Goodrich's History she has had from page 104 to page 124. finishing the War of 1812 - and having the Mexican War with - the intervening history. In Frye's Geography she has had from page 59 to 69, accounts of the Malays, the Lapps, the Eskimos, the American Indians and the Arabs. In Prince's Arithmetic "Number Three" she has worked from page 51 to page 56, bills and other problems in U.S. currency and also problems in avoirdupois weight. Hattie has written 5 letters this month - almost all long letters. Hattie's letters are characterized by her statements first of happiness and then of unhappiness. Her standing is as follows;

Spelling	9⅕
Reading	9⅒
History	9⅖
Geography	9⅗
Arithmetic	9¾
Letter writing	7⅗

Mary Pierce has been out of school the entire month - because of trouble with her eyes. She has however written two long letters. Mary writes a good letter and does it easily. Her standing in Letter writing is - 8½

Mary Portner has been in school 11 days this month. In the Cyr "Third Reader" she has read from page 11 to page 20. having 20 new words to mark, spell define and use in writing sentences of her own. In Prince's Arithmetic "Number One" Mary worked from page 6 to 12. the

1897
Oct 29

work being upon the numbers from 1 to 10.
Her standing is as follows:

Spelling	5 2/3
Reading	8
Arithmetic	10
Language	9 1/2

Mary Pourrier has been in school the 21 days of the month. In Andersen's "Fairy Tales" she has read from page 159 to 191, having 96 new words to define and spell. In Goodrich's History she has had from page 104 to page 124 finishing the War of 1812 - and having the Mexican War with the intervening history. In Frye's Geografhy she has had from page 59 to page 69 accounts of the Malays, the Lapps, the Eskimos, the North American Indians and the Arabs. In Prince's Arithmetic "Number One" she has worked from page 6 to page 18. dealing with the numbers from 1 to 10. Her standing is as follows: (Mary has written two letters this month).

Spelling	9
Reading	8 1/10
History	8 2/5
Geografhy	9 1/5
Arithmetic	9 3/5
Letter writing	8 1/4

Mary Riles has been present 20 days this month. In the Cyr "Third Reader" she has read from page 11 to page 32. having 50 new words to mark, spell, define and use in written sentences of her own. In Prince's Arithmetic "Number One" she has worked from page 6 to page 18. working with the numbers from 1 to 10. Mary has written one letter this

1897
Oct. 29.

month. Her standing is as follows:

Spelling	9 1/2
Reading	8 7/10
Arithmetic	9 4/5
Language	8 3/5
Letter writing.	7 1/2.

Nov. 30.

Fred Batty has been in school 14 1/2 days this month. In Steele's Physiology Fred has read, and recited from the first chapter - page 3 through page 23 - This chapter is upon the Skeleton. In history he has had review work - taking up the different presidents. In Frye's Geografhy he has had from page 99 to page 108 - taking up the different routes of trade - the chief cities of the U. S. - also the countries Canada, Mexico, Brazil, Argentine Republic and Chile. In Prince's Arithmetic - Book III - he has worked from page 58 to page 63. the work being in different tables of denominate numbers. He has written 2 letters this month. His average standing is as follows:

Reading.	9
Physiology.	8
History	9
Geografhy	9
Arithmetic	9 1/4
Letter writing	9 1/4

Theodore Boehland has been in school 20 days this month. In the Cyr "Third Reader" he has read from page 30 to page 60. These lessons have given him 66 new words to define, mark, spell and use in written sentences of his own. This month Theodore began Frye's Geografhy and has had from page 1 to the middle of page 6.

1897.
Nov. 30.

The work has been mainly upon hills, slopes and Streams. In Princes Arithmetic Number Two he has had from page 24 to page 41. involving addition and subtraction where it is necessary to carry and borrow one. Theodore has written 3. letters this month - all short but neatly written. His average standing is as follows:-

Spelling	9¾
Reading	8
Geography	8
Arithmetic	8½
Language	9
Letter writing	8½

Harlie Brockway was in school this month 11 days before he was transferred to Sunnyside. In the Cyr "Third Reader" he read from page 30 to page 45. having 27 new words to spell, define, mark and use in written sentences of his own. Harlie began Frye's Geography having from page 1 to page 4 upon hills and Streams. In Princes Arithmetic Number Two he worked from page 24 to page 32 - involving addition and subtraction where it is necessary to carry and borrow one. His standing for the time is as follows:

Spelling	7½
Reading	7
Geography	8
Arithmetic	9
Language	7½

Eddie Kenorest has been in school 20 days this month. In the Cyr "Third Reader" he has read from page 20 to page 66. These lessons have given him 66 new words to define, mark, spell and use in

1897.
Nov. 30.

written sentences of his own. Eddie was delighted in beginning this month Frye's Geography in which he has had from page 1 to the middle of page 6. upon hills and Streams, soil and water. In Princes Arithmetic Number Two he has had from page 24 to page 41. involving addition and subtraction where one is carried or borrowed. Eddie has written 3 letters this month. Eddie has tried to have his written work as neat as can be - but his hand writing is poor. His standing is as follows:

Spelling	9¾
Reading	8½
Geography	8
Arithmetic	9
Language	9
Letter writing	7

Ray Downey has been in school 20 days this month. In Steele's Physiology he has read and recited from page 3 to page 24. the work being upon the Skeleton. In history as the new books have not come he has had review work upon the Presidents. Ray has taken considerable pride in writing upon paper and on the board the names of all the presidents with dates of term - all this without reference to any book. In Frye's Geography he has had from page 99 to page 108. taking up the routes of trade, the principal cities of the U.S. and the countries. Canada, Mexico, Brazil, Argentine Republic and Chile. In Princes Arithmetic Book Four he has had from page 60 to page 73. work upon decimals & thousandths. Ray has done well in learning to write,

1897
Nov. 30.

add, subtract, multiply and divide decimals. He has written 3 letters this month. His average standing is as follows:

