1899

Julia Andersiek

Dec. Has been in school all the month, she has worked quite well, she is is slow but I can see a decided improvement since the first of Sept. Sometimes she can turn, baste and overcast the hem very nicely in the towel but she will not do it from day to day. Her deportment in school is quite good,

Daniel Anderson

Dec. Has been in school only about two months I find him a very agreeable boy and glad to work, has learned the work so that he can be quite independent, ties a good knot and keeps quite an even mesh His deportment is very good,

Bell Burkshier

Dec. This month she has worked very nicely she tried sewing again I allowed her to alternate her work sew one day and work on the net the next day I find she does better work in that way. She will never sew well I am afraid, her deportment has been quite good,

Agnis Christianson

Dec. Some days she will sew very nicely then again she is careless and her work is not good, she can thread the needle, tie the knot and do it quickly & moves her hands well, her trouble is the lack of ambition, Her deportment is quite good,

1899

Penny Cohen

Dec. Has worked well this month when he worked but he was out much of the time helping about the house, what work he has done I think shows quite a little improvement, His deportment is usually very good in school,

Charley Elginson

Dec. Has only been in school one week this month, he has not done much work he never works alone and if I help him does not seem to comprehend what he is doing does not have the least idea what is to think about one thing any length of time. His deportment is not good, but I think he does not intend to be mean

Levi Greek

Dec. Levi, when he does not have the head-ache, works very nicely in school, he makes a good laundry net or hammock, ties a very firm knot and keeps an even mesh this month he has been out quite a little to help around the house. His deportment is very good in school

Nellie Garvey

Dec. Does the net work very nicely, she keeps a very even mesh and ties a good knot she is very quiet in school, never grumbles or thinks the work to hard, she sews very nicely too, so that when she can not work on the net she will pick up a napkin and hem it, she is always busy, Deportment good,

Dec 1899

Willie Cohen

Has done very good work in the net class has almost made a laundry net this month, he is much more quiet and seems to really enjoy the work, I can see that his deportment is much improved,

Dec,

Annie Hanzel

Is improving she know how to take out the work, when it is not well done, without spoiling the towel, she can turn, baste + oval cast the hem in the towel so that it looks quite well, she works with much more interest and I am in hopes she will in time do very good work Deportment is very good

Dec.

Gladis Hardin

Has not learned to work alone yet but she is understanding the work much better has very good use of her hands and I am in hopes she will learn the net work in time she is good when she is busy

Dec,

Clara Hanson

I do not know whether she will ever learn to sew or not, but she has learned to thread the needle and does it quickly, at first she would load her needle every day but now she does not, and does try to sew, she never makes any noise in school

1899 Dec.

Adolph Holstrom

This boy never gives me the least trouble in actual work all the time and when his net is finished it is beautifully done can almost make the net alone

Dec,

Oscar Hagan

Has been in school regular, I do not know what to say about him where I help him with the net work he does just what I tell him to do, but I must do all the thinking for him I am just a little encouraged with him, when I first began to teach him the work, if I was called away from him for a few minutes he would get the net in such a tangle that it would seem almost impossible to take it out, but now if I leave him he does not do that any more, so that I know that he has learned to make the net does not consist in putting the needle through and through just any place, he is not very quiet in school except when he is at work.

Dec.

Joe Hatch

He worked very nicely makes one of the doll hammock in two days if he will work and is only in a very short time each day, some days he does not work at all, but if he is feeling well he works very nicely, he had no trouble learning to tie the nets, Deportment in school is good.

1899.
Dec. Arthur Hopkins

Does not do any thing in my school except to help some boy mind a ball he is bright enough but can not use his hands.

Dec. Gustav Hack

Works well and independent of me he not only does his own work but will help the other children, if they need to have a needle tied on. He is a very good boy in school

Dec. Clara Doxtin

She is another child that I do not know what to say about her, if I sit beside her she will try and does want to learn but as yet she has not gotten the idea but may be will learn in time Her deportment is good

Dec. Johnie Johnson

Johnie is working well I can't say just how much he has done, for he helps all the other children with their work both sewing and the nets. he is always happy and his work is always well done, he is usually very quiet in the school room and if he ever does make any disturbance it is sure to be some other childs fault,

1899
Dec. Elmer Johnson

Since the first of Sept. Elmer has learned to tie the nets so that now he is making a much better net than many of the children who learned before him, he does not stick to his work very well if he did he could make a laundry net in a month but he is doing much better and is becoming quite good in school,

Dec. Mamie Langan

I hardly think this child will ever do very much with the net work or any other work she will do or rather try to do just what I tell her to do, but seems to have no idea of working independently, She makes very little trouble in school,

Dec. Langdon Sarah

Sarah can thread the needle and baste the hem in the towel, she need much attention from her teacher if she applies herself very much, I am sure I cannot tell whether she will ever learn to work independently or not, She does not give any trouble in school,

Dec. Celia Montour

Celia has worked well all this year ever since Sept. 1st her work on the hammocks could not be much better and the same with the nets, She hems, towels, napkins

1899 tablecloths, and drawn-threads and hemstitches very nicely, and does her work as quickly as any normal person she is a very capable girl around the house, her deportment is usually very good,

Dec. Minnie McClay

Minnie likes to have her workbox and towel, and does try to sew, but I am afraid she will not accomplish very much, it is very hard for her to thread the needle and she does not see well enough to sew, Her deportment in school is good

Dec. Fred Mundt.

Since the 1st of Sept. Fred has improved, very much in the net work now he ties a good knot and keeps an even mesh and and is very much more dilligent than he has ever been works very fast too, His deportment is good in school,

Theadore Miselis

Is a good boy to have in the school room, he can make nets and work on the hammock, but if he does this work very long he blisters his fingers so that he does not like to do the work and will not only for a short time, he winds nearly all the needles for both the hammocks and nets, and if any child gets their nets full of mistakes he will help them undo their work. but does not like to have any work of his own,

1899. Alma Marsh

Dec. Alma is working well in the net class and is dilligen and careful if she does make a mistake in her work she can take it out without any assistance from any one, she ties a pinn knot and keeps an even mesh, and never gives me the least trouble in school, is always kind and good,

Dec. Bennie Astrander

Bennie is usually busy in school but he is one of those children who is not careful with his work, does not have it looking uniform some of the meshes will be quite small other large and some just about right and yet the net will be well enough done to pass for good work, His deportment in the school is good.

Dec. George OConnor

I find that if George thinks he is to be ~~recompensed~~ for his work he will try very hard to finish something for instance in winding the cord, he will give me no peace, when he comes in the room unless I give him some cord to wind so that he can take it to Miss McLean knowing that he will get something from her, he winds a good ball and a very large one much larger than he can hold, he likes to use the scissors and holds them nicely. His deportment is much better than last year, but still there is room for improvement,

1899 Dec.

Raymond Powers

Raymond is anxious to learn and is improving in the net work, he does not have very good use of his hands, I think this work will help to strengthen them, he does not work independently yet, but will learn I think in time he has only been in school about two months, and I think when he was at home he did not do very much work. In school he is very quiet

Dec.

Mary Penheiter

Mary works well in the net class she can very nearly make a net without any help she slices the cord when she needs a new needle ties the weavers knot and binds the end of the cord, she is industrious and her work is very well done, she takes out any mistakes she makes, and is quite independent, Her deportment in school is good,

Dec.

Caroline Peterson

Always works well, she never sits and talks or tries to get out of work, she can very nearly make a net all alone sometime she needs a little help when she is beginning a net, She helps the other children when they need some one to help them out of any trouble, She is much happier than at the commencement of school Deportment good

1899 Dec.

Theodore Palmer

I have some hopes that he will learn in time to make the nets, at first when I would help him if I should go away and leave he he would get the net all out of order, but now he knows that if the work is not done right then he will have to take it out, and he has the idea of what is expected of him, His department in school is quite good,

Dec.

Frank Park.

Has not been in school this month

Dec.

Martin Peterson

Has worked well while he was in school but much of the time he has been out to help about the house,

Dec.

Robert Rebstock

Robert can do very good work on the nets if he will only apply himself but he will not do that, he braids nicely & makes a smooth braid, when he sits quiet a short time he is likely to go to sleep, His deportment is not always the best,

Dec.

Bell Rosencrans

Always works nicely she is quick and would never give any trouble if some one else did not have a hand in it, she turns the hems and hems the napkins beautifully and helps me in many little ways in the school,

1899 Dec.

Anny Reeves

Sews very nicely if I am careful to give her a little attention she threads the needle and knots the thread, turns the hem and basts it, and overcast the hem in the towel and napkin, has good use of her hands uses her left hand in sewing. Her deportment is very good in school.

Dec.

Theresie Slayton

Does not seem to improve very much yet she does not go back, sometimes she will do very nicely then again her work will be all wrong; and when it is she takes it out very carefully, she threads the needle and knots the thread, Her deportment in school is very good.

Dec.

Henry Sauk

Works very nicely when he is in school but this month he has been out much of the time helping about the house His deportment is good.

Dec.

Lena Schumaker

Lena has worked nicely this month she has finished the net she worked on in Nov. and commenced another one, she works almost independently. splices the cord and binds the knot all the help she needs is in starting the net, she is always busy, and never makes any trouble in school,

1899 Dec.

Harry Stewart

Does not work very fast but does his work well, his net looks neat and is much better done than many of the other children who seem much brighter than he, he works all the time he is in the class unless he is waiting for some one to tie the needle on for him His deportment is good.

Dec.

Burt Smith

Burt has not been in school much this month has been taken out to help about the house. when he is in he does good work on the nets or the hammocks, he usually works diligently in school, His department is good

Dec.

Ignatius Stezerowski

He has worked very nicely on the nets this month much better than at any other time, yet he does not like to stick to his work very long at a time, but is improving, finished the net he worked on in Nov. and has begun another, he is restless and it is almost impossible for him to sit very quite for any length of time, His deportment is not always the best.

Dec.

Eddie Wilkinson

Is one of those children who never speaks in school unless he is spoken to, works all the time, Knows his own net and will go to the case and get it himself his work is well done, he can not work independently,

1899.
Dec. Sophia Krabek

I can see that Sophia has improved qui a little since the 1st of Sept. she can thread the needle and knot the thread and keep the hem even while she bastes it in the towel and overcast quite well, she is one of those children who must be urged all the time if she does any thing.

Dec. William Winkelmeyer

Has learned quite a little about the net work, and seems anxious to learn he cannot work without help yet he sits perfectly quiet and would never ask for work, but is pleased when I sit down beside of him to give him some assistance I am in hopes that in time he will learn the work.

Dec. Lewis Weisberg

I hardly know what to say about this boy, he can wind a ball, but not round and likes to do it, I have tried to teach him to wind the net needles + and have had Theadore Mistkin try to help him but he has one way to do it and as yet we have not been able to break him of doing it wrong he seem to want to do it the right, but can not get it if he is hurry his deportment is good

Dec. Nicolas Yeager.

When he is in school he sometimes works well on the nets, This month he has been out nearly all the time,

1900
Jan. Julia Andersick

Has been in school every day this month While I can not say that she has made any great improvement in the sewing class I know she tried and is doing better she is contented and never gives me the least trouble in school.

Jan. Daniel Anderson

Has been in school every day this month, and has done good work on his net, has it nearly half done, he seldom makes a mistake and if he does he can fix it himself and many others cannot undo their work, who have been making the nets much longer than he, he is very industrious and likes this work. Never gives me the least trouble in school.

Jan. Bell Burkshier

Has been in school every day this month she has finished her laundry net and has basted the hem in two towels and overcasted the hem, her work will never come out but it does not look nice She has been very good in school has not given me any trouble.

Jan Agnis Christianson

Has been in school all the month, I hardly know what to say about her she seems to have reached her limit, she can baste the hem in the towel and that is about as much as she can do, she does not give me any trouble in school.

1900.

Jan. Penny Cohen

Has been in school all the month, he worked quite well, for him, as he is never very fond of work, he is in school in the after noon, and he has been quite careful of his work, he dislikes so much to have to undo the work, that it makes him much more careful than he would be if he thought some one else would take his mistakes out for him. His never gives me any trouble in school.

Jan. Charlie Elginson

Has not been in school ~~but six~~ days this month he does not seem to have the slightest idea of the net work will do what I tell him to and that is all, he is one of those boy who is never contented unless he is ticking at some other child does not seem to comprehend that he is doing any thing he should not do.

Jan. Levi Greek

Has been in school every day this month some day he is only in a part of the time, he is often called out to help in some other department, he has done quite good work, some times he complains of having the headache and at those time he is stupid and his work is not well done if he works at all His department is good in school.

1900

Jan. Nellie Garvy

Has been in school nearly all the month was absent three days. She learned the net work very readily can set up a hammock and make it with very little help if any she is a good girl and I like to have her in school, she hems nicely and can turn, baste, and overcast the hem in the table napkins without any help.

Jan. Willie Cohen

Has not been absent this month he is working well, he has made about one fourth of a laundry net this month, can take out his own mistakes, keeps his net very nice, his work is not the very best, but it is good, he is nervous and and rather inclined to be careless. His department is not the best, he has the fault of taking things, and then telling a story to get out of it, I like him for all that,

Jan. Annie Hanzel

Has been in school all the month, she has taken more interest in her work and has improved, she threads the needle knots the thread, turns & bastes the hem in a towel and can overcast quite well; she has had eyes and some days she does not use them at all, she is a good girl in school,

1900

Gladis Hardin

Jan. Has not been absent this month, she is quite interested in the net work and has improved she handles and holds the needle quite natural and will learn it in time, she is a good child in school

Clara Hanson

Jan. Has not been absent this month. She does not improve very much in sewing, but I think in deportment she has improved she may in time learn how to use the needle but just now she does not have much idea what she is doing any more than to put the needle through and through,

Adolfph Holstrom,

Jan. Has not been absent this month, he does the nicest work of any child in the net class and is always busy, never gives me the least trouble in school.

Oscar Hagan

Jan. Has worked out side all this month

Joe Hatch

Jan. Will not be in the net class any more

1900

Arthur Hopkins

Jan. Was absent three days this month, he can wind the net needles very nicely and would do more if he could use his hands.

Gustav Haack

Jan. Has been in school every day this month some day he would not be in all the period, would be detailed to do some other work about the house, his work in the net class is good, he has finished a babies hammock he began last month, his work is always kept nice and clean his deportment is good.

Joshia Clarce

Jan. Has not been absent this month she is improving in the net work handles the needle much more natural, and the mistakes she make are not nearly so many as last month and she is beginning to see that she can do the work, yet she does not like to work independently her deportment in school is always good.

Johnie Johnson

Jan. Has been in school every day this month and has worked well, he has made a babies hammock this month and helped the other children, with their work. His deportment is always good

1900

Elmer Johnson

Jan. Has been in school all except two days this month, he does his work well in the net class but is very slow, keeps his work clean, he will finish his net this month, he has worked on it about three months, and in that time he has learned to work independently, that is, he does not make any mistakes. His deportment in school is very good.

Jan. Mamie Langan

Has been home all this month

Jan. Sarah Langdon

Has been absent one day this month she does not improve very fast in the sewing, she does very much the same work she did last month, threads the needle and bastes the hem in the towel, she is one of those children who never does any thing wrong in her own estimation, and if her work is not right it is always some one else who did it

Jan. Celia Montour

Has been in Miss McLeans office all this month.

Jan. Minnie Meklay

Has been in school all the month she does not improve very much from one month to another, is not capable of much improvement. She is quiet in school.

1900

Fred Mundt

Jan. Has been in school all the month and has done very good work on the net he is making he is improving in the work, is ready always busy, His deportment in school is good.

Jan. Theadore Mislin

Theadore has been in school one period or the other every day this month he winds the needles, and get the work out, and put it away again when the children are through and if any of the boys gets in trouble with their nets he will help them out, but will not work on the nets himself say it hurts his hands. and I think it does His deportment is good in school.

Jan. Alma Marsh

Has been in school every day this month she is doing nice work on her net, she makes a few mistakes but she is overcoming that, her net looks very nice she has been a very good girl in school I never have to speak to her.

Jan. Bennie Astrander

Has not been in school very much this month, was taken out at different times to help around the house, so he has done very little work His deportment is good

1900

George A. Connor

Jan. Has been in school all the month he likes to be busy, and will wind a ball any size, he minds all the word in hall, likes to have some one read to him, will look through a picture book and select what he wants me to read for him, understands quite a little, His deportment is better than it used to be, and could be better yet.

Jan.

Raymond Powers

Has been in school all the month he has improved a little in the net work but can not work alone he wants to learn and will but it will take him a long time. His deportment in school is good.

Jan.

Mary Penheiter

Mary has been absent two days this month she is doing good work on the nets she works almost independently, when she needs a new needle, she ties the loaver knot and binds the ends down and does it very neely when she comes in to the schoolroom she gets her work herself and works all the time, she never make the least trouble in school.

Jan.

Caroline Peterson

Works well she very seldom ask one to help her, she helps the other girls if they need some one to tie the needle on or how to take out their work. She is a very industrious girl, Deportment good.

1900

Theadore Palmer.

Jan. Has been in school all the month he is quite interested in the net work and has improved quite a little I feel sure he will in time learn the work so that he can tie the knot and keep an even mesh. He never gives me any trouble in school.

Jan.

Frank Park

Has not been in school this month

Jan.

Martin Peterson

Martin is usually in school a part of the time he should be in the net class is very often taken out for some other work, I can't say that he is industrious for he does not like to work. yet the net he is making on is quite well done, he never make very much trouble in the school.

Jan.

Robert Robstock

Has been detailed to help his attendant.

Jan.

Bell Rosencrans

Has been in school all the month she is doing very good work in school any thing she does is well done, this month she has learned to tie the nets and do it without any assitance from me, when she has worked at it a little longer I think she will be able to help some of the other girls who find the work so diffienlt, She is always good in school.

1900

Jan. Amy Reever

Has been in school all the month, she is not very ambitious does not do her work any better nor any worse, sew tumer the hem very nicely and bastes well, but does not oversast well at all She never makes any trouble in the school room.

Jan. Thressie Slayton

Has been in school all the month she does not sew very much better, some time the work will be quite good, but I cannot depend upon her, when she has any to take out she does it very nicely and carefully. Department good

Jan. Henry Saur

Has not been in school this month

Jan. Lena Schumaker

Has been in school every day this month she works well and can make a very nice net, and does it almost independently, she never waits for me to get her work for her, but the minute she come in the room she get her net & begins work, She is a very good girl in school,

1900

Jan. Harry Stewart

Has been in school all month he works well has made about one third of a laundy net, he is always busy but works slowly never makes any trouble in school.

Jan. Burt Smith

Has been in school nearly all the month, some days only a part of the period and some day not in at all, He has made a doll hammock and almost a laundy net, he usually very nice in school

Jan. Ignatius Stozercowski

Has not been absent this month, he has worked quite nicely for a child of his makeup, has made about one half of a laundry net, he get along faster than Elmer Johnson but his work is not as good. His department is not always good.

Jan. Eddie Wilkinson

Has not been in school this month only a few minutes each day

Jan. William Winklemeyer

Has been in school every day this month he has learned to tie the nets and can now, tie them with out myself standing beside him, he is going to do the work well is careful to keep the meshes even. He is always quiet in school.

1900 Sophia Vrabek

Jan. Is in school every day, she does not have ambition enough to ever do any thing, she works a little if I keep at her. She never gives me any trouble in school

Jan. Lewis Weisberg

Is in school every day he minds the card and tries to mind the needles but has not learned that yet. he is glad to work but as yet he has not succeeded very well. Does not make any trouble in school.

Jan. Nicolas Yeager

Has not been in school this month.

1900 Julia Andersick

Feb. Was absent three days this month, she has worked very nicely for her she will not ever sew well, she has good use of her hands can thread a needle and baste the hem in the towel, and if I could sit beside her I think she would overcast the hem much better than she does, she makes very good stitches but does not catch them through, in the net work I think she will work better she holds the needle well and is not nearly so helpless as many of the others who have learned it. Department in school is good,

Feb. Daniel Anderson

Has been in the Hospital all this month

Feb. Bell Burkshier

Has been in school nearly all the month but has either not been feeling well or had a sore hand, so that she has not done any work Her deportment has been good,

Feb. Agnis Christianson

Has been in school all the month she does about the same work she did last month she seems to neither go back or to improve. Her deportment in the schoolroom is usually good.

1900
Feb.

Penny Cohen

Is in school every day, has worked quite well for him, for he is not usually very fond of work, has finished the laundry net he has been working on for months, the work was quite well done, he was very much pleased to get it off his hands His deportment in the schoolroom is good,

Feb.

Charlie Elginson

Has not been in school this month

Feb.

Levie Greek

Has been in school all the month, he very often has the headache and at those times he does not work, this month he has made nearly one half of a laundry net, does good work Deportment is good

Feb.

Nellie Garvey

Has been in school all the month she works well can make a doll hammock without any help and is very nice about helping the other children with their work, she is a very kind hearted girl, I can trust her to do any thing about the school room the children all like her and respect her she is always busy and happy in the school room,

1900
Feb.

Willie Cohen

Was out of school one day this month, he has done good work has finished a net he had been working on, and began another he is working very nicely and is quite independent, when he sees he has made a mistake in his work he will take it out himself, he is usually a very good boy in school.

Feb.

Annie Hanzel

Has been in school all this month, she has improved in her sewing quite a little and is very much interested in having her work done well, she threads the needle knots the thread, turns, bates and over casts the hems in the towel and does it very nicely I am sure she will do good work in time, Her deportment in school is usually very good

Feb.

Gladis Hardin

Has been absent four days this month She is doing very nicely in the net work has learned to tie the knot, and can almost work independently. I am sure she will learn for she is so anxious make a net all herself, she holds the needle well and has good hands + uses them naturally, keeps quite an even mesh, at first she found it very hard to do any thing with the work and now that she can help herself a little she is very happy. Deportment good.

1900
Feb.

Clara Hanson

She is in school every day. she never does any kind of work unless I sit beside her and help her all the time she does not have the least particle of an idea what it is to give her attention to her work, I do not know whether she will ever learn or not. Her deportment is never very good, she likes to walk about the room and bother the other children.

Feb.

Adolph Holstrom

Has been in school every day, he is a very industrious boy and works every minute he is in the class does the best work of any child in the class, Has finished the net he worked on last month and commenced another, His deportment is always good.

Feb.

Oscar Hagan.

Has not been in my room this month.

Feb.

Arther Hopkins

Has been in school every day this month, he winds some of the hammock needles over it nicely that is all the work he can do in this room His deportment is always good,

1900
Feb.

Gutav Haack

Has been in school all the month he is making a large hammock his work is well done and very clean he is always busy, and never refuses to help any child who needs his help and is very kind to all. His deportment is good,

Feb.

Clara Josylin

Has only been in school nine days this month, she is anxious to learn and I think in time she will get so she can use her hands well enough to make quite a good net, she can not do it now. her deportment is good.

Feb.

Johnie Johnson

Has been in school all this month I can't say any more for him than has been said all the year he does his work well and quickly, His deportment has been good.

Feb.

Elmer Johnson

Has been in school every day this month, has finished the laundry net he began some time ago and has began another, he does much better work than many of the other boys who work. faster than he, he does not always like to stick to his work but what he does do is well done. Deportment usually quite good.

1900

Feb. **Mamie Dangan.**

Has been in school all the month she is learning the net work can not work alone yet, but she has much better use of her hands, handles the needle much better and has some little idea of what is expected of her, I find it very hard to keep her attention, Her deportment is usually good.

Feb. **Sarah Langdon**

I can't see that she has improved any, she has so little idea of fixing her mind on any thing long enough to learn much about it, She can baste a little, thread the needle, and that is about all she can do. Deportment is not the best,

Feb. **Celia Montour**

Has helped Miss McLean all this month,

Feb. **Minnie McClay**

Has been in school all the month, she does just about the same work she did last month. threads the needle which she finds very hard to do. hastes the hem in the towel and over casts a little, she likes to have her own boy and her own work. Her deportment in the school room is usually very good,

1900

Feb. **Fred Mundt**

Fred has been absent one day this month, he is doing good work on the nets this a firm knot and keeps quite an even mesh I can see each month that his work is a little better done than the month before, His deportment is usually very good.

Feb. **Theadore Misslin**

Has been in school every day this month, he has worked better this month than any time since school commenced, he netted a laundry net himself and has it about one fourth done the work is all that I could wish for, has kept it clean and is very proud of it, his deportment is good.

