

WiredTime's ChekOne product is a powerful end-to-end solution to track and manage service activities, employees, and contractors in real-time answering the questions:

- ✓ Did my employee/contractor arrive on time?
- ✓ Did they complete assigned tasks?
- ✓ How long did it take?
- ✓ Are they safe?

The ChekOne ruggedized handheld is a fully featured Cellular Phone, GPS and Barcode Scanner developed for the service and security industries.

The ChekOne web based software provides a feature rich solution solving contract compliance, regulatory compliance, payroll data collection, event and condition reporting and worker safety, while gaining efficiencies and cost savings.

## ChekOne + LoneWorker

- Restricted access voice calling - eliminate cell phone abuse
- Automatic contact list and patrol assignment by ID
- Integrated barcode scanner - lowest cost check points
- GPS Tracking - when location and tracking is important
- Panic button - it is about safety - self monitored or 3<sup>rd</sup> party monitoring
- Text messaging with receipt confirmation for workflow optimization
- On screen prompts for details of checks
- Alerts for missed or late checks

### WHAT'S INVOLVED?

ChekOne™ is ready to go. Just enter information into the ChekOne™ software based on the service requirements or unique property features. Easy setup and affordable rates make the decision positive and safe.

### TRAINING

ChekOne™ is intuitive, 'Quick Guides' and online support make it easy to train and deploy immediately.

### PRICING

One low monthly service fee for combined, device, software and hosting. Voice, data and messaging charges are competitive and pooled to reduce operating costs. You control the usage and access from the control dashboard in real-time.

Push technology to support instant messages  
LED notifies when new message arrives

### TEAM MODE

Team members can simultaneously scan into tasks  
No limit to number of Team members

### GPS

Assisted GPS to improve satellite acquisition time  
Programmable tracking interval  
Verifies location of worker at time of scan  
Verify location of lost or stolen devices

### LONE WORKER

Programmable countdown timer to monitor employees  
Supports different timers depending upon risk profile  
Timer can be initiated on time-based rules as well as location-based rules

## WHY ChekOne™

Leaders in security and services industries rely on wireless solutions to improve efficiency and boost productivity.

ChekOne's cellular technology creates an around-the-clock connection between the office and the field for maximum security.

Automated workflow processes deliver accurate information in real-time, so it can be acted upon immediately.

ChekOne's devices are easy to use and deploy for a rapid return on investment.

Several pricing models are available to suit any budget.

### REAL-TIME DATA CAPTURE AND REPORTING

No more waiting for data to download at the end of the day. No more interpreting incomplete hand-written forms.

ChekOne devices have voice, data, GPS and barcode functions for immediate, accurate data capture and record keeping.

### A SIMPLE DEVICE ANYONE CAN USE

Mobile workers learn to use ChekOne in minutes. With the push of a button and a quick barcode scan, details are recorded (the job performed, the person on-site and the length of time taken to complete each task). ChekOne's simplicity and functionality pays off in the field and at the office.

### TOTAL CONTROL

The web-based dashboard makes it easy to manage communications.

Each ChekOne device is assignable to a user and location, and can be suspended at any time. Phone numbers for the employee or location are updated automatically in the device when it is reassigned.

## ON TIME CHECKS

Scheduling alerts keep checks on time to reduce late or missed inspections.

### READY IN MINUTES

Log into the web-based software. Enter the information for customer, location and schedule. Print and attach the barcodes.

In minutes, real-time reports are available from any computer connected to the Internet or mobile apps.

### BUSINESS INTELLIGENCE

Reports can be downloaded to Microsoft® Excel™ or any application that uses the standard CSV file. Analyze time by worker, location or project. Report in any format.

### SAFETY IS AUTOMATIC

Safety is built right into the ChekOne device, software and monitoring module.

If a worker is under threat, simply holding the button will dial 911 or assigned emergency number. The location, worker and ChekOne number is automatically provided to the dispatch centre and voice is activated.

### LONE WORKER

ChekOne supports Lone Worker compliance. Set internal timers to provide worker prompts. Get alerts and location maps to see activity. Click the map or text alert and be connected to the worker instantly.

### LONE WORKER MONITORING

ChekOne is connected to SecurTek™, a secure ULC-listed monitoring centre integrated with the SaskTel network. With 24/7 monitoring agents and state-of-the-art systems, SecurTek™ is the first choice for monitoring worker safety.