Reading	9⅛
Physiology	9⅗
History	10
Geography	10
Arithmetic	9⅞
Letter writing	9½

Joe Hatch has been in school 20 days this month. He has read in the Cyr Third Reader from page 30 to page 60. These lessons have given him 66 new words to define, mark, spell and use in written sentences of his own. Joe was pleased to begin the study of Geography. In Frye's Geography he has had from page 1 to the middle of page 6 - upon hills and streams, soil and water. In Prince's Arithmetic Number Two he has worked from page 24 to page 41 - addition and subtraction where 1 is carried or borrowed. Joe has written 2 letters this month - taking a great deal of pains to have them neatly written. His standing is as follows:

Spelling	9
Reading	8¾
Geography	8
Arithmetic	9
Language	9
Letter writing	7½

Henry King has been in school 20 days this month. In Steele's Physiology he has read and recited from page 3 to page 24 the work being upon the Skeleton. In history he has had review work upon the different

1897
Nov. 30

presidents. In Frye's Geography he has had from page 99 to page 108 - routes of trade, most important cities of the U. S. and the countries, Canada, Mexico, Brazil, Argentine Republic and Chile. In Prince's Arithmetic Book Two he has worked from page 24 to page 41. addition and subtraction where 1 is carried or borrowed. Henry does quickly whatever he undertakes - He spends some of his extra time in drawing beautiful stars or borders. His standing is as follows:

Reading	8½
Physiology	8
History	8
Geography	8¾
Arithmetic	10

Theodore Maas has been in school only 10 days this month - and during the greater part of that time he has been unable to do any work - He seemed disturbed because his classmate Ray Downey had during his absence in October gotten so far ahead of him in Arithmetic. He made an effort for two or three days to make up the work - but it was too much - Since then he has seemed to try to do something but the work has ended with the trying - His work admits of no estimation by marks - He has written Two letters this month - well-composed and quite neatly written - They were marked 7¼

George McGraw has been in school 20 days this month. In Steele's Physiology he has read and recited from page 3 to page 24 - the work being upon the Skeleton - In history as the new books have not come he has reviewed the different presidents. In Frye's

1897
Nov. 30.

Geography he has had from page 99 to page 108— routes of trade, most important cities of the U.S., the countries, Canada, Mexico, Brazil, Argentine Republic and Chile. In Prince's Arithmetic Number Two he has had the work from page 24 to page 41— involving addition and subtraction where it is necessary to carry and borrow one. This has been very hard for George as indeed all work in numbers is. He has written 2 letters this month - rather short but neatly written. George took part in the Thanksgiving program by reading articles upon "The New Land", "The Mayflower" and "The First Thanksgiving". His average standing is as follows:

Reading	9
Physiology	8½
History	9
Geography	9
Arithmetic	7
Letter writing	8

Frank Parke has been in school 15 days this month. In Steele's Physiology he has read and recited from page 3 to page 24, the work being upon the Skeleton. In history as the new books have not come he has had review work - upon the different presidents. Without help. Frankie can give the names of all the Presidents in order. In Frye's Geography he has had from page 99 to page 108— routes of trade, most important cities of the U.S. and the countries Canada, Mexico, Brazil, Argentine Republic and Chile. In Arithmetic Prince's Number Three he has worked from page 58 to page 63. problems involving different tables in denominate numbers. Frankie has written 2 letters this month.

1897
Nov. 30.

well composed and neatly written. Frank prepared a reading for the Thanksgiving program but because of a heavy cold at the time, did not give it. His average standing is as follows:

Reading	9⅞
Physiology	8½
History	9⅞
Geography	9
Arithmetic	9¼
Letter writing	8¾

Louis Miller has been in school 19 days this month. In the Cyr. Third Reader he has read from page 20 to page 60. These lessons have given him 66 new words to define, spell, mark and use in written sentences of his own. In Frye's Geography he has had from page 99 to page 108 - routes of trade, most important cities of the U.S. and the countries - Canada, Mexico, Brazil, Argentine Republic and Chile. In Prince's Arithmetic Number Two Louis has worked from page 24 to page 41 - addition and subtraction where 1 is carried and borrowed. Louis has taken hold of work better this month than he did in either September or October. His average standing is as follows:

Spelling	9½
Reading	8½
Geography	8¾
Arithmetic	9½
Language	9½

Martin Peterson has been in school 20 days this month. In Steele's Physiology he has read and recited from page 3 to page 24 the work being upon the Skeleton. In history as the new books have not come he has

1897.
Nov. 30. had review work - upon the different presidents - learning their names and dates of terms - In Frye's Geography he has had from page 99 to page 108 - routes of trade, most important cities of the U.S. and the countries Canada, Mexico, Brazil, Argentine Republic and Chile - In Prince's Arithmetic, Number Three he has worked from page 58 to page 63 - problems involving different tables in denominate numbers. Martin has written 6 letters this month - some very short all neatly written. His average standing is as follows:-

Reading	8½
Physiology	8½
History	8½
Geography	8⅞
Arithmetic	8¾
Letter writing	7⅗

Bertha Akins was in school 8½ days this month - but did no work. She was taken home Nov. 11.

Flora Austin has been in school 18½ days this month. In the Cyr "Third Reader" she has read from page 32 to page 60. These lessons have given her 66 new words to define, mark, spell and use in written sentences of her own. In Prince's Arithmetic Number One she has worked from page 18 to page 29 - involving the four fundamental processes upon the numbers from 1 to 10. Flora has written 2 letters this month. They have been entirely of her own composition but as some words were not spelled correctly and the w's, m's n's etc. were formed incorrectly I rewrote - having her copy it at my desk. Flora has improved somewhat in reading - and quite a little

1897.
Nov. 30. in her written work. Her average standing is:

Spelling	6⅘
Reading	6⅗
Arithmetic	7⅗
Language	5½
Letter writing	6¼

Bochilda Cliplef has been in school 15 days this month. In the Cyr Third Reader she has read from page 32 to page 60. These lessons have given her 66 new words to define, mark, spell and use in written sentences of her own. In Prince's Arithmetic Number One she has worked from page 18 to page 29 - using the numbers from 1 to 10. Bochilde has written 4 letters this month. She is improving in her use of language. Her standing is as follows:

Spelling	9
Reading	8½
Arithmetic	8
Language	8
Letter writing	7⅞

Ida Erno has been in school 15½ days this month. In Andersen's "Fairy Tales" she has read from page 191 to page 230 These lessons have given her 117 new words to define mark and spell. In Goodrich's History she has had from page 124 to page 144. taking up the Civil War and all but finishing it. In Frye's Geography she has had from page 69 through the Map questions upon Europe page 74. accounts of different peoples of Europe and map questions upon North and South America and Europe - In Prince's Arithmetic Number Three she has worked pages

1897
Nov. 30.

56, 57 and a part of 58. problems upon Dry and Liquid Measure. The greater part of her work has been problems along the same line put upon the board. Ida has written 7 letters this month all well worded and well written. Her standing is as follows:

Spelling	9 2/5
Reading	9
History	8
Geografhy	9
Arithmetic	8
Letter writing	9 1/4

Ella May Floyd has been in school 16½ days this month. In the Cyr Third Reader she has read from page 32 to page 60. These lessons have given her 66 new words to define, mark, spell and use in written sentences of her own. In Prince's Arithmetic Number One she has worked from page 18 to page 29. performing the four operations upon the numbers from 1 to 10. Ella has written 1 letter this month. Her standing is as follows:

Spelling	9 7/8
Reading	8 1/5
Arithmetic	9
Language	9
Letter writing	8 1/2

Flossie Floyd has been in school 19½ days this month. In the Cyr Third Reader she has read from page 32 to page 60. These lessons have given her 66 new words to define, mark, spell and use in written sentences of her own. In Prince's Arithmetic Number One she has worked from page 18 to page 29 performing the four

1897
Nov. 30.

fundamental operations upon the numbers from 1 to 10. She has written 1 letter this month. Her standing is as follows:

Spelling	9 3/5
Reading	9
Arithmetic	10
Language	9 1/2
Letter writing	9

Esther Gallentyne has been in school 17½ days this month. In the Cyr Third Reader she has read from page 32 to page 60. These lessons have given her 66 new words to define, mark, spell and use in written sentences of her own. In Prince's Arithmetic Number One she has worked from page 18 to page 29. performing the four fundamental operations upon the numbers from 1 to 10. Esther has written one letter this month and the main part of another. Esther prepared a recitation of 18 lines for our Thanksgiving program. She practically committed it in an hour one morning. In this she surprised me. Her standing is:

Spelling	9 3/5
Reading	9 1/4
Arithmetic	10
Language	9 3/5
Letter writing	8

Nellie Garvey has been in school 19 days this month. In Andersen's "Fairy Tales" she has read from page 191 to page 230. These lessons have given her 11 new words to define and spell. In Goodrich's History she has had from page 124 to page 144 taking

1897
Nov. 30.

up the Civil War and all but finishing it. In Frye's Geography she has had from page 69 through the Map questions upon Europe page 74- accounts of different peoples of Europe and Map questions upon South and North America and Europe. In Prince's Arithmetic Number Four she has worked from page 58 to page 83. taking up decimal fractions up to thousandths and beginning Mensuration. Nellie has written 2 letters this month. Nellie prepared a recitation of 24 lines or so for the Thanksgiving program - learning it in one evening. Her standing is as follows:

Spelling	10
Reading	9½
History	9¾
Geography	9½
Arithmetic	9½
Letter writing	8½

Gladys Holman has been in school 19 days this month. In the Cyr Third Reader she has read from page 32 to page 60. having 66 new words to define, mark, spell and use in written sentences of her own. In Prince's Arithmetic Number One she has worked from page 18 to page 29 the work involving the numbers from 1 to 10. Gladys has written 3 letters this month. She prepared and gave a recitation for the Thanksgiving program. Her standing is:

Spelling	9
Reading	9⅜
Arithmetic	9⅘
Language	9
Letter writing	6½

1897
Nov. 30.

Julia Saunders has been in school 19½ days this month. In the Cyr Third Reader she has read from page 32 to page 60. having 66 new words to define, mark, spell and use in written sentences of her own. In Prince's Arithmetic Number One she has worked from page 18 to page 29 the work being upon the numbers from 1 to 10. Julia has written one letter this month. Her standing is:

Spelling	9
Reading	8¾
Arithmetic	9½
Language	9
Letter writing	8½.

May Little has been in school 19 days this month. In Andersen's "Fairy Tales" she has read from page 191 to page 230. These lessons have given her 117 new words to spell, and define. In Goodrich's History she has had from page 124 to page 144- taking of the Civil War and all but finishing it. In Frye's Geography she has had from page 69 through the map questions upon Europe- page 74- accounts of different peoples of Europe and map questions upon North and South America and Europe. In Arithmetic last month May's work was so unsatisfactory that it seemed best for her to take up Number Three Prince's Arithmetic. She has worked pages 56, 57 and half of 58. The main part of her work has been problems in denominate numbers - placed upon the board. May has written 6 letters this month. Her average standing is as follows:

Spelling	9½	Geography	9¼
Reading	9½	Arithmetic	9
History	9½	Letter writing	8

1897
Nov. 30.

Bertha Maurer has been present 19½ days this month. In the Cyr Third Reader she has read from page 32 to page 60. Three lessons have given her 66 new words to define, spell, mark and use in written sentences of her own. In Prince's Arithmetic Number One she has worked from page 18 to page 29- work upon the numbers from 1 to 10. She has written 3 letters this month- well-composed and very neatly written. Her standing for the month is as follows:

Spelling	9⅗
Reading	8⅞
Arithmetic	10
Language	9¾
Letter writing	9½

Nena Miller has been in school 20 days this month. In Andersen's "Fairy Tales" she has read from page 191 to page 230. Three lessons have given her 117 new words to define, and spell. In Goodrich's History she has had from page 124 to page 144- taking up the Civil War and all but finishing it. In Frye's Geography she had from page 69 to page 74. In Prince's Arithmetic Number Three she has worked pages 56, 57 and half of 58. The main part of her work has been problems in denominate numbers placed upon the board. She has written 2 letters this month. Nena took part in the Thanksgiving program, reading a story of her own thought and composition. She wrote the story between 3 o'clock one afternoon and eight o'clock the next morning. The only change in the story that was made was to have the thought in relative clauses, expressed in independent sentences. I copy the story in full.