Feb. **Alma Marsh**

Has been in school sixteen days this month, she is doing good work and is always busy has her laundry net almost finished, she improves every month, Her deportment in the school room is all I could wish it to be.

Feb. **Bennie Ostrander**

Has been in school fourteen days this month, he works well, his work is not as neatly done as many of the boys, but I think it is as good as he can do. His deportment in school is good.

1900

George O. Connor

Feb. Has been in school every day I can't see any improvement in this child he will mind a ball, but that is the only thing in the form of work that he will do, any other work I try to have him do he takes no interest in at all, his deportment is never very good.

Raymond Powers

Feb. Has been in school every day this month, he does the net work a little better but can not work alone, he is anxious to learn but lacks confidence His deportment in the school room is always good.

Mary Pemheiter

Feb. Has been absent one day this month she is doing very nice work, but not as smoath as some of the other children have their net work. She is industrious works independently, I think can make a net all alone. She is always kind and good in school.

Caroline Peterson

Feb. Has been in school every day this month, she works well and independently She has made about one half of a laundry net and helped many of the children with their work, she is always busy in school, enjoys her work. Her deportment is good.

1900

Theadore Palmer

Feb. Has been in school all the month, he is improving very much in the net work I am sure that he will soon be able to work independently he is very anxious to learn and is busy all the time, which is very surprising to me His deportment is very good

Martin Peterson

Feb. Martin is in school so little that he does not accomplish very much and of course does not improve very much. yet he does the net work quite well, for all he does not like to work the best, he never gives me very much trouble in school.

Robert Rebstock

Feb. Has not been in school.

Bell. Rosencrans

Feb. Has been in school every day this month She has learned the net work so that she can work independently, she makes very few mistake and can take them out herself she ties a good knot and keeps an even mesh she has also learned to braid the cord for the bags She is industrious and and always in a good humor. Deportment good

1900.

Feb. Amy Reever

Has been in school every day this month she does about the same work as last month, threads the needle knots the thread, turns and hastes the hems in the towel, oversews the hem, sometimes the work is quite well done then again it must all be taken out, she has just one way of sewing and it seems she can not change, Deportment very good,

Feb. Thirzie Slayton

Is in school every day. I can not see that she has improved any is nearly always busy. Sometimes she will turn the hem in the towel and baste it very nicely but does not always do it, Her deportment in school is usually very good,

Feb. Henry Sauer

Has not been in school this month

Feb. Lena Schumaker

Has been in school every day, she is industrious and does very nice work, she has almost made a laundry net this month, she does not get any help from me, except when she sets up the net, she can not count the stitches to begin with. Her deportment is always good,

1900

Feb. Harry Stewart

Has been in school all the month he works well, has made about one half of a net in two months, his work is quite well done, has very few mistakes never comes to school with soiled hands Deportment always good,

Feb. Burt Smith

Has been in school every day this month, but many times was taken out for a part of the time to help in some other department, he has worked well finished a laundry net and made a doll hammock all alone. His deportment is good,

Feb. Ignatius Stezerowski

Has been in school every day this month he has not worked as well this month as he has other times, Has made about one half of a laundry net, his work does not look nice, it shows that he was careless and did not care how the net looked, His deportment is never the very best yet I have very little trouble with him,

Feb. Eddie Wilkinson

Is not in school long enough to do any thing, yet some times he will make a few meshes on his laundry net, he never gives any trouble any place,

1900
Feb.

William Winklemeyer

Has been in school every day this month he has learned to tie the nets so now he works independently and does good work makes very few mistakes he has made about one half of a net he is busy all the time if he has the work to do, His deportment is always good

Feb.

Sophia Wrabek

Has been in school every day, she will never learn to sew, I have some hopes that she will learn the net work she surely has improved in that work, she is very awkward but I think will over come that and do the work all right, if she does take to this work it will be a great help to her in using her hands more. Her deportment is good.

Feb.

Lenie Weisberg

Has been in school every day this month, I don't know what to say about him, he can wind a ball & that is all he can do. I have been doing my best to teach him to wind the hammock needles and he just will not or can not wind them for it must be done, if I help him he will do quite well but if I leave him alone he goes back to his own way, I am surprised to think he can not learn it for he wants to so much. His deportment is bad

1900
Feb.

Nicolas Yeager

Has not been in school this month.

1900 Julia Andersick

Mar. Was absent three days. She works well but will never be able to work independently, she likes to help in the schoolroom such work as passing the work boxes and putting them in the cart, She can turn the hems and thread the needle as quick as any one and baste the hem in the towel, She is always a good child in the schoolroom,

Mar. Daniel Anderson

Has been in the hospital all this month except three days.

Mar. Bell. Burkshier

Has been in school all this month She has worked very nicely when she is in the humor she does quite good work but if not her work shows it. tod. her deportment in the schoolroom is usually quite good for a girl of her disposition,

Mar. Agnis Christianson

Has been in school every day this month, she has done better sewing this month than usual yet she never does very much, She never seems to be quite ready to attend to her own work, but is looking around to see if some other child is at work, she never gives me very much trouble in class except she does not like to work

1900 Penny Cohen

Mar. Has been in the class all the month and has worked well on the net. notwithstanding he does not enjoy sticking to the work, he has made about one fourth of a laundry net this month his department is usually quite good,

Mar. Charley Elginson

Has not been in school this month

Mar. Lewis Creek

Has only been in school seven days this month, if he does not have the headache he works quit well. Deportment good

Mar. Nellie Garvy

Has gone to Skinner Hall for which I am more than sorry. she was a very good girl in the knit class.

Mar Willie Gohen

Has been in school only a part of the period that he comes to me sometimes he is in only a short time then again he is out but a few minutes all depends on the lenght of time it take him to do the work he is taken out to do, he gives me very little trouble in school and has worked very nicely has almost made a laundry net this month,

1900 Annie Hanzel

Mar. Has not been absent this month and I am glad to be able to say that she is improving in her sewing, she can turn and baste the hem in a towel in fact she can make a towel without any help from the teacher, yet I think she would not always do that successfully if I did not look over her work she has learned to be busy. Deportment usually good.

Mar. Gladis Hardin

Has been in school all the month and is improving every day, she ties a good knot, sometimes she does not always have the meshes just even, that will come to her with practice, she is much more attentive which pleases me more than any thing else she has accomplished. Deportment good

Mar. Clara Hanson

Is in school every day but 2 can not say that she is improving very much, she has no ambition, she can not appeal to her pride, she does not take any interest in any kind of work, she threads the needle, and some times make an effort to sew but does not succeed very well, Deportment not very good

1900 Adolph Holstrom

Mar. Has been in school all this month, he does splendid work I think the best of any boy in the class, this month he made clean laundry bags and the work is done beautifully, he works every minute in school never gives me the least trouble,

Mar. Oscar Hagan

Has not been in school this month

Mar. Arthur Hopkins

Is in my school every day, he can wind the net needles and that is just about all he does in my room could make the nets if he could use his hands. His deportment is always good,

Mar. Gustav Hoack

Has been in school every day but much of the time only for a little while was out for different things was marked well when he was here finished a laundry net, and began a large hammock when he is in school he is always busy, His deportment is always good.

Mar. Clara Josylin

Has not been absent this month, she has improved in the net work and might do ever so much better if she had any confidence in herself and a little more ambition, Deportment good.

1900 Johnnie Johnson

Mar. Is in school every day, and works well has made a large Hammock and a part of a tennis net, he is very quick to take up any change in the stitch, is always busy and is always very good in school

Mar. Elmer Johnson

Has been in school all the month, he is doing good work on the meter, he is a little restless at times, but is always good natured he likes being the errand boy in the schoolroom, understands readily and is very quick His department is quite good,

Mar. Hanna Langan

Is always in school, She is improving in the net work and if I could in some way instill a little ambition into her I think there would be no reason whatever for her not learning this work so as to be able to work independently, Her deportment is good enough.

Mar. Sarah Langdon

Has been in school all the month, I hardly know what to say about her, she surely has not improved any and I am at a loss to know just how to manage to get her interested, for that is all she needs, she is so thoughtless about everything but talking,

1900. Celia Montour

Mar. Is in Miss McLeans office all the time

Mar. Minnie McClay

Is always in the class she has such bad eyes that I can not expect very much of her, and then she does not care for work, she can thread the needle and baste the hem in the towel after it has been turned for her, She is one of those children who always seem to have something to talk about,

Mar. Fred Mundt

Has been absent two days this month, he is getting along well with his work, his net is usually very well done, he has been having a little discipline this last week by having to take out some of his work, which has worried him quite a little, he usually works quite well, His department is quite good

Mar. Theodore Mislin

Has been in school every day this month many days he has been taken out for some other work, but comes back when he is through with the work he has worked well has finished his laundry net & made about one third of a large hammock his work is well done His department in school is always good, he has worked better this month than any time this year.

1900.

Alma March

Mar. Has been in school all the month, she has worked well and is always in a good humor, she will try to do any thing I ask her to do and never grumbles, she very seldom makes a mistake, has made about one half of a laundry net.

Bennie Ostrander

Mar. Has been in school every day this month some time only for a short time, his work is usually done well enough but he is so untidy with his work and does not work nearly as fast as many of the other boys, he has made about one fourth of a laundry net this month his department is usually quite good,

George A Connor

Mar. Has been in school fifteen days this month, he only works on the nets when I sit beside and then he does not like to apply himself very long at a time, if he has something he really wants to do he will stick to it quite a while and be very quiet, His department this month is much better than usual.

Raymond Powers

Mar. Has been in school all the month he does not work as well as I had hoped he would seems so helpless, if I sit beside him he can do quite well but if he makes a mistake he can not take it out then get the end in a tangle and some other child will have to take it out for him, I think he will learn it in time,

1900

Mary Penheiter

Mar. Has been in school all this month except two days she works independently has finished her laundry net and worked on two or three others she is industrious and a very agreeable girl to have in school Department always good,

Caroline Peterson

Mar. Has been in school all the month she is quite independent with the work has finished her laundry net and helped many of the children to get out of dificulty with their work and finished off one or two nets that some child, who had been taken out of the class, had left unfinished and has begun a large hammock all herself except to count the number of meshes she must have to begin with, she is always good in school,

Theadore Palmer

Mar. Has been in school all this month he is much more interested in the net work than ever before, he know just how to tie the knot but does not get the meshes even I think he will get that with practice, he is quite good about sticking to his work, He is quite stubborn but if I will stay with him long enough he will give in and be very nice about it too, when he sees that there is no other way out of the trouble,

1900
Mar. Martin Peterson
Has been detailed to do some other work

Mar Robert Rebstock
Is not in school.

Mar. Bell Rosencrans
Has been in school all the month she works well she has made nearly one half of a laundry net does good work but not independently. she uses the scissors very well can cut on a line cuts the towels by a drawn thread, she does not do it easily but she can do it, she is careful of her work and always wants to do her best. Deportment always good,

Mar. Amy Reeves
Has been in school all the month, she is a child who might do a great deal better than she does, I think she is a little lazy she never does her work well but is not one of those children who get their works soiled, her towel always looks well and has the appearance of being much better done than it is I am in hopes she will be able to see her diffiency and overcome it, her deportment in school is good.

1900
Mar Theresie Slayton
Is always in school, some times she does good work and when she does not she is very careful about taking the work out in that she excels, she turns the hem very nicely and bastes it, she is usually busy. Deportment good,

Mar. Henry Sauer
Has not been in school this month

Mar. Lena Dehnmaker
Has been in school all the month she has worked industriously and quite independent has finished her net, and is finishing up some of the nets that was left by boys who have left the class she does her work well, Deportment always very good,

Mar. Harry Stewart
Has been in school all the month, he is doing good work, his net is almost finished he has been working on it for nine months he is in the P.M. class he is not at all lazy, but is very slow, he is a very good boy in school,

Mar. Burt Smith
Has been in school all the month many days only a short time, he has finished his net and made about one third of a large hammock he is working well. Deportment very good

1900
Mar. Ignatius Stozercowski
Has been absent three days and much of the time he has only been in school a part of his time, was taken out for other work he has not been inclined to work very much this month, has done a little on the net and has taken out some work that some other child did so that he was busy nearly all the time, he is not very fond of work. His deportment is quite good for him.

Mar. Eddie Wilkinson
Has not been in school this month

Mar. William Winklemeyer
Has been in school all the month he finished one laundry net and has about a fourth of another made, he is always busy in school does good work, but needs a little watching to see that he kept it all right, His deportment is always good

Mar. Sophia Wrabeck
Is always in school, she is improving in the net work some times can tie a knot all alone, and if she had the least ambition she could learn the work in a very little time, but when I leave her she stops, work Her deportment is good,

1900
Mar. Lewis Weisberg
This is a boy that I am free to acknowledge that I do not know what to do with, he is the most trying child in school I have I have thought of many ways to interest him and have failed in all, he never is contented unless he is raging on harassing some of the other children and he does it in such a good natured way if any child will not notice him he will keep at him until patients ceases to be a virtue. If I sit beside him he will work quite well, but the minute I leave him he stops, Has been in school all the month,

Mar. Nicolas Yeager
Has not been in school.

Mar. Hattie Burton
Is a new girl has only been in school a short time, she seem like quite a capable girl I think she will not have any trouble learning the net work.

Mar. Mary Erickson
Has only been in my room a few days she is a very pleasant girl and I think she will not have the best difficulty in learning this work, she is kind and seems to be happy.

1900

Mar. Daphne Brown

Has just come into school, she does not have the slightest idea of what it is to do this work and do not take the least interest in the work may be when she is more acquainted she may do better,

Mar Ralph Sweinsen

Has been in my class fifteen days this is his first work with me I think he will have very little trouble learning if he makes a mistake he can take it out and he ties many of the knots well, he seems to like the work and is a very good boy in school,

Mar. Emma Hendrixson

Is another new child. I am sure she will take up this work without any trouble, has only been in school a short time, hardly know what is expected of her,

Mar. Lena Larsen

Is in the hospital was only in school four days she does not seem to know much of any thing, but she is so homesick and every thing so strange to her, that it may not be fair to judge her until I know her better. while she was in school she was continually walking about the room,

1900

April Andersuck Julia

Has not been absent this month, she has not accomplished much work but what she has done shows much improvement all her work is well enough done to be pretty as good work, while before it would have had to be gone over with machine, her department has been very good.

April Daniel Anderson

Has gone home.

April Bell Burkshire

Has been in school all this month the work well at times, then again she will not do anything good and is stubborn and irritable I think she will never do the work much better, but I am quite sure she is a much better girl by having this work to do, it helps her to forget herself, Her deportment has been quite good

April. Christianson Agnis

Has been in school all this month and the work she has accomplished this month is very good, and shows quite an improvement she is very inattentive and needs looking after all the while to keep her at work I have not succeeded yet in finding any way yet in which I can get her to become more interested in her work, she is not troublesome in the school room

1900.
April — Cohen Penny
Har been in school three week this month he har worked quite well for him, his net look much better than the last one he made, he will never do the work as well as many of the other boys, but at the same time I know that he is a much better boy for having done this work. His department is much imporved,

April — Charlie Elginton
Har worked out side this month,

April — Lewie Greek
Har only been in school a day or two.

April — Cohen Willie
Har been in school all the month he is doing good work, finished his laundry net helpped to take out some work that were done on a hammock and left because it would make the hammock too small and har begun a hammock and made fifty three inches on it his work is well done. he is usually a good boy in school

April — Annie Hauzel
Har been in school all this month, she har imporved very much in her sewing all the work she har done this month will pass for good work, she has not accomplished very much but none of her work will have to be done over with the machine. Her department is quite good,

1900
April — Gladis Hardin
Har been in school all this month and har imporved quite a little she does not do the best work on the net but she makes very few mistakes and seems to like the work I am quite pleased with her Department good,

April — Clara Hanson
Har been in school all the month, I can see no improvement in her since last month, She does not take the least interest in the work and only makes the attempt when I stand beside her, She may learn in time but I hardly think she can, Her deportment is not very good,

April — Adolph Halstrom
Har been in school all the month he har done beautiful work, har finished a laundry net left over from last month and har made about eighteen inches on a hammock, he is very careful of his work and keeps it just as nice as it is possible I think he does the best work of any of the children in my school and he never looses a minute, his deportment is always good

April — Oscar Hagen
Work har out side

1900

April

Arthur Hopkins

Is in school every day of course he does very little in the net class, can wind the needles and sometimes will wind a ball, he can not hold a very large one, he could learn this work if he could use his hands. His deportment is always good.

April

Gustav Haase

Is in school every day. Some days only for a little while but he is doing good work, he finished one large hammock and commenced another and has made more than two yards on it besides he helped many of the other children when the need his help, he is very industrious and never give me the least trouble in the schoolroom

April

Clara Joslin

Has been in school every day this month, she has learned to tie the net and her work is quite well done some times she can tie the knots once around the laundry net and not make a mistake she has improved very much this month, if she just had a little more ambition she would be all right in this work I am in hopes that will come to her now that she sees she can do the work. Her deportment is good

1900

April

Johnnie Johnson

Has been in school all this month has done good work, has made thirty feet on a tennis net, and helped many of the other children on their work, his work is all one could wish it to be he never makes me the least trouble in school and it is a pleasure to him as well as the teacher for him to be in school.

April

Elmer Johnson

Has been in school all this month he has done good work never has any mistakes in his net his work is very nicely done and well kept, he is quite industrious and understands very quickly any thing I want him to do can divide the net needles as well as any one and is very fond of being the errand boy in the schoolroom. His deportment is very good.

April

Mamie Langan

Has been in school all the month she learns very slowly she seems to take a little more interest in the net work and if I can succeed in getting her interested enough to apply her thinking powers a little more I will feel that I have accomplished a great deal with her. Her deportment is quite good.

1900

April

Sarah Langdon

Has been in School all the month I can't see that she has made any improvement, I do not know what to do with her she has so little thought about her work, is always looking around to see if there is not some other child who would rather talk than work and she usually succeeds in her efforts.

Aprie

Celia Montour

Is in Miss McBeans office all the time

April

Minnie McClay

Has been in school all the month She does not improve any or if any very little I think she will never be able to much work of any kind, She is like Sarah L. she likes to talk quite a little.

April

Fred Mundt

Has been in school eight days this month, has been helping along the house in some other busy placd while he is in school he works very nicely and I can see that he misses her quite a little she likes to be the errand boy in school and he is very quick to understand what is wanted. His department is usualy good.

1900

April

Theadore Mizelin

Has been in school ten days this month the last week he has not been well and has not worked although he was in school but when he is well he works very well His department is good

April

Alma Marsh

Has been in school all the month much of the time her eyes have been sore and she has not been able to work any, when she does work she is quite careful and her work is very nicely done she is always kind and respectful in school.

April

Bennie Astrander

Has been in school every day this month he works well and is getting along very nicely with the exception of keeping his net clean I am sure he has the worst looking net in the class & I do not understand why it should be so, he is not any more careless than many of the other boys, His department is quite good.

April

George A. Connor

Has been in ten days this month he has not improved any his department has not been so bad as some oltree times.

1900

Raymond Powers

April — Has been in school every day this month, he does not improve as much as I had hoped he would I think one reason for it is, that he can not use his left hand very well, its partly paralized and is is very difficult for him to hold the work, and that with the lack of energy makes it hard to work with him. His department is good

April

Mary Penheiter

Has been in school nearly all this month. She is industrious and does her work well I think better than last month, she works quite independently, she has finished her own net and taken up two or three other nets that were left unfinished and has finished them, she is is always ready to do any thing I ask of her. Department good.

April

Caroline Peterson

Has been in school all this month she is very industrious worker independently, she is making a large hammock and is good to help the other children with their work if they need her, which they do very often, she is always happy, and very happy now. Her department is always good.

1900.

Theadore Palmer

April. — Has been in school 14 days this month he is doing very good work and has improved quite a little, can tie the knots in the net alright but does not always have the meshes just as small as they should be I think in time he will do the work very nicely. His deportment has been good.

April

Martin Peterson

Has not been in school enough to do any work this month, a day now and then.

April

Bell Rosencrans

Has been in school all this month she works well does not need any help with her net except when she wants the needle tied on, she is very nice about helping others, she makes a good model girl in the school room, she is very industrious. Never gives me any trouble in school.

April

Amy Reever

Has been in school all this month she has done much better work than she has done this year, the work on the towels is very nicely done and when she has finished one it does not have to be done over again, she can turn the hems in the towel and baste them and hem the towel with very little help. Deportment is good

1900
April

Thressie Slayton

Has been in school all the month she does very much the same work she did last month I can't see any improvement, If her work is not well done she take it out very carefully & does it over again some time she will do very nicely but oftener she does not have the work as is should be, Her deportment is quite good,

April

Lena Schumaker

Has been in school all the month she works independently and does good work she is always busy, and is kind to the other children & will help them if they need her assistance Her deportment is always good,

April

Harry Stewart

Has been in school all this month he has finished his net, he had been working on for several months, he was very happy to be able to take it to Miss McLean so she could see what he had done, and he wanted to begin another one right away, and did and has quite a little done on it, he keeps his work very nice and it is always well done, His deportment is always good,

1900
April

Burt Smith

Has been in school all the month, he has made a large hammock and commenced another, he does good work and is busy all the time. he can tie and bind the thread when he wants a new needle so that he is quite independently, he is quite industrious His deportment has been very good

April

Stezercowske Ignatius

Has been in school sixteen days this month, he has not cared to work this month I think he may be a little tired of the work, & then he likes to be out of doors; he would like very much to play all the while, his deportment has not been very good,

April

William Winklemeyer

Has been in school all this month he is doing good work and now he will bring his work to me to have me tell him that I think it is good and that he is a good boy, he never intentionally looses a minute from his work, he has improved quite a little and has almost made a laundry net this month, His deportment is good,

1900
April

Sophia Wrabek

Has been in school all the month, she has done very little work this month without any help I think she does not like to work very well, if I do not watch her all the time she will just sit and hold her hands, she has very little ambition

April

Gennie Weishuz

Has been in school all the month I can't say he has improved any I do not like to have him work on the nets except I can work with him for if he learns to do anything wrong he will never give it up, I think he would like to work on the net all the time if I could stay with him, He has been quite good this month for him

April

Hattie Burton

Has been in school all the month she has improved very much, she can tie the knot all keep a very even mesh in the laundry net, she is very industrious and works very fast she has made almost the half of a net, she seems very happy now, in school, Her deportment is very good,

1900
April

Mary Erickson

Has been in school all the month, she is doing very good work is industrious and anxious to learn, she can untie the knots when the work has not been put in right and can tie the net, but not as good as it must be done but she will do it in time, she seems happy in this class never makes any trouble in school,

April

Daphne Brown

Has been in school all this month, she does not take any interest in the net work, but she is new in school and every thing is strange to her, I am in hopes she will in time be more interested in the work I do not think she will be as apt as many of the other children She is usually quiet in school,

April

Ralph Swanson

Has been in school all the month, he is learning the net work nicely and is quite industrious, can take the work out if put in wrong, is happy and contented. he has made about one fourth of a net this month, never given me any trouble in school,

April

Emma Hendrixson

Has been in school all the month. She is learning the work nicely and will in time do it well, She is strange and must learn the way of the school room, she is quite a bright girl, does not make me any trouble in school,

1900
April

Lena Larsen

Has been in school all the month has not done any thing she is new in school and every thing is new to her not excepting the language, she will not learn readily but I am sure she will do something after a while. She has not been at all well, her nose lips and finger have been sore all this month and she has been sad is now very home sick,

April

Willie Wall

Has just come into school he seems to be bright enough but very restless. I hardly know what to expect of him,

April

Duffield Ray

Has been in school all the month, he has improved in the net work a little and I know should have done much better, but he lacks energy and will not try unless I stand beside him He never give me any trouble in the schoolroom

April.

Edgar Miller Frank Meeker

Has been in school all the month. He has improved in the net work very much can tie a good knot and keep an mesh, but he does not care to work and needs to be urged if he does very much, His Deportment is good,

1900.
April

Edgar Miller

Has been in school every day has not improved very much in the net class, he seems to lack ambition will not even try unless I stand beside him I think he will learn for there is know reason why he should. That he is quiet in school has not given me any trouble,

April

Don Hobbs

Has only been in school a day or two and is so homesick I can't tell much about him he seems like a very bright boy,

April

Joe Sullivan

Has been in this class (for the first time) three weeks this month he has learned the net work and can tie a firm knot and keeps an even mesh keeps his work very neat and work very dilligently but I think he is a child who will after a while become tired of the work and want a change, so far he has not given me any trouble in school.

