Oct.

Anderson Alfred.
Has been absent this month from illness.

Colynton Christopher.
Absent from illness this month.

Hinshaw David.
The child has done nicely this month. His reading has improved and is decidedly better. He is very obliging and his memory is good. Has learned a number of the singing games and enjoys them. Does not speak plainly yet, but is improving. Very active and full of mischief. Can march pretty well. Does not sing, nor care to.

Hyrcha Aloys.
Full of life and mischief, it is very difficult to control him. He understands and has learned some of the little actions words, though he does not talk. Is fond of hearing the other children and has to be watched as he sometimes hurts them.

Hong Ole.
Continues about the same, matches colors nicely, plays the games pretty well, and can talk. Has learned about six or eight action words, and remembers them. A good quiet boy in school. Can sing and carry an air right well, and seems to enjoy music. He takes no interest in industrial work so far.

1900.
Oct.

Hostad, Alfred.
Absent from illness.

Lind Carl.
The child continues about the same. He can not talk but seems to understand nearly all that is said to him. Can string beads, but not match colors. Likes blocks and pictures. Marches though not very well, seems to enjoy the music, and plays the games nicely.

Mmoll Otto.
Full of mischief and very restless, tires quickly of any work or game and is very destructive. Leaves the children though some days is not as full of mischief as others. Can match colors quite well when watched. Tries to sing and uses plenty of voice though not much tune. His industrial work gives some promise. He is learning to sew cardboard rags, and sews the rags together neatly and nicely.

Olson Astrid.
This child does not improve and I fear never will. He is small child in school very gentle and easily governed. Has learned to string beads, and enjoys blocks. Does not pay much attention to pictures. He marches, but kneels every few steps, a habit which seems almost impossible for him to overcome.

Peterson Astrid.
A pretty low grade child. When given the beads or small blocks he tries to chew or swallow them, so has to be closely watched.

1900. Dec. Marches but can not keep in line. He moves constantly. Does not sing.

Smith Fanny.
He marked improvement this month. He matches colors pretty well. Marches, but does not like to keep in line. Full of mischief. Likes and can play a few of the games. Enjoys pictures very much. Not very hard to control.

Brown Clint.
This child has not made the improvement he promised. He has learned to say but a few words and these with difficulty. Seems to understand pretty well what is said to him. Can not match colors yet. Has learned a few little games and enjoys them. Marches and tries to keep in line. Does not sing, though seems to like music. Very gentle and quiet in school.

Theron Joseph.

1900. Dec. He reads quite smoothly in 3rd reader. Spells pretty well, and his writing is neat and very good if he only tries, but he does not always care to. His industrial work is very good. He sews carpet rags and sews well. He seems much interested in sewing.

Jan. 1901.

Thorsen Alma.

The boy is doing pretty well though not as well as he can. Promise of doing. He has learned only two or three words and it is very difficult to get him to say them. He is observing and understands anything I say to him. He likes to have certain little responsibilities, to help him help me with some of the smaller children, and take care and see to some of the things belonging to them. These things seem to make him very happy. He is sometimes a little restless but never a bad child.

Thomas Joseph.

This is one of the most difficult children I have. He is so restless, fretful and loves to tease the children. Very destructive and has to be watched constantly. He can say a few words. Enjoys and can play most of the games. Any romping game appeals to him. Can make paper rings pretty well but is liable to chew or tear them unless watched.

Blasdell Lawrence.

Alfred Anderson.

Am obedient boy when he knows, but has to be told the same things daily. In answer to the roll-call holds up his hand showing that he can remember, throws the bean bags with precision taking note of his distance & throwing increasing bags goes home and follows in the march he counts the others are before him.

David Hinchow.

A very interesting little individual perfectly negative and useless in a good mood, neither responds to persuasion nor threat of being sent down stairs. Where another boy fails to hold up his hand or get out of his seat, David moves with great alacrity to block him or put the boy in his seat with a goodly show of indignation at his stupidity. In this way he can be held for a session he loves the beaded rings, knows colors can name, sometimes matches with great spirit at other times will touch at all. is very bright and although very small can create much noise when I carry him bodily down with no expression of discomposture. or to special attention Can put the

which he taught to others.

Jo Swenson Charlie.

Has made the most
progress of any boy has developed
most in every way first- Lifon
day after day to make him hold
up his head. Then to learn his name
which pleased him greatly then I
took him seperately around the ring
to walk. At first after learning
his name if I called him he would
face on his toes & look perfectly
astonished. Now he runs out- laughs
merrily in walking on the front step
up & take my hand and runs to
pull his own way when I turn them
a new way. Has grown stronger physically

Konrad Alfred.

Working.

Otto Arndt.

Has grown & he found of
his industrial work having accomplished
much in the winter in the hot- work that
is in doing it- really has done undone
as much as he has done but- with great
advantage to him. He enjoys it- and
likes to help me regulate the work
of the others - In very particular I
has- watched very carefully altho much
more gentle than he was - His frantic
efforts at- talking are at once pathetic
& ludicrous. He enjoys the humor
himself- Loves to sing & insists upon
doing it- altho the others protest
against- his music. Otto has progressed
wonderfully.