1897
Nov. 30.

A Thanksgiving Dinner.

On a grey November morning, on the twenty-fifth day of the month, in a well-to-do family there were many happy thoughts and much talking about the large Thanksgiving party which was to be given late in the afternoon of that day.

But before I go any further I must tell you how many and who were in this family.

There were Mr. and Mrs. Hodge and their six children, four girls and two boys. Frank and Jack had gone with their father to the nearest meeting house where Rev. Mr. Mann was to preach the Thanksgiving sermon. After the meeting they were to drive far into the city to receive some relatives who were to spend Thanksgiving with them.

The two oldest girls, Maggie and Helen, were helping to get the two large turkeys ready. As this took a good deal of time, they had commenced it rather early. Julia was picking over the cranberries and watching the cakes in the oven. They would soon be ready for the frosting and chocolate which Mrs. Hodge was getting ready for them.

Little Emma, the youngest of them all, although she could not help much about the important work of the house, was nevertheless getting her dollies ready and was telling them to be very good or they should not go to the party at all.

At last everything was ready. The large house was put in order, the table was set and all that there remained

1897
Nov. 30.

I do was I put the great platters of turkey and the other well-filled dishes on the table. This however could not be done until the oven had done its work and it was time for the dinner. There remained a couple of hours yet before the company would arrive.

At last the loud ring of the door-bell was heard through the house. Mrs. Hodge and the girls went to the door to receive the guests and gave them a most cordial greeting.

After wraps had been laid aside, all sat down to the bountiful dinner which was now ready for them all and which, you may be sure, they all enjoyed very much for the guests were all very hungry after their long ride. It was about five o'clock in the afternoon before they rose from the table.

After the dishes had been washed and the table was cleared away, busy preparations began to go on for the evening entertainment which was to be given at eight o'clock.

First of all they had some games for the younger ones; then Mr. Hodge came bringing in the large basket of corn which was to be popped and this aroused a great deal of excitement especially among the children, each of whom was eager for his or her turn. Then came the pulling of the candy which made many sticky hands and faces. After this there was the cracking of the nuts and, last of all, after they had all gathered around the pleasant fire place, Mr. Hodge told them the story of the first Thanksgiving which was made by our Pilgrim Fathers and Mothers so many years ago.

1897.
Nov. 30.

My story must now end leaving Mr. Hodge to finish his to the ones around him.

Nena's average standing is as follows:

Spelling	9 7/5
Reading	9 1/2
History	9 3/4
Geography	9 1/2
Arithmetic	9 1/2
Letter writing.	8 1/2

Hattie Metz has been in school 19 days this month. In Anderson's "Fairy Tales" she has read from page 191 to page 230. These lessons have given her 117 new words to define and spell. In Goodrich's History she has had from page 124 to page 144 - taking up the Civil War and all but finishing it. In Frye's Geography she has had from page 69 through the map questions upon Europe page 74 - accounts of different peoples of Europe and map questions upon North and South America and Europe. In Prince's Arithmetic Number Three she has worked pages 56, 57 and a part of 58. The greater part of her work has been problems in denominate numbers put upon the board.

Hattie has written 3 letters this month - all too long for the amount told. Her average standing is as follows:

Spelling	9 7/5
Reading	9 3/4
History	9 1/2
Geography	9 1/2
Arithmetic	8 1/4
Letter writing	8

1897
Nov. 30.

Mary Pourrier has been in school 11½ days this month. In Andersen's "Fairy Tales" she has read from page 191 to page 230. These lessons have given her 117 new words to define and spell. In Goodrich's History she has had from page 124 to page 144 - telling of the Civil War and all but finishing it. In Frye's Geography she has had from page 69 through map questions upon Europe page 74 - accounts of different people of Europe - and map questions upon North and South America and Europe. In Prince's Arithmetic Number One she has had from page 18 to page 29 - work upon the numbers from 1 to 10. She has written 3 letters this month. Her average standing is as follows:

Spelling	8⅞
Reading	8¼
History	8½
Geography	8¾
Arithmetic	10
Letter writing	7¾

Mary Pierce has been in school this month 19 days. In Andersen's "Fairy Tales" she has read from page 191 to page 230. These pages have given her 117 new words to define and spell. In Goodrich's History Mary has had from page 124 to page 144 taking up the Civil War and all but finishing it. In Frye's Geography she has had from page 69 through map questions upon Europe page 74 - accounts of different peoples of Europe and map questions upon North and South America and Europe - In Prince's Arithmetic Number Three she has worked pages 56, 57 and half of 58. Her main work has been problems

1897
Nov. 30.

just upon the board - in denominate numbers. She has written 2 letters this month. Her average standing is as follows:

Spelling	9¾
Reading	8¼
Geography	9
History	9
Arithmetic	8
Letter writing	8¾

Mary Portner has been in school only 3 days this month. She has written one letter - marked 7.

Mary Riles has been in school 17½ days this month. In the Cyr Third Reader she has read from page 32 to page 60. These lessons have given her 66 new words to define, mark, spell and use in written sentences of her own. In Prince's Arithmetic Mary has worked from page 18 to page 29 - work upon the numbers from 1 to 10. She has written 2 letters - Her average standing is:

Spelling	9
Reading	8½
Arithmetic	9
Language -	9
Letter writing	8.

Dec. 23. Fred Batty has been in school 14⅓ days this month out of the 16⅓ days of school. In Steele's Physiology he has had from page 24 to page 40 - the chapter upon "Muscles". In Barnes' History he has had from page 11 to page 38 - taking up the introduction, the early discoveries and the account of the settlement at Jamestown - In Frye's

1897-
Dec. 23

Georgraphy Fred has had from page 108 through page 114 - thus finishing the book. These pages have given accounts of different countries of Europe, Asia, Africa and Australia. In Prince's Arithmetic No. III he has worked from page 63 to page 74. the work being problems in U.S. currency, then in square measure and the last in the writing of numbers such as: nineteen thousand seven. Fred is slow but it is a satisfaction to work with him for what he claims to understand he actually does understand. Fred has written three letters this month. His average standing is as follows:

Reading	9
Physiology	8 3/4
History	8 1/2
Georgraphy	9
Arithmetic	9
Letter writing	9 1/2

Thevdore Boehland has been present the 16 2/3 days of the month. In the Cyr Third Reader he has read from page 60 to page 91. These pages have given him 82 new words to mark, spell and use in sentences of his own. In Frye's Georgraphy Thevdore has had from the middle of page 6 through page 12. the work being upon river systems and mountains, general descriptions in place of definitions. In Prince's Arithmetic Number II. he has worked from page 41 to page 44. the work being in addition and subtraction where carrying and borrowing 1 is involved. The work in numbers has seemed difficult and not interesting to Thevdore. He has written 2 letters this month. His standing is:

Spelling	9 4/5	Arithmetic	7
Reading	8 3/4	Language	9 1/2
Georgraphy	8 1/2	Letter-writing	7 3/4

1897-
Dec. 23.

