Pollution Control Agency

Air Quality Division

Adopted Emergency Rules Relating to Air Quality ~~Permit~~ Emission Fees

Rules as Adopted

7002.0400 [Emergency] APPLICABILITY.

Parts 7002.0400 to 7002.0450 [Emergency] apply to all emission facilities that were subject in ~~1988~~ 1990 to the emissions inventory reporting requirements of part 7005.1870, subpart 4, and to indirect sources. During the time that this emergency rule is effective, parts 7002.0010 to 7002.0110 are not effective.

7002.0410 [Emergency] DEFINITIONS.

Subpart 1. **Scope.** For the purposes of parts 7002.0400 to 7002.0450 [Emergency], the following terms have the meanings given them.

Subp. 2. **Division chief.** "Division chief" means the division chief of the Air Quality Division of the Pollution Control Agency.

Subp. 3. **Emission facility.** "Emission facility" has the meaning given in Minnesota Statutes, section 116.06, subdivision 5, and part 7005.0100, subpart 10.

Subp. 4. **Indirect source.** "Indirect source" has the meaning given in part 7001.1260, subpart 5.

Subp. 5. **PM-10.** "PM-10" means particulate matter with an aerodynamic diameter less than or equal to a nominal ten micrometers.

Subp. 6. **Volatile organic compound.** "Volatile organic compound" means an organic compound that participates in atmospheric photochemical reaction; that is, any organic compound other than those that the United States Environmental Protection Agency has designated as having negligible

Approved by Revisor

photochemical reactivity. As used in parts 7002.0400 to 7002.0450 [Emergency], volatile organic compound does not include:

A. methane;

B. ethane;

C. 1,1,1-trichloroethane (methyl chloroform);

D. trichlorotrifluoroethane (freon 113);

E. methyl chloroform;

F. methylene chloride;

G. trichlorofluoromethane (CFC-11);

H. dichlorodifluoromethane (CFC-12);

I. chlorodifluoromethane (CFC-22);

J. trifluoromethane (FC-23);

K. trichlorotrifluoroethane (CFC-113);

L. dichlorotetrafluoroethane (CFC-114);

M. chloropentafluoroethane (CFC-115);

N. any other compound listed in table 1, as amended, of the United States Environmental Protection Agency's Recommended Policy on Control of Volatile Organic Compounds, Federal Register, volume 42, page 35314, July 8, 1977; or

O. any other compound determined by the United States Environmental Protection Agency to be negligibly photochemically reactive. These determinations are published in the Federal Register.

7002.0420 [Emergency] EMISSIONS FEE.

Subpart 1. **Annual fee on certain pollutants.** The owner or operator of all emission facilities that were subject in ~~1988~~ 1990 to the emissions inventory reporting requirements of part 7005.1870, subpart 4, shall pay an annual emissions fee ~~of $7.59~~ per ton of sulfur dioxide, nitrogen oxide, PM-10, and volatile organic compounds emitted from the emission facility, except that the fee shall not include an assessment for each of these pollutants for which the emission facility did not emit 25 tons or more. The tons of sulfur dioxide, nitrogen oxide, PM-10, and volatile organic compounds emitted from a source shall be the

Approved by Revisor _____

amount calculated by the division chief, based on the information reported by the owner or operator under part 7005.1870, subpart 4, for the ~~1988~~ 1990 emissions inventory ~~and~~ that were required to be submitted to the division chief before ~~January 1~~ May 15, 1991.

Subp. 2. **Calculation of fee per ton.** The commissioner shall calculate the amount of the fee due per ton of pollutant by dividing $3,567,368 by the total tons of emissions subject to the fee under subpart 1, as determined by the 1990 emissions inventory. For example, if the emissions under the 1990 emissions inventory were the same as those reported under the 1988 inventory, the fee per ton would be $3,567,368 divided by 469,935 (the total tons of emissions in 1988 subject to the fee under subpart 1), or $7.59 per ton. The commissioner shall calculate the fee per ton as soon as the data in the 1990 emissions inventory is finalized.

Subp. 3. **Indirect sources.** Indirect sources shall pay an annual fee of $400 through the year in which construction is completed or compliance with all permit provisions is documented, whichever is later.

7002.0430 [Emergency] PAYMENT OF FEE.

A person submitting the fee required by part 7002.0420 [Emergency] shall make the fee payable to the Pollution Control Agency, and shall submit it to the division chief. The fee shall be paid within 30 days of receipt of an invoice from the division chief. The division chief shall not send invoices to persons earlier in the calendar year than ~~October~~ January 1, 1992.

7002.0440 [Emergency] LATE PAYMENT.

~~The permittee~~ A person required to pay the fee by part 7002.0420 [Emergency] shall pay a late payment fee of 20 percent of the payment due for failure to make payment within 30 days of a payment date. The permittee shall pay an additional ten percent of the original payment due for each 30-day period or portion of that period that the payment is late.

Approved by Revisor _____

7002.0450 [Emergency] NOTIFICATION OF ERROR.

A person who thinks that the fee assessed under part 7002.0420 [Emergency] is in error shall provide a written explanation of the person's position to the division chief along with the assessed fee. The division chief shall, within 60 days of receiving the person's written explanation, either notify the person that the fee assessed was not in error and will not be refunded, or, if the division chief finds that the assessed fee was in error, the overpayment shall be refunded to the ~~permittee~~ person or credited to the ~~permittee's~~ person's account.

OFFICE MEMORANDUM

DATE: September 20, 1991

TO: MARK STRANGE
Air Quality Division

FROM: CHARLENE HATCHER
Special Assistant Attorney General
525 Park Street, Suite 500 (55103)

PHONE: 296-9422

SUBJECT: In the Matter of the Adopted Rule Relating to Air Quality Emission Fees

The above-referenced rule has been approved as to its legality by the Attorney General on September 17, 1991.

Enclosed is your copy of the approved rule. This office has already filed two copies with the Secretary of State, who will forward one copy to the Revisor of Statutes. The fourth is being retained by this division of the Attorney General's Office for its records.

Also enclosed are any petitions, requests, submissions or comments along with any extra copies of documents which you submitted to the Attorney General.

Your next step is to arrange for publication of the Notice of Adoption in the State Register. In a day or two, you should receive from the Revisor's Office three copies of the notice of adoption of your rule. You should submit two copies of the Notice of Adoption to the State Register for publication. A permanent rule without a hearing does not become effective until five days after a notice of adoption is published in the State Register in accordance with Minn. Stat. § 14.27. An emergency rule becomes effective five working days after approval by the Attorney General; however, the agency must publish a notice in the State Register in accordance with Minn. Stat. § 14.34.

If you have any questions in this regard, please contact me.

Minnesota Pollution Control Agency

Air Quality Division

Notice of Intent to Solicit Outside Information or Opinions Regarding Proposed Emergency Rules to Amend Air Pollution Permit Fees (*Minnesota Rules* Part 7002.0010 through 7002.0100)

NOTICE IS HEREBY GIVEN that the Minnesota Pollution Control Agency (MPCA) is seeking information or opinions from sources outside the MPCA in preparing to propose emergency rules which will amend *Minnesota Rules* parts 7002.0010 through 7002.0100 and establish the annual permit fees to be paid the MPCA for implementing its air quality program. The MPCA's authority to adopt the emergency rules is set forth in *Minnesota Statutes* § 116.07, subd. 4d (1991), which requires the MPCA, by September 1, 1991, to establish annual permit fees to collect the funds needed to conduct its air quality program.

The MPCA requests information and opinions concerning the subject matter of these rules. Interested or affected persons or groups may submit statements of information or comments orally or in writing. Written or oral statements relating specifically to the subject matter of the rule should be directed to Mark Strange at the address listed below.

Mr. Mark Strange
Air Quality Division
Minnesota Pollution Control Agency
520 Lafayette Road North
St. Paul, Minnesota 55376

Oral comments will be accepted by Mr. Strange during regular business hours at the MPCA office or over the telephone at (612) 296-9711. General questions regarding the rulemaking process should be directed to Norma Florell at (612) 296-7712.

Written and oral comments will be accepted until June 21, 1991. Any written materials received by the MPCA in response to this notice will become a part of the rulemaking record generated in this matter.

Charles W. Williams
Commissioner

Minnesota Pollution Control Agency

Air Quality Division

Notice of Intent to Solicit Outside Information or Opinions Regarding Proposed Permanent Rule Governing Air Quality Permit Fees

NOTICE IS HEREBY GIVEN that the Minnesota Pollution Control Agency (MPCA) is seeking information or opinions from outside sources in preparing to propose the amendment of permanent rules governing air quality permit fees, *Minnesota Rules* parts 7002.0010 through 7002.0100. The amendment of the rule is authorized by *Minnesota Statutes* § 116.07, subd. 4d (1991), which requires the MPCA to establish annual permit fees to collect the funds needed to conduct its air quality program.

The MPCA requests information and opinions concerning the subject matter of the rule. Interested persons or groups may submit data or views in writing or orally. Written or oral statements or comments should be directed to:

Mr. Mark Strange
Minnesota Pollution Control Agency
520 Lafayette Road North
St. Paul, Minnesota 55376
Telephone: (612) 296-9711

Oral statements will be received during regular business hours, 8:30 a.m. to 4:30 p.m., Monday through Friday.

All statements of information and opinion will be accepted until July 15, 1991. Any written materials received by the MPCA shall become part of the rulemaking record in the event that the rule is adopted.

Proposed Emergency Rules Relating to Air Quality Permit Fees

Rules as Proposed (all new material)

7002.0400 [Emergency] APPLICABILITY.

Parts 7002.0400 to 7002.0450 [Emergency] apply to all emission facilities that were subject in 1988 to the emissions inventory reporting requirements of part 7005.1870, subpart 4, and to indirect sources. During the time that this emergency rule is effective, parts 7002.0010 to 7002.0110 are not effective.

7002.0410 [Emergency] DEFINITIONS.

Subpart 1. **Scope.** For the purposes of parts 7002.0400 to 7002.0450 [Emergency], the following terms have the meanings given them.

Subp. 2. **Division chief.** "Division chief" means the division chief of the Air Quality Division of the Pollution Control Agency.

Subp. 3. **Emission facility.** "Emission facility" has the meaning given in Minnesota Statutes, section 116.06, subdivision 5, and part 7005.0100, subpart 10.

Subp. 4. **Indirect source.** "Indirect source" has the meaning given in part 7001.1260, subpart 5.

Subp. 5. **PM-10.** "PM-10" means particulate matter with an aerodynamic diameter less than or equal to a nominal ten micrometers.

Subp. 6. **Volatile organic compound.** "Volatile organic compound" means an organic compound that participates in atmospheric photochemical reaction; that is, any organic compound other than those that the United States Environmental Protection Agency has designated as having negligible photochemical reactivity. As used in parts 7002.0400 to

Approved by Revisor

7002.0450 [Emergency], volatile organic compound does not include:

A. methane;

B. ethane;

C. 1,1,1-trichloroethane (methyl chloroform);

D. trichlorotrifluoroethane (freon 113);

E. methyl chloroform;

F. methylene chloride;

G. trichlorofluoromethane (CFC-11);

H. dichlorodifluoromethane (CFC-12);

I. chlorodifluoromethane (CFC-22);

J. trifluoromethane (FC-23);

K. trichlorotrifluoroethane (CFC-113);

L. dichlorotetrafluoroethane (CFC-114);

M. chloropentafluoroethane (CFC-115);

N. any other compound listed in table 1, as amended, of the United States Environmental Protection Agency's Recommended Policy on Control of Volatile Organic Compounds, Federal Register, volume 42, page 35314, July 8, 1977; or

O. any other compound determined by the United States Environmental Protection Agency to be negligibly photochemically reactive. These determinations are published in the Federal Register.

7002.0420 [Emergency] EMISSIONS FEE.

The owner or operator of all emission facilities that were subject in 1988 to the emissions inventory reporting requirements of part 7005.1870, subpart 4, shall pay an annual emissions fee of $7.59 per ton of sulfur dioxide, nitrogen oxide, PM-10, and volatile organic compounds emitted from the emission facility, except that the fee shall not include an assessment for each of these pollutants for which the emission facility did not emit 25 tons or more. The tons of sulfur dioxide, nitrogen oxide, PM-10, and volatile organic compounds emitted from a source shall be the amount calculated by the division chief, based on the information reported by the owner

Approved by Revisor _____

or operator under part 7005.1870, subpart 4, for the 1988 emissions inventory and submitted to the division chief before January 1, 1991. Indirect sources shall pay an annual fee of $400 through the year in which construction is completed or compliance with all permit provisions is documented, whichever is later.