1900 May

Julia Andersick

Has been in school all the month, she has not accomplished very much in work but has improved quite a little, the sewing she has done is better than at any time and I think there is some chance for her learning to sew quite well, she works very slowly, she is very good in school,

May.

Bell Burkshier

Has not been out of school this month, she has done very nice work for her, she will never do the best work and yet her nets are not bad she sew almost make a net alone and I think she does as well as she can, she is not hard to manage in school, but there are times she does not like to work,

May

Agnis Christianson

Has been in school all this month she is one of those extremely slow children who lacks application she has done quite good work for her this month but it has been very little if she would succeed in accomplishing very much, some one would have to sit beside her and urge her all the while, she does not seem to have the least thought about her work, she never gives me any trouble in school,

1900 May

Penny Cohen

Has only been in school seven days this month. Has worked well, has made ten or twelve rounds on his laundry net, wound the net needles, and wound two balls of cord he is lucky to be in school again, deportment very good,

May

Willie Cohen

He has been in school every day this month some days only for a little while, then again may be he would be in nearly all the period, he usually works well, he helped to finish a hammock he had been making on for a month or two and set up another and has made twenty or more rows on it he has improved very much in many ways, deportment good

May

Anna Hanzel

Has been in school all this month she is working very nicely for her, and much better than I had ever expected she would, she can hem a towel very nicely with out any help from me and very seldom has to take out her work, is more interested in her work than she has ever been I think now she will learn to sew quite well, ther deportment is very good

1900

May

Gladis Hardin

Har been in school all the month she is doing good work on the nets uses her hands much better and now comprehends what is expected of her, she knows when she has done the work well and likes to be commended, her deportment is very good,

May

Clara Hanson

Har been in school all the month she simply does nothing only when I stand beside her and then she does not take the least interest in the work, she is not still very much of the time,

May

Adolph Halstrom

Has been in school every day apart of the time, some time all of the period them again only a little while, he works all the time when he is in school, his work could not be better and he know that it looks well if at any time he finds that some one else has been working on his hammock he will take out all they have put in, His deportment is very good

1900

May

Arthur Hopkins

Har been in school all the month he minds the needles and can wind a ball and if he could use his hand he could do any of the work in the net class, he is a nice boy and never gives me any trouble in school,

May

Gustav Haack

Has been very irregular is month but the time he has been in he has worked well, His deportment is very good,

May

Clara Josylin

Har been in school all the month and has done very good work in fact much better than I had ever expected she would do, she uses her hands much better and ties a good knot and keeps quite an even mesh and is becoming much more interested in the work, it makes her quite happy to know she can do the work, Her deportment is very good,

May

Johnie Johnson

Has been in school all the month he is just the same good worker he has made twenty feet on the tennis net besides helping several of the boys finish their hammocks, His deportment is very good,

1900

May

Elmer Johnson

Has been in school all the month he is doing good work on the nets, ties a good knot and keeps an even mesh he very seldom makes a mistak and works quite rapidly, he finished a net he had been working on for two month and commenced another, he is very careful of his work, his department is usually quite good,

May 1

Mamie Langan

Has been in school all the month, she I think does the net work a little better than last month and I believe in time she will learn to do the work if the teacher has patient enough to hold out until she has accomplished her aim, she talks quite a good deal yet she does not give me very much trouble in school,

May

Sarah Langdon

Has been in school all the month she has not improved very much if any, she will not apply her mind to and one thing long enough to become the least interested in it, Her deportment is usually good

May

Minnie McClay

Has been in school all the month but has had either one eye or finger so she has not accomplished any thing Deportment quite good,

1900

May

Fred Arndt

Has not been in school this month,

May

Theodore Mishlin

Has been in school every day this month but not all the time, the work he has done is good but he has not worked as well as he did last month, His deportment has been good,

May

Alma Marsh

Has been in school all the month she is doing better work on the nets than last month, has finished the net she had been working on for two months and now quite willing to commence another in school she is a good girl, I think she enjoys her work

May

Bennie Astrander

Was in school three week but not regularly, some days only a few minutes and maybe other days all the time, he has done quite well for the time he put in, finished the net he was working on for two or three months and has made twelve rounds on a new one, he is unfortunate in that he can not keep his net looking clean, and I think he really tries to keep his hands clean, Deportment is good,

1900

May

George A. Connor

Has been in school nearly every day a little while he has not done any thing, Deportment has been quite good

May

Raymond Powers

Has been in school all the month he has not accomplished very much but I can see that he is improving a little in the net work has better control of his lame hand and I think he will after much patience and many efforts he will succeed in being able to make the nets very neat, His Deportment is quite good.

May

Mary Penheiter

Has been in school all the month she is doing good work she can make a laundry net very nearly alone she ties on the needle and binds the knot, braids the string for the top of the bag, wind the needles she is very industrious, and never gives me any trouble in school,

May

Caroline Peterson

Has been in school all the month she is doing very good work she needs very little help with her work if any of the children need a little help out of trouble she is always glad to come to their assistance. She never makes the least trouble in school,

1900

May

Theadore Palmer

Has been in school all the month, he is doing good work, much better than I had ever expected he could do, and he is quite interested in the work, the work is not always the best but he improves a little every day and works well, his deportment in school is good,

May

Bell Rosencrans

Has been in school all this month she has worked well on the nets keeps her net clean and is very industrious she has the last week been working on a patchwork quilt - cuts out the blocks by a pattern uses the scissors well and sews out on a line the work well but does not always keep an even seam but will learn that after a while. Deportment very good,

May

Amy Reeves

Has been in school all the month she has done better work this month than she has all done for me she can make a towel all alone turn the hems and all and will make one in the morning session, she is more interested in her work that she has ever been, Her deportment is always good,

1900.
May

Theresie Clayton

Has been in school all the month she does not improve any sew a little one day and tickes it out the next, Deportment always good,

May

Gena Schumaker

Has been in school all the month she is very industrious and works fast. She finished the net she worked on last month and has commenced another she very seldom asks for any help, Deportment is always good,

May

Harry Stewart

Has been in school all the month he works well, he keeps an even mesh and ties a fine knot, he is always ready for work, does not accomplish much in a session but he does his best, Deportment always good,

May

Burt Smith

Has been in school two weeks this month, he has worked well on his hammock, and helped some of the other children with their work he very seldom asks for help from the teacher, he is a good boy in school,

1900
May

Ignatius Stezneowski

Spent most of his time working in the Cantatas,

May

William Winklemeyer

Has been in school all the month he finished the laundry net he was working on last month and has made about twenty rounds on a new one, he likes to work and is always busy in school. His deportment is very good,

May

Sabina Wrabek

Has been in school all the month she has improved a little in the net work seems to want to learn but she dont know how to use her hands from the very fact that she wants to learn I think she will succeed, her deportment is good

May

Lewis Weinberg

Has been in school all the month I cant say that he is lazy for he always wants to do something, but the trouble with him is that if he had a way of doing any thing no matter if it is not the right way, it is almost impossible for him to change and do it as it should be done he can wind the cord in balls but the ball is always eggs shape, His deportment is never good

1900
May

Hattie Burton

Has been in school all the month she is doing good work helped some of the other children finish a net they were working on, and now has commenced one of her own and is doing nicely she seldom makes a mistake or askes for help except when she wants a new needle tied on. Deportment good,

May

Mary Erickson

Has been in school all the month she has learned to tie the net well I think she was the happiest girl in school when she found she could do it alone, at first she was very much discouraged and said many times I know I can not learn to do this, but now she has commenced a net of her own and is very proud of it. She is a very good girl in school

May.

Daphne Brown

Has been in school all the month she does not call to work and has not done much this month, she can wind the cord in ball and makes quite a round ball. She is not ambitious and must be urged if she does any thing at all,
Deportment good,

1900
May

Ralph Swanson

Has been in school every day this month, he has done much better work on the net, than last month he is quite industrious and I think will do good work in time, Deportment very good.

May

Emma Hendrickson

Has been in school all the month she has learned to do the net work quite well and is industrious, she is a pleasant child to have in school and never makes me the least trouble in school.

May

Lena Larson

Has been in school all the month, she does nothing except play with the colored sticks, she is not very quiet in school.

May

Willie Wall.

Has been in school over two weeks he learned to wind the cord, he is very restless and is never ready to be quiet or for work, he has spent most of his time out in the grounds.

1900
-N

Ray Duffield

Has been in school all the month, he is one of those boys who never can't say whether he works or not, and I think he would rather not do any thing he works when I help him, can mind the coal His deportment is quite good,

May

Edgar Miller

Has been in school all the month he has not improved very much he does not like to work and will not if he can get out of it. he can mind the coal, and will work on the net if I help him His deportment is good enough,

May

Frank Meeken

Has been in school all the month he has learned the net work and can tie a firm knot and keep an even mesh, has helped finish up some of the bags that was left by boys who were taken out of the class for other work, and now he is working on a net of his own and is much pleased to see it grow every day He is a very good boy in my school,

1900
May

Don Hoke

Has been in school all the month has not learned the net work as easily as I had thought he would, he's one of those restless boys who is never in one place very long at a time, he can mind the coal but as good as many of the boys and only works on the nets when I help him I am in hopes he will do better after he has been here longer

May

Jas Sullivan

Has worked in the Cantata this month

June 1900

Julia Andersick

Has worked well during the year She trimes the hem, bastes it and overcasts, so that it can be handed in as good work, threads the needle knots her thread and can hem the towel with out any help her work is not the best but at the same time, she has improved very much and is capable of more improvement, In school her deportmen has been good

June

Bell Burkshier

During the year she has done very good work, she is a child who will never do nice smoath work but I can see a decided improvement in her work she is giving more attention and likes to see that her nets are as good as any of the others Her deportment in school is much improved,

June

Agnis Christianson

Agnis has improved in her work, that is sewing a little but she will never do much in that line she has very little application, she did very little work in the net class she is one of those children who will spend all the morning sewing in one place, not more than an inch, if she does not have some one to urge her watch what she is doing, Deportment has been good,

1900 June

Penny Cohen

Penny this year has improved in application very much, has enjoyed his work more than any time since I have had him, and has been much more energetic, he very seldom has to take out his work and do it over but when he does have that misfortune he knows how and what he must do and does it without any help from the teacher, His deportment has been very good

June

Willie Cohen

Has made decided improvement in his net work, and of course has improved very much in application, he makes a good net and understand that if he has any bad work he must take it out, it is very discouraging to be obliged to do that but, he knows that nothing else will do, so he does it & is quite contented, he has tied several laundry nets and two hammocks he enjoys the work there are many little things he has not learned, but he has the most important part Deportment has been good

June

Annie Hanzel

Has improved very much in her work, in the beginning of the year she did very little work unless I helped her, did not apply her mind at all, would sew on a towel one

1900 June

day and spend the next in taking it all out, of course that was not very encouraging and she often did not like to work at all, now she is quite independent when it comes to hemming a towel, she can thread the needle and knot the thred as quickly as any one, baste the hem and overcast it very nicely does not have to take her work out her sewing is not perfect, but very good, she has improved very much in application, Deportment good

June

Gladis Hardin

In the beginning of the year she knew nothing of the net work she found it very difficult to learn & because it was hard she did not want to work alone, she has learned to tie the knot well and keep a uniform mesh and has made one laundry net, the work has been much help to her in giving her strength in her hand as well as her mind her deportment is very good

June

Clara Hanson

She has done very little work and nothing independent, when I have tried to help her with the net work she did not take the least interest in the work, she seems to know all that is said to her, but cannot or will not apply herself. She may in time her deportment is none good.

1900 June

Adalph Halstrom

I can say that he works well in any department in the house, the work in the net class, could not be better there a few little things he cannot do but that is the teachers fault and not his, he cannot count the number of meshes he must have to begin either the net or hammock cride he can be taught to be independent, he is never idle in school, Deportment always good,

June

Arthur Hopkins

Arthur has been in my school more to have some place to stay than to work, he is quite a bright child, but his hands are in such a condition that he could not take the work only for that he could have learned it, the only thing he has learned in this class is to bind the net needles and can not do that well. His deportment is very good,

June

Gustav Haack

All the year has done good work he is a bright boy and there is no reason why he should not do well, he has kept up his interest all along and this month he has been very ambitious to finish two large hammocks, he works almost independently if he could count he could do this work without any

1900
June

assistance from his teacher he is a good boy to have in the class is an inspiration to the rest of the class he is trusty never gives me any trouble,

June

Clara Josylin

This is her first year in this school she has accomplished a great deal for her, she knew nothing of the work and I should think in her home she had had very little if any manual training, she did not know how to use her hands and of course she found the work very hard, she was an interesting child to work work with he cared she wanted so much to learn she lacked application of the mind as well as strength in her hands during the year she has learned to tie the net so that it is a pleasure for her to work there is much for her to learn yet that will come with practice she is very happy to know she can work independently, Her deportment is always good

June

Johnnie Johnson

Has kept up his interest all the year, his work is always good he is quite independent, work fast and does not depend on the teacher for any help, except to count the number of meshes to begin a net or hammock Deportment always good,

1900.
June

Elmer Johnson

Has improved very much in the net work has learned much in accuracy he tries a firm knot and keeps an even mesh, if some other child has worked on his net and not left it in a good condition he will see it right away he is very careful of it himself and has been quite interested yet he did not like to work at one thing all the while can wind the needles or the cord in balls. he is a nice child to have in school, Deportment usually very good

June

Mamie Langan

Has not accomplished very much but has done much better than I had ever hoped for I think in another year I will see a great improvement in her, she has learned to tie the knot very nicely and keeps an even mesh but she lacks concentration and I feel that if any work will develop that in her, this will she surely is more interested in this work than she has ever been in any thing in the school, Her deportment is not bad,

June

Sarah Langdon

I can see that she has made any improvement this year, she never has time for work because she must talk all the time and her work is always all done if I ask her about it, does not do any thing unless I stand beside her

1905

June

Minnie McClay

Is another child who has made no improvement she can thread a needle and baste a little does nothing independently, is very much like Sarah Langdon, in that she talks quite a little and is never ready to work.

June

Fred Mundt

Has not been in school all the year but while he was in he did good work his work on the nets and hammock is very good, he has improved very much, He works well in any of the departments, he's never gives any trouble in school,

June

Theadore Mishler

Has been in and out of school all the year, when he feels well and wants to, he does very good work think he has made two hammocks this year and helped in many ways in school, he will not work if he is feeling badly, he is always ageable in the school and I like to have him

June

Alma Marsh

Has worked quite well in school this year yet I think she has not improved as much as she is capable of, I think it may be because she wastiled from work in some other department, she lacks ambition and appreation, Department good in school,

1900.

June

Bennie Astrander

Is doing much better work now than at the beginning of the year he shows that he has imprisoned in accuracy very much, ties a firm knot and keep the meshes quite uniform, but his net never looks well, because he gets them so soiled I expect that comes from the fact that his hand are nearly always damp with perspiration he works well in all the departments never gives me any trouble in school

June

George A. Connor

Has not done any thing in school

June

Raymond Powers

Has done very little with the nets it is so difficult for him to hold the needle with his lame hand, he was beginning to take it up last month when his fingers on both hands became sore and since he has not been able to do anything with it I am in hopes he will learn it another year, think it will help to give strength both to his mind and hand. he is not very ambitious. His department is usually very good,

1900 June

Mary Penheiter

Has improved in the net work this year, yet she does not have as nice looking work as many of the other childdren, but she is industrious and her work is good, she works almost independently. all except to count the number of meshes that she must have to begin a net, mind the needle ties them on and binds the knot She never gives me any trouble in school,

June

Caroline Peterson

Is one of the best workers I have in my class she is industrious and happy can do any thing there is to be done with the nets and hammocks except count the number of meshes, she must have to begin with, she does her work well, and if any of the childdren needs help she is always glad to help them which is quite often she works fast, and never looses any time, I can trust her with any of the school material. Her deportment is always good,

June

Theadore Palmer.

Has made more real improvement than any child in school both in accuracy and application, she has surprised me very much, of course

1900 June

he does not do as nice work as many of the children, but the fact that he can do the work at is a surprise to me some days he will work all the time he is in the class and not have any very bad mistaks, but not always, he is much brighter in every way in school & seems very happy Deportment much improved,

June

Martin Peterson

Has been out of school much of the time, but with all that he has improved very much, is making a large hammock now ties a firm knot and keep the meshes uniform Works well in any department Deportment good

June

Bell Rosencrans

Has learned the net work all this year she does it well and has a nice looking net when it is finished ties a good knot and keeps the meshes even, She sews well can turn the hem in the towel and napkin baste it and finish it all up with out any help from me she can use the scissors quite well cuts on a line, she has been cutting quilt blocks and she does that pretty well most of the blocks will be done as nicely as any one could do, she is industrious, always good in my school,

1905.

June

Amy Reeves

Amy has improved quite a little this year, she threads her needle knots the thread as quickly as any one, can turn the hem and overcast it in the towel she can do this independently, she has learned to be very much more careful with her work She is not lazy, but sometimes she will forget to work Her deportment is good,

June

Thressie Clayton

Has made very little improvement she threads the needle knots the thread and some time will have a towel very nicely but can not be depended upon. Her deportment is good,

June

Henry Lauer

Has not been in school for some time until this month He is doing good work on the hammocks and is always busy is careful of his work to keep it looking nice likes to have his own special work he is not regular some day he will be in all the session and another day only a short time His deportment is good,

1905

June

Lena Schumaker

Has learned how to make the laundry net, so that she is quite independent ties a good knot keeps an even mesh and ties the weavers knot when she splices the cord and binds it very nicely She is quite industrious never looses any time, is contented and happy, never gives me any trouble in school,

June

Harry Stewart

Has worked well all the year kept up his interest to the last, he has not the least trouble with the work take out the mistakes, if he makes any himself, he is only in school an hour and a half each day, always come to school with clean hands and never forgets to come and show them to me, His deportment is always good,

June

Burt Smith

Has improved a great deal this year and work independently except he does not count the number of meshes he must have when he begins a laundry net or hammock that is all the help he need, he has worked well made several laundry net and three or four large hammocks and several doll hammocks, he has been contented and happy deportment very good,

1900

Ignatius Stezercowski

June Has worked very nicely this year some times he would think he did not like to work, but, when I remember how active he is, and curious to always want to know every thing that is going on, either in the house or out on the lawn, I do not wonder that he did not like to stick to one thing for an hour or more, he has made several laundry nets, ties a firm knot keeps an even mesh, and has a very neat looking net, his deportment is not always the best

William Winklemeyer

June Was a boy I had very little hopes of ever getting him to do any thing with the net work, this is his first year in school and he evidently had, had very little training in manual work at home did not know how to use his hands knew very little about application it was knocks before he understood what was expected of him, he does not talk so that he can be understood, and says only a few words he had many hard trials learning this work but he got it at last and is doing good work now there are many little thing that he has not learned, but he ties a firm knot and keeps an even mesh Has never given me the least trouble,

1900

Sophia Vraheck

June Did not improve as much as William, she has no power of concentration and only works when I help her, the does seem to understand a little better what she must do but will not work when left alone she does not talk any more than William, and is not at all observing Deportment good,

Genie Weisberg

June I think this boy will never learn much in any department he has not learned any thing about the net work. can wind a ball, but never a round one they are all eggs shape, I have tried to have him learn to wind the net needles and he simply can not do it, I can not understand why he can not learn for he really is anxious to do something, His deportment is usually quite good for him,

Hattie Burton

June Has only been in school four months she learned to tie the net in a very short time, so that now she ties as good a knot and keeps the meshes as even as many of the children who have been working in the class two years, she did not have any trouble works well and is always busy Her deportment is always good.

1908

Mary Erickson

June — Has only been in school fone month she was interested in the work from the first she found it a little difficult when she had to keep her mesher all the same size but when she did get them of uniform size she check no more tears, she is an very industrious girl never grumbl and is always happy, she has never give me the least trouble in school

Daphne Brown

June — Has not accomplished any thing does not care to do any thing, and if I try to help her she never seems very much interested in the work

Ralph Sweinsen

June — Came into this class in march, he had very little trouble with the net work, he ties a firm knot keeps an even mesh, takes out any mistake he makes, works quite well and kep his work looking very nicely Deportment is good,

Emma Hendrickson

June — Has been in school about three months, she learned the work in a few days, and now she is doing good work ties a good knot and keeps an even mesh, she is not a very neat child, and her work

1908

June — shows it, When she came here she had had very little training of any kind she is a pleasant child, never makes any trouble in school,

Lena Larson

June — I have not succeeded in teaching her any thing, but I think she will learn something some day, she likes to walk about the room, will look at a picture book and seem quite interested in it, will hum many of the songs she hears the children practicing in the hall,

Willie Wall

June — Has not been in this school but a few days at while he was in he did not do any thing in the way of work would wind a ball, that did not keep him sitting in a chair, if it had more than likely he would not have done it. I doubt if he ever does any manual work or any other kind,

Ray Duffield

June — Has only been in this class a short time has not accomplished any thing only worked when I helped him. if he had been at all ambitious he could have learned more but does not care for this work, His deportment is not very good

1900

Edgar Miller

June Has been in this class a very short time, I think he will learn this work in a very short time but I have not had the time to give him. His department is good

Frank Meeker

June Took up this work in a very short time and can do very good work he learned the work so quickly that he is not interested in it, he has made nearly one laundry net. His department is quite good

Don Hopps

June He is new in school he the appearance of being a very bright boy but he has not the least inclination to work, will spen all his time looking at illustrated papers but if I have him sit down by some work he simply will not look at it nor touch it unless I sit by him, and help him all the time I think may be another year he will do something, His department is not very good, yet he is not a mean boy.

Dow Sullivan

June Was only in this class a few weeks, he took up the work in one day and could do it as well as any one, the work was as easy for him that he did not like it

1900

Dena Reeney

June Has not been in school long enough for me to find out what she can do, she is very quiet,

Alfred Smith

June I think he will have very little trouble with this work, he has been in this class such a short time that I really do not know what he can do, He is a very nice child,

Eugene Zeerenzey

June Has only been in school a few weeks I think he will have no trouble in learning the work I have not given him very much time, he can wind a ball, winds the net needle and I think is a very bright boy.

Warren Dugan

June Has been in school a few weeks he will learn the work I think in time, but he has not done very much yet can wind a ball and the net needles, and does a little work on the net if I help him, is a very nice boy to have in school

Sarah Halmberg

June Has been in school a short time she can sew very nicly can sew on tamil without any help in any way she is a good girl in school

1900 Willie Speck

June Has been in this class two or three week I taught him the net work more than a year ago he does good work, is making a large hammock I think he could do it all alone, he enjoys the work is good in this school,

June Martin Peterson

Has been out of school for some time and just the last week or two he has come back is doing good work on the large hammocks. deportment good

June Gladdis Hulman

This is her first month in this class, she does not take the net work very easily but I have given her very little time

June Emma Helvorsen

Has been in so short a time that I do not know any thing about her ability. she is very quiet

June Kern Christopherson

Has been in school or four days she has the towel quite nicely, Deportment good

1900

Julia Andersick.

Sept. Julia has been detailed for work outside of school except for a few days in the month and has not been able to accomplish anything in the net work.

Sept. Esther Anderson

Esther has been present a part of 18 days She has not accomplished a great deal but is a promising pupil because she is so anxious to learn.

Sept. Bell Burkshire

The most that can be said for Bell is that she has not lost what she learned last year. She has only been present eleven days.

Sept. Hattie Burton

Hattie has not yet returned to school

Sept. Jimmy Cross.

Although Jimmy is recorded present most days of the month he has been detailed for outside work after roll call. All that he has accomplished is to learn to untie the knots.

Sept. Penny Cohen

Penny has remembered his last years work very well but he has sometimes to undo some of his work.

1900

Kern Christopherson

Sept: has been rather irregular in attendance. She has started a net and seems careful not to make mistakes. She makes the knot very nicely.

Sept: Agnes Christenson

Agnes has not accomplished anything as yet

Sept: Warren Dugan

Warran is making a net bag he makes the net fairly and can undo his own mistakes when they are shown to him.

Sept: Mary Erickson.

Generally Mary does very good net work but she seems not to notice a mistake when she has made one and goes right on past it.

Sept: Ella Froeming

Ella has been in school so little that I have not had time to discover what she can do

Sept. Anna Hanzel.

Anna gives good attention to her work only when I stand near her to see what she can do and by spells at other times. She can loosen and undo the knots when she does pay attention otherwise she makes sad blunders.

1900

Sarah Holmberg

Sept. Has not yet returned to school.

Sept: Lilla Helgeson

Lilla has been school only six days and I have not found out whether she can do anything or not

Sept: Don Hopps.