Eddie Demorest has been in school only 11 of the 16 2/3 days of this month because of the extra work for Christmas in the boys room. In the Cyr Third Reader he has read from page 60 to page 85. These pages gave him 61 new words to mark, spell and use in sentences of his own. In Frye's Georgraphy he has had from the middle of page 6 to page 11. the work being a general description of a mountain system. In Prince's Arithmetic No. II. Eddie has worked from page 41 to page 53. Eddie has seemed to particularly enjoy his work in numbers this month. It has been quite largely upon the multiplication table - multiplication and division also finding 1/2, 1/3, 2/3, 3/4 etc. of different numbers. His standing for the month is as follows:

Spelling	9 2/5
Reading	8 3/4
Georgraphy	8 1/2
Arithmetic	9
Language	8

Ray Downey has been in school 14 2/3 of the 16 2/3 days of the month. In Steele's Physiology he has had from page 24 to page 41. the chapter upon "Muscles". In Barnes' History he has had from page 11 to page 38. the introduction, early discoveries and the settlement at Jamestown. In Frye's Georgraphy he has had from page 108 through page 114. accounts of different countries of Europe, Asia, Africa and Australia. This work finished the book. In Prince's Arithmetic No IV. he has worked from page 73 to page 90. the work being in decimals and problems in square measure. Ray has written one letter this month. His standing is as follows:

Reading	9	Georgraphy	9 1/2
Physiology	9	Arithmetic	9
History	9	Letter writing	9 1/2

1897
Dec. 23

Joe Hatch has been in school 16 of the 16⅓ days of this month. In the Cyr Third Reader he has read from page 60 to page 91. These lessons have given him 82 new words to mark, spell and use in sentences of his own. In Frye's Geography he has had from the middle of page 6 through page 12 the work being a description of a mountain system and a river system. In the Prince's Arithmetic No. II Joe has worked from page 41 to page 67. Work being upon the multiplication table through the "nines". Joe has seemed to particularly enjoy his work in numbers this month. He has written one letter - several pages in length - this month. His standing is as follows:

Spelling	9½
Reading	8¾
Geography	8½
Arithmetic	9½
Language	9
Letter writing	8

Henry King has been in school but 11 of the 16⅓ days of the month - because of the extra Christmas work done in the brass room. In Steele's Physiology he has had from page 24 to page 39, the work being upon the "Muscles". In Barnes' History he has had from page 11 to page 25 - the introduction and the early discoveries. In Frye's Geography he has had from page 108 to page 111 - description of different countries of Europe and Asia. In Prince's Arithmetic No II he has worked from page 41 to page 72 the work being upon the multiplication table - fractions and dry and liquid measure.

Henry wrote 1 letter this month: well composed and neat throughout. His standing is:

1897
Dec. 23

Reading	8½
History	8
Physiology	8½
Geography	8½
Arithmetic	9⅘
Letter writing	8

Jesse Gunn entered school Tuesday Dec. 7 but owing to the extra Christmas work in the shops has been present only 8⅓ days this month. He has taken up work in Steele's Physiology, Barnes' History, Frye's Geography and Prince's Arithmetic No. III. In physiology he has had from page 32 to page 39 the work being upon the muscles. In history he has had from page 18 to page 27 - early discoveries. In Geography from 108 to page 111 - accounts of different countries of Europe and Asia - In Arithmetic he has worked from page 65 to page 75 - . He has written three letters this month, short but well-composed and full of news. Jesse is slow but takes hold of his work in an intelligent way - does particularly well in numbers.

Work being in mensuration and writing numbers such as 19,705 etc.

Theodore Maas was taken home Dec. 5 and so has not been in school this month.

George McGraw has been in school 16⅓ days this month. In Steele's Physiology he has had from page 24 to page 41, the chapter upon "Muscles". In Barnes' History he has had from page 11 to page 38. the introduction, early discoveries and the Jamestown Colony. In Frye's Geography he has had from page 108 to page 114 - accounts of different countries in Europe, Asia, Africa and Australia. In Prince's Arithmetic No. II. he has worked from page 41 to page 51. George has written one letter this month: He has learned a recitation for the Christmas program. His standing is:

1897
Dec. 23

Reading	9
Physiology	8¾
History	8¾
Geography	9
Arithmetic	8
Letter writing	8½

Louis Miller has been in school only 11 of the 16⅓ days of the month owing to the extra Christmas work. In Barnes' History he has had from page 11 to page 20, the introduction and the early discoveries. In Frye's Geography he has had from page 108 to page 111 descriptions of different countries of Europe and Asia. In Prince's Arithmetic No II. he has worked from page 41 to page 62. the work being upon the Multiplication Table - involving multiplication, division and work in finding given fractional parts of different numbers. His standing for the month is as follows: (He has written one letter)

Reading	8
History	8
Geography	8½
Arithmetic	9
Letter writing	8½

Frank Parke has been in school 11⅓ days this month - hardly deemed equal to school work when he first came from the hospital. In Steele's Physiology he has had from page 24 to page 41. the chapter upon "Muscles". In Barnes' History. he has had from page 11 to page 38. the introduction, the early discoveries and the settlement at Jamestown. In Frye's Geography he has had from page 108 through page 114. thus finishing the book. (The work was descriptions of different countries in Europe, Asia & Africa) In Prince's Arithmetic No. III. he has worked from page 63 to page 67. problems in U.S.