7002.0430 [Emergency] PAYMENT OF FEE.

A person submitting the fee required by part 7002.0420 [Emergency] shall make the fee payable to the Pollution Control Agency, and shall submit it to the division chief. The fee shall be paid within 30 days of receipt of an invoice from the division chief. The division chief shall not send invoices to persons earlier in the calendar year than October 1.

7002.0440 [Emergency] LATE PAYMENT.

The permittee shall pay a late payment fee of 20 percent of the payment due for failure to make payment within 30 days of a payment date. The permittee shall pay an additional ten percent of the original payment due for each 30-day period or portion of that period that the payment is late.

7002.0450 [Emergency] NOTIFICATION OF ERROR.

A person who thinks that the fee assessed under part 7002.0420 [Emergency] is in error shall provide a written explanation of the person's position to the division chief along with the assessed fee. If the division chief finds that the assessed fee was in error, the overpayment shall be refunded to the permittee or credited to the permittee's account.

STATE OF MINNESOTA
POLLUTION CONTROL AGENCY

In the Matter of the Proposed Emergency Rules Governing Air Emission Fees, Minn. Rules Parts 7002.0400 to 7002.0450

INFORMATIONAL STATEMENT

I. INTRODUCTION

The Minnesota Pollution Control Agency (MPCA) was first required to adopt rules to collect fees from regulated parties in 1985. The first air quality fee rules were designed to collect an amount appropriated by the legislature to cover the costs of reviewing and acting on permit applications, and to implement and enforce the conditions of air quality permits. These fee rules were first adopted in 1986, and were amended in 1988 and 1990 to collect additional amounts that the legislature appropriated to the MPCA to be collected as fees in those fiscal years. The fee rules are currently codified as Minn. Rules pts. 7002.0010 to 7002.0110 (1991).

On November 15, 1990, President Bush signed into law the Clean Air Act Amendments of 1990, Public Law No. 101-549 (1990 Amendments). Title V of the 1990 Amendments requires states to develop a permit program to implement the requirements of the Clean Air Act. Title V also requires states to establish emission fees, assessed based on the tons of each regulated air

pollutant emitted, to fund the state programs and provide the resources to accomplish the requirements of the 1990 Amendments. The emission fees are to be assessed annually, and are to fund all direct and indirect reasonable costs of the permit program, including review of permit applications; implementing and enforcing air quality statutes, rules and permits; air monitoring; rulemaking; responding to federal guidance; modeling; emissions inventories; and providing public information about air programs. The fees are required to be used solely for air quality programs. As a result, the portion of the air program to be funded by fee revenues increased substantially.

The 1991 legislature amended the MPCA's statutory fee authority to allow fees to be used not only for the items listed in the 1990 Amendments (listed above), but also for all other aspects of the MPCA air quality program, such as the noise program and the state acid deposition monitoring program. 1991 Minn. Laws ch. 254, art. 2, §37. The 1991 legislature substantially reduced general fund monies for the air quality program for fiscal year 1992 and eliminated all general fund monies for the air quality program for fiscal year 1993. The 1991 legislature appropriated $3,317,000 to the air quality program for fiscal year 1992 to be collected as fees. Since $74,000 will be paid to the MPCA by the Metropolitan Airport Commission for noise monitoring, since $156,000 must also be collected to cover indirect costs, and since the MPCA has had a collection efficiency of 95% (5% of permit fees due are not

paid), the fee assessed by these emergency rules is designed to collect $3,567,368 during fiscal year 1992.

II. STATUTORY AUTHORITY

The 1991 legislature amended Minn. Stat. §116.07, subd. 4d to require the MPCA's air quality program to collect fees to cover the majority of the costs of the air quality program. The fees are to be assessed annually to all air emission sources subject to the requirement to obtain a permit under the federal Clean Air Act or Minn. Stat. §116.081 (1990). The MPCA's statutory authority to adopt this fee rule is set forth in 1991 Minn. Laws ch. 254, art. 2, §37 (to be codified as Minn. Stat. §116.07, subd. 4d(c) and (f)).

The statute requires the MPCA to adopt fee rules to implement the fee by September 1, 1991. Minn. Stat. §14.29, subd. 1 (1990) provides that "when an agency is directed by statute, federal law or court order to adopt, amend, suspend or repeal a rule in a manner that does not allow for compliance with sections 14.14 to 14.28...the agency shall adopt emergency rules in accordance with sections 14.29 to 14.36." The legislature required in the fee statute that the MPCA adopt rules by September 1, 1991, and made the MPCA's air quality program largely fee-funded in fiscal year 1992, which commences on July 1, 1991. The MPCA cannot comply with this statutory requirement without promulgating emergency rules to establish the fee for fiscal year 1992 by September 1, 1991, and then promulgating

permanent rules for fiscal years 1993 and thereafter. Therefore, by the terms of Minn. Stat. §14.29, subd. 1 (1990), the MPCA has authority to promulgate this emergency rule.

III. EXPLANATION OF PROPOSED RULE

Part 7002.0400, Applicability.

This part lists the air emission sources subject to the emission fee assessed in this rule. The MPCA decided to impose the fee for fiscal year 1992 based upon the latest completed emissions inventory data available to the Air Quality Division. The emissions inventories are calculated using EPA-approved emission factors. The 1990 emissions inventory has not been completed, and will not be available in final form to utilize as the basis of the fees assessed to each emission facility in the time frame necessary for promulgation and implementation of this emergency fee rule. The MPCA therefore utilized the 1988 emissions inventory as the basis for the fees assessed under this proposed emergency rule. This part provides that emission facilities which were subject to the emissions inventory reporting requirement in 1988 must pay the emission fees assessed by this fee rule.

An "indirect source" is a particular type of emission facility defined in MPCA air quality rules which will have a different fee than other emission facilities and is therefore

listed separately in this proposed rule. As part 7002.0420 reflects, these sources will be assessed in this emergency rule the annual fee which applies to them under the current permanent fee rules.

This proposed part also provides that during the time this proposed emergency rule is effective, the current air quality permit fee rule is not in effect. The emergency rule cannot permanently repeal the existing air quality fee rule because the emergency rule is not itself permanent, and will not be effective for more than a year. The emergency rule is, however, designed to replace the fees currently in place in parts 7002.0010 to 7002.0110 and to wholly collect the fiscal year 1992 fee appropriation for the MPCA air quality program. Therefore, while it is legally effective, the emergency rule will supercede the existing fee rule. The existing fee rule will then be either heavily amended or wholly repealed by the permanent fee rule that the MPCA will promulgate to implement the new fee statute in fiscal years 1993 and thereafter.

Part 7002.0410, Definitions.

This part defines the terms that are used in the proposed emergency rule. Subpart 1 establishes that the terms defined in this part apply only to the emergency fee rule.

Subpart 2 defines "division chief" as the Division Chief of the MPCA Air Quality Division, the person to whom fees will be paid.

Subpart 3 defines "emission facility" exactly as it is defined in Minn. Stat. §116.06, giving the term the same meaning it has in the new fee statute. This definition is also used in Minn. Rules pt. 7005.0100, subp. 10 (1991), and is identical to the definition of emission facility that is used in the air quality rules to describe which sources are subject to the emissions inventory reporting requirement.

Subpart 4 defines "indirect source" as it is defined in the MPCA's air quality rules, because there is no statutory definition of this term. An "indirect source" is an "emission facility" as defined in Minn. Stat. §116.06, but will be charged a separate, and lower, fee than other emission sources in this rule. Therefore, the term had to be separately defined.

Subpart 5 defines "PM-10" in the way it is defined in the federal Clean Air Act, section 302(t), 42 U.S.C. §7602(t). This definition describes the particulate matter emissions calculated in the 1988 emissions inventory, which is being used in this emergency rule as the basis for the fee.

Subpart 6 defines "volatile organic compounds" consistent with the way that this term is defined in the MPCA air quality

offset rule, Part 7005.3030, subp. 20. This definition is consistent with the volatile organic compound emissions calculated in the 1988 emissions inventory, which is being used in this emergency rule as the basis for the fee.

Part 7002.0420, Emissions Fee.

This part establishes how each source's fee will be calculated in fiscal year 1992. The part first requires all emission facilities which were subject in 1988 to the emissions inventory reporting requirements of part 7005.1870, subpart 4 to pay an annual fee of $7.59 per ton of sulfur dioxide, nitrogen oxides, particulate matter with an aerodynamic diameter of less than ten microns (PM-10) and volatile organic compounds emitted by each source, except that the fee shall not include an assessment for each of these pollutants for which the emission facility did not emit 25 tons or more. The tons of these pollutants emitted will be calculated, for fiscal year 1992, according to the MPCA's emissions inventory data for 1988, the most recent completed MPCA inventory. The January 1, 1991 cut-off date for information submissions is in place so that 1988 emissions inventory data are not reopened. Indirect sources pay the same annual fee they paid under Part 7002.0100, subp. 5, the currently effective fee rule.

Because the MPCA had such limited time in which to write and commence emergency rulemaking to collect fees for fiscal year

1992, the MPCA chose to calculate the fee in a simple manner with the same per ton charge for all pollutants. The four pollutants were chosen because they are pollutants inventoried in the 1988 emissions inventory. The 1988 emissions inventory was chosen as the data source because it has been completed, and because the tons of emissions of each pollutant from each source in the inventory are known, making the fee simple to calculate and administer. The simplicity of the fee assessed in the emergency rule is necessary given the time frame under which it had to be developed.

The following three examples will illustrate the operation of the fee assessment. Source A in 1988 emitted 100 tons of sulfur dioxide (SO2), 50 tons of nitrogen oxides (NOX), 25 tons of volatile organic compounds (VOCs), and 10 tons of PM-10. Source A's emission fee under this emergency rule is:

SO2	100 tons	x	$7.59	=	$ 759.00
NOX	50 tons	x	$7.59	=	$ 379.50
VOC	25 tons	x	$7.59	=	$ 189.75
PM-10	10 tons	x	$0.00	=	$ 0.00
TOTAL FEE:					$1328.25

Source A is assessed a fee of $7.59 per ton for those pollutants which Source A emits in a quantity of 25 tons or more. If Source A emits one or more of the pollutants in a quantity of less than 25 tons, then Source A is not assessed a fee for that pollutant category only. Therefore, Source A is not assessed a fee for emissions of PM-10 in this example, but is assessed a per ton fee for all tons emitted of SO2, NOX and VOCs. Many different air

pollutants are VOCs, but VOCs are treated as one category in the emissions inventory and therefore in this emergency fee rule.

Source B in 1988 emitted 250 tons of SO2, 200 tons of NOX, 100 tons of VOCs, and 50 tons of PM-10. Source B's emission fee under this emergency rule is:

SO2	250 tons	x	$7.59	=	$1897.50
NOX	200 tons	x	$7.59	=	$1518.00
VOC	100 tons	x	$7.59	=	$ 759.00
PM-10	50 tons	x	$7.59	=	$ 379.50
TOTAL FEE:					$4554.00

Source B emitted 25 tons or more of all pollutants for which an emission fee is being assessed, and therefore is assessed a per ton fee for all tons emitted of SO2, NOX, VOCs, and PM-10.

Source C in 1988 emitted 20 tons of SO2, 15 tons of NOX, 10 tons of VOCs, and 5 tons of PM-10. Source C's emission fee under this emergency rule is:

SO2	20 tons	x	$0.00	=	$ 0.00
NOX	15 tons	x	$0.00	=	$ 0.00
VOC	10 tons	x	$0.00	=	$ 0.00
PM-10	5 tons	x	$0.00	=	$ 0.00
TOTAL FEE:					$ 0.00

Source C is not assessed a fee under this emergency rule because it did not emit in 1988 enough of any pollutant to be required to report emissions to the emissions inventory under Minn. Rules part 7005.1870, subpart 4.

The MPCA will not necessarily use the same fee for all pollutants in the permanent rulemaking which will commence after this emergency rule is adopted. The number of pollutants for which a fee will be assessed will increase in accordance with the new fee statute to include regulated air pollutants as listed in the new fee statute, and the amount assessed for each pollutant will be determined in the permanent fee rulemaking which will follow this emergency rulemaking and establish the fees for fiscal year 1993 and thereafter.

Part 7002.0430, Payment of Fee.

This part states that the fee shall be paid to the Division Chief of the Air Quality Division, and that the fee shall be paid within 30 days of receipt of an invoice from the MPCA. This language duplicates the current requirements of Parts 7002.0040 and 7002.0070. This part also states that invoices shall not be sent earlier than October 1, 1991. This language was intended to alert the regulated community that the MPCA will assess fees starting in October of this year, rather than January of 1992. In the past, annual fees were assessed to sources in January. The fees must be moved up to be closer to the start of the fiscal year on July 1, 1991, because fees are now a much more significant funding source of the MPCA air quality program. As a result, fees must come in during the first half of the fiscal year, not the last half as in the past.