Don can do nothing at all without constant supervision over all the details. He seems to have no power of attention.

Sept: Arthur Hopkins

Has not been present at all as yet

Sept: Frank Jervitt:

Frank has had little trouble in learning to tie the knot. He is somewhat flighty and does not like to stick to his work long at a time but he works faithfully for a short time. He makes a great many mistakes but almost always knows when he has made one and does not go on without speaking of it. Then he can usually correct it himself

Sept. Clara Joslin.

All that Clara can do now is what she learned last year and she seems to have forgotten some of that. She can not undo her knots now as she could.

1900

Johnny Johnson

Sept: Johnny has made two large hammocks and has about thirty feet done on a tennis net this month. He does everything all right by himself.

Sept: Ben Johnson

Ben can work backwards on a bag very well. He seems to have a good deal of application. He has been somewhat irregular in attendance.

Sept: Elmer Johnson

Elmer Johnson has spent only eight days in school few of them consecutive. Just what he can or cannot do I do not know. He can go to work on a partially completed hammock or bag and work fairly well at least.

Sept: Lottie Jacobs.

Lottie can do very little yet but she begins the work with some intelligence and is faithful, evidence to one that she will do well.

Sept: Lena Larson.

At first it seemed, from Lena's indifference and lack of desire to do anything, that she might not learn anything but after considerable ~~work~~ work with her she appears more apt to learn than it seemed. She is able now to tie the weavers knot used in splicing the cord. While she does not do it very neatly yet, still she has the idea and is proud of her accomplishment as I am.

1900

Sept: Nannie Langan

Has not yet returned

Sept: Ludford

Also has not returned.

Sept: Willie McCormick

Willie has been pretty regular in attendance and I have spent considerable time with him but his attention is such a very uncertain quantity that while I am doing my best to teach him something he may not know what I say or do at all.

Nellie McGovern

Sept: This is Nellies first attempt in the net-work and she is doing very good work. She is making a hammock and never makes a mistake once in a while she has to ask what to do next first after she has turned the rod around but her work is very neat. She is learning now to tie the weavers knot.

Sept: Theodore Misslin

Theodore works when he feels like it. he winds the needles for me very nicely but when he does not feel disposed I think best not to urge him to it.

1900

Alma Marsh.

Sept. Alma's work is somewhat variable she can tie the knot pretty well and some days her work looks very well but the next it may present a good deal of a contrast: She is rather willful but works fairly well with a good deal of supervision

Sept. Bennie Olson

Bennie does very good work on a hammock, I do not know whether he can tie the weavers knot or not: but his net work looks well.

Sept. Bennie Ostrander.

Bennie does beautiful net work but anything but beautiful to look at because so soiled. He is quiet and gives not the least trouble.

Sept. Mary Penheiter

Mary does very neat work on her bag. She works quite independly.

Sept. Frank Parke

Has not been in school at all yet.

Sept. Raymond Powers

Raymond, because of his lame hand has not done very good work but seems anxious to learn.

Sept. Theodore Palmer.

Theodore Palmer retains what he learned last year and works generally pretty well but he seems

1900
Sept. to have an aversion to learning anything new. He has not advanced much this month.

Sept. Caroline Peterson.

Caroline goes ahead quite independently but is likely to do her work carlessly and make slipknots and other mistakes.

Sept. Marlin Peterson

Has not been school at all.

Sept. Amy Reeves

Amy has accomplished almost nothing but seems to be learning to use the needle with a little more ease.

Sept. Bell Rosencrans

Bell is careful and works quite independently but slowly.

Sept. Alfred Schmidt

It is very hard to get Alfred's attention and I can not really say that he has accomplished anything at all. His spirits are irrepressible and he wants to talk all the time.

Sept. Ignatius Stegercowski

Ignatius can do pretty good work but is extremely willful. When he tires of his work and wants to make mischief I allow him to show some other boy and it gives him new zeal.

1900

Jessie Smith

Sept. Jessie handles the needle very clumsily indeed. She cannot do much but is quiet in the room

Henry Sauer

Sept. Henry is making a hammock and does his work fairly well but surprises me occasionally by making a row of little but slip knots he can not tie and bind the weavers not well.

Harry Stewart

Sept. Harry is somewhat careless making his meshes too large. He is unable to make the weavers knot for himself and so is not independent.

Lena Schumacher

Sept. Lena makes the net-work quite independently She can set up her own bag, works neatly and carefully but wants to be watched some so she will not make mistakes.

Laura Strub

Sept. Has not been in my school room yet.

Burt Smith

Sept. Has been very irregular in attendance but he can make net very well

Ralph Swanson

Sept. Has been present only three or four days and I do not know what his ability is.

1900

Julius Turner

Sept. Keeps his net-work very neat and makes few mistakes.

Willie Wall

Sept. Has been present only three days I believe and I do not know what he can do.

Francis Ward

Sept. Francis' attendance has been quite regular but I can record absolutely no progress in learning the net. He has so little use of his hands that I give him some exercises for limbering them for use.

Lewie Weisberg

Sept. Lewie has been in in school 5 days and I have spent really no time with him as yet.

Lena Wagner

Sept. I can record really no progress for Lena. She is trying now to learn the weavers knot.

Sophia Wrabeck

Sept. Could do nothing at all when I came but she can untie the net-work now when there is no needle attached to it.

Mabel Wright

Sept. Mabel is to careless and indolent to have learned by now to do much. She can make the net but is always having more backward

1900 Sept. because of her many mistakes.

Sept. Fred Mundt.

Fred is able to work nicely on his hammock without making many mistakes but needs help always to fasten a fresh needle to his work.

Sept. Willis Winkelmeyer

He has not yet shown what he can do. He has been out of the school, most of the time, detailed for duty elsewhere.

1900 Julia Andersicka

Oct. Julia has been detailed for other work quite a little this month and when she is present can do nothing on the net work without my immediate supervision.

Oct. Esther Anderson

Esther has improved very much in her work the last month. She has had a good many mistakes to undo and sometimes works past her mistakes without knowing they are there, owing partly I think to her near sightedness. She is working on a bag of her own and is very proud of her progress. Her deportment is very good.

Oct. John Brady

Has been in school the entire month but has accomplished very little. He seems anxious to work but his hands are very troublesome. I hope to get them limbered up so as to make them more useful to him.

Oct. Bell Burkshire

Bell has finished the bag she was at work on when I came and is beginning another. Her work is not very neat and she is careless often in making the knot large and loose. The quality of her work differs with her mood I find. Her deportment much of the time is very good but not invariably so.

Oct. Hattie Burton

Has not been in school this month.

1900

Penny Cohen

Oct. Penny's work is very well done. It is not so clean-looking as I hope to see it soon. He and Burt Smith together have just finished a hammock they have worked on together and both take great pride in their work. Another is started. His deportment is usually good

Jimmy Cross

Oct. The first thing Jimmy learned was to untie the knots and he likes it so well that he wants to do it all the time. If any one has made a mistake and has to undo their work he wants to help them and can do it well. If I stay by him and guide him he can make the knot but not otherwise.

Oct. Agnes Christienson

Has showed herself very dull about learning. She can do nothing except when I am directing her every move.

Oct. Kern Christopherson

Kern can make her knots very nicely now She has been present every day and takes an interest in her work. From lack of enough rods she has been working on another girl's net.

Oct. Warren Dugan

Has been absent because of sickness the first part of the month. He is very slow in his work and this month had to take out several rows

1900

of his bag because of mistakes. He gives no trouble in department

Oct. Mary Erickson.

Mary is industrious and cheerful but I find her a little careless with her work. She has been learning to tie the new cord on to her own work but she can not do it yet and bind it. Her deportment is good.

Oct. Ella Froeming.

I have been trying to teach Ella to knit She has not worked at it long and cannot do it yet. She can not do the net work at all by herself.

Oct. Willie Cohen

Has been present all the month and shows that he understands the main part of the work very well although he has many things yet to learn. He has finished a laundry bag and has begun a large hammock. His work looks very neat. His deportment is not the best.

Oct Anna Hanzel

Has worked on the same bag as Clara Joslin and together they have a good deal of work to take out. Anna does the best work though and can also undo the knots more quickly. She remains inattentive to her work by spells.

Oct. Sarah Holmberg

Has not been in school yet.

1900

Gilla Helgeson

Oct. Gilla seems quite ready to work if she only knew how but she has great difficulty in learning. She tries to do the knots when I am not beside her but only makes great blunders. She has been present every day but seems not to have the power of application.

Oct. Don Hoffes

Don is gaining in ability to hold himself to his work and as soon as he begins to do that he learns. He can make the hammock knot alone now and does it. He makes it a slip knot about as often as a firm one but he knows when it is wrong and can undo it himself. He dislikes to remain in one place but wants to wander around the room. When he can do the work a little better I think he will be content and industrious.

Oct. Johnny Johnson.

Johnny has finished a beautiful tennis net and another hammock and does his work as well as ever. He helps the others often in binding the knots and putting the rings on the hammocks. It is a pleasure to have him in the room.

Ben Johnson.

Oct. Ben can and does do some very good work on a large hammock but he is inattentive and seems half asleep some of the time and makes some very odd mistakes. He does not like the vigorous exercize of the drill.

Oct. Elmer Johnson

Elmer does very good work but is very slow and indolent. Will sit gazing at his work or something else for some time and do nothing. But he is cheerful and quiet and much of the time works industriously.

Oct. Clara Joslin

Clara does very poor work. She can tie the knot well and make the mesh even but as often as not she makes the slip knot and if she succeeds in getting it out the cord is very rough and soiled. She is good to keep to her work and tries hard to please me in it. Her deportment is good.

Oct. Lottie Jacob.

Lottie is very faithful in her work. She has a lundry bag about a fifth done I think. her knot is firm and neat and she is learning to tie the weavers knot. Her deportment is good. She is trying hard to make her bag with no mistakes.

Oct Mamie Dangan.

Mamie seems to have learned nothing at all. She has apparently no desire or ambition to learn. Her deportment is good

Oct May Gudford

Has not been in school yet

1900

Oct. Lena Larson

Lena continues to tie the weavers knot- quite neatly now- but she has done nothing else alone. If she can learn the weavers knot- surely she can learn the other and yet she has not- as yet-.

Oct. Willie McCormick

I can not see that- Willie has improved duri-ng the month. He is as inattentive as ever but he does not make a snarl in any net- he happens to sit- by as he did before.

Oct. Tommy Mapp

This is the first Tommy has been with me and he does very good work with occasionally a mistake. He is working on the same bag with Bennie Astrander and his work looks neater than Bennie's. He is not- entirely independent. His department is good in school.

Oct. Nellie McGovern

Nellie has had to undo several rows of her hammock because of a mistake but- she is going on again very nicely now. Her department- is the very best all the time and she is interested in her work. She does not- work as quickly as some.

Oct. Theodore Misslin

Has not been in any school room but a few days this month.

Oct. Alma Marsh

Alma seems to like her work pretty well when she does not- have any mistakes to undo It is hard to get- her to work at- such times. Her deport-ment- has been very bad. She has been a general disturber of the peace. She can do the net work well but- none of the little extra things.

Oct. Fred Mundt-

Fred and Ben Johnson- together have been making a large hammock and Fred helped to finish it off. They have begun another together now. He does very good work ties a good knot- and keeps the meshes even. He is not- entirely inde- pendent-. He has decided objections to the drill.

Oct. Ben Olson

Bennie has had no work of his own thus far owing to the lack of enough rods, but- he does pretty good work when I give him another childs work to help them. He is quiet- and gives me no trouble. He has been detailed for other work a good deal of the time

Oct. Bennie Astrander.

Makes a good ~~knot~~ knot- keeps an even mesh and if he kept his bag clean would have his work look as well as any one's But- he gets it very much soiled. He is trying to learn to tie his own cord to his work.

1900

Oct.

Frank Parke

Has not been in school at all.

Raymond Powers.

Oct. Has learned considerable of the net work. He can make the net but makes many and serious mistakes but I hope he will overcome that. I cannot say whether he sees his mistakes and works on beyond carlessly or whether he does not know. His department has been good.

Oct. Martin Peterson

Has done outdoor work all the month.

Oct. Theodore Palmer

Has been greatly tried at having to undo quite a good deal of his work but is cheerfully going on with it now. He has had a sore hand and been unable to work for sometime and has been detailed for other work several days. He does not enjoy the gymnastic drill at all and is always anxious to escape it if possible. His work is neatly done.

Oct. Caroline Peterson

Caroline has helped the others quite a little this month in binding the knots and so forth. She likes to do it and it gives her practice which she needs. She is on the lookout for mistakes in their work and is prompt to make them known, more so than she is in her own.

Oct Bell Rosencrans

Bell is growing more independent in her work. She can tie the weavers knot and bind it not quite as neatly as she will soon but she needs little attention. She never gives the least trouble and enjoys her work.

Oct. Amy Reeves.

It looks as though Amy could not learn the work. She is unambitious and inattentive. She does not often attempt to do anything by herself but when she does she always makes mistakes that show lack of attention. Her department is good always.

Oct Albert Riley

Has not been in my room a week yet. He is not picking up the work as quickly as I expected him to. He is learning though to braid the cord in three strands. He does not do it very lightly but otherwise all right. He lacks something of interest in the other regular net-work. But I still expect him to learn soon. He is restless and active and requires considerable attention.

Oct. Alfred Schmidt

Alfred seems to have so little power of application. I can record no progress for him this month He handles the needle perhaps a little less clumsily than he did while I stand by and guide his movements. His department is as good as I could expect from a boy of his flighty disposition.

1900 Jessie Smith

Oct. jessie seems more anxious to please me than to learn the net work and she tries to learn for that reason but she is easily discouraged by a mistake. She does not trust herself to work alone. As she learns the work better I expect her to gain confidence in hersely and then she will be more capable of learning this and other things. Her deportment is always good.

Oct. Henry Sauer

Henry has done all he could on a large hammock and Johnny Johnson put the rings on for him. He needed a good deal of attention while he was narrowing it off or he would not count the meshes right. His work looks nice and he has taken great pride in doing it as he said for his brother. He has begun another now which he wants to do entirely alone. His deportment is generally good He does not like to do the exercises but wants to keep at his work.

Oct. Harry Stewart

Harry has done much the same work he did last month. a little better I think, with fewer mistakes. His deportment is good. He has finished his laundry bag with some help from Caroline Relerson

Oct. Ignatius Stezencowski

Ignatius is a boy who likes to be ever on the move and is not content to remain

1900 quietly at any one thing but will be
Oct very good and industrious if he has
variety. I have tried to give him as much
variety as he needs and keep him at
work but I think it has had the effect of
making him more discontented with
steady work and I must try new methods
of keeping him at his bag. He has wound
needles and cord and done other things
a good deal and not much on his bag.

Oct. Lena Schumacher

Lena is a girl who takes great pleasure in her work she does good work ties a firm knot and keeps the meshes even and can tie and bind her own knots. She can help the others often

Laura Shub.

Oct. Laura has been in my room nearly the whole month. She has great difficulty with her hands and can understand more than she can accomplish at present. She can tie the weavers knot already though and has worked on the regular knot for the hammock some but is unable to make it at present. I have hopes that she will though some time.

Oct Anna Sonnanburg

Anna has only been with me a week. She shows considerable aptitude for the work and is anxious to learn to do as well as any one else. She will be quite independent when she learns it I think.

1900

Willie Speck

Oct. Willie has been with me only a week also but he has had the work before and can do good work. He makes the knot firm and the meshes even and keeps the large hammock he is working on very neat. He enjoys his work and attends to it well but he has mind enough so that he attends to more than his own work. He does not bind his knot very well yet. His deportment is not the very best.

Oct. Burt Smith

Has been in school most of the time and has done very good work on his hammock. Burt and Penny Cohen together have finished a large hammock and Burt points to it with pride. He enjoys his work and usually works well. Other times he needs considerable coaxing. His deportment is generally good.

Oct. Ralph Swenson

Has been in school nearly all the month. He is happy and industrious and does his work well, is working on a hammock and keeps it neat and clean. He gives me no trouble in school. He is forgetful and often forgets to come into my room so I have to send for him.

Oct. Julius Turner

Julius is a good, quiet boy willing to work and doing his work very well but slowly. He has finished the laundry bag he has been at work on ever since I came and is beginning now on a hammock.

1900

Willie Wall

Oct. Has not been school this month

Oct. Francis Ward

Francis has made no visible progress in the net work. He is so clumsy with his hands and seems to have no idea what is wanted of him when I try to help him. He tries to go through the drill with the others.

Oct. Gevie Weisberg

Gevie does not come to school with the others but at recess. I have had him about two weeks and it seems as though he would learn. While I stay beside him and watch he can do the work without very much help and seem to understand what is to be done but he he seems to lose the power when I am not beside him. I am in hopes he will learn so that he can work alone after a while.

Oct Gena Wagner

Has no power of concentration and will do nothing or try nothing except while I am beside her. She is good natured and gives me little trouble but she does not try to learn.

Oct Sophia Wrabek

Much the same is true of Sophia as of Gena She will not work, when left alone she drops everything and gazes about her.

1900

Oct

Mabel Wright

Mabel has done better work than last month. She is more careful and her bag looks better but she is listless a good deal of the time, whether because she is sick or indolent I do not know. She likes to feel that she has a bag of her own started and no one else works on it.

Oct.

Willie Winklemeyer

Willie does his net-work pretty well usually but takes spells of making a great many mistakes. He lacks in ambition or energy and works slowly but he keeps his work looking clean.

Oct.

Frank Jewitt

Has improved in application and he makes fewer mistakes than last month. His bag looks well and he enjoys keeping it nice. He is a very active child and wants considerable change but succeeds in keeping to his work better than last month.

Oct.

Mary Penheiter

Mary is quite independent with her net work and can help those who need help often. She likes her work and is very industrious. She has finished her laundry bag, keeping it clean and the meshes even and knots firm.

Arthur Hopkins

Oct. Has not been in school

Nov. 1900.

Esther Anderson.

Esther is rather careless in her work. She is anxious to get a good deal done and slights her work somewhat but she sticks to her work bravely when she has work to undo as well as at other times.

1900

Julia Andersick

I think in time Julia will learn to do the work. She is not able to work alone at all yet but I hope she will before long. Her deportment is good but she seems perfectly indifferent whether she has work to do or not.

Nov: 1900

jimmy Cross.

jimmy is very slow in learning to do anything but work backwards on the net work. He is unwilling to do the work forwards and is inattentive when I try to teach him. but he has learned the process well enough so that he can make the knot without my helping him with my hands if I will tell him what to do next. His department is good.

Nov. 1900

John Brady.

The work seems to help John in the use of his hands. He is awkward with them, of course but he can use them enough to make the hammock knot well. They are often beyond his control but he tries hard to do his work right and has intelligence

Nov. 1900. enough to know when it is not right. His department is always good and he is industrious he is not content to sit without any work for even a few moments.

Nov. 1900

Bell Burkshire

The amount of Bell's work this month is small but the quality is better I think than last month. She is growing more particular I think about the quality of her work, since having to undo a good deal of poor work. Still her work is not good. Her department is quite good.

Hattie Burton

Nov. 1900 Has not been in school this month.

Nov.

Penny Cohen

Penny's work has been very good but his application to it has not been quite what I might expect. He is anxious to see his hammock growing longer every day but seems sometimes to forget that his own industry is what the length of his hammock depends on. His department is good as a rule

Nov. 1900

Kenn Christopherson

Kenn has a bag of her own begun and is doing good work. She works steadily though not very fast. Her department is good. She works quite independently except when it comes to joining on new cord.

Nov. 1900

Agnes Christenson.

Agnes shows more desire to learn than last month and will struggle over the work alone after I leave her. She sometimes succeeds in making the knot but it seems to happen so rather than to be brought about by design. Her department is good.

Nov. 1900

Warren Dugan

Warren has finished a bag he has worked on all the fall and for a good deal longer. He feels very much rejoiced over it because he had been discouraged about not getting through faster. He works very slowly and gives the impression of always being tired.

Nov. 1900.

Willie Gohen.

Has been present the greater part of the month. He can do very good work on the hammock and tried a good many times I think to mend his behavior But his disposition to tease and torment those around him was a great temptation to him. He has been taken out of my room.

Nov. 1900

Mary Erickson

Mary has not done very good work for her this month. She seems to believe in making mistakes worth while when she makes them and has made a good many this month. Her department is good.

Nov. 1900.

Ella Froeming

Ella has learned how to knit but she keeps her yarn so tight that the work is not what I can call good work. She likes her work and gives me no trouble in school.

Ferdinand Freber was in my school only four days.

Nov. 1900

Arthur Hopkins

Has not been school this month.

Nov. 1900

Don Hopps

Don is doing better work than before this fall. He has learned to tie the knot firmly and well and does it oftener than last month. He is growing more careful about the size of the mesh also. The work he has done is very good for him I think, and he continues to learn. For a boy of his restless disposition he has accomplished a great deal.

Nov. 1900

Anna Hanzel

Anna does very little work but what has to be undone. She has applied herself to her work pretty well this month too. She is working now on a bag of her own and I know that she tries to do her work well. She gives me no trouble in school.

Nov 1900

Sarah Holmberg

Has not been in school.

Gilla Helgeson

Can do nothing at all by herself on the net-

Nov. 1900.

work. I shall have to give her something more simple to do. Her deportment is good.

Nov, 1900

Frank Jewitt

Frank is doing well in school. He does his work well and is proud of it. He is going to be quite an independent worker I think when he learns to bind the knot better. The net work keeps him stiller than it is his nature to be and he gets restless under it sometimes but he is not troublesome.

Nov 1900

Clara Joslin

Clara has done a little better work than last month. Her work is anything but neat. She works very slowly sometimes doing not more than a dozen knots in a day and yet she seems to be busy all the while. She is very quiet in school seldom speaking and never giving the least trouble.

Nov 1900.

Elmer Johnson

Has improved in application to his work and has learned to tie and bind the weavers knot alone so that he really needs no help from the teacher. His deportment is good

Nov. 1900

Ben Johnson.

Ben attends to his work pretty well and does it pretty well usually, when he makes

Nov 1900 mistakes he takes them out very cheerfully His work is no different- from last-months

Nov 1900

Johnny Johnson

Has done good work as he always does. His hammock is finished and he has done a large part of two basket-ball baskets. His department- is always good.

Nov. 1900

Lottie Jacob.

On the whole Lottie's work is good but-since she knows how to do the work well she is somewhat- inclined to be a little careless. She needs some watching yet- To keep her work in good order. She keeps it very clean and is careful and anxious that no one else shall work on it.

Nov. 1900

May Ludford

Has not- been in school this month.

Lena Larson

With any help Lena can now tie the regular hammock knot- she is a girl who has done more than I expected of her, or showed more intelligence rather for the amount- of her work has been small. She winds a very firm round ball and can also wind the needles nicely. Her department- is good

Nov. 1900

Mamie Langan

Mamie seems unable to concentrate her attention on her work long enough to learn anything. She can do nothing by herself and never makes any effort except- when I stand directly over her and guide her movements. She is to fond of talking and saying whatever comes into her mind otherwise she gives me no trouble.

Nov, 1900

Willie McCormick

Willie has learned nothing that I can see. He does not even go through the movements I direct- when I stand by him but- has to have help from my hands also. He is very quiet and is no trouble except- as he sometimes makes a snarl in the work he is sitting by. He has not- been in my room for about- two weeks.

Nov. 1900.

Nellie McGovern

Has done nice neat- work on the hammock she has just- finished. She does not- feel independent- in all parts of her work. but- she was able to finish it off herself. She is helping now to finish off one for one of the other children. Her department is very good.

Nov. 1900

Theodore Mislin

Has been in Miss Johnston's room all of this month.

Nov. 1900

Fred Smundt.

Fred has done pretty good though not so very steady work on his hammock. His difficulty in counting makes me have to pay considerable attention to his work He is usually well behaved in school and gives me no trouble that way.

Nov, 1900

Alma Marsh.

Has been taken out of my room.

Nov 1900.

Tommy Mapp

Has a net begun now of his own and is doing well on it. He works slowly and sometimes makes his meshes to large. He does not get much done in a day but it looks quite well when it is done. He is a good boy in school and more intelligent than most of the children I have.

Nov. 1900.

Bennie Olson

Bennie is industrious and gets a good deal done in a day. he ties a good firm knot and kups his work clean looking. He has a bag started of his own now He has been detailed for other work so much that he has not gotten on with it very rapidly.