Olson David.

Did not come back.

Pederson Arndt.

It is most- pleasing
to see this boy who began School with
me by flinging spoons continually
entirely forbidden over that- & interested
in School and happy wants to come
out- does not- concentrate on anything
loves to come beside me and shows
appreciation & kindness. He seems
thoroughly to enjoy everything- & we
are out on the lawn or grove likes
to be by himself- tries to make
himself understood not- cannot- talk
words- is interesting to one who is
interested in him.

April May June 1903

Rothie August.

Has seemingly a very helpless little boy when he first- very very shy but- by little touches here & there without his knowledge & being noticed worked he by on to creep out & his little shell and show interest- then he would join in the exercises & no one was noticing him, learned his name answered to it- holds up his hands join in the games this has been very gradual very tedious but very absorbed progress has been obtained & first- and through sickness, hope for much in time next- year as he is growing stronger physically encouraging & interesting.

Smith Harry.

Has been absent through much sickness had many spasms and was most- distressed.

Thorsen Alf.

An interesting boy but- has not- made much progress in exercises has in that he is more amenable to being told various things & in observing them. He is on the go continuously but- fetch- on his way & mischief often It is not- malicious mischief but- continuous inert pushing pinching he will do a little work but- can hardly be kept- at- anything long enough to finish it- under physical occupation has an amiable eye- When I'm playing thinks it- a great- joke to pinch or put- his arms around me is a source of amusement to the others

April May June.

Rosie Harry.

This dear child is growing too much alone hard to be carried up first- times to take him individually in all the games he is left out- & nothing. He has learned and has favourite in our long- vacation lines to come to school merely in the meantime through the snow and weather and tumbles only to get up again & on again He is the married- child we have. His happiness is infectious

The last Classes.

Some have temporarily left for the Cottages. The boys enjoyed the work at Kellogg with some interruption of timings. Lawrence Blokhelus work was regular & neatly done. Otto Mundt was improving. Bob Stark most delightful considering but his work is slow hard to control his hands. Bob is full of humor and interest.

Our evening singing Class continues with great interest and benefit to the boys. When have a little talk on some subject appropriate interesting to them and with some point towards helping them to more contentment or interest in the more helpless ones.

1903-'04.

Bennie Abrahams

Bennie is a good boy - fond of all of the kindergarten work but especially favors the straws and paper chains. Has learned to thread his own needle tie his own knots, join the threads to make long chains is happy when making something for somebody other than himself. Has learned to wind yarn ~~was~~ in and out the card board circles to make the kindergarten balls and is pleased to be able to do it. Is usually helpful with the smaller children and is fond of staying in the school room through the entire morning session. Likes the music and the games and participates in the latter when they are such that his lameness permits.

Bennie seems to have improved in many ways and is very companionable

Raymond Burroughs.

Is fond of the piano music, marching songs and games. Enters heartily into all and is helpful with the other boys. Can play with a good degree of perfectness, "drop the hand kerchief", "blind man's buff" and "going to Jerusalem". Beats the drum in good rhythm and is one of the best of the soldier boys. Does not readily adapt himself to the Kindergarten Materials but think that is principally caused by his defective sight.

Is affectionate, kindly disposed towards all and always regretful when the session has closed.

Roy Corser.

Roy is splendid in the marches songs and games. Is a great help in the school.

Does sewing, pasting, cutting, stringing straws and paper chains, makes the kindergarten ball from start to finish excepting the chrochetin of the cord, does color[illegible] of pictures, holds a skein of wool for winding and can also wind a good ball when some one else holds the skein. In fact does fairly well all the work presented to him. Needs much encouragement however and once in a while imagines himself tired of his work and wants to go at something else he sees other people doing. But when newly inspired goes on nicely.

Is very affectionate on occasion. Is fond of staying throughout the morning session.

Once in a while I notice a

tendency towards ugliness when he is playing with the boys but think he is overcoming that. With the blocks and the dumb bells he is especially fond of playing and plays ball and all the games very energetically.
The evening entertainments seem to have had a splendid effect on Roy as the "competitive games" have inspired him to new Efforts and surprising results.

Eddie Capron

Is inclined to be lazy in the march and games but very industrious when asked to do anything of which he is particularly fond. Foot-ball interests him very much indeed - likes to string chains and papers - and paste paper chains. Does some of the simple sewing and pastes pictures nicely. Likes the singing and is apt to ask for special songs.
Is very helpful with the little cripples and generally speaking is a good boy. Has a mind of his own however and on one or two occasions has been persistently obstinate.

Selby Elyison.

The leader in the march. Is rather mischievous and full of life but all the more interesting for that. Fond of the balls, blind man's buff, dumb-bell games and does the sewing and making the kindergarten balls very nicely. Always likes to stay through the whole session and is fond of helping the big boys march. Is learning a few words and makes himself understood very well indeed. Is fond of the Thursday evening entertainments and always desirous of entering all the games. Two-steps nicely and is nearly always happy. Affectionately disposed.