Part 7002.0440, Late Payment.

This part provides that a source which does not pay its fee within 30 days of its due date must pay an additional 20 percent because of late payment. If the late payment persists for additional months, another 10 percent is added each month. This part is identical to the late payment provision in current Part 7002.0090. It is needed to cover the contingency that some sources will not pay their fees on time, and to encourage prompt payment of fees.

Part 7002.0450, Notification of Error.

This part provides that a person who thinks that the fee was calculated erroneously must pay the fee, but can provide a written explanation of that person's position to the division chief. If the division chief finds that the fee was in error, the division chief can either refund the excess amount or credit the person's fee account with the MPCA. This part is identical to the notification of error provision in current Part 7002.0080. It establishes a procedure whereby sources can claim that their fee was calculated erroneously.

IV. SMALL BUSINESS CONSIDERATIONS IN RULEMAKING

Minn. Stat. §14.115 (1990), which outlines factors the MPCA must consider in proposing rules which may affect small

businesses, does not apply to the promulgation of emergency rules. Minn. Stat. §14.115, subd. 7(1) (1990). Due to the legislative deadline of September 1, 1991 for promulgation of rules to implement the fees to collect its appropriation for fiscal year 1992, the MPCA has decided that, for purposes of these emergency rules, it will impose a fee that is the same for all pollutants and which does not differentiate between smaller and larger sources. The selection of sources required to submit an emissions inventory as the sources subject to the fee in fiscal year 1992 eliminates many small sources which do not emit 25 tons per year of any of the inventoried pollutants, lessening the financial impact of the emergency fee rule on many small businesses.

The MPCA also notes that some large sources have urged that a maximum cap be placed on the fee assessed. Were such a fee cap put in place, the revenue shortfall that would result would force an increase in the fee assessed per ton for all sources, large and small. The MPCA did not propose to impose such a cap in these emergency rules, which reduced the per ton fee amount that would have otherwise needed to be assessed to small sources. The MPCA will fully consider whether such a cap should be placed in the permanent fee rules, but does not propose such a cap in these emergency fee rules.

The MPCA will consider ways to lessen the economic impact of air emission fees on small businesses during the rulemaking to

adopt the permanent fee rules which will be in place for fiscal year 1993 and thereafter. In this emergency rule, the MPCA has assisted all businesses, including small businesses, by establishing a fee that is simple to compute and administer. A business can compute the fee charged under these rules by multiplying the tons emitted as recorded in the 1988 emissions inventory by the per ton dollar amount.

V. CONSIDERATION OF ECONOMIC FACTORS

In exercising its powers, the MPCA is required by Minn. Stat. §116.07, subd. 6 (1990) to give due consideration to economic factors. The statute provides:

> In exercising all its powers the pollution control agency shall give due consideration to the establishment, maintenance, operation and expansion of business, commerce, trade, industry, traffic, and other economic factors and other material matters affecting the feasibility and practicability of any proposed action, including, but not limited to, the burden on a municipality of any tax which may result therefrom, and shall take or provide for such action as may be reasonable, feasible, and practical under the circumstances.

In proposing these emergency rules to establish air emission fees for fiscal year 1992, the MPCA has given due consideration to available information as to any economic impacts the proposed rules would have. The 1991 legislature changed the basis of the MPCA's air quality program budget from general funding and fee funding to a program that will be largely funded by the air emission fees, and not funded from the general fund.

A large part of the air quality program will now be funded by the fees assessed to sources under this emergency rule and the permanent fee rule which will be promulgated for fiscal years 1993 and thereafter. The fee must therefore be set to collect the amount appropriated by the legislature to the MPCA for air quality program fees. In fiscal year 1992, the year to which this emergency rule will apply, the MPCA must collect $3,567,368 from its air emission fees. The MPCA has set the fee to collect this amount. While the MPCA has considered the economic impacts of the proposed emergency rules, it does not have the option of eliminating them in light of the 1991 legislature's requirement to collect this amount in fees.

VI. EXPENDITURES BY LOCAL PUBLIC BODIES

Minn. Stat. §14.11, subd. 1 provides that if the adoption of a rule by an agency will require the expenditure of public money by local bodies, the notice published by the agency must contain a written statement giving the agency's reasonable estimate of the total cost to all local public bodies in the state to implement the rule for the two years immediately following adoption of the rule if the estimated cost exceeds $100,000 in either of the two years. "Local public bodies" means officers and governing bodies of political subdivisions of the state and other officers and governing bodies of less than statewide jurisdiction which have the authority to levy taxes.

The MPCA first notes that this emergency rule is allowed by law to only apply for up to a year after its promulgation. Minn. Stat. §14.35 (1990). This rule will therefore not apply after fiscal year 1992. Total fees which will be assessed to local public bodies by this emergency rule are relatively easy to estimate, because the fee is based upon four pollutants and the data already in possession of the MPCA in the 1988 emissions inventory. The MPCA estimates that the total fee imposed upon local public bodies by this emergency rule in fiscal year 1992 is $108,985.

VII. IMPACT ON AGRICULTURAL LANDS

Minn. Stat. §14.11, subd. 2 (1990) imposes additional statutory requirements on agencies when proposed rules have a "direct and substantial adverse impact on agricultural land in the state." The additional statutory requirements are codified at Minn. Stat. §§17.80 to 17.84. This proposed emergency rule imposes fees on emission facilities and stationary sources of air emissions, and does not have an impact on agricultural lands.

VIII. CONCLUSION

Although the MPCA is not required to produce a statement of need and reasonableness when it is promulgating emergency rules under Minn. Stat. §§14.29 to 14.36 (1990), the MPCA thought that it would assist the regulated community to have an

explanation of the provisions of and background to this proposed emergency rule. The MPCA is proposing a straightforward rule to collect the required fee in the time required by the legislature for fiscal year 1992, but does not know at this time how it will propose to structure the air emission fees in the permanent rules that will be promulgated for fiscal year 1993 and thereafter.

SUBJECT : FEE SCHEDULE APPROVAL FOR THE AIR QUALITY DIVISION

In accordance with Minn. Stat. § 16A.128, the fee schedule for the Minnesota Pollution Control Agency's (MPCA) proposed emergency fee rule is submitted for your review and approval. The attachment shows the required revenues and the proposed fees, how they were calculated, and some example fee assessments.

Approval to begin rulemaking procedures is expected from the MPCA Board at it's June 25, 1991, meeting. We request your review and written approval be done at your earliest convenience so that we can proceed with the rulemaking process.

If you have any questions, please call Joel Smith, of the Air Quality Division, at 296-7512, or Mark Strange at 296-9711.

Budget Operations & Support

The 1991 Minnesota Legislature amended Minn. Stat. § 116.07, subd. 4d to require the MPCA's air quality program to collect fees to cover the majority of the program costs. The legislature has appropriate $3,317,000 to be collected as fees for fiscal year 1992. Of this amount, $74,000 will be paid by the Metropolitan Airport Commission for noise monitoring. In addition to this amount, $156,000 must be collected to cover indirect costs. Finally, we expect to collect approximately $10,000 from Indirect Source Permits ($400/source * 25 sources). Therefore, the amount to be collected is:

	$3,317,000
-$	74,000
+$	156,000
-$	10,000
	$3,389,000

Over the past two years, the amount collected verses the amount invoiced has been approximately as follows:

	Invoiced	Collected	Collection Efficiency
FY 1989	$430,496	$413,000	95.9 percent
FY 1990	$595,433	$567,000	95.2 percent

Using a conservative 95 percent as our anticipated collection efficiency, we must have as a collection target:

$$\$3,389,000 / 0.95 = \$3,567,368$$

Emissions of four pollutants, particulate matter less than 10 micrometers (PM-10), sulfur oxides (SOx), nitrogen oxides (NOx),and volitile organic compounds (VOC) will be considered in the collection of fees. The 1988 emissions inventory will be used as the indicator of actual emissions. Sources with emissions of less than 25 tons of a particular pollutant are not included in the inventory for that pollutant. The total number of tons for each of these pollutants from the 1988 inventory is as follows:

PM-10:	60,365 tons
SOx:	130,799 tons
NOx:	220,251 tons
VOC:	58,520 tons
TOTAL:	469,935 tons

Dividing the total amount of money to be collected by the total number of tons gives us a dollars per ton figure of:

$3,567,368 / 469,935 tons + $7.59/ton

A source will not be charged for emissions of each pollutant under 25 tons per year. The following three examples will illustrate the operation of the fee assessment.

Source A in 1988, emitted 10 tons of PM-10, 100 tons of SOx, 50 tons of NOx, and 25 tons of VOC. Source A's emission fee under this emergency rule is:

PM-10:	10 tons x $0.00	=	$ 0.00
SOx:	100 tons x $7.59	=	$ 759.00
NOx:	50 tons x $7.59	=	$ 379.50
VOC:	25 tons x $7.59	=	$ 189.75
TOTAL FEE:			$1328.25

Source B in 1988 emitted 50 tons of PM-10, 250 tons of SOx, 200 tons of NOx, and 100 tons of VOC. Source B's emission fee under this emergency rule is:

PM-10:	50 tons x $7.59	=	$ 379.50
SOx:	250 tons x $7.59	=	$1897.50
NOx:	200 tons x $7.59	=	$1518.00
VOC:	100 tons x $7.59	=	$ 759.00
TOTAL FEE:			$4554.00

Source C in 1988 emitted 5 tons of PM-10, 20 tons of SOx, 15 tons of NOx, and 10 tons of VOC. Source C's emission fee under the emergency rule is:

PM-10:	5 tons x $0.00	=	$ 0.00
SOx:	20 tons x $0.00	=	$ 0.00
NOx:	15 tons x $0.00	=	$ 0.00
VOC:	10 tons x $0.00	=	$ 0.00
TOTAL FEE:			$ 0.00

CERTIFICATE OF AGENCY'S AUTHORIZING RESOLUTION

I, Charles W. Williams, do hereby certify that I am the Commissioner of the Minnesota Pollution Control Agency, an agency duly authorized under the laws of the State of Minnesota, and that the following is a true, complete, and correct copy of a resolution adopted at a meeting of the Minnesota Pollution Control Agency duly and properly called and held on the 25 day of June, 1991, that a quorum was present at said meeting, that a majority of those present voted for the resolution and that said resolution will be set forth in the minutes of said meeting and has not been rescinded or modified:

> BE IT RESOLVED, that the Commissioner of the Minnesota Pollution Control Agency is hereby granted the authority and directed to sign and to give notice of the Minnesota Pollution Control Agency's intent to adopt the attached emergency fee rules, Minn. Rules pts. 7002.0400 to 7002.0450, governing air emission fees, to all persons who have registered their names with the Minnesota Pollution Control Agency for that purpose and to publish the notice and the rules in the State Register, and to perform any and all acts incidental thereto, including making any form changes in the rules that the Revisor of Statutes requires the Minnesota Pollution Control Agency to make in order to obtain the Revisor's certification as required by Minn. Stat. § 14.07, subd. 2 (1990).

IN WITNESS WHEREOF, I have hereunto subscribed my name this 25th day of June, 1991.

CHARLES W. WILLIAMS
Commissioner

STATE OF MINNESOTA
POLLUTION CONTROL AGENCY

In the Matter of the Proposed Rules Governing Air Quality Permit Fees, Minn. Rules Parts 7002.0400 to 7002.0450

AFFIDAVIT OF SENDING NOTICE OF PROPOSED EMERGENCY RULES TO CHAIRS OF HOUSE APPROPRIATIONS AND SENATE FINANCE COMMITTEE

STATE OF MINNESOTA)
) SS.
COUNTY OF RAMSEY)

Norma L. Florell, being duly sworn says:

That on the 1 day of July, 1991, prior to submitting the Notice of Intent to Adopt Emergency Rules to the State Register, I mailed a copy of the Notice of Intent to Adopt Emergency Rules, the proposed emergency rules, the Informational Statement, along with the attached cover letters, to the chairs of the House Appropriations Committee and the Senate Finance Committee.