Nov. 1900

Bennie Astrander

Bennie is a good child in school and does not give me the least trouble. He is cheerful and likes his work. He as finished the laundry bag he has worked on for so long but

Nov. 1900.

has not yet begun anything else.

Uri Amberg

Uri can do nothing that I have tried to have him do. He seems not to know enough to come into the room when the line passes but always goes by unless he is watched for and led in. He is very quiet but does not keep his seat well.

Nov. 1900

Mary Penheiter.

Her work has been about what it was last month. For a girl who does such good work she sometimes overlooks a mistake that surprises one. She is a good girl in school and I think enjoys her work very well. She helped a little on the basket ball baskets we made this month. She has the advantage of being able to count.

Nov. 1900

Frank Parke

Has not been in my school this month.

Nov. 1900.

Raymond Powers.

Has not improved as much as I looked for. He makes the knot well but does not keep the meshes even and his work is not very neat. He is quiet and industrious in school and gives me no annoyance.

Nov 1900.

Theo. Palmer

Has been detailed for other duty nearly every day for part of the session and has not done very much of anything. His behavior is good

Nov.

Caroline Peterson.

Caroline tries to help the others considerable and does help a good deal but is apt to find mistakes where there are none and then she makes them. Her deportment is good.

Nov

Martin Peterson

Has not been in school this month.

Nov, 1900.

Anny Reeves

Anny has tried ~~harder~~ this month more than before to do what I tell her and she shows more sense about making the knot. She can make it when I stand by her and show her about it and she tries when I leave her to do it alone and makes fewer tangles with her cord than last month. She can untie the hammock knot nicely now. Her department is good.

Nov 1900

Bell Rosencrans

Bell has gotten so she can sometimes help others by tying and binding the knot for them. She is always at work and her work looks nice and neat

Nov. 1900

Albert Riley

Albert has improved in attention to the work. He can tie the hammock knot and has begun a bag of his own. His interest is better than last month and he loves to get considerable done and surprise one with it. He has been out for band practice and music and preparation for thanksgiving quite a little so he has not accomplished as much as he otherwise would. He is restless and talkative and so sometimes forgets his deportment. In other ways it is good.

Nov, 1900.

Alfred Schmidt.

Alfred has been taken out to polish as he seemed to learn nothing at all.

Nov, 1900.

Ignatius Stezercowski

Has been put in Miss Johnston's room where there will be fewer to distract his attention. The work seems to vary to suit the fancy of a boy of his disposition.

Nov 1900

Jessie Smith

I can see some improvement in Jessie this month over last. She tries now to work by herself and finds that she can do considerable. She can tie the regular knot and then she can undo it too if there is a mistake. She is very slow and makes perhaps only three or four a day but is delighted to find that she can do that. Her deportment is always good.

Nov. 1900

Henry Sauer

has been in school all the month and done good work on his hammock. He can not finish it off without constant supervision because he can not count. The gymnastic drill is a great trial to him. But his deportment is good.

Nov. 1900

Anna Sonnenberg

Anna is learning to do the work nicely. She is by no means independent and she gets impatient at what what she thinks is her slowness to learn. She is attentive to what I say to help her and remembers well what she has once learned. She gives me no trouble in school.

Nov. 1900.

Willie Skeck

Willie does all his net work in the south wing now and only comes to school for Lloyd. He finished his hammock before he left and it was as well done as Johnny Johnson's which is saying a good deal.

Nov. 1900

Harry Stewert

Harry has begun another laundry bag but has not done very much on it yet; He is steady and keeps at his work all the time and gives no trouble. His work has all been to help him to make his work better especially make the meshes more even and I think he has improved in that respect.

Nov. 1900

Lena Schumacher.

Lena has finished the bag she has been working on and gotten about two and a half feet done on a hammock she does very good work and can often help the others with their work. She is especially interested in her hammock because she wants her sister to buy it after it is finished. She is such a good girl that it is only a pleasure to have her in the room.

Nov.

Laura Strutt

is doing the work well considering the trouble she has with her hands. she winds the needles nicely and can even make a knot in the bag now. It is slow work but she is gaining in ability to use her hands. She gives me no trouble in school

Burt Smith

Nov.

His work has been much the same as last month. He and Penny are working in partnership on another hammock. He does not keep at his work quite as well as I exped him to. He is always wanting his hammock measured to see if it is long enough.

Nov.

Ralph Svenson

The work he has done has been the same as last month. His memory has improved so he never forgets to come in the room any more Deportment good.

Nov 1907.

Julius Turner

Has been sick and out-of school for two weeks so he did not get much done on his hammock. What he did do was not so well done as last month, because he was not well perhaps. Department good.

Nov.

Willi Wall

Has not been school this month.

Nov.

Francis Ward.

Until Francis gains better use of his hands he will never learn the net work. He has done nothing more than last month. He was out of school over half the month. He is always quiet and sits still in his chair.

Nov.

Lewis Weisberg.

The work Lewis does is somewhat of a surprise to me. He knows how do do the net work and when I stand beside him and watch him he does it pretty well. He will do a half dozen knots successively perhaps and sometimes when I do not stay with him he will do a little work right but usually when I am not beside him he makes any sort of knots but the right kind. He seems to wilfully do what he knows he ought not to do. There is no knowing from his expression whether that is the case for there is so little expression in his face. I never heard him speak one word though they tell me he can talk avolubly enough. His deportment is good. I have had him at recess so

Nov. I do not know how it would be with others about him

Nov.

Lena Wagner

Last months report is first what I would write again. She does not try, is cheerful but has no power of concentration Deportment good.

Nov.

Sophia Wrabek.

Sophia shows almost as much listlessness as Lena Wagner. She will do nothing alone Her deportment is good.

Nov.

Mabel Wright

Has shown more ambition to work this month but passed over a very serious blunder either without knowing it or because she thought I would not. She can tie the weavers knot now and bind it though not very well yet. She is practicing on that a good deal now.

Nov.

Willie Winklemeyer

Is working slowly along on his laundry bag and doing in the main good work though he needs a little watching to keep it in good order. He is quiet and gives me no trouble in school.

1900
Dec.

Julia Kendersick

Has been in school only one week of the month and was taken out to the kitchen. Her work was not different from last month. Deportment - good.

Dec.

Esther Anderson

I think I see an improvement in Esthers carefulness to have her work all right this month. She has had some severe lessons in having to undo her work, and is very desirous of doing well. She likes her work very well and makes a good firm knot usually. her trouble is in making the meshes even and regular. Her deportment is excellent.

Dec.

Bell Burkshire

Bell was taken to the kitchen the same time as Julia Andersick and before she had done much in the work. Last months report would apply to this. Deportment - quite good.

Hattie Burton

Dec. Has not been in school yet.

John Brady.

Dec. Practice long and continued alone will help John. The progress is slow but he can tie the hammock knot. It is laborious work and must often be taken out because it becomes a slip knot but he can do it entirely alone. He can also pick out the knot if wrong. His deportment is invariably good.

1900
Dec

Jimmy Cross

is much the same as last month. He seems to have less desire to work backward and while he does not work continuously at the forward work he can do a little. When he is very careful he can make the knot alone. He gives me no trouble in school and is anxious to help in such ways as carrying my boxes or the childrens work.

Dec

Pinney Cohen.

Not being able to count, Pinney can not do all parts in the making of a hammock without constant watching. So Burt Smith finished it off alone without his help. Since then Pinney has been making a doll hammock that is not yet completed. I find that he has to be managed very carefully so that he will not take a stubborn streak and almost refuse to work at all. Deportment - quite good.

Dec.

Kern Christopherson

Kern's work is quite good, usually with even meshes and a firm knot. She is industrious and happy never giving the least trouble. She works slowly but steadily.

Dec

Agnes Christenson

Agnes was taken at the same time with Bell and Julia and had not done much in the work. She could follow my Directions when I told her what to do

1900
Dec.

Warren Dugan

Since finishing his bag Warren has worked with more energy than he showed before on a doll hammock. keeping it neat and clean and he now ties and binds his own knots though not without considerable trouble. He is cheerful and needs little help with his work. His department is good, and his work is more interesting to him I think than before.

Dec.

Mary Erickson

Her work is better for this month than for last. She works quickly and sometimes carelessly, but for her the work is well done. She is patient and industrious and her department is good

Dec.

Ella Froeming

Has worked on the net work this month. She can tie the knot nicely with some of my help and can undo mistakes nicely when that needs to be done. She does not take it up quickly but will learn I think to do it well. She is uneasy when not at work and somewhat inclined to be teasing one or two of the others but her department is quite good.

Dec.

Guy Gardner

Has been in the school only two days. Has never had the net work but shows aptitude in learning the work.

1900.
Dec.

Anna Hanzel

Anna has improved in her work this month I think. She is more careful to have her work in good shape and with no mistakes for she knows that it has to come out if it is not right. It seems impossible though for her to loosen and untie the knots without almost spoiling the cord by pulling only one strand separate from the others. She dislikes so much to have to retrace her steps that way that it helps her to be careful. Her department is good.

Dec.

Sarah Holmberg

Has not been in school this month.

Dec.

Lilla Helgeson.

I can see some improvement in Lilla's work. She can make net knot now without much help from the teacher and enjoys doing it very much. I have just begun to feel that she will learn the work and get the good that will come to her from the concentration of her attention on it. Her department is quite good.

Dec.

Don Hapes

Don has done better work than last month. He has several rows, five

1900
Dec. or six done on his own bag. If he worked steadily he would have much more done. Of course he makes many mistakes still but he always sees them, unless they are large meshes which he does not observe so quickly, and is quite willing to take them out and make his work look as it should but he is so impatient if they are difficult - that his is to attention is easily attracted elsewhere and he needs often to be recalled to his seat - and work.

Dec. Arthur Hopkins

Frank Jewett

Frank is doing well with his laundry bag he has it three fourths finished now and it is pretty well done. He grows tired of the work needs a change occasionally but he can wind balls or needles or any of the other little things that need to be done extra and then he is rested and ready for work again.

Dec. Clara Joslin

Clara has done about the same work this month as last. She is anxious to do her work right and feels badly when she makes mistakes. Her department is always good.

Elmer Johnson

Elmer does very good work on his bag keeps it neat and clean. He works quite

1900
Dec. independently, although he has frequently to be recalled to his work from his day dreams. Department good.

Dec. Bennie Johnson.

Has worked faithfully all the month. He has been detailed for other duty several days. His work is not so neat as I ought to see it seems to one nor as regular as it ought to look. His department is good.

Dec. Johnny Johnson

Has worked faithfully and well as usual is very particular about his work and does it with no help from the teacher excepting in counting the number of meshes to start a hammock and in measuring the length of it. He has made a baby hammock and about half finished a large hammock. His department is good.

Dec. Gottie Jacobs

Gottie has done good work this month. She is learning by her mistakes and is growing to be quite an independent worker tying and binding her own knots She is a good quiet girl and no trouble at all

Dec. Lena Larson

Lena is constantly improving slowly. She can now tie the knot without any

1900
Dec. help and does it sometimes till she has made several successively. I enjoy watching her progress because she appears so very feeble minded, laughing so feebly and foolishly at some creation of her own imagination apparently, and any little improvement is so much gain. She gives me no trouble in school.

Dec. Mamie Langan

I find from an old report of last year that Mamie has learned once to tie the knot and succeeded in doing the work and keeping an even mesh. She had evidently forgotten it all this year and she has done really nothing until this month when she has followed my directions in making the knot without any help of my hands. I am hoping that she will go on more rapidly now in learning to work alone. She is not a troublesome child to manage.

Dec. May Sudford

Has not been in school for this month.

Dec. Tommy Mapps

Tommy's work has been better this month both in quality and quantity than it was last. He is very much interested in it and works quite steadily on it. He has been out a good deal for rehearsal for Christmas and been hindered in his progress somewhat. He is a good boy but intelligent enough to get into mischief sometimes.

1900
Dec. Willie McCormick

Will not be in my room any more I believe.

Dec. Mr Govern

Nellie does work that looks very well works faithfully and gives me no trouble but really does not seem to be as intelligent as that would indicate for she sometimes asks me how she shall do a thing that she has done all along without the least trouble or something about turning her work that gives her trouble which should be no bother to her at all. She is a good girl and pleasant to have in the room.

Dec. Theo Missdin

Theodore has been with Miss Johnston again all the month.

Bennie Olson

Has been detailed nearly every day for duty elsewhere for a part of the session So of course he has not done so much in the net work. But what he has done has been well done and he keeps at it well. He is a well behaved boy giving me no trouble

Dec. Bennie Astrander

Bennie has been in school all the month and worked well on another bag he is making. He can tie his own cord to his bag now with the weavers knot but does not yet bind it well. He is careful in his work

1900
Dec. and has few mistakes to undo. He is a good industrious boy in school.

Dec. Fred Mundt-

Fred has been out-of school a good deal this month. The work he has done was much the same as last-month but he did not have many days to work.

Dec. Uri Ornberg

Uri is a boy that I expected nothing of. He has not done anything at all until a few days ago when he showed that he could unfasten the knots in the bag. It looks as though he might learn but he has been so utterly indifferent and apparently would not learn that I felt it to be rather a hopeless case. I am in hopes he may pick up now and do something. His behavior is as good as one would expect from one like him. He wanders about when he can unobserved and tries to talk a good deal and is very listless but he is not very troublesome.

Dec. Mary Penheiter.

Mary grew careless this month about the regularity of her meshes and has been obliged to retrace her steps and undo several rows of her work. It is the first time it has happened so. She usually does very even work and is quiet and her deportment good all the time.

1900
Dec Frank Parke

Has not been in my school yet.

Dec. Raymond Powers

Has worked faithfully as usual and tried to do good work but he seems not to know when he has done his work wrong and needs a good deal of watching. He so often makes his knots slipknots and does not notice them. He is very quiet and always good in school.

Theodore Palmer.

Nearly every day Theodore has been taken out for duty elsewhere and so has not progressed much with his work. His deportment is good.

Dec. Caroline Peterson.

Has worked much as she did last-month. Her ability to find mistakes where there are none is growing somewhat troublesome for she promptly goes to work to straighten out the work and changes what was right into something wrong. She has worked most of the time on her own bag this month though. Her deportment is not bad.

Dec Martin Peterson

Has not been in my schoolroom as yet

1900
Dec.

Anny Reeves

Anny has picked up and I see a marked improvement in her this month over last month or any time before. She has showed more desire to learn and has succeeded in making the knots alone several times. She pays good attention to her work. Not working at it constantly but very steadily for her. I feel greatly encouraged over her. Deportment good.

Dec.

Bell Rosencrans

Her work shows care and she works quite fast. she never needs much oversight only I observe it occasionally to see that it is up to its usual high grade of excellence She is a good girl always in school

Albert Riley

Dec.

I can see some more improvement in Albert's work. He is inclined to call for more help from the teacher than he really needs I think and is a little troublesome by making demands on my time and attention, more needed elsewhere. But he is interested in his work and is growing more independent now. He is sometimes restless at being obliged to be quiet but on the whole his deportment is quite good.

Dec.

Jessie Smith

Her work has been much the same as last month with some improvement in the speed with which she does it, She

1900
Dec.

works industriously and her deportment is good. She is proud of being able to do the work

Henry Sauer

Dec.

Henry has worked well this month. He is working on another hammock and has it about half done. His work is not quite so well or intelligently done as I expect of him. but he keeps it looking quite well and no one else works with him. His deportment is quite good

Dec.

Harry Stewert

Harry is a good industrious boy, has done good work this month but is very slow and gets but little done in a day. Still he seems busy all the time and gives not the least trouble.

Dec

Gena Schumacher

Gena's work is like that of last month very good and well kept. She has worked hard to finish her hammock before Christmas but did not succeed. Deportment could not be better.

Dec.

Lana Stubs.

I have been very much pleased with Lana's work. She is working alone on a bag now and can make a round

1908
Dec. or more in one day which is a good deal to say for her I think, for however willing she may be still she has such difficulty to handle the work easily. She takes great pleasure in having work of her own that no one else can work on. Her department is good.

Dec. Burt Smith

Has done good work this month. Besides finishing his hammock he has made a doll hammock and enjoyed the change. Department usually good.

Dec. Ralph Swenson

Ralph's work is quite regular, neat and clean and even so that it changes little from one month to another. His department is good.

Dec. Anna Sonnenberg

For a week or more out of the month Anna has not been in my school room. She had learned to do the work well except tying and binding the knot but worked to rapidly sometimes to do the best work. She also has done some knitting, knit about one half of a stocking making the heel also. Department good.

Julius Turner

Dec Julius has been out of school for the entire month.

1908
Dec. Willie Wall

Has not yet been in my room.

Dec Francis Ward

Have noticed no improvement in Francis this month. He did say "no" one day, a word that I think is new to him. His vocabulary has consisted of only two words mam-ma and the other I forget. He sits very quietly all the time only sometimes calling my attention to his tie or his coat.

Lewis Weisberg

Dec. Lewis's work is the same as last month. I see no difference in the work but think the bad tangles he often makes are due to an effort on his part to correct something which he sees to be wrong about his work

Dec. Lena Wagner

Has improved somewhat in the last month in concentration. She can follow my directions in making the knot with a little of my help. She has a habit of laughing out foolishly and rather loudly and frequently but her deportment is in general good.

1900
Dec.

Sophia Wrabek

I can see no difference in Sophia. She needs to be aroused from a sort of stupor and listlessness often to keep her even apparently awake. She is very quiet never making a sound.

Dec.

Mabel Wright

Mabel has worked well this month not getting a great deal done because she is so slow but doing some good work. She can bind a knot real well now. Her deportment is good. She has been present all the time

Willie Winklemeyer

Dec. Willies work has been of rather variable this month. He made a long series of continuous blunders which it has taken him a long time to undo again. It is the first time he has done any such thing and it seems strange for him to do it but he is nearly ready now to go on with his work and do good work again I hope. Deportment good. Has been in school all the months.

Jan. 1901

Esther Anderson.

Has been in school all the month. She works very fast and would accomplish a good deal if she were not so careless. As it is she often has to undo much of her work. Still she is growing more careful I think. She is very anxious to do her work well and feels very badly to have it wrong but she takes it out very patiently nevertheless. Her department is good.

John Brady.

Jan. works with great patience at the work which is extremely difficult for him. It does not seem to become easier as he works at it but he is always cheerful and always wants to be at work even though he accomplishes so little. He makes a good knot occasionally and as often picks a poor one open. His department is good. He has been present all the month.

Jan.

Jimmy Cross

There seems to be no difference in Jimmys work this month and last. He lacks in energy to apply himself to his work excepting when he is undoing work which is wrong. He likes to do that very well and keeps at work fairly well. If I stay by him and direct him he can do the net work but he seldom makes any effort when I am not with him to work by himself. He has been present all the month. His department is good.

Jan. 1901

Pinny Cohen

The doll hammock Pinny begun last month he finished and is now working on another hammock. I think I see a little improvement in the looks of his work. It is somewhat neater now than it has been. He is working well this months and his deportment has been good. He has been present every day this month.

Jan.

Kern Christopherson

is getting along nicely with her bag. She works industriously though somewhat slowly and is a good girl in school. She works alone very well but she can not get tie on a fresh needle of cord by herself.

Jan.

Warren Dugan.

has worked well this month. He has finished his doll hammock and did it well. When that was done he was quite ready to start another bag. He has done good work on it and worked quite rapidly also. He has been more energetic since finishing his first bag. His deportment has been good. Attendance regular.

Jan.

Mary Erickson.

Mary's work has been about the same this month as it was last month. She works more carefully if I notice her work often and criticize it a good deal. She has been regular in attendance and gives me no trouble in school.

1901 Jan.

Ella Froeming.

I can see a decided improvement in Ella this month. She can do the net work alone now. She does it very slowly so she does not do many knots in a day but it looks to me as though she would do it very well when she does it a little easier. She is better satisfied to be at work and it is a comfort to have her able to work a little without my help. Her deportment has been very good.

Jan.

Charlie Fruchtman.

Has only been in school a few days. The work is entirely new to him and there has not been time to do much with him yet.

Jan.

Guy Gardner

Guy has been in school every day this month. He has learned to make a good firm knot but not to keep the rows of knots even. He is a good boy to have in school, quiet and industrious giving me no trouble at all.

Jan.

Willie Cohen

does his work quite independently. He does very good work keeping his knots firm and his meshes even. He only needs help to tie the new cord on the bag and bind the knot. His deportment is not very good.

Jan. 1901

Anna Hanzel

I fel encouraged about Anna's work. It has been very good this month for her. She has accomplished more than in any other month this year and it has been much better done too. Her bag now looks very well. She has needed less of my help to do her work this month also. Her deportment has been good and her attendance regular.

Jan.

Gilla Helgeson

Gilla also has given me cause to be encouraged She has done enough to make me think that she will learn the net-work in time. She has several times now made good firm knots under my direction. She is not able to make them unless I am beside her to guide her but I no longer have to place her hands as they should be, for her. her deportment is quite good.

Jan.

Don Hapka

Don continues to improve. He can make a row and a half or two rows in a day on his bag. He makes fewer mistakes and works more steadily than he has done before. His department has been good.

Jan.

Frank Jewitt

Frank has been working well this month. He has been less restless than last month and has done good steady work. He has completed the laundry bag he has been

Jan. 1901 working on since the opening of the school year and it is well done with good firm knots and even meshes. Deportment—good attendance regular.

Clara Joslin

Jan. has done more work and done it better than she has before this month. She is always so pleased when she has done work to win my approval and wants to show me her work all the time when she does anything. She is very quiet deportment—always good

Jan.

Elmer Johnson

He has done much the same work as last month. He tires of one kind of work and wants a change such as winding cord on the needles or in balls both of which he can do nicely. His deportment is usually good.

Jan.

Bennie Johnson

I am not satisfied with Bennie's work he has worked on hammocks most of the time but I shall have him start a bag the next thing. His work does not look neat enough either in cleanliness or in evenness. He works pretty constantly and cheerfully. and his deportment is pretty good. He has been present very regularly.

Jan. 1901

Johnny Johnson

Has done good work as he always does. His work does not vary from the usual high standard of excellence. He has been in school all the month. Deportment good.

Jan.

Lottie Jacob

The work Lottie has done has been quite rapid, too much so for her to be real careful. She grows careless and makes large meshes and somewhat uneven at times. On the whole her work is fair, good but it does not improve very fast. She is a good quiet girl always and pleasant to have in the room. She has been very regular in attendance.

Jan.

Lena Larson

Lena succeeds now in making a dozen or more knots entirely alone and without any watching her. She is very good and quiet. The work takes up her attention and she does not grow tired of it quickly. She is regular in attendance.

Jan

Mamie Langan

Mamie has done considerable work in making the net knot since coming back but nothing new. I need to be beside her and direct her movements still but I think now that she will learn to work alone in time. She was out of school three weeks out of the month. She talks a good deal but does not give me any real trouble.

Jan. 1901.

Nellie Mc Govern.

Her work is about the same as last month. She keeps her hammock in good condition binding her own knots and keeping the work clean and the meshes even. Her deportment is good. She has been in school every day this month.

Jan.

Theodore Mislin

Spends most of his time in Miss Johnstons room across the way.

Jan.

Tommy Mapp.

Tommy's work I can see has been an improvement this month over last month. He is growing more and more careful to make the meshes even, a thing which seems to be particularly hard for him. He is learning also to tie and bind his own knots, another thing that is hard for him. His deportment is quite good.

Jan.

Bennie Olson

A good deal of Bennie's time is taken up outside of the schoolroom for he is detailed for other duty every day about half the time or more that he is supposed to be in my room. He does nice work though, on his bag, and he is a good quiet boy an agreeable child to have in the room.

Jan. 1901

Bennie Ostrander

Bennie has been in school all the month and has done as good work as ever. It would be very good work if he were neater about it but it is always so soiled that it looks badly. He is a good boy in school He does not accomplish as much as many of the boys in a day but is busy all the time

Jan.

Mary Penheiter

The bag Mary has been working on for some time is finished now. She has done well this month and her bag looks well. clean and even. Her department is always good. She is always ready to do anything I ask of her and she does it without any words quietly and cheerfully. She is often able to help the other children with their work. Has been present all the month.

Jan.

Raymond Powers

I can not notice much improvement in Raymond this month over last month but he has improved very much since the beginning of the year in his ability to to handle the needle. He works easier and faster but he can not be relied on to know when his work is wrong as it often is. He has to have help to undo it when it is wrong.

Jan.

Theodore Palmer

Is detailed for duty in the halls or elsewhere nearly every day so he has not so much

Jan. 1901

time as most of the others to improve in his net work. He works very steadily when he is in the room. His department is good. His work is not always of the best but he does some very good work is unable to tie and bind the weavers knot. Has been in school a part of every day this month.