Lewis Gunning.

Shows very little interest in any of the games. Follows in a desultory manner in the march and plays a very little with a ball.
In a lax way will take blocks out of a box and put them in again but has to be continually encouraged.

James Hurley

Marches when compelled to. Otherwise he sits away off by himself if in a quiet mood. In one of his insane frenzies he rushes about, hits at the boys and is sometimes terribly ugly. Can't keep his attention on any true thing longer than a few moments. No improvement whatever.

Peter Halverson.

Does not apply himself at all. Is insane and hard to manage. Marches when held in the march by main force.

David Kincha

At times as "good as gold" and at other times very hard to manage. Marches and plays the games. Does the kindergarten balls from start to finish except cords and likes to make the paper chains, string straws and papers. Sewing and pasting. New clothes make a great difference with David. When dressed up in his best

clothes he seems to be invested with his "best" dignity.

At times he is affectionate and when in this mood get the best work.

Bennie Le Fountaine.

A dear little boy! Sweet and affectionate. Never applies himself long at one thing but has improved during the year. For when he first entered school he objected to doing anything.

Marches, sings and plays the games fairly well. Will play ball or roll marbles or string beads. Further than that he does not like to do constructive work. Has a mania for putting things out the window and earliest watched will pile block after block through the iron grating.

Kurt Lund.

Marches - enjoys the games, the songs and some of the work. Is very appreciative of all that is done for him. Affectionate and good natured. Is much hampered by his crippled condition. Does not degenerate and perhaps can truthfully say that he improves a little.

Harry McLaine

Marches when compelled to. Takes little or no interest in anything indoors. When out-of-doors will pick flowers and carry rubbish. On the walks he is orderly but is not appreciative.

Arnat Peterson

Is a good boy. Somewhat less heavy than in the fall. Takes a little more interest in the march and games

very affectionate and exhibits a tendency towards wishing to be noticed by teacher or attendant. But does not want the boys to be near him.

John Pougnet.

Much improvement! In the fall showed little interest in anything. Wanted to be let alone severely. Now he marches and marshals other boys in the march. Plays the games we have made a specialty of and likes the "busy work" very much. Tries to talk and sing and is very much interested in all of the work.

Henry Rosine.

Marked improvement! Has learned to walk quite independently of any help. His extreme good nature is infectious. Is trying to learn to talk and is much interested in boys and stories. Remembers the story of the "Christ Child" and in his own way can tell it to others.

Marches in the march and pretends to two step. Enjoys to the fullest extent all of the entertainments in Assembly Hall.

August Rothes.

A timid little fellow but withal quite bright and sweet. Enjoys the blocks and balls if left to play alone. During the finger games August will play if you are not watching him particularly. But if you do call attention to him he crawls into his shell and there he stays.

Sometimes he will march

and join in the games.

Willard Sprague. Marches, plays ball, builds with the blocks big and little and is interested in packing the little blocks into the boxes. Is usually obedient and contendented. Sews cards if watched closely will also string beads and straws and paper chains.

" he is bad and unhappy;
he is indifferent.

Walter Shermanhorn Enjoys the marching and the games and listens with apparent pleasure to the music. He cannot sing himself however. If he were not so badly crippled he would be a good and sufficient example of "progress." Enjoys attention and is quite affectionate. Remembers people who are good to him and

retaliates in kind to those who tease or trouble him in any way.

Willie Scamneman. Marches, plays the games and does some sewing - stringing of straws and papers for chains - shakes the paper strips and joins them into chains and weaves the mat - formula one up, one down.
When he entered school he had never even seen any of the materials. Is bright active and very affectionate. Knows how to unlock a door - jumps to open the door if a lady is in advance of him and is a truly little gentleman. His deafness bars him from the songs but is fairly patient and quiet when the rest are singing. Is reverent during prayers and in many little ways shows an unusual mind for child in this department.
Is always much interested in all of the entertainments and is usually fairly well behaved.

Joseph Thoreau. Likes the marches songs and games. Is very fond of dancing and is always helpful in any of the exercises. Can do some sewing - string straws and paper chains + beads and builds with the blocks. Throws a ball but cannot catch one.

Enjoys the singing and is very attentive and appreciative. Is always pleased to go to the entertainments and although he cannot talk at all plainly manages to impart to others his impressions.

Theodore Thorbergerson.

An appreciative mind with a poor crippled body and also afflicted with epilepsy.

He is always grateful for any kindness shown and the only thing he can do is to mark time with one hand on the floor.

He tries to sing and the effort is very pitiful.

Walter Westrom.

Marks time with his hand. Plays just a very little with a ball and one dumb bell - understands everything that is said to him but cannot talk.

Affectionate in disposition and very fond of those who are kind to him.

Has an exceedingly appreciative mind. Is much interested in the story of "Christ's Life" and in the Sunday School he is quite an inspiration.

Reads and writes consequently spending his time very profitably.

John Anderson.