Norma Florell

Subscribed and sworn to before me
this 12th day of July, 1991

June 28, 1991

The Honorable Gene Merriam
Chair, Senate Finance Committee
State Capitol Building
Room 122
St. Paul, Minnesota 55155

Dear Senator Merriam:

The Minnesota Pollution Control Agency (MPCA), Air Quality Division, is proposing to adopt emergency permit fee rules in response to the 1991 Minnesota Legislature. If adopted, the proposed emergency rules will assess permit fees, based on the tons emitted of sulfur dioxide, nitrogen oxides, volatile organic compounds and particulate matter, to fund the state air quality program and provide the resources to implement the requirements of the 1990 Clean Air Act Amendments in Minnesota. The 1991 legislature appropriated $3,317,000 to the air quality program for fiscal year 1992 to be collected as fees. The emission fees will be assessed to all air emission facilities which were subject in 1988 to the emissions inventory reporting requirements of the state air pollution control rules. These emergency rules will be in effect for fiscal year 1992. The MPCA will then adopt permanent rules to establish emission fees for fiscal year 1993 and thereafter.

I am enclosing a copy of the Notice of Intent to Adopt Emergency Rules, the proposed emergency rules (all new language), the Fee Schedule sent to the Commissioner of Finance for approval, and an informational document which provides an explanation of the provisions and background to the proposed emergency rules.

If you have any questions, please feel free to contact me at (612)296-7731.

Sincerely,

Lisa J. Thorvig

June 28, 1991

The Honorable Wayne Simoneau
Chair, House Appropriations Committee
Minnesota House of Representatives
St. Paul, Minnesota 55155

Dear Representative Simoneau:

The Minnesota Pollution Control Agency (MPCA), Air Quality Division, is proposing to adopt emergency permit fee rules in response to the 1991 Minnesota Legislature. If adopted, the proposed emergency rules will assess permit fees, based on the tons emitted of sulfur dioxide, nitrogen oxides, volatile organic compounds and particulate matter, to fund the state air quality program and provide the resources to implement the requirements of the 1990 Clean Air Act Amendments in Minnesota. The 1991 legislature appropriated $3,317,000 to the air quality program for fiscal year 1992 to be collected as fees. The emission fees will be assessed to all air emission facilities which were subject in 1988 to the emissions inventory reporting requirements of the state air pollution control rules. These emergency rules will be in effect for fiscal year 1992. The MPCA will then adopt permanent rules to establish emission fees for fiscal year 1993 and thereafter.

I am enclosing a copy of the Notice of Intent to Adopt Emergency Rules, the proposed emergency rules (all new language), the Fee Schedule sent to the Commissioner of Finance for approval, and an informational document which provides an explanation of the provisions and background to the proposed emergency rules.

If you have any questions, please feel free to contact me at (612)296-7731.

Sincerely,

Lisa J. Thorvig

Enclosure

Emergency Rules

Proposed Emergency Rules

According to Minn. Stat. of 1984, §§14.29-14.30, state agencies may propose adoption of emergency rules if: 1) expressly required; 2) authorized by statute; or 3) if the manner permitted by a directive (given by statute, federal law or court order) does not allow for compliance with sections 14.14-14.28. The agency must, however, publish a notice of intent to adopt emergency rules, along with the rules themselves, in the *State Register*. The notice must advise the public:

1) that a free copy of the proposed emergency rule is available upon request from the agency;
2) that notice of the date that the rule is submitted to the attorney general will be mailed to persons requesting notification;
3) that the public has at least 25 days after publication of the proposed emergency rule to submit data and views in writing; and
4) that the emergency rule may be modified if the data and views submitted support such modification.

Adopted Emergency Rules

Emergency rules take effect five working days after approval by the attorney general, and after compliance with Minn. Stat. §§14.29-14.365. As soon as possible, emergency rules are published in the *State Register* in the manner provided for in section 14.18.

Emergency rules are effective for the period stated in the notice of intent to adopt emergency rules. This may not exceed 180 days.

Continued/Extended Emergency Rules

Adopted emergency rules may be continued in effect (extended) for an additional 180 days. To do this, the agency must give notice by: 1) publishing notice in the *State Register*: and 2) mailing the same notice to all persons who requested notification on rulemaking. No emergency rule may remain in effect 361 days after its original effective date. At that point, permanent rules adopted according to Minn. Stat. 14.14-14.28 supercede emergency rules.

Pollution Control Agency

Air Quality Division

Proposed Emergency Rules Relating to Air Quality Permit Fees

Notice of Intent to Adopt Emergency Rules

NOTICE IS HEREBY GIVEN that the Minnesota Pollution Control Agency (MPCA) intends to adopt the above-entitled emergency rules. The statutory authority to adopt the emergency rules is contained in *Minnesota Statutes* § 116.07, subd. 4d, as amended by the 1991 Minnesota Legislature in *1991 Minnesota Laws* ch. 254, art. 2, section 37. The MPCA, in adopting the rules, is following the procedures set forth in the Administrative Procedure Act for adopting emergency rules, *Minnesota Statutes* §§ 14.29 to 14.36 (1990).

All persons have until 4:30 p.m. on August 5, 1991, to submit comments orally or in writing on the proposed emergency rules or any part or subpart of the rules. Each comment should identify the portion of the proposed rule addressed, the reason for the comment, and any change proposed. Written comments should be directed to Mark Strange at the address listed below.

Mr. Mark Strange
Air Quality Division
Minnesota Pollution Control Agency
520 Lafayette Road North
St. Paul, Minnesota 55155

Oral comments will be accepted by Mr. Strange during regular business hours at the MPCA or over the telephone at (612) 296-9711. All general questions regarding the emergency rulemaking process should be directed to Norma Florell at (612) 296-7712.

If adopted, the proposed emergency rules will assess permit fees, based on the tons emitted of sulfur dioxide, nitrogen oxides, volatile organic compounds and particulate matter with an aerodynamic diameter of ten microns, to fund the state air quality program and provide the resources to implement the requirements of the 1990 Clean Air Act Amendments in Minnesota. The 1991 legislature appropriated $3,317,000 to the air quality program for fiscal year 1992 to be collected as fees. The emission fees will be assessed to all air emission facilities which were subject in 1988 to the emissions inventory reporting requirements of the state air pollution control rules. These emergency rules will be in effect in fiscal year 1992. The MPCA will then adopt permanent rules to establish emission fees for fiscal year 1993 and thereafter.

Minnesota Statutes § 14.11, subd. 1 provides that if the adoption of a rule by an agency will require the expenditure of public money by local bodies, the notice published by the agency must contain a written statement giving the agency's reasonable estimate of the total cost to all local public bodies in the state to implement the rule for the two years immediately following adoption of the rule if the estimated cost exceeds $100,000 in either of the two years. "Local public bodies" means officers and governing bodies of political subdivisions of the state and other officers and governing bodies of less than statewide jurisdiction which have the authority to levy taxes. The MPCA first notes that this emergency rule is allowed by law to only apply for up to a year after its promulgation. *Minnesota Statutes* § 14.35 (1990). This rule will therefore not apply after fiscal year 1992. The MPCA estimates that the total fee imposed upon local public bodies by this emergency rule in fiscal year 1992 is $108,985.

The proposed emergency rules are published below. One free copy of the rules is available by contacting Norma Florell at (612) 296-7712. An informational document that provides an explanation of the provisions and background to the proposed emergency rules has been prepared and is available from Norma Florell upon request.

The proposed emergency rules may be modified if the modifications are supported by data and views submitted to the MPCA and do not result in a substantial change in the proposed emergency rules as noticed.

Upon adoption of the emergency rules by the MPCA, the emergency rules as adopted and its supporting documents will be delivered to the Attorney General for review as to legality and form to the extent form relates to legality. Any person may request notification of the date of submission to the Attorney General. Persons who wish to be advised of the submission of this material to the Attorney General, or who wish to receive a copy of the adopted rule, must submit a written request to Norma Florell at the address listed below:

Mrs. Norma Florell
Air Quality Division
Minnesota Pollution Control Agency
520 Lafayette Road North
St. Paul, Minnesota 55155

The emergency rules will take effect five working days after approval by the Attorney General and be effective for 180 days. The emergency rules will be continued in effect for an additional 180 days if the MPCA gives notice of continuation in accordance with *Minnesota Statutes* § 14.35 (1990).

Charles W. Williams
Commissioner

Rules as Proposed (all new material)

7002.0400 [Emergency] APPLICABILITY.

Parts 7002.0400 to 7002.0450 [Emergency] apply to all emission facilities that were subject in 1988 to the emissions inventory reporting requirements of part 7005.1870, subpart 4, and to indirect sources. During the time that this emergency rule is effective, parts 7002.0010 to 7002.0110 are not effective.

7002.0410 [Emergency] DEFINITIONS.

Subpart 1. **Scope.** For the purposes of parts 7002.0400 to 7002.0450 [Emergency], the following terms have the meanings given them.

Subp. 2. **Division chief.** "Division chief" means the division chief of the Air Quality Division of the Pollution Control Agency.

Subp. 3. **Emission facility.** "Emission facility" has the meaning given in Minnesota Statutes, section 116.06, subdivision 5, and part 7005.0100, subpart 10.

Subp. 4. **Indirect source.** "Indirect source" has the meaning given in part 7001.1260, subpart 5.

Subp. 5. **PM-10.** "PM-10" means particulate matter with an aerodynamic diameter less than or equal to a nominal ten micrometers.

Subp. 6. **Volatile organic compound.** "Volatile organic compound" means an organic compound that participates in atmospheric photochemical reaction; that is, any organic compound other than those that the United States Environmental Protection Agency has designated as having negligible photochemical reactivity. As used in parts 7002.0400 to 7002.0450 [Emergency], volatile organic compound does not include:

A. methane;

B. ethane;

C. 1,1,1-trichloroethane (methyl chloroform);

D. trichlorotrifluoroethane (freon 113);

E. methyl chloroform;

F. methylene chloride;

G. trichlorofluoromethane (CFC-11);

H. dichlorodifluoromethane (CFC-12);

I. chlorodifluoromethane (CFC-22);

J. trifluoromethane (FC-23);

K. trichlorotrifluoroethane (CFC-113);

L. dichlorotetrafluoroethane (CFC-114);

M. chloropentafluoroethane (CFC-115);

N. any other compound listed in table 1, as amended, of the United States Environmental Protection Agency's Recommended Policy on Control of Volatile Organic Compounds, *Federal Register*, volume 42, page 35314, July 8, 1977; or

O. any other compound determined by the United States Environmental Protection Agency to be negligibly photochemically reactive. These determinations are published in the *Federal Register*.

7002.0420 [Emergency] EMISSIONS FEE.

The owner or operator of all emission facilities that were subject in 1988 to the emissions inventory reporting requirements of part 7005.1870, subpart 4, shall pay an annual emissions fee of $7.59 per ton of sulfur dioxide, nitrogen oxide, PM-10, and volatile organic compounds emitted from the emission facility, except that the fee shall not include an assessment for each of these pollutants for which the emission facility did not emit 25 tons or more. The tons of sulfur dioxide, nitrogen oxide, PM-10, and volatile organic compounds emitted from a source shall be the amount calculated by the division chief, based on the information reported by the owner or operator under part 7005.1870, subpart 4, for the 1988 emissions inventory and submitted to the division chief before January 1, 1991. Indirect sources shall pay an annual fee of $400 through the year in which construction is completed or compliance with all permit provisions is documented, whichever is later.

7002.0430 [Emergency] PAYMENT OF FEE.

A person submitting the fee required by part 7002.0420 [Emergency] shall make the fee payable to the Pollution Control Agency, and shall submit it to the division chief. The fee shall be paid within 30 days of receipt of an invoice from the division chief. The division chief shall not send invoices to persons earlier in the calendar year than October 1.

7002.0440 [Emergency] LATE PAYMENT.

The permittee shall pay a late payment fee of 20 percent of the payment due for failure to make payment within 30 days of a payment date. The permittee shall pay an additional ten percent of the original payment due for each 30-day period or portion of that period that the payment is late.

7002.0450 [Emergency] NOTIFICATION OF ERROR.

A person who thinks that the fee assessed under part 7002.0420 [Emergency] is in error shall provide a written explanation of the person's position to the division chief along with the assessed fee. If the division chief finds that the assessed fee was in error, the overpayment shall be refunded to the permittee or credited to the permittee's account.

Revenue Notices

Effective July 1, 1991, the Department of Revenue has authority to issue revenue notices. A revenue notice is a policy statement made by the department that provides interpretation, details, or supplementary information concerning the application of law or rules. This authority was provided by the Legislature in *1991 Session Laws* Chapter 291, article 21, section 6 and will be codified at *Minnesota Statutes* section 270.0604.

Department of Revenue

Revenue Notice #91-1: Transitional Periods for Sales and Use Tax Law Changes

Facts: During the 1991 legislative session, a number of changes were made to the sales and use tax laws. The legislature did not include any transitional language to grandfather in existing contracts.