Jan

Uri Ornberg

Uri has continued to pick out the knots in any work I give him to do. He has also made several knots, not alone but with some of my help. If he keeps on as he has begun he will really learn to do the net work and surprise his teacher. He will work at picking out the knots for sometime without once wanting to talk or wander about the room.

Jan.

Caroline Peterson

Caroline has worked well this month. has attended to her own work very well and has finished her bag that she has been at work on. She has not tried to find so many mistakes in other's work but has helped several of the children who needed help.

Martin Peterson

has outside work still most of the time I believe

Amy Reeves

Has made a good deal of improvement

Jan. 1901 this month. She can make the knot more easily and works alone now and does very good work. She can make over half a row of knots in a day alone and make them well. She works all the time and seems to enjoy it very well. Her deportment is very good

Jan. Bell Roscencrans

Bell's work is about the same as last month. It always looks well both neat and even. She is a nice quiet girl in school and she can do her work so well that I often have her help the other children with their work. She has been regular in attendance.

Jan. Ignatius Stezerkowski

can do as many as six rows on his bag in one day. He does not always do as well as he can and he is fond of only playing. some days he does as well as that, others he does almost nothing.

Jan. Jessie Smith.

Jessie does not improve much. It is only with the greatest labor that she can make the knot at all. She knows well enough to do it but her hands shake and tremble so much that she can do very little with them. She isn't able to hold the needle or the stick steady enough to accomplish any good work. She tries very hard and becomes so discouraged that she cries and says she is mad at her hands. Her deportment is good.

Jan. 1901 Henry Sauer

Has been in school every day this month. Is doing good work on his hammock and is careful to keep it nice and clean. He works pretty steadily but hates to be disturbed. He is very contrary and when it comes to the gymnastic drill it is hard to make him take it with the others. With that exception his deportment is good.

Jan. Harry Stewert

Has been in school all the month and has done good work on his bag. He works at it steadily and does it pretty well but so slowly. His deportment is very good.

Jan. Gena Schumacher

Has been in school all the month and has done good work on her hammock. She has finished it and all the time has taken great pride in having it well done for she wants her sister to buy it. She is a good girl to help the others sometimes and is always so pleasant and helpful.

Jan Laura Strub.

Laura did not come into school until the month was nearly half over. She has done good work since. about the same that she did last month. Her deportment is good

Jan. 1901

Bert- Smith

Has been in school all the month and worked well most of the time. He works quite independently and does very good work. He is beginning a laundry net- now that- he is interested in. Deportment- quite good.

Jan.

Ralph Swenson

Has done good work on his hammock all the month. He keeps the meshes quite even and and is industrious and quiet- giving me no trouble in school. He has been in school regularly all the month.

Anna Sommenberg

Jan. Has spent her time in the sewing mostly in the sewing room

Albert- Riley

Albert- has worked faithfully all the month. he has been in in school every day but- is called out- once or twice a day for band practice or singing class or both. His work has improved this month. He is more independent- now a[illegible] help and he does his work quite well keeping the knots firm and the meshes even. He has made a doll hammock since last- month and has done considerable on his laundry bag since finishing that:- Deportment- has been good

Jan

Julius Turner

Does not come to the retroom any more.

Jan. 1901

Francis Ward

Francis still comes in and sits very quietly the whole session but- when I attempt- to show him what- to do he does not- appear to get- any idea of what- I want- of him. I do not- understand the Boy. He appears to understand me when I test- him on that:- in simple every day talk. but- he works perfectly at- random He has been in school every day this month and gives me no trouble so far as his deportment goes but- he does not- learn.

Jan.

Lewie Weisberg.

Has not- been school every day. was absent- six days. He has done a little more perfect- work this month than last:- He often starts to make a knot- wrong but- a reminder that- it is wrong is all that- he needs to do it- right:- He cannot make that- right- that- is already wrong, that- is he can not- loosen the knot- and put- the needle back so as to undo the the knot:- Some days he will do a long stretch of good firm knots, others he forgets with nearly every one. Deportment- is good.

Jan

Lena Wagner

Lena has done better this month than before. She can undo knots for me and when I stay by her and direct she can make them as well. She does not- try to work alone without- my help. Deportment- good.

Sophia Wrabek

Jan. 1901 Sophia and Lena Wagner keep pace with each other all the time. Sophia is a litle ahead though for she can make the net alone now. She has made half a dozen at one time. She needs one by her to encourage and direct sometimes. She has done very well for her. She is quiet and not at all troublesome in school

Mabel Wright.

Jan. Mabel's work has been about the same as last month's. She seems to be at work most of the time but she is indolent and works very slowly. She never seems to be aroused to do her very best work, because she has not energy enough.

Willie Winkelmeyer.

Jan. Has been in school nearly every day and has worked faithfully on his laundry bag. He is working more rapidly now than at times before and enjoys a little praise from me very much. He is always at work.

Fred Arndt.

Jan. Has been in school all the months and has done a good deal of good work on his hammock. He enjoys doing the net-work I think but he does not always work well. He is contrary about taking the drill with the others and sometimes makes me a little trouble. He does very well as a rule though.

Nathan Rice

Jan. 1901 Nathan been in school all the month and does very good. He is careful of his work and particular about not having any one else work on it. He is a good boy usually but there are days when he proves very exasperating, when he persists in talking and teasing any one who is near him.

Erwin Shull.

Jan. Has been in school every day this month He can make the net fairly well now and works by himself very quietly never leaving his seat or making the least noise.

Edward Barr

Jan. Has only been in school three days so I do not know how well he will learn the net work. But I think he will learn rather quickly and he seems a nice boy in school. Deportment has been good.

1901
Feb.

Esther Anderson

Has been in school all the month and has done some very good work. She has her laundry bag almost-finished and is very much elated over having so nearly finished it-alone. She has gained in carefulness since last- month I think. Her department- is all I could wish and she works all the time

Feb.

Jimmy Cross

I can't- see that- Jimmy's work is any different- from what- it has been before. If he had a little more energy I think he could do considerable but- he seems to have it- fixed in his mind that- he can't do the work. When I stay by him and direct- him he can tye the knot- so well that- I believe he could do it without- any help if he would make the effort. He drops the work almost- as soon as I leave his side. He is usually quiet- and good in school.

Feb.

John Brady.

Has been in school the entire month and worked faithfully as ever. His perseverence is meeting with its reward. It is growing easier for him to use his hands I think. He succeeded one day in making as many as fifteen laundry-bag knots. the most- he has ever done and all of them good firm ones. Department- good.

1901
Feb.

Edward Barr

Edward has gone home again but- before he went- he had begun a laundry bag and done several rows on it- of very good work keeping even meshes and making firm knots.

Feb.

Penny Cohen

Has been in school nearly every day this month. has about- half of the body of his hammock done. but- all the month he has shewed a strong tendency towards indolence, so much so that- it has been annoying work keeping him at- work. In other respects his department- has been fairly good.

Feb.

Kern Christopherson

Kern is doing very good work on her bag. She works all the time quietly if not- quickly. Her department- is good invariably.

Warren Dugan

Feb.

Warren's bag is about- one third done. He is working with more ambition to accomplish something after having finished his other bag and his baby hammock. he is making very few mistakes and his work looks well with its firm knots and even meshes and he keeps it so clean too. His department- is good and he has been present- all the month.

1901
Feb.

Mary Erickson

Has been in school all the month and has worked well. She has kept her work in better shape this month than usual and her department has been as good as ever.

Ella Froeming

Feb Ella has worked well and has made marked improvement in her work. She works by herself very nicely and keeps at work because she likes to. She can do about one round of knots on a laundry bag in a session and does most of them well but she often fails to notice when she makes a slip knot and so has a good many knots to undo for herself. Her department has been good. Attendance regular.

Feb. ### Ferdinand Froeber.

Ferdinand works industriously all the time and does good work. He needs little supervision. Department is good.

Feb. ### Charlie Fruchtman.

Charlie has been in school all the month. He is not taking up the work very quickly. He can make the regular hammock knot and has made as many as eight successively while I stood by and directed him, I think he is only slow and will have no real trouble in learning the work. His department is good

1901
Feb.

Guy Gardner

Guy has a bag of his own begun and is learning to keep his meshes even as well as his knots firm. With a little direction he can also tie the weavers knot and bind it nicely. He is quiet and industrious and it is a pleasure to have him in school.

Feb. ### Willie Gohen

His work is about the same as last month. He does very good work when he is in but he is in and out. He keeps his work clean but makes the meshes rather large but quite regular. His department as well as his attendance is variable

Feb. ### Anna Hanzel

Has been in school all the month and has kept her work up to last months level which is saying a good deal. The improvement in her work is more marked than in the work of almost any one of my children since the beginning of the year. Her department has been good.

Feb. ### Lilla Helgeson

When I stay by Lilla and direct her movements she can make the hammock knot. I do not need to always tell her what to do but a question or exclamation which shows her that she is wrong will lead her to correct her own mistake that would be if she were left to herself.

1901
Feb.

Don Hopps

Has worked quite faithfully this month. He has been in school all the month and has his laundry bag a third or more done. His work looks well. He works with only medium speed when he works but- he gets restless and needs some change during the session. Department- quite good.

Feb

Frank Jewett.

Frank has been in school all the month and has begun a new laundry bag. He has worked on it with a good deal of ambition and industry. His diportment- has been good.

Feb

Clara Joslin

Her work is about- the same as last- month. She does very little in one session, not- so much as she might- it seems. She lacks ambition. She will sit with her work in her hands for a long time and do almost- nothing. When she does do anything though she is very proud of it and anxious to show it off. Her attendance has been regular and her department- good.

Feb.

Elmer Johnson

Has been regular in attendance and has done good work as usual but- not quite so much of it as there should be. He works well for a time and then drops his work

1901
Feb.

and gazes about the room or sits and dreams. He is easily roused but- he needs rousing often.

Feb.

Bennie Johnson

Bennie not- changed as I see. He is working on a bag now, but- his work is not- very extra good quality. It is as much as I expect- of him in quantity. He has been detailed for other work several days. His department- is good.

Feb

Johnny Johnson

Johnny has been making a flynet- for a horse this month. There is considerable yet- to do to it. He takes up anything new in the stitch or knot- very readily. It goes without- saying that- it is well done and as neat- as can be.

Feb.

Lottie Jacobs.

Lottie has completed her laundry bag, which she has been working on since she began I think, this week and has not- yet- begun anything else. She has been regular in attendance and has been good in deportment.

Feb.

Lena Larson.

There has been a great- deal of improvement-

1901 Feb.

in Zena's work since her beginning. and in her work this month over that of last month. She has begun a bag of her own and has done about half a dozen rows with only a little of my help in getting it on the rod and at the ends for the first three or four rows. She works all the time and seems to enjoy it very well. I am much pleased over her improvement. She has been in school all the time and gives one no trouble.

Feb.

Mamie Langan

Her work is no different from what it was last month. She can do very little when I give her my whole attention and nothing when I am not by her.

Feb.

May Gudford

has not been in school.

Feb.

Nellie McGovern

Nellie finished her hammock and is working on a bag now doing very good work but no different from what it was last month and before in quality Department good, attendance regular

Feb.

Tommy Mapp

Careful practice is having its effect on Tommy's work. It is improving and he is able to see it himself and it makes him work harder and do more. Department good, attendance regular.

1901 Feb

Bennie Olson

Bennie's work is good as usual, and his department likewise and attendance regular for part of the session

Feb.

Bennie Ostrander

Bennie's work is just the same as ever. I would say just what I did last month.

Feb.

Wi Amberg

His progress is chiefly at a standstill I can't see any improvement.

Feb.

Mary Penheiter

Mary has made another laundry bag since she finished her other last month. She must have made it in six weeks. It is a better bag than the other too. It was kept so neat and clean. She was regular in attendance and her department has been good.

Feb.

Raymond Powers

I can not say that Raymond's work is any different from what it was last month. I would say the same thing over again about him.

Feb.

Theodore Palmer

Has been in school a part of every session

1901
Feb. He works all the time and at times does very good work then perhaps he will make a lot of work and have the meshes so large that it all has to come out. I hope in time he will do more regular work. His department is good.

Feb. Caroline Peterson
Has about three fourths of a lanneing bag done this month. She has been in school all the month and worked steadily. Her Department has been good.

Feb. Amy Reeves
Amy is gaining in ability to do the net work easily and does it better than she has before She is working on a bag of her own now and although she makes many mistakes she gets along wonderfully well for her. She has been in school all the month and worked very steadily. Her department has been good

Feb. Bell Roscencrans
Has done the same good work as ever. There is no more to be said than that. Department good. She often helps others with difficult knots.

Feb. Albert Riley
Has been in school all the month part of the session but is taken out every day for band practice and operetta practice.

1901
Feb. The work is so easy for him that he has spells of carelessness when he does not do such nice work as usual, but after he has had such an attack he sees its results in his bag and wants to take it out and make it as it should be. He wishes it to be well done and as a rule he does it well keeping a n even mesh and and making a firm knot.

Feb. Nathan Rice
Nathan has gone to work on his bag again after stopping to make doll hammock, and he works with more determination than before. He is always planning great things and talking about doing some of the work for some one else. He would work more if he did not talk about it quite so much.

Feb. Ignatius Stozerowski.
Ignatius has been out of school a part of each session for operetta practice and has not had so much time for his net work as most of the others but he does not often do as well as he can. Some days he does almost nothing and is so exasperating because he hinders the other boys from doing their best.

Feb. Jessie Smith
Some days Jessie has succeeded in making

1901
Feb.

as many as eight- or nine good firm knots. She tries all the time and deserves a good deal of credit- for trying so hard against- such obstacles as her hands are to her.

Feb.

Henry Sauer

Henry has done good work in school and finished his hammock. He is making a bag now. He keeps his work neat- and clean. If he could tie the weavers knot- and bind it he would work very independently but- he can not- yet- do that- alone. He does it- with a little help. He has been in school all the month and his deportment- has been good.

Feb.

Harry Stewart-

Harry is a good boy in school always. He attends strictly to business and does very good work. he does not- work quickly but he makes few mistakes. He has been in school all the month and his deportment- has been as good as it always is.

Feb.

Lena Schumacher

Lena has begun and nearly half finished the body of another large hammock. It will be when finished I think a little better appearing one than the other she made. She has been in school all the month and is a great help to me in assisting some of the others.

Feb.

Laura Stubb

I can't say that- Laura's work is any better done than last- month or that there is more of it but- it was very good then, The wonder to me is that- she can do it at all with her stiff hands. It is hard for her very hard but- she keeps at- it and works all the time with the greatest patience and cheerfulness, even when I know she must- be tired. She has been regular in attendance and her deportment- has been good.

Feb.

Burt Smith

Has worked very faithfully on his laundry bag all the month doing good work in every way, Deportment good, attendance regular.

Feb.

Ralph Swenson

Has been in school all the month His hammock is at- last- finished But- he could not- do it himself because he can not- count- four single knots and then make a double one or manor of one. He has been working on a bag since that- was done His deportment- is good and his attendance regular.

Feb.

Erwin Stull

Erwin has done very good work since coming back into school this month

1901
Feb. He works cheerfully the whole session and makes about one round of knots on his bag. He does much better than when he was in before. before he was sick.

Feb. Francis Ward
So far as I can see there is no improvement in Frances

Feb. Lewis Weisberg
Lewis grows more and accurate in his work the more he works at it. He still makes many mistakes but is learning to know when he has made one and today he several times stopped working when he had made one and simply waited for me to come and straighten up his work for him. That was a vast improvement for him. I have him now one session besides at recess but he works away on his bag no matter what goes on around him. Sometimes I go away while he is at work at recess and leave him entirely alone but when I come back he is always hard at work. He has been regular in attendance and his department is good.

Feb. Lena Wagner
Sophia Wrabek
Lena and Sophia always do about

1901
Feb the same work, Either one can wind a ball or a needle. Both can tie a hammock knot if I stand by and direct all the while. and sometimes they keep on after I leave and make a few alone. Department good.

Feb. Mabel Wright
Mabel has been part of nearly every day out for drill for the operetta and so has not accomplished much in school.

Feb. Fred Mundt
Has begun a laundry bag and and has worked pretty faithfully the whole month. His department has been fair.

Willie Winkelmeyer
Has been regular in attendance and has done considerable work on his ~~laundry~~ bag. He lacks energy somewhat. His department is good. He is always just so quiet and immovable.

1901
March

Esther Anderson

Esther Anderson has begun another laundry bag since finishing her first bag. She has six or eight rounds done on her new one. Her improvement is gradual but she grows more and more careful with her work and is more apt now to notice her own mistakes now that she has new work. She does the gymnastics always as well as she can but has a little trouble in understanding what she is to do. Department good. Has been present every day this month.

Brady, John.

I can not say that John is able do do any more work and perhaps it is no better than he did last month but the practice is certainly good for him. He is very faithful, laboring over his work with the most painstaking care. He does as well as could be expected in the Calesthenic exercizes taking quite an interest in it Has been absent two or three days for the most part of the session. Department good

Cross. Jimmy

I see no difference in Jimmys work in the net work from that of last month He wakes up to a little more energy when it comes time for the drill and makes an effort to go through with the exercizes. He has been present all the month. Department good.

1901
March.

Pinney Cohen

Has been absent only three or four days this month. He has finished the central part of the ham mock he has been making doing about half of it this month. He does very well usually in the drill, gets the ideas quickly and acts on them. He gives me no real trouble but is at times quite aggravating.

Christopherson. Kern

Has been present all the month and worked as well as ever. She does as well as she can in the drill and succeeds in going through the exercizes nicely. There is no more to say than that she does her best and that is very good.

Dugan. Warren.

Has been in school all the month and done more work than in any other month this year. His work is very well done too. He has been excused from taking the drill. Department has been good

Erickson, Mary

Has been in school all the time this month. Her work has been well done, better than usual I think She has nearly finished her laundry bag. She works quietly and faithfully. She does not keep very good time so her gymnastic work is not so good as some but she gets the movements quite well.

1901
March

Ella Froeming

Ella has been in school all the month and continues to improve in her work. She is more quiet than she was and though she does not do more than a round of knots in a day she does them better than she did last month, making fewer mistakes. She does not do very well in the drill. Her department for the month has been good

Froeber. Ferdinand

Ferdinand has been in school regularly since coming in and works well at the net never giving me any trouble in school. He keeps to his work all the time and does very good ~~good~~ work. He doesn't do especially well in the drill but he goes through it fairly well.

Fruchtman. Charlie

Charlie has learned to do the net work and does a little every day. He works very slowly, often stopping altogether. He did not learn it readily at all. He seems very indolent. He is not bright and quick in taking up the drill either. He is a pretty good boy in school. Has been in school all the month.

Gardner. Guy.

Was in school only eleven days and part of that time he was taken out for part of the session for other work. He did not have time to get very much done on his bag the time he was in but he can work quite fast and at the same time do good work.

1901
March

He is a real good boy in school and did such good work that I miss him but he had gotten about all the training from doing the work that he would. He also did well in the drill.

Gohen. Willie

Has been out of school the greater part of the session a good many days doing outside work. So he has not done so very much work. What he has done is well done. His behavior is not good. He is the most aggravating child I have in school, snatching their work from the other children and in any way he can think of tormenting them. He can do the net work well enough so that he gives little thought to it as he works and has a chance to let his mind be busy elsewhere. He is not in the room in time usually for the drill.

Hamzel. Anna

Has been in school all the month and done her work fairly well. She always makes bad work of her cord when she has any work to do. She is usually quite industrious and quiet, but sometimes has troublesome times when she does not work very well and cries on the slightest provocations. Her department is good usually.

1901
March

Lilla Helgeson

Lilla has improved a very little I think this month. She does not work by herself that I can discover. that is, she does try sometimes to make the knots and has sometimes showed me one that she says she has made but I am not at all sure that she did. She shows more intelligence in the work than she has. She tries to go through with the drill and does not succeed very. Deportment is good. She has been in school all the month.

Holmes. Donn

Donn Has been pretty restless this month. and worked by fits and starts. He can, and does do very good work on the nets. and if he would work more steadily he would accomplish a good deal. He is a good natured child and is only troublesome sometimes because he is so restless. He can do the gymnastic work very well. Has been present all the month.

Jewett. Frank.

Frank has about half finished his second laundry bag. He works quite fast accomplishing a good deal of work in one session. He works a long time steadily then seems to need to rest a little before going on again. He has usually a pleasant agreeable disposition. but I find when he is crossed he is quite savage biting his own hands or throwing his work from him. Such times are often after a reaction from the other extreme when he is so very foolish laughing in a silly way at

1901
March

anything or nothing. He can do the gymnastic work very well, when he wants to but he is not so uniformly good in that as he is in the net work. Has been in school all the month, giving me little trouble.

Joslin, Clara

Has been in school all the month and done better work and more of it than in in any month before. She sometimes does as much as one bound on a laundry bag in a day and has only one or two slipknots in it.

Johnson, Elmer

Elmer has done good work on his bag and has worked faithfully all the month. He is a very quiet boy in school. He does the drill very nicely also. He has been in school every day. Deportment — good.

Johnson Bennie

Bennie has not manifested much energy or ambition to do much this month. Unless he is prompted every little while some days he will go to sleep in his chair or nearly go to sleep. His work has been pretty well done this month. He has been in school nearly all the month. Deportment good

Johnson Johnny

Johnny has been in school all the month and has been making another tennis net. He has nearly finished it already. He would have had it completed by now, only one

1901
March

day he dicided that something was wrong with it and before I knew what he was doing had unknotted a cord across the net and taken about a foot of the work of and begun to go on with the net. His chief fault in the work is that he will occasionally do something like that. He does the drill well. Deportment good.

Jacobs Lottie

Has been working on another laundry bag. She keeps it in good shape without much help, tying and binding her own weavers knots. She often helps the others in tying or binding a knot. She takes kindly to the drill and does it very well. Has been regular in attendance and. Deportment good.

Larson Lena

In school all the month. Has done very good work on her bag. Lena is a girl I have been very agreeably surprised by. For a while I was afraid she would not learn the net-work but she has improved wonderfully. She has done, in the last month, about a fourth of a bag and done it well. She can also tie the weavers knot but not bind it. She tries to take the drill with the others but does not succeed very well. Deportment good.

Langan Mamie

Three times I have known Mamie to

1901
March.

make one knot alone. Deportment has been good. Attendance regular

McGovern, Nellie

Nellie has about half finished a laundry bag this month. She has worked very steadily as she always does and kept her work neat. She does well in the drill also. Attendance regular. Deportment good.

Mundt, Fred.

Has about a third of a bag done. Has worked as well as usual but no better this month. Does not do the drill well chiefly because he dislikes it I think. He is very stubborn and somewhat hard to manage. Deportment not very good. Has been absent only one day this month.

Mapp. Tommy.

Has done good work this month, finished his laundry-bag and was anxious to begin another. He is ambitious to get a good deal done before June and has worked hard. He is equally anxious now to do his work well and intends this new bag he has started to be better done than the other which was well done. On that he often had to undo parts of his work and do it over again because the meshes were to large or uneven. He has begun well on his new one, has ten or eleven rounds done and very well done. He still has some trouble in tying the weavers knot. Can do the drill well

1901
March.

Bennie Olson

Has been in school all the month for part of the session. Has finished the laundry bag he has been working on for some time. it is well done as all his work is. Has just begun on another He does the gymnastic drill very well. Is always quiet in school. Department good.

Astrander, Bennie

There is little change in Bennie's work. It would be very good work if he could keep it neater as it is, it does not look well. He keeps the meshes even and the knots good and firm. He does the drill very well. Department good attendance regular

Ornberg Uri

I can't really see any more improvement in Uri's work, He can't wind a ball or a needle and when he tries by himself to do the net-work he never does it right though when I help him he does make the knot right sometimes. He does nothing right in the drill. attendance has been regular and department good.

Pemheiter. Mary

Has over a third of another laundry bag finished as this months work. The work is well done as usual with her She ties and binds her own weavers knots nicely. She does the gymnastic work well. Department good attendance regular.

1901
March

Raymond Pawers

Raymond's work is not well done. He seems at a standstill now. Often he does a row or two of pretty good work then he will do almost nothing that is good enough to leave. He does the gymnastic work as well as he can. Department good. attendance regular

Palmer. Theodore.

Theodore is out of school half a session or more every day. Has been marked present every day this month. He does a great deal of work that is not fit to leave because he makes the meshes so large. He is quiet and industrious. He objects strongly to trying to take the gymnastic work at all. I suppose he really is not capable of doing much with it and he does not want to try. Department good.