1897
Dec. 23

currency and linear measure. Frank has found it rather hard to make up his work in Arithmetic. He has written one letter this month and has a second one ready to copy. His standing is as follows:

Reading	9½
Physiology	8¾
History	8¾
Geography	9
Arithmetic	8¾
Letter writing.	8

Martin Polchow has been in school the 16⅓ days of the month. In Steele's Physiology he has had from page 24 to page 41, the chapter upon "Muscles". In Barnes' History he has had from page 11 to page 38, the introduction, early discoveries and the settlement at Jamestown. In Frye's Geography he has had from page 108 through page 114. thus finishing the book. The work was descriptions of different countries of Europe Asia, Africa and Australia. In Prince's Arithmetic No. III. he has worked from page 63 to page 72. the work being problems in U.S. currency, linear and square measure and the writing of numbers from dictation such as 19,007. Martin had written 2 letters this month. His standing is:

Reading	8½
Physiology	8½
History	8
Geography	8¾
Arithmetic	8
Letter writing	7½

Bertha Akins returned to school to school the eighth of December and so has been present 12 of the 17 days of the month. Since her return she has read with the class in the Cyr Third Reader.

1897.

Dec. 23. She reads nicely, pronouncing all words correctly. But seems to take no interest in what she reads. Bertha has written two spelling lessons on the board and in the preparations for Christmas String Popcorn.

Silva Austin has been present the 17 days of the month. In the Cyr Third Reader she has read from page 60 to page 97. These lessons have given her 108 new words to spell, mark and use in sentences of her own. Silva is a poor reader, making frequent repetitions - occasionally repeating one word 3 or 4 times. In writing and in language work Silva shows considerable improvement. In Prince's Arithmetic No. I. the work with the class seemed difficult for Silva and so she has begun at the beginning. Silva has written two letters this month. Her standing is as follows:

Spelling	8
Reading	7
Arithmetic	6 3/4
Language	6 3/4
Letter writing	6 1/2

Bertilde Cliplef has been in school the 17 days of the month. In the Cyr Third Reader she has read from page 60 to page 97. These lessons have given her 108 new words to mark, spell and use in sentences of her own. In Prince's Arithmetic No I. she has worked from page 29 to page 34 - addition, subtraction, multiplication, division and fractional work with numbers from 1 to 13. Bertilde has written 3 letters this month. Her standing is as follows:

Spelling	9 3/4
Reading	7 3/4
Arithmetic	8 1/2
Language	8
Letter writing	7 2/3

1897

Dec. 23. Ida Erno has been in school 15 1/2 of the 17 days of the month. In Andersen's "Fairy Tales" she has read from page 230 to page 280, thus finishing the book. These pages have given her 152 new words to spell and define. In Goodrich's History she has had from page 144 to page 164 finishing the book. These pages took up the close of the Civil War and the subsequent history to the present time. She reviewed the presidents and then took up Barnes' History in which she had from page 11 to page 15 - the introduction. In Prince's Arithmetic she has worked from page 58 to page 62. problems in denominate numbers. Ida has written one letter this month - and has helped in the Christmas preparations. Her standing is:

Spelling	10	In Frye's Geography she had
Reading	9	from page 74 to page 79 map ques-
History	8 1/2	tions and lessons upon "Heat, Wind
Geography	9	and Rain".
Arithmetic	8 1/2	
Letter writing.	9 2	

Ella May Floyd has been in school 14 1/3 days of the 17 this month. Christmas work has broken in upon her time. In the Cyr Third Reader she has read from page 60 to page 97. These lessons have given her 108 new words to mark, spell and use in sentences of her own. In Prince's Arithmetic No I. she has worked from page 29 to page 36 - work upon numbers from 1 to 13. Her standing is as follows:

Spelling	9 3/4
Reading	8 1/2
Arithmetic	8 3/4
Language -	8 3/4

Flossie Floyd has been in school 15 days

of the 17 this month. In the Cyr Third Reader she has read from page 60 to page 97. These lessons have given her 108 new words to mark, spell and use in sentences of her own. In Prince's Arithmetic No. I. she has worked from page 29 to page 37. work upon numbers from 1 to 13. Her standing is as follows:

Spelling	9½
Reading	9
Arithmetic	10
Language.	9

Esther Gallentyne has been in the hospital this entire school month.

Nellie Garvey has been in school 15⅔ of the 17 days of the month. In Andersen's "Fairy Tales" She has read from page 230 to page 280. finishing the book. These lessons have given her 152 new words to spell and define. In Goodrich's History she has had from page 144 to page 164. finishing the books. These pages took up the close of the Civil War and the subsequent history. She reviewed the Presidents and has begun Barnes' History taking the introduction page 11 to page 15. In Dryer's Geography she has had from page 74 to page 79 map questions and lessons upon "heat" "wind" & "rain." In Prince's Arithmetic No. IV she has worked from page 83 to page 94. work in mensuration, business transactions and denominate numbers. Nellie does very good work in Arithmetic and is quite independent. She has written 3 letters this month. Her standing is as follows:

Spelling	9¾		
Reading	9½	Arithmetic	9¾
History	9½	Letter writing.	8
Geography	9½		

1897
Dec. 23.

Gladys Holman has been in school 13 of the 17 days this month. In the Cyr Third Reader she has read from page 60 to page 97. These lessons have given her 108 new words to mark, spell, and use in sentences of her own. In Prince's Arithmetic she has worked from page 29 to page 35 work upon numbers from 1 to 13. Gladys has written 2 letters this month. Her standing is:

Spelling	9¾
Reading	9¾
Arithmetic	8½
Language	9½
Letter writing	7½

Julia Saunders has been in school 15⅔ of the 17 days of the month. In the Cyr Third Reader she has read from page 60 to page 97. These lessons have given her 108 new words to mark, spell and use in sentences of her own. In Prince's Arithmetic she has worked from page 29 to page 34. work upon numbers from 1 to 13. Julia has written one letter this month, well-composed, of medium length and neatly written. Her standing is as follows:

Spelling	9⅘
Reading	9
Arithmetic	8¾
Language	8
Letter writing	8½

May Little has been in school 12 of the 17 days of the month. In Andersen's "Fairy Tales" she has read from page 230 to page 280. finishing the book. These lessons have given her 152 new words to spell and define. In Goodrich's History she has had from page 144 to page 164. finishing the book. These pages take up the close of the Civil War and

1897
Dec. 23. the subsequent history. She reviewed the presidents and has begun Barnes' History taking the introduction from page 11 to page 15. In Frye's Geography she has had from page 74 to page 79 map questions and lessons upon "heat," "wind" and "rain." In Prince's Arithmetic, No. III, she has had from page 58 to page 62, problems in weights and measures. May has written 4 letters this month. Her standing is as follows:

Spelling	9 3/4
Reading	9 3/4
History	8 3/4
Geography	9 1/4
Arithmetic	8
Letter writing	8 1/2

Bertha Mauker has been in school 13 2/3 of the 17 days of the month. In the Eclectic Third Reader she has read from page 60 to page 97. These lessons have given her 108 new words to spell, mark and use in sentences of her own. In Prince's Arithmetic Book I. She has worked from page 29 to page 34—work upon numbers from 1 to 13. Bertha has written one letter this month. Her standing is:

Spelling	9 5/6
Reading	8 3/4
Arithmetic	8 3/4
Language	9 1/2
Letter writing	9

Nena Miller has been in school 15 1/3 of the 17 days of the month. In Andersen's "Fairy Tales" she has read from page 230 to page 280, finishing the book. These lessons have given her 152 new words to spell and define. In Goodrich's History she has had from page 144 to page 164, finishing the book. These pages give the close of the Civil War and the subsequent history. She

1897
Dec. 23. has reviewed the presidents and has begun Barnes' History, taking the introduction from page 11 to page 15. In Frye's Geography she has had from page 74 to page 79, map questions and lessons upon "heat" "wind" and "rain". In Prince's Arithmetic Number III. she has had from page 58 to page 62—problems in weights and measures. Nena has written two letters this month. She is very nervous and has always written with a pencil. This month she has made an effort to use pen and ink—with good result. Her standing is as follows:

Spelling	10
Reading	9 3/4
History	9 3/4
Geography	9 1/2
Arithmetic	9
Letter writing	7 1/2

Hattie Metz has been in school 13 of the 17 days of the month. In Andersen's "Fairy Tales" she has read from page 230 to page 280—having 152 new words to spell and define. She finished the book. In Goodrich's History she had from page 144 to page 164 finishing the book. These pages take up the close of the Civil War and the subsequent history. She has reviewed the Presidents and has begun Barnes' History taking the introduction page 11 to page 15. In Frye's Geography she has had from page 74 to page 79 map questions and lessons upon heat, wind and rain. In Prince's Arithmetic Number III. she has had from page 58 to page 62 problems in weights and measures. She has written 3 letters this month. Her standing is as follows:

Geography	9
Arithmetic	9
Letter writing.	8 1/10

Mary Pierce has been in school 14 2/3 of the 17 days of the month. In Andersen's "Fairy Tales" She has read from page 230 to page 280. finishing the book. She has had 152 new words to spell and define. In Goodrich's history She has had from page 144 to page 164. finishing the book. These pages take up the close of the Civil War and the subsequent history. She reviewed the presidents and then began Barnes' History taking the introduction page 11 to page 15. In Dryer's Geography She has had from page 74 to page 79 map questions and lessons upon heat, wind & rain. In Prince's Arithmetic No. III. She has worked from page 58 to page 62. work in weights and measures. Mary has written one letter this month.

1897
Dec. 23.

Her standing is as follows:

Spelling	9 1/2
Reading	8 3/4
History	8 3/4
Geography	9.
Arithmetic	8 1/2
Letter writing	8.

Mary Portner has been in school only 7 days this month. She has taken up the work in the Cyr Third Reader with her class and also in Prince's Arithmetic No. I. Mary is always faithful and a good worker. But necessarily her work has been so broken into this month that it is impossible to give an exact report of it.

Mary Riles has been in school the 17 days of the month. In the Cyr Third Reader She has read from page 60 to page 97. These lessons have given her 108 new words to spell, mark and use in sentences of her own. In Prince's Arithmetic Number I. Mary has worked from page 29 to page 34, work upon the numbers from 1 to 13. Mary has written one letter this month - well composed and neatly written. Mary has a good command of language and would produce a pleasing letter were she not so poor a penman. Her hand is very cramped - Her standing is as follows:

Spelling	9 3/4
Reading	9
Arithmetic	9
Language	9 1/2
Letter writing.	8

1898
Feb. 26

During this month there have been only fifteen days of regular school work four of the fifteen days were spent in letter writing.

Fred Batty has been in school all of the fifteen days. In Steele's Physiology he has studied and read from page 61 to page 78 the work being upon the Glands of the skin" and "Respiration". He has had one review on the bones and muscles and blood very well.
In Barnes History he has had from page 31 to page 59. The colonies from Virginia to Pennsylvania. In a test given him on the Early discoveries and explorations he stood 7½.
In Prince's Arithmetic he has finished book number three working the two last pages and reviewing the "tables" in Denominate Numbers. He has written three letters this month.
His standing is as follows [He learned a piece to recite in concert with five of the boys for Washington's Birth-day]

Spelling 8½
Reading 7½
History 8.
Physiology 8.
Arithmetic 9½
Letter Writing 9.

Theodore Borhland has been in school all of the fifteen days. In Ley's Reader he has read from page 119 to page 128 Spelling and weaving into sentences

June 1899.

Ray Downey began book 5. in numbers work in Sept. And has worked to page 80. Of course he has had a good deal of supplementary work. His work has been in fractions and enumeration, So History has gone from the beginning of Barnes Primary to the development of the States - covering the discovery, colonial period & Rev. War.

From the beginning of Civics Class to the Circulation, including the bones, skin, organs & respiration. His writing has improved very much. Has taken up the vertical nicely.

June 1899.

John Goldsmidt, has only been in school afternoons and has had nothing but reading and writing His improvement has not been very marked. He has read from the beginning of 2nd Reader to page 94. & spelled all the words in the lessons. His writing is not neat, & dont form letters well.