Issue: Will the Commissioner administratively provide any transitional periods for contracts?

Conclusion: The Commissioner will allow a transitional period for enforceable written contracts for the following law changes:

1) **Sales Tax Rate Increase (6 percent to 6.5 percent).**

- **Construction contracts.** The rate increase does not apply to sales of building materials and supplies made under a bona fide written lump-sum or fixed-price construction contract that has no allocation provision for future taxes. The contract must be executed prior to June 1, 1991, and delivery of the materials and supplies used in performing the contract must be made on or before December 31, 1991.
- **Leases and taxable service contracts.** The rate increase does not apply to payments made for July and August, 1991 for leases of tangible personal property and contracts to provide taxable services if the lease or contract was executed prior to June 1, 1991. The additional .5 percent tax rate applies to payments made for September 1, 1991 and after.

STATE OF MINNESOTA
POLLUTION CONTROL AGENCY

In The Matter Of The Proposed Emergency Rules Governing Air Quality Permit Fees Minn. Rules Parts 7002.0400 to 7002.0450

NOTICE OF INTENT TO ADOPT EMERGENCY RULES

(1) Notice is hereby given that the Minnesota Pollution Control Agency (MPCA) intends to adopt the above-entitled emergency rules. The statutory authority to adopt the emergency rules is contained in Minn. Stat. § 116.07, subd. 4d, as amended by the 1991 Minnesota Legislature in 1991 Minn. Laws ch. 254, art. 2, section 37. The MPCA, in adopting the rules, is following the procedures set forth in the Administrative Procedure Act for adopting emergency rules, Minn. Stat. §§ 14.29 to 14.36 (1990).

(2) All persons have until 4:30 P.M. on August 5, 1991, to submit comments orally or in writing on the proposed emergency rules or any part or subpart of the rules. (3) Each comment should identify the portion of the proposed rule addressed, the reason for the comment, and any change proposed. (3) Written comments should be directed to Mark Strange at the address listed below.

Mr. Mark Strange
Air Quality Division
Minnesota Pollution Control Agency
520 Lafayette Road North
St. Paul, Minnesota 55155

Oral comments will be accepted by Mr. Strange during regular business hours at the MPCA or over the telephone at (612) 296-9711. All general questions regarding the emergency rulemaking process should be directed to Norma Florell at (612) 296-7712.

(4) If adopted, the proposed emergency rules will assess permit fees, based on the tons emitted of sulfur dioxide, nitrogen oxides, volatile organic compounds and particulate matter with an aerodynamic diameter of ten microns, to fund the state air quality program and provide the resources to implement the requirements of the 1990 Clean Air Act Amendments in Minnesota. The 1991 legislature appropriated $3,317,000 to the air quality program for fiscal year 1992 to be collected as fees. The emission fees will be assessed to all air emission facilities which were subject in 1988 to the emissions inventory reporting requirements of the state air pollution control rules. These emergency rules will be in effect in fiscal year 1992. The MPCA will then adopt permanent rules to establish emission fees for fiscal year 1993 and thereafter.

Minn. Stat. § 14.11, subd. 1 provides that if the adoption of a rule by an agency will require the expenditure of public money by local bodies, the notice published by the agency must contain a written statement giving the agency's reasonable estimate of the total cost to all local public bodies in the state to implement the rule for the two years immediately following adoption of the rule if the estimated cost exceeds $100,000 in either of the two years. "Local public bodies" means officers and governing bodies of political subdivisions of the state and other officers and governing bodies of less than statewide jurisdiction which have the authority to levy taxes. The MPCA first notes that this emergency rule is allowed by law to only apply for up to a year after its promulgation. Minn. Stat. § 14.35 (1990). This rule will therefore not apply after fiscal year 1992. The MPCA estimates that the total fee imposed upon local public bodies by this emergency rule in fiscal year 1992 is $108,985.

(5) The proposed emergency rules are published below. One free copy of the rules is available by contacting Norma Florell at (612) 296-7712. An informational document that provides an explanation of the provisions and background to the proposed emergency rules has been prepared and is available from Norma Florell upon request.

(6) The proposed emergency rules may be modified if the modifications are supported by data and views submitted to the MPCA and do not result in a substantial change in the proposed emergency rules as noticed.

(9) Upon adoption of the emergency rules by the MPCA, the emergency rules as adopted and its supporting documents will be delivered to the Attorney General for review as to legality and form to the extent form relates to legality. Any person may request notification of the date of submission to the Attorney General. Persons who wish to be advised of the submission of this material to the Attorney General, or who wish to receive a copy of the adopted rule, must submit a written request to Norma Florell at the address listed below:

Mrs. Norma Florell
Air Quality Division
Minnesota Pollution Control Agency
520 Lafayette Road North
St. Paul, Minnesota 55155

(8) The emergency rules will take effect five working days after approval by the Attorney General and be effective for 180 days. The emergency rules will be continued in effect for an additional 180 days if the MPCA gives notice of continuation in accordance with Minn. Stat. § 14.35 (1990).

Re: **Proposed Emergency Rules to Amend Air Pollution Permit Fees**

Dear Mr. Strange:

NSP understands the need for increased air emissions permit fees and the need for the MPCA to build up capabilities for handling a more complex permitting program. We appreciate the opportunity to submit the following comments regarding proposed emergency amendments to the fee rules.

Actual vs. Potential Emissions

Fees should be based on actual, not potential, emissions. This encourages pollution prevention and is consistent with EPA's recommendations.

If potential emissions dictate fees, some argue that permit limitations could be changed to lower the potential. At NSP, this strategy would be hampered by the necessity of flexible permits to meet electric generation demand. Also, to calculate potential emissions from a source allowed to burn multiple fuels, there is the problem of determining on which fuel to base the calculations.

4000 Ton Cap

Minnesota Statutes 116.07 states that the calculation of the aggregate fees to be collected from all Minnesota sources by the MPCA must not include any amount in excess of 4000 tons per year of each air pollutant from a source. Payments by each source also should not be determined on any emissions in excess of 4000 tons per year of each pollutant. Additionally, a "source" should be defined as all stationary sources located within a contiguous area.

Fee Applicability and Scope

Fees rules should apply to all sources required to obtain an air emissions facility permit under Minnesota Rules. The per-ton charge should be consistent among source categories and types of pollutants. This will spread the fees fairly among sources.

Pollutants on which the income is based should be those that, for a specific source category, are currently regulated by laws or rules, not permits. There has not always been consistency on which pollutants are regulated in one source's permit compared to another permit for the same source category. Using the 1988 emissions inventory removes this concern.

Fee rules should state from which pollutants income will be generated and for which MPCA activities the income will be used (not litigation or enforcement action). Also, there should be no double counting of pollutants (e.g., total suspended particulate and PM-10).

CEM and Stack Test Data

MPCA has stated that 1988 MPCA air pollutant emission inventories are being considered for use in calculating fiscal year 1992 fees based on actual emissions. MPCA, in a memo dated June 1991 from Kim Sandrock to Lisa Thorvig, discusses a proposed policy for accepting CEM and stack test data as actual emissions. The memo says, "At this time the CEM and stack test data are not being considered for use in the emergency fee rule."

Why not? The CEM and stack test data has been required for proving ongoing compliance with federal and state emission limits; MPCA has required that certain CEM quality assurance measures be performed and 90% uptime met; MPCA has required that CEM maintenance and drift check records be maintained; MPCA has required that monthly or quarterly excess emission reports be submitted based on CEM data; MPCA has required approval of stack test plans and results; data used to determine Clean Air Act Amendments Title IV Phase I and II applicability and allowance allocation was based on CEM numbers; and the MPCA emission inventories even request company-estimated emissions.

If CEM and stack test data are not used, the substitute is calculations based on AP-42. The emission factors in AP-42 certainly are not more accurate than site-specific measurements. Ignoring the existing CEM and stack test data for determining fees--even for one year--sends a very confused message to sources and the public. It also would be another use of incorrect emissions information, which gets quoted. NSP has been working with MPCA to correct this problem.

If MPCA wishes to tighten CEM quality assurance paperwork, then a requirement to submit results of an annual quality assurance check could begin with 1992 data. Perhaps by then MPCA also will be in a position to conduct timely reviews of CEM audits and stack test reports.

Thank you for your consideration of these comments. I can be contacted at 330-5520 for any additional discussion on how the fees will affect NSP.

Sincerely,

Nancy C. Lowe

RE: Proposed Emergency Rules Relating to Air Quality Permit Fees

Dear Sir:

As a member of the seasonal construction industry in Minnesota, the following issues should be considered in your emergency rules and on permanent action to follow.

1) Actual vs. Potential Emissions

I have no problem with the concept of paying for your actual plant emissions. However, in an industry where perhaps 95% of our competitors do not have air quality permits, it becomes an economic hardship to pay for unused plant capacity. I would strongly urge the use of actual emission based on a yearly inventory.

2) 4000 Ton Cap on Payments

I am strongly opposed to a break on tonnage. If the true goal is to reduce pollution, then perhaps we should have an increasing rate structure for the large polluters to give an economic incentive to improve production facilities and reduce pollution. At least the large polluters should pay their fair share.

3) Who Should Pay - The 1988 inventory seems to be a good starting point. However, it would seem reasonable to include new applicants since 1988 and have enforcement start actions for operators without permits.

Thank you for considering these ideas. I will be available at 612-251-7141 if you have any questions.

Sincerely,

Don Vry

July 9, 1991

Dear Mark,

Thank you for informing us of the MPCA's intent to adopt the proposed emergency rules parts 7002.0400 to 7002.0450. As I advised you on July 9, 1991, our firm has recently upgraded our oat processing plants pollution control equipment in Ada, Minnesota by removing all of our high efficiency cyclones and installing a $130,000 Mac bag filter. The net result of this upgrade is that the 38 tons of grain particulate your agency previously estimated that our facility emitted has been totally eliminated. We suggest that it would be completely unfair to propose assessing a fee based on 1988 estimates of particulate emmissions that no longer exist. We further suggest that if your agency adopts a policy such as is currently proposed, firms such as ours would have no economic incentive to install state of the art pollution control equipment such as we have done. To add insult to injury, the proposed rules would charge firms such as ours a fee based on estimated emmissions by a previous owner since we did not purchase the plant until July 16, 1990.

Please pass our comments on to whomever you deem appropriate. I appreciated your time and consideration during our phone conversation today.

Sincerely,

Steve Riley, V.P.-C.O.O.

Mr. Mark Strange
Air Quality Division
MINNESOTA POLLUTION CONTROL AGENCY
520 Lafayette Road
St. Paul, MN 55155

Dear Mr. Strange:

SUBJECT: NOTICE OF INTENT TO ADOPT EMERGENCY RULES GOVERNING AIR QUALITY PERMIT FEES

We suggest the following changes to these proposed rules in order to provide a permittee with some reasonable assurances that MPCA will respond in a timely manner in the event that a dispute occurs or that an error has happened. We also object to the penalty charges as being excessive. Your proposed emergency fee schedule could result in cases where a permit fee would be $150,000-$300,000. It is totally unreasonable and excessive for MPCA to collect such fees in one lump sum. A monthly payment schedule should be setup for any permit fees in excess of $2,500 per year. It is totally unreasonable and unrealistic to expect any business to make such a large lump sum payment.

SECTION, 7002.0430 (EMERGENCY) PAYMENT OF FEE: Change to allow twelve (12) equal monthly payments for any permit fee in excess of $2,500 per year.

SECTION, 7002.0440 (EMERGENCY) LATE PAYMENT: The proposed late payment fee is excessive. A reasonable fee of 1% or 1.5% per month would be more realistic.

SECTION 7002.0450 (EMERGENCY) NOTIFICATION OF ERROR: Your proposed rule puts no responsibility on MPCA for a response. Here again, a permittee could be responsible for thousands of dollars in permit fees while the MPCA is not required to acknowledge a Notification Of Error.

SUGGESTED CHANGES: MPCA must respond, in writing, within forty-five (45) days of receipt of the Notification Of Error. If MPCA does not agree with the permittee it shall provide detailed information and calculations supporting its calculated fee. If upon receipt of the MPCA answer to the Notification Of Error the permittee does not agree with MPCA, the permittee shall, within

thirty (30) days of receipt of the MPCA response, request, in writing, to meet with MPCA representatives. MPCA must meet with the permittee within forty-five (45) days of receipt of the permittee's letter. If, after meeting, the parties cannot agree to the fee calculation, the dispute must be resolved by the MPCA Board. The permittee shall, within forty-five (45) days following the meeting, request in writing a formal fee determination. The MPCA must, within forty-five (45) days, provide the MPCA Board with the permittee's Notification Of Error, the MPCA's calculations and any other pertinent information. The MPCA Board must resolve the dispute within sixty (60) days of receipt of Notice Of Dispute from the MPCA. The permittee shall be given thirty (30) days advance notice of the MPCA Board meeting and will be allowed opportunity to address the Board and answer questions prior to the MPCA Board's final decision.