Peterson. Caroline

Has begun another laundry bag. When she begins a new bag she is all the time finding some flaw in the work and taking it out so she gets along slowly at first. She likes to help others with their work especially if she finds a mistake in their work to undo. She does the net-work very well. as well as she ever will I presume. Does fairly well in the drill. Is in school all the time. department good.

1901
March

Anny Reeves

Anny has improved in her ability to do the net-work in the last month. She makes fewer mistakes than she did and does more work. She has done fourteen rounds in her bag alone. She keeps to her work well and is always nice and quiet in school. She does not do the drill work very correctly but she tries to do it right. She seems afraid to make use of her limbs freely.

Roscencrans Bell.

Bell has finished a laundry bag this week and begun another. There is nothing new to say about her work it is well done and neat. She is quite independent, ties all her own weaver's knots and binds them nicely. Occasionally makes her meshes a little uneven but not often much so. She does the drill fairly well is always willing and quick to respond to a new exercise. Deportment good attendance regular

Riley Albert

Has been in school every day but one for the greater part of the session. goes out for band practice every day but Saturday. He does very well in the net work. Has nearly finished a laundry bag now. His work is usually very well done meshes even and knots firm. He takes a good deal of interest in the net-work and works energetically while he is in the room. Is out for band practice while the drill is going on. Deportment good present every day but one.

1901
March

Nathan Rice

Nathan is very slow with his work. He is very lazy I think. He has some trouble with his paralyzed hand so he can not work so well as many of the children but he can do very good work in spite of that when he has a mind to. His work is always good though what there is of it but there is to little entirely a great many days. Other days he works industriously all day only talking considerably about his work. He is to fond of talking to be quiet all day. On the whole his deportment is usually pretty fair.

Stezercowski. Ignatius

Is in Class B. now most of the time.

Smith. Jessie

Jessie is improving in the net-work Since last month she has gained considerable. She can make fifteen or sixteen knots in succession now and is full of elation because she can She works faithfully and can tell the difference better now than she could between a slip knot and a good firm knot. She tries hard to do the drill work and is improving some in that though she does not do very well. She has been in school all the month. Her deportment has been very good

1901
March Henry Sauer

The report for Henry this month is much the same as last month. He has worked well and gotten on very well with his laundry bag. He can do the exercizes very well but dislikes to do them. However he seems more willing now than at first. He has been regular in attendance and his deportment has been good

Stewert, Harry

Harry has half finished his bag. He works steadily and does very good work, keeps the meshes even and the knots firm. He is not independant yet for he can not tie his own weavers knots. He does fairly well with the gymnastics, always does his best. Has been absent three or four days this month. Deportment good.

Schumacher, Lena.

Lena does not work quickly as Johnny Johnson does but her work when it is done is as good as his. She has not had the variety in the net work that he has. She has the body part of her hammock done now. Has been in school every day and Deportment is always good.

Stubb, Lana

Lana has worked well and as patiently as ever this month. She has about half finished her laundry bag keeping it even and nice looking. She finds great

1901
March difficulty in going through with the gymnastic work and dislikes to do it. She succeeds in doing so little that I can not see that it has done her any good yet; but of course it is too soon to say that it will not

Smith Bert

Bert has been in school all the month and done good work on his laundry bag. He has worked more persistantly than than sometimes, this month and has two thirds finished his bag. He does well in the drill also except occasionally when he feels to indolent to do much Has been in school every day. Deportment good.

Swenson, Ralph.

Ralph has done good work on laundry bags this month. He keeps his work neat and makes the meshes even and ties firm knots. He can not tie or bind the weavers knot. He is a good quiet boy in school. Has been present all the month.

Shull, Erwin.

The work Erwin does in the net-room is very good. He has his bag about two thirds finished. He works most of the time, not so very fast though, He has sly little ways of teasing the boys who sit next to him otherwise he is

1901
March. a good boy. He does most of the drill work very well. Has been in school all the month.

Tuttle Grace.

Grace has been in school every day since coming into the room about two weeks ago. She has gotten now so she can make a good firm knot and make it well. She has not done much work yet but has worked on a bag that was partly made. She takes the drill well. Deportment good. She has had spasms three times in my room since coming in.

Ward, Francis

Francis has not succeeded in learning anything in the onet work yet. The drill appeals to him and he tries to take the exercizes. He does more in that than anything else. The first thing he ever did for me was to draw out his hand from under the pile of our hands placed alternately one on top of the other. He knows what I say to him and if I tell him to stand or sit or move in certain ways ~~but~~ and does as I say but when it comes to using his hands he seems to have no comprehension of what he should do though I tell him and show him constantly.

1901
March.

Louie Weisberg

Louie has been in my school room for two sessions during the for the greater part of this month. He has improved a great deal since last month. He does a whole round of knots now that can be left sometimes, at others he will make them right but leave the meshes to large to leave when he does that I go over the work left that way and make the meshes smaller. Sometimes he makes a serious mistake or two but he has not made a whole snarl of knots as he used to this month. He is very quiet in school giving me no trouble at all. Has been in school every day. He has nine inches done on his bag, his own work.

Wagner, Jena

Wrabek, Sophia

Sophia has shown a little more intelligence than last month and has made a few knots alone. There has been no improvement in Jena Both have been in school all the month and their debartment has been good. Neither one does anything gymnastics except move about on their feet a little though both make some effort.

Wright, Mabel

Has been in school every day this month. Was taken out some days for part of the

1901
March

session for operetta practice. She finished her first laundry bag this month and has begun another. She has five or six rounds done on. Finishing one gave her an impetus to go on and get something more done so I think she is working a little faster on this one. She takes the drill nicely. Deportment good.

Winkelmeyer Willie's work does not vary much from month to month. I can see no difference in him or his work. His work is usually good though not very neat.

Mason Albert-

Has only been in the net-room three days so I have not had time to know much about him.

Yoshikawa.

Tama is only in the net-room a half hour a day and has only been in two weeks yet. She is slow in taking up the work so I have not had time to do know what she can do. She can wind balls and needles nicely

1901
April

Esther Anderson

Esther has done about such work this month as last. She is faithful, working all the time but needs to be watched quite carefully still to keep her work up to the standard of her best. Her ability to discriminate good from poor work has improved very greatly.

Brady, John

John's improvement in the net work must be very gradual because of his lameness in his hands. He has intelligence enough to do very good work but that does not overcome the difficulty with his hands. If he should be able ever to manage his hands properly he would still not be able do neat work because he drools so much and soils his work so much. His deportment is always good.

Cross, Jimmy

Has improved some in this month. He has gotten so he wants to have work by him and will work when I am not by all the time. His work is not very good but he tries harder than he ever has before and of course succeeds better. He is a good boy in school.

Cohen Pinney

Finished his hammock the early part of the month and begun a laundry bag. He is keeping it more even and therfore better looking than he has his hammocks at all I think. Deportment has been fair.

1901
April

Kerr Christopherson

Kerr always does very good work but she is very slow and quiet, so quiet that if she needs anything that she has not she will sit still waiting for me to notice that she is not at work rather than tell me what she needs. She is a good girl never giving me the least trouble

Dugan Warren has been absent all the month.

Erickson Mary

Marty has been in school all the month and has nearly finished her bag. She would have had it done some time ago if had not had to undo so much work. She works along in her own way as well probably as she will ever do it, very good usually but with occasionally a blunder. Her department is good.

Froerning Ella

Ella has worked very faithfully in the net work this month. She has kept her work looking well and appears to enjoy the work. She is still improving both in ability to do her work and and in her general behavior.

Froeber Ferdinand

Has been in school all the month. He works quite independently in the net work but he can not wond the needles properly. He is a quiet boy in school never getting into mischief or making the least bother.

1901
April

Charlie Fruchtman.

Is improving in the net work but he does not like it very well and so does not work with so much interest as he might.

Gardner Guy

Was only in school fifteen days but he improved his time and has done considerable work. He is careful and finds an interest in his work. He keeps at work well and does not like to be called out for other work. Deportment good

Gohen. Willie In school only one day

Hanzel. Anna

Anna still improves in her work gradually. She has learned do distinguish quite well between her work when it is good and when it is poor something she seemed to have no idea of when she came to me first.

Lilla Helgeson

Lilla is learning to wind the needles with cord. She can not do it by herself yet. Her work in the net is no more satisfactory than it has been for any month previous. Department fairly good all the time.

Hopps. Donn

Has been restless this month as he was last. For a boy of his active temperment

1901
April

the net work has almost to little variety. He likes his work and works very energetically for some time then he might as well have something else to do for five or ten minutes for if he keeps at work on his bag he does not accomplish much of anything until something gives him fresh impetus when he will attend to business again. His department quite good.

Jewett Frank

Has been in school all the month and has done about the same work he did last month. He does his work very well, and is quite independent of any aid Department fair.

Joslin Clara

Has been in school every day this month. She is improving in her ability to know when she has made a mistake. She keeps at work all the time but works quite slowly. She is very quiet, never giving the least trouble. The bag which She and Ella Froeming worked on together is finished and they are both at work on a new one. Her department is regular

Johnson Elmer.

Has missed nine days out of the month when he was doing some other work. He works quite independently keeps his knots firm and his meshes even and binds his weavers knots better than most of the children who can do it for themselves. His department has been good.

1901
April

Bennie Johnson

Bennie has missed nine days of this month while doing outside work. He is very indolent. He appears to be half asleep a good deal of the time. He doesn't accomplish very much in the net work and what he does do is not of the best quality. his department has been good

Johnson, Johnny

Johnny finished his tennis net; made one large hammock and has begun another tennis net. There is nothing new to say about his work. It is good as it always is. Department likewise

Jacobs Lottie.

Last months report of Lottie would answer just as well for this month. She is quiet and industrious and her work is pretty well done always. I think she can learn to do her work still better. Her department is good.

Larson Lena.

Has done about the same as last month. She is always uneasy if she is without work for a few minutes. She is very anxious always to show me her work and is so proud if I say she has done well. Deportment good.

Langan, Mamie

Mamie seems to have learned all she ever will in the net work. She does not seem

1901
April

able to concentrate her attention long enough on any one thing to learn it. Her department is pretty good

McGovern, Nellie

Is making a bag. She does very good work keeps her knots firm and meshes even. She is very quiet in school and works more quickly than she used to. She has been in school all the months. Department good.

Mundl. Fred

Has done about the same as last month. He is growing restless as the warm weather comes on and objects to working very hard.

Malejo Tommy

Tommy is still improving in his work. He does it very well indeed now and intends to finish his laundry bag long before school is out. I have been a little surprised that the net-work held his attention and interest so long when it seems to become monotonous to so many after they have it pretty well learned. He does get restless and longs to get out doors. He took a special interest in the seeds we planted last week. He has a strong tendency to annoy the other children at their work but succeeds fairly well in restraining it. Department fairly good.

Olson Bennie. Has his laundry bag a third or more

1901
April

completed. He is seldom in the net-room more than half a session a day. But he works fast while he is at work. His work is very regular and neat in every way. His department is invariably good.

Ostrander Bennie

Bennie Ostrander's work is quite in contrast to Bennie Olson's. It is not neat and he does not work fast but very slowly. He is industrious though and keeps at it pretty well. He does succeed in getting it pretty even.

Ornberg Uri

I can see no change in Uri's work over last month.

Penheiter, Mary

Mary works quite independently and quite rapidly. and she keeps her work neater than almost any of the children. She does it I suppose, as well as she ever can do it. She is very quiet never having anything to say to any one. Department good attendance regular

Powers Raymond.

Has been in school all the month. He tries very hard to do his work well but only succeeds to a limited extent. He is improving a little I think. He works over and over his cord so much that he gets it very much soiled

1901
April

He is a good boy to have in school, quiet and obedient. He does the best he can in the calesthenic drill too.

Palmer Theodore

Theodore's work the latter part of the month is better than for a long while before it has been fit to leave most of it. He wants to be at work all the time and gets a good deal of work done in the half session he is in the ant room Has been present sixteen days in the month only. Deportment good.

Peterson Carolina

Has been in school all the month and done good work on her bag. She has almost finished it now. She will finish it tomorrow I presume She does the work very well but if she was a little more careful she could do it a good deal better than she does now. Her deportment fairly good.

Reeves, Amy.

Has done about the same work as last month, I notice a little general improvement every month. Deportment good Attendance regular

Rosencrans Bell.

Bell's work also is about the same as last month. Has been in school all the month, She does not work at all fast on her bag. She is very slow but industrious and quiet.

1901
April

Albert Riley.

Albert finished his bag the early part of the month and then made a doll hammock. After that he began another bag which he says he expects to have better than the other, I think it will be better done too. He does not ask for any of my help any more and is proud to do it entirely alone. His interest in the ant work remains good. Deportment usually good

Rice, Nathan

Nathan is one of the children who are growing very restless and somewhat troublesome as warm weather comes on. He has an irritable temper and is kind of a disturber of the peace generally. His work is about the same as last months work. Has been present every day.

Smith Jessie

Does the best she can and improves a very little from month to month otherwise I should write just what I did last month.

Sauer Henry.

Henry has been called out for outside work more or less this month. But he has finished his laundry bag and begun another. His work is pretty good the knots are firm and the meshes are usually even. He is very stubborn when crossed and sulks but usually he is good natured. Has been in school nearly every day. Deportment on the whole good.

1901
April

Harry Stewart-

Has been in school all the month and done as good work as usual. He works steadily and keeps his work nice in appearance. He enjoys doing the net work and works industriously all the time. He is always good in school.

Schumacher, Lena

Lena has finished her hammock and begun a bag. She works steadily and intelligently in the the network. She can work independently of the teacher and often helps some other child who needs help in tying the weavers knot or in anything else. She is good natured and helpful in disposition and I can call on her for many little things that require more intelligence than many of the children possess. Her deportment is always good and her attendance regular.

Strub, Laura

Has not worked quite so much this month as usual or quite so patiently. The first heat of the season I think makes her feel listless and not like working. She has been so good all the year that I can only explain it that way. Her deportment is good and her work as well done as ever. Has been in school all the month.

Smith, Burt

Has been in school all the month and after he finished his bag begun another hammock. He has worked better than usual all the month

1901
April

and took a decided interest in his work His department has been good.

Swenson, Ralph

Has been in school all the month. He has a bag of his own now. He does very good work keeps it neat and even. He is not at all troublesome in school but is quiet and industrious.

Shull, Erwin.

Erwin finished his bag this month and begun another He spends most of his time working faithfully without any prompting. He has been in school all the month. Department good

Tuttle, Grace

Grace was changed so I have her no more.

Ward, Francis

I cannot see that There has been any improvement in Francis' work. He always tries to take the exercises in gymnastic drill but can not succeed very well and he can not make the hammock knot shows no intelligence at all concerning it. I have tried to teach him to wind the needles but he cannot do that nor even wind the ball of cord.

Weisberg Jonie

Jonie has grown very restless and troublesome

1901
April

this month. As he has learned to do the net-work more easily he has apparently tired of doing it and in the last two weeks especially he has done very little in it. He is a boy who must be active so spends his energy in slyly teasing and tormenting the other children. I have had him for two sessions a day in the net-room and I think it may be to much for him then I think he is restless to be out doors since the pleasant spring days have come. He has been in school every day this month. His deportment has been really very poor and a great change from what has been before

Wagner Lena
Wrabek Sophia

There has been no apparent change in Lena this month. She works a little while I stay by her and show or tell her just what to do but not otherwise. Sophia has learned to wind the balls of cord and the needles very beautifully. I have been giving her all of that work there was to do during the session when she is in school. She is a very quiet child and seems to want to do some work, but unless she is winding the cord or when I am not working with her she always simply lays her head on her arms by the radiator or table and sits perfectly still never making a sound but if I ask for the scissors or thread or anything if she can find it or knows where it is she always wants to get it for me. I have still considerable hope that she will learn more of the work this year

April 9.01

Mabel Wright-

Mabel has done about the same work this month that she did last. She had to undo five rounds once because of a mistake she made. She is a pleasant agreeable child but she is either excessively lazy or else half sick. Every motion she makes seems to indicate that she has not quite enough strength for it. She seems sufficiently interested in his work and likes to do it, usually doing it very well but she works very slowly. She has been in school all the month and her deportment has been good.

Winkelmeyer Willie

Willie has been in school all the month and has worked quite steadily. He works all the time but does not seem so much interested in the work as many of the children are. possibly he needs more praise or attention than he has had. He is so very quiet that he does not call it out as most of them do at times. He is a very good boy but does not accomplish much in a day.

Gould Lena

Lena has been in school for a half hour only every day this month. She has proved slower in learning this work than I expected. She can not work at all independently yet. She winds the balls and needles of cord nicely. She is a pleasant child to have in school she is good natured and very quiet always and thoughtful of others

1901
April

Albert-Nason

Has been in school all the month. He only came in last-month for the first-time and he has learned enough so he can do very good work in the net. There are some little things about it that-he has not-learned yet-but-he has the principal part-of it well learned. he ties his knots good and firm and keeps his meshes even. He still works a little laboriously but-he will get-over that-soon. His deportment-is usually good and he is interested in the net-work.

1901 Anderson. Esther
May. Has worked very steadily this month and has had few mistakes to undo so she accomplished a good deal. Has finished the laundry bag she started in april. She has been present-every day and kept-her department-up to where it-should be. Always takes the gymnastic work cheerfully and as well as she can.

Brady. John.
Has been out-of school five days this month He works with a will and a desire to learn to do his work well. He works very slowly spending a long time over one knot-before he finishes it. The knot-itself is good usually though occasionally he makes a slip knot-because the cord slips from his fingers He doesn't-hold his work well. But-he tries very hard. The net-work is a great-deal harder work for him than it-ought-to be for anyone. Department-has been good, as usual.

Cross Jimmy.
Jimmy knows how to do pretty fair work in the net-. sometimes he does it and sometimes he seems to have forgotten one part-of it so he will make knot-after knot-with only a twisting of the threads and no real knot-. When shown his mistake he undoes it quickly and with a little help goes on again making firm knots. I expect-more from Jimmy than he has yet-done at-any time. He should do good steady work continuously. Has been in school every day-. Deportment-good.

May 1901

Cohen, Pinney

Pinney has done good work this month on his laundry bag. He has it about two thirds finished, it is both more even and neater than his last hammock was. He has been regular in attendance and fair in department

Christopherson Kern

Kern has just finished her laundry bag except for the row of double cord on the end. She has kept it quite neat in appearance and has done her work well. Her work this month is about the same in quantity as for several months back. She does not work very rapidly but does it well. Has been in school all the time Department good

Durfam, Warren

Was not in school all the month.

Erickson, Mary.

Several days ago Mary completed her laundry bag. She did it with very little help but she had at different times to undo quite serious mistakes which she made. She can do pretty good work alone but needs to be watched to see that she does not leave such mistakes behind her and make herself a good deal of work. She has been in school every day this month. Department good.

Froening, Ella

Ella has made this month over a third of a laundry bag. Working every day on the same one with Clara Joslin with occasional help from some one else their laundry bag is long enough.

May. 1901 I have been pleased both with the quantity and quality of her work. Both are better than in any previous month. She has been present every day and her deportment has been good.

Froeber, Ferdinand

Has been in school all the month and done work about as usual. Usually he does very good work and makes the regular network very well but he is not independent for he can not tie or bind his weavers knots and he can not wind the needle for his work. He has broken two or three needles, not all this month but since he has been in the net class, by winding them wrongly and too tightly. He is a strange child, he seems not to have much sense of pain for he will hurt himself apparently because he enjoys the sensation. Twice he has bitten or scratched his hand or wrist until it bled profusely and every little while breaks out in a chuckle which seemed to be of pleasure. He is quiet and gives me very little trouble in school.

Fruchtman, Charlie

Charlie has done more and better work this month than he has before. He waked up to more ambition. In trying to get ahead of another boy in his work he forgot his not liking to work and often did one and a half rows round a laundry bag in one session. He was present every day. Department fair, better than usual.

May 1901

Gardner, Guy

In school only thirteen days. His work was good as usual. He completed his laundry bag and braided the string for it. Department-good.

Gothen, Willie not in school at all.

Hanzel, Anna

Has been in school all the time this month and worked well. She has her laundry bag about three-fourths finished. She is not so careless as she was about her regular work and does not make so many mistakes and blunders but sometimes when she makes she goes on with her work in spite of the fact that she knows she has made it wrong. Once this month she had to undo five or six rows because she would go on after she knew of her mistake. She does not take so much pride in her work as I wish to see yet although she has improved very greatly since the earlier part of the year. Department- good

Helgeson, Lilla

Lilla's work in the net is discouraging. She can wind the needles and the balls but not very well. She can if I sit by her constantly and direct her some make the hammock knot but when I am not beside her she makes a snarl and tangle of the work that takes sometime to undo. She has been present all the month. Department good

Hopps. Donn.

Donn has finished his laundry bag which he has been working on ever since he learned

May 1901 the net work and is working now on another with Erwin Shull. He does very good work by spells. His work is even and neat. If I succeed in varying his work somewhat he works contentedly and quickly. He is always rather proud of his work because it is clean and neat. Has been in school all the month. Department - good.

Jewett, Frank

Frank and Donn finished their laundry nets at the same time, running a race to see who should get through first. Both of them worked well for sometime with that end in view. Both are working on nets about the same length now also and each tries to outdo the other. They are both somewhat restless but Frank gives me more trouble with his activity than Donn. He has been regular in attendance. Department - not the best.

Joslin, Clara

With only a little help from others Clara and Ella Froeming have just finished their second bag. Clara works much faster than she did and makes fewer mistakes, Also keeps her work in a much neater condition. Present every day. Department- good

Johnson, Elmer

Elmer has finished his laundry net and is at work now with Bessie Olson. He does equally good work with Bessie but does not work so much in the same length of time. While he is working he works quickly but he has a habit of dreaming that makes him slower. Some days

May 1901 it is worse than others. On those days he will drop his work and sit perfectly idle until he is called to his work again. or sit so with his work in his hands. Has been present all the month. Deportment good.

Johnson. Bennie

Has worked with a little more ambition this month. the quality of his work has improved somewhat also. He only missed three or four days this month. Deportment good.

Johnson, Johnny

This month Johnny finished the tennis net he had begun, also the hammock. After that he made a wide flounce with tassles on each side of a hammock he had already made and his second fly net is over half finished. Deportment good as usual.

Jacob. Lottie.

This month Lottie finished her second laundry net. It took her less time to make it and it is better done too than her first one. She works very steadily and can do all parts of her laundry nets braid the cord bind the knots and tie the weavers knot; was in school all the month and worked well all the time. Deportment good

Larson, Lena

Lena has also finished her bag which she has been at work on ever since she learned the net work. She can tie her weavers knot but can not bind it neatly yet. She has learned to braid cord for the draw string also. She does very poorly in the gymnastic work

May 1901 Langan, Mamie

I can not see that Mamie makes any improvement in the net work. I think she can wind cord on the needles now but I don't trust her to do it alone much for she does not do it well.

McGovern. Nellie

This week Nellie finished the bag she has been working on. She does very good work keeps her work neat and even. She ties and binds all new weavers knots and works very quietly and industriously all the time. Has been in school all the month. Deportment good

Mundl Fred.

About the middle of the month Fred finished his laundry net. then he braided the string for the draw string. Since then he has been working on a new bag. He has worked more industriously this month than last. Was present all the month. Deportment generally good.

Mapp. Tommy

About a week ago Tommy finished his second laundry bag. He has grown quite independent in the net work. can do all parts of his bag make the weavers knot; bind it keeps his meshes even and knots firm and braid the cord. The last he has but just learned but he does it very well. He is working since on a baby hammock with Albert Kiley. has been in school all the time. Deportment and the best;

May 1901

Olson, Bennie

I would write this month as last for Bennie, his work and his behavior is invariably excellent.

Olstrander Bennie.

Bennie is another boy who has finished his work this month. The bag he has worked on for a long time is now finished, He braided his cord for the draw string and has braided some cords for others. Department-very good. present-everyday

Ornberg, Avi

No improvement.

Pamheiter, Mary

Another bag finished by mary. Since finishing it she has worked some on Johnny Johnston's fly net. She does some even work on the bag then on work with larger meshes. Department-always good Does well in Gymnastic drill. Present all the month.

Powers, Raymond

Has done about-the same work as last-month. He tries very hard to do his work well and it is not his fault-if he does not-succeed in doing perfect-work. Present-all the month. Department very good.