June 1899.

Joseph Walsh has studied from the beginning of the Primary Geog. to Australia covering general definitions and a brief study of North America, South America, Europe, Asia, and Africa. He has read from the beginning of the Cyr Third Reader to page 241, nearly completing the book. Has including spelling and primary computation work. He began No. 3 Arith. in Sept. and has worked to Section 4 page 45, besides a great deal of supplementary work in multiplication and division. He has improved very much in writing.

June 1899.

George McIsaac. began book 2 in Arith & has finished it. It includes all operations with numbers to 100, and practical work in measures and weights. He has studied from the beginning of Barnes Primary History to the Development of the States - covering the discovery, colonial period and Rev. War. Began Civics Class, and has reached the Circulation

including the bones, skin, muscles and respiration. His writing has imporved very much. He one of the best critical writers in school.

June 1899.

Frank Parke began No 3. Arith at the beginning of the school year. Has marked to page 60 He has gotten the idea of numbers to one thousand and one million and done many practical problems. Has studied from the beginning of Barnes Primary History to the Development of the States carrying the Discovery, Colonial Period & Rev. War. Dr Phys, from the beginning of Circle to the Circulation including the bones, skin, muscles and respiration. He a good reader and Speller and has improved in writing

June 1899.

Martin Colchard began in Septem per No 4. Arithmetic and has reached page 86 Carring fractions, mostly. He has had a good deal of extra drill - practical Review problems in multiplication and division.

He began Barnes Primary History in Sept. and has reached the Development of the States - covering the Discovery, Colonial Period & Rev. War.

Began Circles Phys. & has gotten to the Circulation including the bones, skin muscles, & respiration. It was hard for Martin to get the critical writing, but he is improving. He a very nice boy in school.

June 1899.

John Parker has only been in school a fortnight, so has had no Arith. He does very nice writing and drawing.

He began Barnes Primary History in September and has reached the Development of the States, covering the Discovery, Colonial Period, & Rev. War.

He began Circles Phys. & has gotten to the Circulation, including the bones, skin, muscles, & respiration,

June, 1899

Fred Batty, began Barnes Primary History in Sept, & has reached the Development of the States - including the discovery, colonial &

period. & Rev. Van.
He also began Studies in Phys. & has reached the Circulation. covering the bones, skin, muscles and respiration.
He began No 4. Smith and has reached page 36. His work has been with fractions. Has had a good deal of extra drill & practical review problems in multiplication and division.

June 1899.
Edward Cox has only been in school the last month and he has spent that time on the multiplication table. He has read with the class in the 2nd Reader - A fair reader & can spell if he puts a good deal of study on words. Is a poor writer.

June 1899.
Fred Wiggins has only been in any school one month & that only for numbers. He has done practical problems in addition & subtraction & multiplication.

June 1899.
Klasie Floyd began No II Smith in September and has worked to Section 5 page 74. It includes all kinds of operations with numbers to 100. and many practical problems. She began the Primary Geog. and has reached Australia - covering general definitions & a brief study of North America South America, Europe Asia & Africa. She has read from the beginning of Sea Side & Way Side, No 2. to page 166, getting much drill in reading & spelling, as well as acquiring many facts about birds, insects, etc. Has improved greatly in writing.

June 1899.
Barbara Gatzke began No I Smith in September and has completed it, besides a good deal of supplementary work in measuring, etc. Has read from the beginning of Sea Side & Way Side No 2 to page 166 getting much drill in reading & spelling as well as acquiring many facts about birds insects, etc. She began the

Primary Geog. & has studied to Australia- covering general definitions and a brief study of N. America S. America, Europe, Asia & Africa. Hez writing is very much improved.

June 1899.

Gladys Holman has read from the beginning of Sea Side & Wayside No 3. to page 166. getting much drill in reading and spelling as well as acquiring many facts about birds, insects, etc.
She began the Primary Geog. in Sept. and has reached Australia covering general definitions and a brief study of N. America, S. America, Europe, Asia, & Africa
Began & finished No I Arith. besides a good deal of supplementary work in measuring, etc. Has not improved very much in writing

June 1899.

Julia Saunders began & finished No I Arithmetic, besides a good deal of supplementary work in measuring etc.
She has read from the beginning of Sea Side and Way Side

No 3. to page 166. getting much drill in reading & spelling as well as acquiring many facts about birds, insects, etc.
She began the Primary Geog. in Sept. and has reached Australia covering general definitions, and a brief study of N. America, S. America, Europe, Asia & Africa. She writes a fair hand but does not get the vertical at all.

June 1899.

Mary Little has studied from the beginning of Barnes Primary Visiting to the Development of the States - covering the Discovery, Colonial Period & Rev. War. Has studied from the beginning of States Steps to the Recapitulation - including the bones, skin, muscles, She began No 4 Arith. in September, & has worked to page 29, taking up fractions which she does not comprehend at all. It is my judgment that she has reached her limit in numbers.

She is a neat, nice writer.

June 1899.

Edith Poole has read from the brginning of Lea Side and Wayside No 3 to page 166. getting much drill in reading and spelling as well as acquiring many facts about birds & insects.

She began the Primary Geog. & has studied to Australia, corring general definitions, a brief study of N. America, S. America, Europe, Asia & Africa. She began & has completed No II Arith. braides doing a good deal of supplement any rules in measuring etc. She is a good mild & an improvable child.

June 1899.

Agnes Spotchett began & has completed book one in Arith. braides getting a good deal of drill in measuring, etc.

She has read from the brginning of Lea Side & Wayside No 3 to page 166. getting much drill in reading & spelling as well as acquiring many facts about birds, insects. Etc.

She has studied from the brginning of the Primary Geog. to Australia corring general definitions and a brief study of N. America, S. America, Europe, Asia & Africa.

Has improved in writing but is still a poor writer.

Sept. 1899.
Rhoda Binnix has just been promoted to this grade from the primary. She is a quiet studious girl. She has worked from the first of No I Arith. to page 10. Knumbers seem easy hard for her. Has read from first of 2nd Reader to page 9. Has spelled all the words. Has to study hard at spelling. Writes neatly, all words she can spell. Has written one letter this month.