Failure to meet the deadlines listed in this section will result in automatic resolution imposed against the party failing to meet the time limits. Refunds of fee overpayment, and underpayment of fee amounts shall be assessed an interest rate of 1% per month.

The intent of the suggested changes is to make the impact of these fees more reasonable, to provide an avenue of review and appeal, to require written MPCA response to a Notification Of Error, to provide a dispute resolution mechanism, and generally impose on the MPCA a responsibility similar to that being imposed on the citizen. Any proposed rule and system that meets these requirements would be more satisfactory than the currently proposed Emergency Rules.

If you have questions, you may contact myself at 218/628-4101 or Mr. G.C. LaValley at 218/628-4103. We believe the suggested changes would make the Emergency Fees more palatable and fair.

Sincerely,

W H Harrison

Subject: Proposed emergency rules governing air quality permit fees.

Dear Mr. Strange:

As individuals, and as a company, we are greatly concerned with the present and the future condition of our environment. We feel and realize that steps must be taken to safeguard the environment for the generations that follow. The enactment of the Clean Air Act of 1990 should, and will prove to be very beneficial to the future of our environment.

As with any program or act, implementation and enforcement is just as important as the passage of the act itself. We must keep in mind that it will be the consumer who will ultimately bear the costs associated with this program.

In order to minimize the costs that are to be incurred by the consumer, certain points must be kept in mind. First of which is continuing to maintain no cap on regulated pollutants emissions for fee calculation. We feel that small utilities such as ourselves would be paying more than their fair share of the cost of the permit program if a cap is implemented for fee calculation. We also feel that the floor of 25 tons per year is adequate to insure that all significant pollution sources are covered.

Secondly, the fees should be based on actual emissions vs. potential emissions, and should cost no more than $10.00 per ton of regulated pollutants.

Also of concern to us is the continuance of operational flexibility within the permit. Without such flexibility, utilities will be severely hampered in their attempt to provide the best possible service and rates to their customers. The use of "minor" permit amendments will not only be less expensive, but also less time consuming, for both the source and the permitting authority.

In closing, let me re-emphasize the need to maintain no cap on emissions for fee calculation, to maintain a lower permit fee per ton, to maintain the 25 ton per year floor, and to allow continuance of operational flexibility within the permit.

Sincerely,

WILLMAR MUNICIPAL UTILITIES

Subject: **Proposed Emergency Rules**
Air Quality Permit Fees

Certified Mail

Air Quality Division
Minnesota Pollution Control Agency
520 Lafayette Road North
St. Paul, MN 55155

Attention: Mark Strange

Dear Mr. Strange:

3M Company has reviewed the text of the Proposed Emergency Rules Relating to Air Quality Permit Fees, (Proposed Minn. Rules Parts 7002.0400 *et seq.*). By way of this letter we are sending you our comments on this proposal.

Under the proposed rule, the fees for fiscal year 1992 are to be based upon the facilities' Emissions Inventories submitted for 1988. (Proposed Minn. Rules 7002.0420) These fees are to support the Air Quality Program at the MPCA.

Using data that is over three years out of date is inherently inaccurate. Supporting a vital state program by fees apportioned on basis of old data is likewise inequitable and unreasonable.

The Informational Statement accompanying the proposed rule explains that the "simplicity of the fee assessed in the emergency rule is necessary given the time frame under which it had to be developed." (page 8) But simplicity and expediency in choosing the quickest alternative does not compensate for a standard of fairness and equity, which must be the predicate of any regulation. Clearly, there is sufficient time available to both the facilities subject to the rule and the MPCA staff charged with collecting the fees, to allow for a more equitable and accurate basis for the fees, based upon known and readily available data.

3M Company, like many other responsible companies in Minnesota, has been actively seeking and implementing ways to reduce air emissions from all of our plants, including those in Minnesota. For example, our Tape Manufacturing Division plant in St. Paul has installed state-of-the-art control technology under 3M's 3P+ program. This equipment, operated since 1990, reduces VOC emissions by 80%. Facilities which have expended resources in reducing air emissions should stand to benefit from their efforts. Ignoring

such advancements would be a step backwards from government policies encouraging voluntary reductions.

Furthermore, the proposed rule does not recognize facilities and equipment which are no longer in operation. As a case in point, 3M's Chemolite Industrial Abrasives plant in Cottage Grove, MN, which reported emissions of 2496 tons of volatile organic compounds (VOCs) in 1988, has since shut down all of its largest emitting equipment at this plant, and emitted only 11 tons in 1990. The rule should provide flexibility to accommodate this type of situation,

We propose that, if an out-of-date source of emission data must be used to accommodate emergency conditions, the emergency fee rules must include some provision allowing an owner or operator to depart from the 1988 emissions levels when it can be demonstrated that the 1988 inventory is no longer representative of present operations

We realize that this rule will only control fees for one fiscal year, and we appreciate the urgent schedule under which you have developed this program. However, we believe that the need to develop an emergency program does not justify, even for one year, apportioning the financial burden on an inequitable basis.

Thank you for this opportunity to have our comments considered. We are anxious to participate in the development of the permanent fees rule when the time comes. If you have any questions on this matter, please contact me at 778-6014.

RECEIVED
Minnesota Pollution Control Agency
Division of Air Quality

August 1, 1991

Mr. Mark Strange
Air Quality Division
Minnesota Pollution Control Agency
520 Lafayette Road
St. Paul, MN. 55155

Dear Mr. Strange:

While we recognize that the Agency, in establishing rules instituting a new fee requirement covering air quality emissions is following mandates of the Federal Clean Air Act and the Minnesota legislature, we do feel obliged to make these general comments.

Basicly we feel that the utilization of the 1988 emissions inventory as the basis for applying the fee schedule carries with it some real inequities. Use of the 1988 inventory has the result of imposing the great bulk of the cost upon major sources only. In our instance, it appears that the seven taconite operations will be paying more than 15% of the total amount of fees collected. The 1988 emissions inventory fails to address the total profile of pollution sources in the State, thus imposing a disproportionate burden upon those large sources who reported emissions in 1988. This means that the data used does not reflect any mitigating steps that have been taken, or are being taken, resulting in a distortion of the amount of emission on which the fees are based.

Also we question the efficacy of applying the same dollar value to each of the four pollutants. Since some conceivably could be more deleterious than others.

We recognize that these issues may well be addressed as you go to permanent rules, knowing you have little other recourse, under the terms of the legislation, to proceed other than you have. However, as an Industry facing extremely negative economic conditions due to the current decline in the steel industry, the increased costs as a result of the new fee schedule comes at a most difficult time for our Industry, as it strives to respond to intense economic pressures to control and reduce our costs.

Sincerely,

Alfred E. France
President

Re: Comments On Proposed Emergency Rules Governing Air Quality Permit Fees, Minn. Rules Pt. 7002.0400 to 7002.0450

Dear Mr. Strange:

I am an attorney representing Tower Asphalt, Inc. On behalf of Tower Asphalt, I am writing to comment on the Proposed Emergency Rules Governing Air Quality Permit Fees, Minn. Rules Pt. 7002.0400 to 7002.0450.

Attached to the Proposed Emergency Rules is a list of various companies and their emissions of PM10, SOX, NOX, and VOC's. The "Tons Per Year Emitted" by Tower Asphalt, Inc., as listed in the report, exceed the actual emissions by Tower Asphalt. Kim Sandrock of the Minnesota Pollution Control Agency informed me that the emissions data is the result of a calculation based solely on each

company's production data, rather than actual emission test results. We would like the record to reflect clearly that Tower Asphalt's actual emissions are less than those stated in the attachment to the Proposed Emergency Rules.

Thank you for your attention.

Very truly yours,

LEONARD, STREET AND DEINARD

ENVIRONMENTAL AFFAIRS DEPARTMENT

August 2, 1991

Mr. Mark Strange
Air Quality Division
Minnesota Pollution Control Agency
520 Lafayette Road North
St. Paul, MN 55155

AUG 05 ...

Dear Mr. Strange:

The Ashland Petroleum Company is herewith submitting comments on your Proposed Emergency Rules Relating to Air Quality Permit Fees. It is evident from the proposal that the MPCA recognizes the changing and expanding requirements necessitated by the CAA and the need to balance fiscal responsibility with industry's ability to pay for general welfare benefits. There are several areas, however, where this proposal neither serves the public nor the regulated communities. Detailed comments on the provisions of particular concern are attached.

Should you decide that a committee or task force with industry representation would be helpful, please contact me and I would be pleased to be of service.

Respectfully yours,

Charles D. Bennett

Ashland Petroleum Company
Committed to a Quality Environment

ASHLAND PETROLEUM COMPANY
COMMENTS ON PROPOSED
EMERGENCY RULES RELATING TO AIR QUALITY PERMIT FEES

1. Emergency Rule Powers

The use of emergency rules powers is unnecessary and prejudicial when used to establish such a major program which has such a significant effect on all industry and a significant prejudicial effect on larger industry. For the reasons stated below, Ashland believes that such a program should not be entered into hastily and arbitrarily, but rather should be analyzed and designed equitably so that agency expenses are borne equitably by, at least, all permittees and applicants. An improved program could also be designed by further coordination with the new Clean Air Act Amendments, as described below. Some consideration should be given to some fiscal contribution by the true beneficiaries of the program, the general public; without some such contribution, it is doubtful that the rule can be justified as one with benefits in excess of costs.

2. Overpayment Refund

The governing statute, Minn. Stat. §116.07 Subd. 4d, permits the collection of permit fees to finance current and prospective agency operations. The use of three-year old emissions data as proposed could be used to estimate agency costs three years ago, but it is unreasonable and arbitrary to assume that such data could be used to apportion costs currently or prospectively. This is especially true of companies such as Ashland that strives to reduce emissions wherever possible in which case annual emissions would be decreasing with time. We therefore request formal clarification of Rule 7002.04 50, Notification of Error. Specifically, we request clarification that an overpayment refund will be credited to the permittee's account when its current, or latest year, emissions are shown to be less than aged data used to calculate the fee. While such a clarification would not cure statutory deficiencies of the method of calculation, it would recognize emission reduction efforts that have occurred over the past three years, would continue to encourage current and prospective emission reductions, and would provide an equitable means of adjusting the fees to resemble actual emissions.

3. Late Payment

Objection is made to the 20% and 10% punitive measure of Rule 7002.0440, late payment, merely because a fee payment is late. Any such measure is unrelated to any actual costs incurred by agency, and further, it is arbitrary because it is based on speculation that some permittees might not pay.

Although it appears a legitimate concern that permit fees will cause industry to move elsewhere, it is unfair and discriminatory that such an extreme collection measure be taken in order to "cover that contingency that some sources will not pay"; if some sources don't pay, then the MPCA should deal directly with those sources rather than shifting its enforcement and collection burdens and the resulting fiscal deficiencies to legitimate permittees.

4. Twenty-five Ton Threshold

The cost apportionment plan that exempts permittees from the permit fee rules for those with emissions of less than 25 tons is arbitrary, discriminatory and contrary to sound environmental policy management. All permits have administration costs, irrespective of their actual emissions; it is arbitrary and discriminatory that greater than 25 tpy sources be made to pay for the administration of permits from all of the smaller less than 25 tpy sources. It would be reasonable and appropriate to calculate one equitable base fee by dividing the total cost of the permit processing program (exclusive of enforcement) by the total number of permittees, as is usually the case in licensing fee programs. If a particular source needs unusual attention, then the statute provides sufficient authority to recoup expenses. The 25 tpy threshold, as proposed, will also encourage the establishment of numerous small company spin-offs, to circumvent fees, thus escalating permit management complexities, however, an equitable fee structure would prevent such a result. Also of concern is that a new major source which is hypothetically proposed to be constructed; since its emissions would not be in your three-year old data base, it would have no fee imposed during its first few years of operation; the method of calculating fees in such a case strongly discriminates against existing industry in favor of newly constructed or proposed sources; existing industry is being made to pay for new sources.