Palmer. Theodore

Theodore finished the bag this month which he has been working on all the year and part of last year. He is learning now to tie the weavers knot. Is never in school more than about half a session but-has been present-every day

Department-good.

May 1901

Peterson Caroline

Caroline has been in school all but two days this month. She has spent considerable time undoing work on a bag which was made different from the others as an experiment. It was not ~~so~~ satisfactory so she undid it. Her deportment has been very good this month.

Reeves, Anny

Anny's general work is much better than it was last month. She works very much faster and does her work fully as well. She seldom makes serious mistakes but-she is apt-to go on with her work and not-try to take-them out-when she has made one. She does not observe readily and perhaps does not-know.

Rosencrans, Bell.

Bell. is a girl who is always busy. She is very careful about her work and is slower than many of the children. She keeps her work very neat and dislikes to have any one else have anything to do with it because she wants it to be all her own. She is always good natured and is a pleasant child to have in school. She has been in school all the time this month. Department-good.

Riley, Albert-

About a week ago albert-finished his second laundry bag. He did all parts of it alone. He is very independent-of my help in making the bags now. Since getting the bag off his hands he has begun a

May 1901 baby hammock which he expects to finish before school closes with Tommy Mapp's help. Attendance regular. Department very good.

Rice, Nathan.

This month Nathan has worked well on his laundry net and succeeded in making about a round and a half or two rounds on it in a day for most of the month. His department has been considerably improved also.

Smith, Jessie

Jessie's work this month has still a little better than ever and she can now make twenty-four or five knots in one session. She is gaining a better use of her hands from her efforts in the net work. She has been in school all the time. Department is very good.

Sauer, Henry

Henry has completed his bag and is at work on a new one. Henry is learning to tie and bind the weavers knot. He does not yet tie it easily but he binds it very well. He has worked with a will all the month. He braided his own cord for the bag he finished. He is doing better in the drill now than she did for a while and is more good natured all the time. Has been in school all the time Deportment good.

Stewart, Harry.

Harry does about the same work right along He does not work rapidly but his bag is neat, the meshes are even and the knots are good and firm. He can not tie or bind his weavers knots himself. Has been present every day this month Deportment always good.

May 1901

Schumacher, Lena

Has done her work as well as ever. She works with intelligence and is a good child to have in school. Deportment is always of the best.

Stutz, Laura.

Laura has done about as well as she can this month. She has now finished her first laundry net and has done it all very well. In spite of the lameness of her hands she succeeds in doing her work better than many of the children. She has been better natured than last month. She has been in school all the time. Deportment very good.

Smith Burt:

Burt has his hammock about half finished now and hopes to complete it this month. He has worked well this month. was been in school all the time. Deportment good.

Swenson, Ralph

Ralph has his bag about half or more done. He has done good work. With some help he can tie the weavers knot but he is not independent in his work until he can do it alone. He has done good practice in the calesthenic drill. Also Has been in school all the time and been a good boy all the time as usual.

Shull Erwin

Erwin is not quite independent in the net work yet. He can not add the new

May 1901

needle of cord to his work alone when he needs it. Other wise he is independent-and he does his work well all of it. He has done a little work on one of the fly nets and done it well. He winds the balls of cord and the needles nicely. He works nearly all the time industriously. He is a good boy in school. has been present all the month.

Ward, Francis

There is little difference in Francis from month to month. He can not talk at all but-everything appears to be to hard for him except the gymnastic drill. That he likes and tries to take but- he has no interest- in anything else. Present every day. Deportment-good.

Weisberg, Tonie

Tonies work has been about the sameas last- month but- his deportment- has been better. He has been regular in attendance. He makes very poor work of the gymnastic drill but- he has been more absorbed in his net- work so has had less time for tormenting his neighbors.

Wagner Gena

Wrabek Sophia

Gena can make the hammock if I stay by her and direct- her movements but- she does nothing at- all Otherwise. Sophia busies herself winding balls or needles or doing little things for one. She is a very good child wanting to help all the time. Gena does not appear to care at all whether she works or not. Attendance of both, regular deportment- good.

May 1901

Wright. Mabel

Mabel did more and better work this month than last-. She worked with more energy and accomplished more than last month has been in school all the time. Deportment- good

Winklemeyer. Willie

Willie does not- do so very much if he does appear to work all the time, He is a boy who it seems has learned the net- work as well as he can and though he does not- do it so very well he goes on in the same humdrum way with what- he knows and never bother his head about what- he does not- know. In school all the time. Deportment- good,

Gould, Laura

Has improved considerably this month but- is not independent- in any of her work yet- She will learn If she is to do it and do it- quite well but- she must- have time. She is in school every day and is a good girl in school

Mason. Albert-

Albert- has done better work and more of it- this month than last- He continues to improve. The only work he has done alone yet- is a doll ham mock. He did every part of that- after I showed him some parts and did it- well. He has been anxious to learn and do more work entirety alone. He is a good boy to have in school. Has been in school all the time this month.

1901
June

Esther Anderson.

Esther has had her first-year in the net-work this year. She picked up the work quickly so that she knew how it should be done. I have looked for a little more evenly accurate work from her than she has done. For a girl who can do it as well as she can I have had to watch her work more carefully than I should have had to. The meshes are apt to be a little irregular in size but the knots are firm usually. She often makes a slip-knot in the work she ties and binds the weavers knot but is inclined not to make it quite neat. She winds the balls and needles fairly well. When she first came into the net room she was very nervous. Her hands often trembled considerably from nervousness and she cried very easily. She has outgrown that to a very great extent. She does not see very well so has to hold her work quite close to her eyes. One time and another she has had to undo quite a little of her work because it was not even enough. She has always been obedient and industrious always showing a desire to learn and please the teacher. She has only worked on bags. Has made two entirely alone. works rather fast. She can do all parts but get one started, alone but needs practice in accuracy. She has grown much more observing during the years but was a long time before she knew when her work was wright and when wrong. She does the cable hem & drill quite well and cheerfully.

1901
June.

John Brady

Entered the class in October. It was easy to see from the first that he would have great difficulty in learning the net-work because his hands are so paralyzed not because he lacked intelligence. He has been in school nearly all the time for the remainder of the year and has done fully as well as could be expected. He learned almost immediately how the hammock knot should be made and always knew when it was wright and when wrong but the work would slip from his fingers and get wrong in spite of his efforts to do it wright. He has worked with much patience and perseverence. He winds the needles and the balls of cord very well and has done well I think to be able to make a half round of knots on a bag in one session. Practice will help him still further. He can not make or bind the weavers knot. He is always cheerful and wants to be at work all the time so he never has given me the least trouble with his behavior.

Cross. Jimmy learned the net-work this year, what he knows of it. He has been very slow about it. The first thing he learned was to undo the hammock knot and he would sit by the work and keep doing that in preference to learning any thing new. He speaks of himself in the third person and he would say "Jimmy undo knots, Jimmy undo knots" He showed a decided aversion to learning any thing besides. Even when he came

1901 June

to the conclusion he would like to be able to do other work it was very hard for him to learn it. In October he could make the knot if I guided his movements but not otherwise, before January he could do it if I would only tell him where to insert the needle every time without guiding his hands. When he grew able to make the knot alone when I watched and spoke a word of warning if he had it wrong. All along he lacked ambition. He liked to work but always backwards. I can not get him to always make the knot so it's a real knot and not a twisting of the cord that will all pull out though he often does do it right. When I set him to work forwards he knows and tries to do as I tell him and sometimes he will have a row of firm knots sometimes no knots at all but he will take in mesh after mesh regularly and wind the cord around the mesh stick so it looks as though every thing is right to him till he draws out the stick. He seems to be an unobserving child. Another year I think he will improve much more.

Cohen, Pinney has been in the net room all the year. He learned it last year or sometime before. He has enjoyed his work and has done well as a rule but there are times when he grows somewhat careless. As, in the last month he left a piece of work with very large meshes and he had to undo three or four rounds on his laundry net. Such times he grows

1901 June

very impatient and somewhat ugly it is not easy then to keep him cheerfully at his work, but such instances are not very common. He takes hold of the gymnastic work with considerable interest and can take the exercises quite well. His general department.

Christopherson, Kern has done very good work in the net work. She is not entirely independent. When she needs a new needle of cord she always has to have some one else fasten it on for her. She does very good work ~~work~~ though on the laundry nets. She is a well behaved child, always quiet in school seldom speaking even though she needs help and wants. She does not work very fast but she has made two laundry nets this year keeps her work quite neat and even and likes to do the work. Department always good

Durgan, Warren did not learn the work this year. But he learned to tie and bind the weavers knot and bind it and I believe to braid. He binds the knot well better than most of those who do it at all. He has not been kept very hard at work because he is not well. He was at the hospital until about the middle of Oct, and again since the first of April. He complains a good deal of not feeling well and seems to enjoy the distinction it gives him. He has improved both in accuracy and speed this year. Department good He was excused from the gymnastic drill.

1901
June

Mary Erickson.

The work is not new to Mary. She has done pretty good work all the year Has learned to tie the weavers knot and bind it. She lacks still something of carefulness, is faithful and quiet; does not always wind the balls and needles as tightly as she should. is cheerful and happy in disposition Department good.

Froemming, Ella knew nothing of the net-work till this year. Now she does it very well. It took her a long time to learn and until she learned it she was very restless and rather talkative. but she improved in both ways when she became able to work alone. All the help she needs is when she has to have new cord. She is a very good girl to help those who cannot make the knot at all. She will sit for some time beside Lilla Helgeson trying to show her how is the best way to make the knot; She likes her work and is always very cheerful. Department good

Troeber, Ferdinand does very good net-work He has only been in school since February. He is a very silent child seldom saying anything at all. He is not very observing but he does his work well. He learned it some time before this year. He does not do the gymnastic work well. It is more exertion than he likes. Department good

1901
June.

Charley Fruchtman

Charley came into my room in Jan. and has been quite regular since in school almost every day. He took up the net work slowly but he can do it very well now making two or more rounds in one session. With one of the boys he is inclined to be somewhat mischievous but he is not a mean boy. He is a good firm knot and keeps the meshes even.

Gardner, Guy has been out of school a good deal but has learned to do the net work real well this year. He has had some difficulty in keeping the meshes even always Has made a bag, two doll hammocks and worked on a large hammock. He is neat about his work and is a very good boy in school, quiet and obedient and a good worker. He winds the needles and balls and braids the string to finish the bag.

Gohen, Willie was only in school five months. He does very good work making the knots quickly and keeping the work even but he is a very mischievous boy in school always bothering some one near him, snatching their work or talking to them. Has been out of school since march and usually for half the session for sometime before Department— not good

1901 June

Anna Hanzel

Anna's improvement since the first of the year is very marked both in her work and in deportment. She had apparently forgotten everything she had ever learned in the net work and had to begin all over. She was very careless and unobserving. It was a long time before she did any of her work right. Now she seldom makes mistakes keeps her work much more neatly than at first and is more observing and better able to concentrate her attention than she was. She seemed to have no application at all. I do not believe she could forget in another year what she has learned so thoroughly. Deportment very much improved also

Hodgson, Tilla Can not do much net work. She has grown in power of observation and application though. I can not trust her to do anything in the net work alone because she always makes such a snarl and tangle of the cord if left but I still hope and think that she will learn it in another year. She can make the knot with some help. She can wind the needles of cord if watched and warned when wrong, but she can not wind the balls at all.

Hopps, Donn It has been a pleasure to see Donn's progress. For some time I feared he would never learn because he was so restless and no power of applying himself

1901 June

to his anything. gradually he grew more quiet and tried hard himself to keep himself to his work. He seemed to want to learn. He does his work now very well keeping meshes even and knots firm and tying and finding his weavers knots very neatly. In all his other work he has quieted down from learning to apply himself in this. He has grown more observing too. He winds the balls and needles and braids the cord. In fact does everything about his bag himself. In beginning a new bag he would perhaps need a little advice but no real help. Deportment good.

Jewett, Frank is something like Donn in his restless active temperment and he has not improved this year as much as Donn in steadiness. He learned the net work also this year and more quickly than any of the other children. both boys are somewhat willful but where Donn will yield to authority gracefully and pleasantly Frank will grow ugly and show defiance. They can do the work equally well and independantly. Deportment not always good. Dislikes the gymnastic drill and will not exert himself sufficiently to do it well.

Koslin, Clara This is Clara's second year.

1901
June

in the net room. She had almost to begin anew this year because she had lost some that she learned last year. But it nevertheless made the work easier for her than if he had known nothing of it before. She can work quite independantly now and takes great pleasure in her work. She is not content to be idle at all and though she does not work very quickly she gets a good deal done because she works all the time.

Johnson, Elmer did not learn the net work this year. He has worked very well. He is neat about his work and keeps it very even He does not work so fast as the fastest but gets a good deal done while he works He does all parts of the net work and does them very well. He is quite cheerful and obedient. Deportment very good.

Johnson, Bennie. Bennie's work does not satisfy me at all. He can do pretty good work but he does not improve as he ought to and learn the little new things he ought to learn. He is very indolent and would rather drop his work any time and lean forward in his chair and go to sleep as he can do so easily, than get something done to show me.

Johnson, Johnny. Johnny has done just

1901
June

the same good work as he always does. He has made this year three tennis nets, two fly nets, four large hammocks, a baby hammock, and put side ruffles or valances with fringed tassels on three other large hammocks, and two doll hammocks.

Jacob, Lothie learned the net work this year and has done pretty good work. She does all parts of the laundry nets without the teachers helps. She is somewhat careless at times but has grown in carefulness. She is a well behaved child always and is able sometimes to help others who need help.

Larson, Tina is another girl who has learned surprisingly well. She seemed so very foolish, throwing her arms up and laughing foolishly so often. But she did take up the work and does the net work as well as any one. She can not wind her weavers very well, otherwise she is quite independent. She does all other parts of the work well. She is more quiet than at first because she is always busy. She works rapidly and keeps it neat. Deportment good

1901 June

Mamie Langan

Mamie has never learned anything in any department - and she has been in the net-class at least - two years, more I think. In spite of that - I made up my mind that - the must - learn, I would force her to learn. If I have taken more pains with one child than with others she has been the one. And she has not - learned. She can not - wind a ball she can not - be trusted to wind a needle properly and she will do any work of any kind, only when I sit by her and direct - her movements can she do any thing She has no concentration, no application her work leaves her hands when I leave her side. I do not - believe she will ever learn it - though it is only through lack of will power and concentration. She has to be reproved constantly for chattering so much that - I can not - call her deportment - good otherwise it - is not - bad. Has been school all the year.

Mc Govern, Nellie has learned the work this year. She is not - really independent - although she knows how to do all parts of the net - work because she looks to me to tell her whether her work is right - or not - If - almost always is right - she works away quietly and industriously the whole session. She has made both bags and hammocks. Deportment - always good

1901 June

Fred Mundt

Fred can do very good straight - along net - work but can not - tie the weavers knot - He has worked all the year the same. He does not - wind the needles tight - enough to be very good, winds the balls quite well. His deportment - is pretty good

Malpp, Tommy learned the work this year during the year his work has improved greatly. He can do all parts of the laundry nets and do them well. He has worked on a large hammock also. His moral deportment - is good but - if he is crossed in his wishes he makes himself quite troublesome. Can not - work as easily as some of the children because of a stiffness in his hand. He can do considerable in a session though. Has made two laundry nets alone and kept - them even and neat - especially the second one.

Olson, Bennie did not - learn the main part of the work with me this year. He does very good work, clean and even and does it quickly. Has been in school all the year but - for the most - part only part - of the session. He is very quiet - never making the least - trouble for anyone. can do all parts of the nets.

Ostrander. Bennie is not - so quick or so neat as Bennie Olson but - he does his work very well keeps it quite even can not - bind the weavers knots so

well but- ties them all right- winds both balls and needles well. Has been in the school before and learned the most of what he does now. Department- good

Arnberg, Uri. I have tried hard to teach Uri the net-work all the year but he has not learned. He does know how to undo the knots but if he is seated with a bag in front of him he will pick it up and deliberately make a complete tangle of the work. He seems to know he is in mischief and do it for that. If the tangle is not to bad he can undo it himself but if left to himself he makes it worse and worse. Seems to me he might learn but he will not. I have given up hope of his ever learning. He is something like Mamie Sarrepens, lacks all power of concentration. He can not wind a ball or a needle properly and will not make any effort only when I urge him on continually and then it can not be called an effort for he will insert the needle anywhere in the bag although I think he knows enough to know the successive meshes where it should go. Department- pretty good.

Renheiter, Mary did not learn the work this year. She has done good work and a good deal of it. She keeps it neat and does every part of it. She did not tie the weavers knot before this year. Her department is good. She is a quiet child never making

1901 June

the least trouble.

Powers, Raymond tries very hard to do the net-work nicely and I can see that he has improved quite a little during the year but he does not do perfect work by any means. He often makes mistakes but not so often as at first. He has done the net-work before this year. He works by himself and some days does not make a mistake the whole session. He is very patient and persevering and ought to succeed some day in doing his work nicely. Department good.

Palmer, Theodore learned the net-work before this year too. His work is somewhat irregular. For some time during the year he did a good deal of work that was not very good with occasionally a serious mistake. His work now is more nearly perfect than any time before. He has been out of school detailed for other work for a part of the session nearly every day. Department usually good.

Peterson, Caroline knows the net-work well and works very fast, to fast often to be quite as careful as she should. She does a good deal of work and it has a neat appearance although it is rather loosely done. She does all parts of the laundry nets, braiding, binding and all. Department good

1901 June

Anny Reeves.

Anny was very slow in learning the net-work but now she does it very well indeed. She has not all the little things about it yet but will next year I think if she keeps on with it. She is a good girl in school never giving the least trouble. It looked at first and for quite a time that she could'nt learn but her progress has been very decided during the latter half of the year. Deportment good

Rosenerans. Bell learned the net-work before this year. She has done very good work all the year but she does not work quickly. She is a very good girl in school never making any trouble for anyone.

Riley. Albert learned the braiding first when he entered the net-class in Nov. from that he went on with the regular net-work. he has made three doll ham mocks two laindry nets and the most part of a baby ham mock. He does everything about the net and does it all well keeping everything neat and clean. He requires no help of the teacher. He is quite absorbed in the work and takes as much pride in having his work well done as in doing a good deal of it; while he succeeds in both. Deportment good

Rice Nathan. Nathan learned the net-work this year. He can not work quickly because of his stiff hands but he makes his meshs very even and ties his knots firmly. He

1901 June

has learned to tie and bind the weavers knot very well. He is a very nervous child and quarrelsome in disposition, always thinking some one is troubleing him when it all comes from his own tormenting ways. When he does his best work he makes as much as a row and a half or two rows on his laundry net but when he doesn't feel like it or want to he will only do six or eight knots and complain all the time and grumble about his work or his neighbors. Deportment not the best.

Smith, Jessie also has a lame hand and can not work quickly but she has gotten lately so she can make from twenty to twenty five knots in a session. Sometimes she makes a slip knot but she always knows it now and can usually undo it herself. She has not been in the class till this year, and there is a good deal of improvement in her case. She has had a good deal of nervousness to overcome and a twitching of the hands. It is not conquered now by any means but it is much improved. Deportment good.

Sauer, Henry does real good work in the net. He has worked on both hammocks and bags this year. He has done the work before. can take the gymnastic drill quite well but does not like it very well, that is he never likes an interruption if he is at work on the net, and is somewhat contrary about doing it at times. Deportment usually good

1901 June

Harry Stewart-

This is not Harry's first-year in the net-class. He does good work but-does not-work so very quickly. He is not-quite independent for he cannot-tie or bind the weavers knot for himself. There are some other little things about-it that-he can not do either. He is a very quiet-child and never makes any trouble. Deportment-always good.

Schumacher. Lena has been in school all the year and has learned to do very nice net-work. She has made two-or three bags and two hammocks herself. She knows enough to work quite independently of my help. She is a nice quiet-girl that-I can depend on for help with the other children sometimes.

Stutz, Laura has learned the work this year and made a great-deal of improvement. She is another child with a stiff or paralyzed hand and the work was hard for her. She has learned to do it very well and much more quickly lately. She is a nervous child and I think not very well a good deal of the time. She has gained much in the way of self control and application to her work this year. Deportment-good. There are some parts about the net-work that she can not do with her stiff hands.

Smith, Bert- has done the net-work before this year and he does it very well. Has made both hammocks and bags this year. He has not known how to tie or bind the weavers knot-till

1901 June

lately and does not-bind it well. When he does any work that-is not satisfactory to me the first-time he objects strongly to doing it-over. He is quite stubborn at-such times. Usually he is good-natured and willing to work. Deportment-pretty good

Swenson, Ralph There seems to be no record of Ralphs net-work last-year so it seems to be new to him this year too. He does very good general work, keeps the meshes quite even and the knots firm but-can not-do the little things about-the net-work, braiding and so forth. He is a nice quiet boy in school and obedient. Does the gymnastic drills fairly well.

Shull, Erwin has learned the net-work this year. He tried it early in the year and learned a little about it and absolutely refused to learn any more then he was sick and in the hospital for some time. In Feb. he came back and is doing beautiful work now. There are a few things about-it that-he can not-do yet but-in general the work is good. Takes the gymnastics lazily but-fairly well. Deportment-good.

Ward, Francis has been in school the whole year. In Sept. he was new to this school. He has interested and puzzled me greatly he looks like a boy who should learn but-so far as I can see he has learned nothing this year. He sits very quietly in his chair all the time never making

1901
June

an effort to learn anything. I might perhaps except the gymnastic drill for he is very imitative and seems to be attracted by the large motions with the limbs. He always stands and tries to do as the others do but never seems conscious of not doing it right. He seems to see no other way than the way he does it. He will come up to me and take quite a correct position for a waltz also but he can not dance a step or keep any sort of time. In his walk he tries to imitate or draw attention to himself. When I attempt to teach him and draw his attention to the work he always becomes so impressed with the heat and takes off his coat. He seems to have no understanding of the net-work at all, He can not even insert the needle in two meshes successively and see what he has done. Yet he understands my directions if I tell him to bring me something or go somewhere or do something about the room. Deportment good. Is always still can only speak two words "Mamä and "no" although last year he had an articulation teacher who spent much time with him.

Weisberg, Louis seemed to be a hopless case when he came to me in October but after spending weeks of individual attention to him alone he has learned considerable about the net-work. He does not seem to know quite how to use his stick but

1901
June

when he once gets started with it he will make meshes entirely round the bag without once removing it so that he has the meshes all round a circle on a straight stick. Of course the last ones will not be right. When I watch him and manage his mesh stick for him he can do as much as three rounds in one session with sometimes no worse mistake than having some of his meshes to large but often he still makes continuous mistakes. He has quieted down wonderfully where he was wild and noisy he is quiet gives no trouble. Except for two months about, his deportment has been most excellent but for six weeks or so it was very bad. He would talk incessently or torment the boys beside him, or near him.

Wagner, Lena
Wrabek, Sophia

Lena shows no inclination to learn anything still. I can see almost no improvement in her the whole year. If I tell her exactly what move to make with the needle and then show her how to make it she can get a knot made in time but she never does a thing alone. She can not do any of the little things to help that Sophia does such as winding balls and needles or bringing me anything I need. If I ask her plainly to bring me something as the thread or scissors from the table, she seems not to comprehe

1901 June

what- I mean at- all. She knows I want- something of her but- not- what- I want- while Sophia will jump up and bring it- while Zama is wondering what- is wanted. Sophia shows more intelligence about the making of the knot- also. though she has learned to make it- alone by any means. Department of both good.

Wright, Mabel has learned the net-work this year and made a good deal of improvement in it- She can work quite independently now. Her report- for last- month is a fair summing up of her work Department- good. She acts half sick most of the time. Is very sluggish in temperament.

Winkelmeyer, Willie usually does pretty good work but- works very slowly. He has finished just- lately a bag which he has worked on all the year. He works along without- apparently thinking of his work at- all. He learned the net- work before this year I think he does it- just about- the same as the first- part of the year. Department good.

Gould, Zama has not- been in school long. and I do not- know yet what- she will do but- though she is quite slow about- taking up the work I think she will do it and do it well in time. Department- good. Is in school only a half hour out- of the session every day.

1901 June

Albert- Mason

Albert- has not- been in school very long either but- he is picking up the work more rapidly than Zama. He shows ability to make him a very good worker. He works with intelligence and accuracy. He is a good boy too in school and likes the work. He has made one doll hammock and has worked on the side pieces and fringe of a large ham mock and seems able to do it- almost- as well as Johnny Johnson.