5. Federal Clean Air Act Amendments Conflict

There is no indication that the 1990 CAAA directly require or indirectly necessitate additional fees at this time. The 1990 CAAA will require fees to fund new federally mandated operating permit programs beginning in a few years. Also, there is nothing in the MPCA's directives that prohibit the redistribution of current resources to meet both state and federal mandates concurrently. MPCA resources would therefore better serve the public interest by adopting Clean Air Act requirements for air toxics that will control the vast majority of sources in Minnesota. This good management practice would allow MPCA resources to be redistributed to develop control requirements for air toxics sources that are unique to Minnesota and offset

the need for additional fees. It is in the public's best interest to have the state identify and regulate air toxics problems that are specific to Minnesota while allowing the burden of developing regulations for a broad class of sources to be assumed (as required by the 1990 Clean Air Act Amendments) by the federal government. This also allows Minnesota to economically compete with other states that are adopting federal clean air requirements; industries considering Minnesota will not be faced with additional, unpredictable requirements that discriminate and that are based on outdated data.

Subject: Proposed Emergency Rules Governing Air Quality Permit Fees (Minn. Rules Parts 7002.0400 to 7002.0450)

Dear Mr. Strange:

The purpose of this letter is to provide the Minnesota Pollution Control Agency (MPCA) with Minnesota Power's comments regarding the proposed emergency rules on air quality permit fee assessments.

Fee Applicability and Scope

Minnesota Power understands the need for air quality permit fees as it relates to funding state programs and provide resources to implement the requirements of the 1990 Clean Air Act Amendments (CAAA). We endorse the collection of permit fees provided the assessment is consistent and fair.

We are concerned about controlling costs associated with this fee program. Industry will be essentially funding the MPCA air quality programs beginning in 1992. Therefore, Minnesota Power recommends that industry be provided sufficient notice and opportunity to participate jointly with the MPCA to determine program costs and needs. This process would also allow industry to have upfront information necessary to plan and budget for program costs.

The proposed emergency rules will have an immediate and significant financial impact on Minnesota Power. Based on preliminary determinations, we will be assessed approximately $350,000 in October of this year. This assessment will be in addition to annual permit fees of $20,000 which we have already paid in 1991. Also, it appears that future assessments for fiscal year 1993 will be even higher and have an even greater financial impact on Minnesota Power.

Actual versus Potential Emissions

Minnesota Power agrees that the permit fee assessment should be based on actual emissions instead of "potential to emit" emissions. This should encourage pollution prevention and is consistent with the Environmental Protection Agency's (EPA) recommendations.

Actual versus 4000 Ton Cap

Since the permit fee assessment is based on actual emissions with no cap, the difference between actual and capped emissions represents an approximate $200,000 additional cost for Minnesota Power in 1991. By not placing a cap on emissions, Minnesota Power is concerned that it may be placed in a situation where we are, in effect, subsidizing air permit related costs for other industry in Minnesota. Minnesota Power recommends the fee structure be designed to reflect actual service costs associated with air permit issuance/reissuance, maintenance, enforcement, indirect and related program development.

Minnesota Power respectfully submits these comments for the Agency's review and consideration. Should you have any questions regarding the enclosed information, please contact me at 218/722-2641.

Sincerely,

Dennis L. Niemi
Environmental Engineer

Cleveland-Cliffs Inc

August 2, 1991

Mr. Mark Strange
Air Quality Division
Minnesota Pollution Control Agency
520 Lafayette Road
St. Paul, MN 55155

Dear Mr. Strange:

Re: In The Matter Of The Proposed Emergency Rules
Governing Air Quality Permit Fees
Minnesota Rules 7002.0400-.0450

Cleveland-Cliffs Inc is the managing agent for Hibbing Taconite Company and LTV Steel Mining Company. It is the position of Cleveland-Cliffs Inc that the proposed emergency rules are unreasonable for the reasons set forth below:

1. Hibbing Taconite Company and LTV Steel Mining Company have been paying approximately $5,000 per year in air permit application, processing and annual fees. Under the proposed rules Hibbing Taconite Company's fee for fiscal year 1992 would leap to approximately $30,000, while LTV Steel Mining Company's would skyrocket to approximately $168,000. This enormous increase in annual fees is not reflected in any increased services from the MPCA or any increase in emissions, and is therefore unreasonable.

2. The MPCA has not demonstrated that $3,567,368 is a reasonable figure for the costs required to develop and administer the permit program requirements of Title V of the Clean Air Act Amendments of 1990, Public Law No. 101-549. That figure may include amounts which go beyond the appropriate direct and indirect costs of the program. It is unreasonable to impose upon facilities such as Hibbing Taconite Company and LTV Steel Mining Company such a large percentage of the total costs without giving them a voice in controlling the costs.

3. The MPCA included in the calculation of the aggregate amount to be collected under the fee rules amounts in excess of 4000 tons per year of each air pollutant from a source. This violates Minnesota Statute 116.07, subdivision 4d.

Suite 811-200 West Superior Street • Duluth, MN 55802 • 218/722-2605 • 218/722-0566

4. The MPCA has excluded pollutants for which an emission facility did not emit 25 tons. This eliminates a significant source of fees and places an unreasonable burden on facilities which emit more than 25 tons. Small emission sources should pay a proportionate fee. Large industries with small emissions should pay a fee because their permits take as much staff time and expense to issue and maintain as other permits do.

5. The selection of the four pollutants (SO_2, NO_x, VOC and PM-10) is arbitrary and unreasonable. Other facilities may be emitting pollutants which are regulated under sections 111 or 112 of the Clean Air Act which are more harmful to the environment than the four which were designated. It is also arbitrary and unreasonable to attach the same fee to each of the four. A ton of VOCs are likely to be more harmful to the environment than a ton of PM-10.

6. Hibbing Taconite Company and LTV Steel Mining Company have participated in an air permitting system which allocated its fees based on services provided. Under the proposed emergency rules, they will be suddenly paying a much higher percentage of the program. Had they known the system would be changed, they could have participated in a different way in the past. They are now paying a much higher percentage of the cost of a program which they did not create.

7. Emission facilities with large emissions of the four designated pollutants will pay for a high percentage of the permit program. This includes the cost of issuing permits to a large number of small emission facilities which will no longer be paying fees. The permit criteria of the potential to emit more than 50 tons does not fit with the requirement of a fee if "actual" emissions are greater than 25 tons.

8. The MPCA should retain a system of service-based fees to prevent the system from being unfairly skewed toward emitters of large amounts of the four designated pollutants.

9. The selection of 1988 reported data is arbitrary and unreasonable for the collection of fees for the 1992 fiscal year. Facilities which have come on line after 1988 are not included. Facilities which have substantially reduced emissions since 1988 through expenditures for pollution control equipment are being unfairly penalized.

10. The system for establishing the fees in the proposed rules provides no incentive to reduce pollution emissions. If all of the emission facilities were to reduce their emissions by half, the system would simply double the amount of the fee per ton, resulting in the same amount being paid.

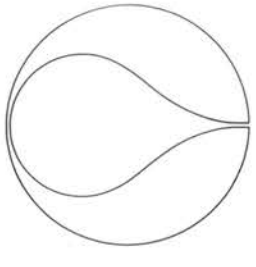
Re: Proposed Emergency Rules Relating to Air Quality Permit Fees

Dear Mr. Strange:

I write to submit the comments of Cargill, Incorporated Commodity Marketing Division on this Proposed Emergency Rulemaking. The Commodity Marketing Division (CMD) of Cargill, Incorporated operates sixteen country grain elevators in rural Minnesota. Four of these entities, Dodge Center, Alberta, Pipestone, and Marna country elevators, are assessed fees under this proposed emergency rule.

1. It is not Fair or Reasonable to Base Fiscal Year 1992 Fee Assessments on a Calendar Year 1988 Emissions Inventory.

The proposed rules impose fees based upon calculated annual emissions for calendar year 1988. The Minnesota Pollution Control Agency (MPCA) justifies this because emissions data most recently collected for calendar year 1990 cannot be subject to quality assurance requirements until December 1991 or later. CMD submits that 1990 data that has not undergone the MPCA's rigorous quality assurance protocol will still be more accurate than that collected for calendar year 1988. CMD's position is based upon several glaring deficiencies in the emergency rule's proposal to base assessments on the 1988 emissions inventory, four of which are explained below.



a. The Proposed Rule Fails to Assess Fees of New Sources That Have and Will Continue to Require a Tremendous Amount of the MPCA's Resources.

Many new and significant sources of air pollutants have become operational since 1988. These facilities are not included in the 1988 emissions inventory, but have placed and will continue to place disproportionate demands upon the MPCA's resources. Data regarding emissions from these sources should be readily available to the MPCA and easily incorporated into any fee structure the MPCA adopts. We should not be asked to subsidize these sources.

b. CMD Facilities Have Upgraded Their Facilities and Pollution Control Efforts Since 1988 and This Rule Unjustly Penalizes These Efforts.

Since calendar year 1988, CMD has upgraded its facilities and pollution control efforts voluntarily at virtually all of its facilities. At its Alberta country elevator, CMD is installing a bag house, and took the wooden elevator and feed mill out of service. At its Bingham Lake country elevator, CMD took the wood elevator out of service, installed an oil additive system to prevent fugitive emissions during the transfer of grain and replaced the basement conveyor with a totally enclosed conveyor.

At facilities that are not subject to the fee, CMD also took steps to improve pollution controls. An oil additive system was installed at the Gluek and Maynard country elevators. At Graceville, the wooden elevator was closed. At Guckeen, the feed mill was closed and an oil additive system was installed. Effective August 1991, Hills has a completely new elevator with totally enclosed conveyors and legs and a baghouse. The feed mill was closed at Litchfield. Finally, at the Alpha country elevator, the basement conveyor was replaced with a totally enclosed conveyor.

Basing fees for fiscal year 1992 -- and, it appears possible, for fiscal year 1993 -- on 1988 calendar year emissions penalizes sources that have taken voluntary steps to reduce air emissions. We are very disappointed that the MPCA chose the "easiest" method for collecting these fees rather than putting the resources into this project necessary to promote its overall policy objectives.

c. Motor Vehicles Should be Assessed Fees.

MPCA states that the legislature is requiring it to fund all air division programs, not just those aspects that deal with stationary sources of air pollution. Why then has

the MPCA determined to relieve automobile owners of their responsibility for air pollution? MPCA television advertisements assert in strong terms that automobile exhaust is a major cause of air pollution and poses an imminent threat to our quality of life. MPCA has spent a considerable amount of time reworking traffic patterns in metropolitan areas and instituting the vehicle emissions inspection program that is now in effect in the Minneapolis-St. Paul metropolitan area. Because mobile sources make such demands upon the MPCA's resources, they also should be subject to this assessment.

Assessing a fee of motor vehicles would be a very easy task. A surcharge simply could be added to the annual registration fee each Minnesota automobile owner must pay. Clearly, this can be done, since a fee has been added to cover vehicle emissions testing. MPCA should be able to fairly accurately determine the revenues that would be generated by such a surcharge because the number of registered vehicles in Minnesota can be readily determined from state motor vehicle records. Why should small, rural grain elevators be subsidizing resolution of urban pollution problems caused by urban motor vehicles?

d. The Proposed Rule Assesses for the Four Pollutants Covered by the 1988 Emissions Inventory, Completely Ignoring a Large Group of Sources and Large Number of Pollutants that are Regulated by MPCA Permits.

The proposed rule focuses on the sources of only four contaminants -- PM10, SO_x, NO_x, and VOC. Sources of numerous other contaminants (e.g., mercury from the Minneapolis incinerator) are not assessed any fees for these emissions. This is true even though the MPCA has spent a considerable amount of staff time on developing its Air Toxics guidelines, undoubtedly regulates numerous sources for these contaminants, and has a data base of reported emissions for these contaminants. If nothing else, SARA Title III inventories provide this information on an annual basis and this information already has been compiled for calendar year 1990.

This proposed rule is particularly unfair because it not only exempts such emissions from assessment, but if the source does emit PM10, SO_x, NO_x or VOC, it completely escapes payment to the MPCA air program because the proposed rule eliminates payment of permit fees! This is grossly unfair to small, rural grain elevators in PM10 attainment areas that make virtually no demands on MPCA's resources.

2. Fee Caps Should not be Included in the Emergency Rule.

CMD approves of MPCA's decision not to impose fee caps. As discussed in previous paragraphs, CMD is convinced that it already is subsidizing the emissions of numerous stationary and mobile sources because the rule is based upon an outdated emissions inventory for only four of numerous regulated pollutants. Imposing fee caps would only increase that burden. Further, caps create no incentive for pollution sources to reduce their emissions once they hit the cap threshold. As a matter of public policy, the cap must be rejected.

3. Conclusion

CMD's comments are necessarily limited in scope and depth due to the very limited amount of time allowed for comment. CMD's primary concern is that the framework established in this emergency rulemaking will form the basis for discussions regarding the permanent rule. MPCA set forth a dangerous precedent, only a few of the inequities of which are discussed in this memorandum. We look forward to working with the MPCA through our trade associations to address these and other concerns in the permanent rulemaking proceedings.

Very truly yours,

Dale Fehrenbach
Assistant Vice President and
Manager, Plant Operations

Farmers Elevator Association of Minnesota

Since 1907

August 5, 1991

Mr. Mark Strange
Air Quality Division
Minnesota Pollution Control Agency
520 Lafayette Road North
St. Paul, MN 55155

Dear Mr. Strange:

The Farmers Elevator Association of Minnesota, which consists of nearly 400 country elevators located in Minnesota, wants the record to show its opposition to adoption of emergency rules governing air quality permit fees (Minn. Rules Parts 7002.0400 to 7002.0450. The adoption of these proposed emergency rules serve no purpose other than generating additional revenue for the Minnesota Pollution Control Agency (MPCA). The proposed 300 plus % increase in the fee per ton of emissions is excessive ($7.60/ton - $25/ton) and inappropriate without a more formal process in place to assess the air quality program in general.

The MPCA regulation of potential sources of airborne dust is very discriminatory. The list of current permitted facilities seems to contain an excessive number of grain elevators versus other industry generators. The elevators on the list seem to have been randomly selected based on the discriminatory application of the MPCA air emission permit authority. As a result, the country elevators on the current list are being unfairly punished financially for compliance with the regulation. The list also contains several facilities than have been closed or have changed ownership, in one case over 3 years ago. This points to a real problem with the air emission permitting system. It is very difficult to allow such an excessive increase in fees for a permitting system that is so flawed in its application and purpose.

For our industry (grain elevators), the use of 1988 inventory reporting data for fee assessment is unfair and even unethical. The year 1988 was the year the United States Government chose to aggressively eliminate much of its grain inventory being stored in most elevators. As a result, the throughput for many of the elevators on the MPCA list was unusually high which will result in an excessive fee. The use of your more current available 1990 inventory data would more accurately reflect the typical throughput of an elevator. However, the emergency rules process being used does not allow time to bring this available data into the fee discussion. Again, a clear example of how unjust and discriminatory the air emission permitting system has been and will continue to be unless the system is curtailed and analyzed in terms of need and purpose.

PHONE: 612-339-5043 • FAX: 612-339-5673 • 852 GRAIN EXCHANGE • MINNEAPOLIS, MN 55415

We find it increasingly difficult explaining the need and cost of these permits when no value is given in return, i.e., authority, monitoring or technical assistance. The Occupational Safety and Health Administration (OSHA) has become the major player in our industry, including standards related to air emissions. Perhaps a better understanding of the OSHA process and regulations could lead to the elimination of this obvious financial drain on MPCA resources and confusing duplication in efforts to limit dust emission.

We certainly have a vested interest in this issue and would appreciate the opportunity to be contacted when the MPCA decides it`s time to pursue permanent rules on air emissions and fees. For some reason, we were not notified concerning the intention to adopt these emergency rules.

Thank you for the opportunity to comment on the proposed emergency rules. If we can be of service, please don't hesitate to contact us.

Sincerely,

Bob Zelenka

Re: In the Matter of the Proposed Emergency Rules Governing Air Quality Permit Fees, Minnesota Rules Parts 7002.04002-7002.0450

Dear: Mr. Strange

The Northwest Agri-Dealers Association is a trade association composed of country elevators, feed mills and fertilizer dealers with our principle membership being in the State of Minnesota. We have several problems with the proposed emergency rules as published. They are as follows:

1. The base year 1988 represents the high point of grain volume activity due to government grain storage and resulting movement of the grain. There have been very few years prior to that and I am certain that there will be very few years after that, that we will see those kinds of volumes. Therefore, the grain industry will be unduly impacted by using 1988 as the base year.

2. Using 1988 as a base year also does not impact firms who may subsequently have registered and submitted data thereby, creating an additional competitive disadvantage for those firms who have complied with the law.

3. The proposed emergency rules do not give consideration to firms who have installed pollution control equipment since 1988. One of the goals of both the legislature and the MPCA must be to encourage firms to improve dust collection and to reduce admissions. This type of a proposal whose only focus is budget will tend to work against those goals.

4. The proposed fees will be increased by over 300 percent from the current $7.60 per ton charge for particulate emission to $25 per ton. This fee increase is unconscionable regardless of the reason. In addition, the above cited items coupled with the percentage increase unduly punish those who comply versus those who do not.

Warren Gerdes, Vice President
Farmers Co-op. Elevator Company
Buffalo Lake, Minnesota

Richard Dummer, President
Blue Earth Farmers Elevator Co.
Blue Earth, Minnesota

Thomas Cashman, Executive Vice Pres.
303 Lundin Blvd. P.O. Box 698
Mankato, Minnesota

5. In looking at the list of firms who have supplied the breakdown of their inventory in 1988, we strongly suspect that some of those firms may have fallen below the threshold level for reporting and yet they will be affected by this fee increase.

In conclusion, Northwest Agri-Dealers Association opposes the use of 1988 as a base year and we also feel that the flat rate increase of over 300 percent is unwarranted. We recognize the agency's need for revenue, but by using the 1988 base year and the 300 percent increase in fees, the MPCA will discourage compliance and create a competition disadvantage. We strongly encourage the agency in using more current inventory data.

We would be most happy to supply information on grain movements, to the MPCA, if you would like a more in-depth look at grain volumes.

Sincerely,

Tom Cashman

Re: In the Matter of the Proposed Emergency Rules Governing Air Quality Permit Fees, Minnesota Rules Parts 7002.04002-7002.0450

Dear: Mr. Strange

The Northwest Agri-Dealers Association is a trade association composed of country elevators, feed mills and fertilizer dealers with our principle membership being in the State of Minnesota. We have several problems with the proposed emergency rules as published. They are as follows:

1. The base year 1988 represents the high point of grain volume activity due to government grain storage and resulting movement of the grain. There have been very few years prior to that and I am certain that there will be very few years after that, that we will see those kinds of volumes. Therefore, the grain industry will be unduly impacted by using 1988 as the base year.

2. Using 1988 as a base year also does not impact firms who may subsequently have registered and submitted data thereby, creating an additional competitive disadvantage for those firms who have complied with the law.

3. The proposed emergency rules do not give consideration to firms who have installed pollution control equipment since 1988. One of the goals of both the legislature and the MPCA must be to encourage firms to improve dust collection and to reduce admissions. This type of a proposal whose only focus is budget will tend to work against those goals.

4. The proposed fees will be increased by over 300 percent from the current $7.60 per ton charge for particulate emission to $25 per ton. This fee increase is unconscionable regardless of the reason. In addition, the above cited items coupled with the percentage increase unduly punish those who comply versus those who do not.

Re: Proposed Emergency Rules to Amend Air Pollution Permit Fees

Dear Mr. Strange:

NSP's review of the proposed emergency rules relating to air quality permit fees shows that the rules are not equitable. Please consider the following issues.

The first issue is regarding NSP's portion of the costs. According to the proposed rules and MPCA's version of the 1988 emissions inventories, NSP's share of fiscal year (FY) 1992 permit fees is **$1.6 million** ($7.59 x 209,217 tons). NSP's 18 permitted facilities, which comprise only about 2 percent of the state's 885 stationary source permits, will be charged **44.5 percent** of the fees for FY 1992. We do not believe it is appropriate to require NSP to subsidize the other 867 stationary source permittees in the state of Minnesota.

Our experience indicates total facility emissions do not reflect the actual costs incurred by the MPCA to administer an individual permit. Smaller sources often require as much or more agency resources than larger emission sources.

The emergency rules do not cap the fees assessed on a source. As a result, large sources like NSP would pay the majority of the amount collected. In the Informational Statement, MPCA argues a maximum cap was not included because it would result in a higher per-ton charge for all sources. This argument is not persuasive.

The use of a higher per-ton charge is consistent with the amount per ton that will be collected in fiscal year 1994 and thereafter. In addition, a 4,000 ton cap for determining the aggregate tons of emissions will be used after 1993.

Also, the cap concept is consistent with the federal Clean Air Act (CAA) and the Minnesota Statutes, and their purpose, which is to collect fees to offset the cost of air quality programs. Large sources are not responsible for the percentage of costs they will be required to pay under the proposed rules.

Lastly, the primary argument for the proposed emergency rules and their structure is simplicity. A cap on the fees assessed on a source does not affect the simplicity.

The second issue is collection of fees beyond the statutory authority. The statute says, "The agency shall adopt fee rules...that will result in the collection, in the aggregate, from the sources listed in paragraph (b), of the following amounts: (1) in fiscal years 1992 and 1993, the amount appropriated by the legislature from the air quality account in the environmental fund for the agency's air quality program..." The amount appropriated from the air quality account is $3,317,000.

The MPCA, however, intends to collect an additional $156,000 to cover indirect costs. It also assumes a fee collection efficiency of 95%. Sources should not have to pay for MPCA's collection inefficiencies.

Also, we state once again that the amounts of pollutants assigned to NSP in the emissions spreadsheet made public with the proposed rules are not the correct amounts. They are in all cases based on general AP-42 calculations instead of our actual measurements.

During the 1991 Minnesota legislative process, NSP met with Lisa Thorvig and Ann Glumac regarding Clean Air Act and Minnesota legislative provisions for permit fees. Before Minnesota's proposed rules were made public, NSP on June 29, 1991 met with MPCA staff to present written comments and discuss concerns. Despite our efforts, the proposed rules put an unreasonable proportion of costs on to NSP. Any assumption that NSP fees under the proposed rules are fair or of no consequence to NSP is incorrect.

Sincerely,

L W Eberley

RE: Air Quality Permit Fees

Dear Mr. Strange:

Williams Pipe Line Company (WPL) appreciates the opportunity to provide comments on the above mentioned proposal. WPL realizes the MPCA is attempting to work within the confines of the 1990 Clean Air Act Amendments, however, there are several items in the proposal that cause us great concern.

WPL has voluntarily implemented various VOC reduction programs since the last major amendment to the Clean Air Act in 1977. Some of these programs were completed after 1988. By using 1988 data in the billing structure, as currently proposed, many of our facilities will receive no credit for the VOC reductions we have initiated. In effect, the new proposal will penalize WPL and any other companies who have initiated pro-active measures to minimize their emissions. The net increased fee that we would unjustly be required to pay, is significant.

WPL submits that a logical and legally supportable regulatory framework would use emission data collected and established after the 1990 Clean Air Act Amendments became law for permit fees justified or computed by reference to the 1990 Clean Air Act Amendment. This should not preclude the use of test data (e.g., stack tests) collected prior to the 1990 Clean Air Act Amendments, as test data generally has low levels of fluctuations.

The current permit application process is inefficient and is in need of revision. Our experience suggests that it has been difficult for the person submitting the permit application to track its progress once received by the MPCA. Prompt feedback from the MPCA is needed so that we can provide any additional data that may be required to keep the permit process proceeding in a timely fashion. Since many of the new permit applications reflect a reduction in emissions, a quick review and approval is needed to avoid unjust charges.

A formal quick appeals process should be established and included as part of the proposed billing structure to address disputes regarding emissions calculations. During the appeal, it is recommended that all monies be placed in an interest bearing escrow account. This should serve to promote negotiations, rather than litigation.

Should the current proposal pass, WPL formally request data detailing the formulae, input variables and rationale used in calculating the fees assessed to each emission source. This is requested not only to ensure proper billing but also to reconcile differences between our calculations and those of the MPCA.

Once again, WPL appreciates the opportunity to comment on these important issues and we trust you will give our comments your most serious consideration. Please direct any followup questions that you may have, to Ed Mize (918) 588-3486.

Sincerely,

Jason T. Huso

Subject: Emergency Rules Related to Air Quality Permit Fees

Dear Mr. Strange:

In accordance with the provisions established by the Administrative Procedures Act (Minn. Stat. 14.30), North Star Steel Minnesota (NSSM) is herein submitting comments on the subject Emergency Rules.

I. Use of 1988 as Base Year is Unfair

One of our principal concerns with the emergency rules is that the use of 1988 as a base year for determining fees to be assessed in 1991 is exceedingly unfair to sources that have made major reductions in pollutant emissions. In our own case, such reductions occurred in sulfur oxide emissions as a result of substituting natural gas for fuel oil used to fire our reheat furnace.

The question of fairness also arises in two other situations. First, recent emission increases (that could parallel heightened regulatory attention at a source) will not be reflected in the 1988 emission inventory. Second, information recently obtained or approved may render as incorrect the basis on which emissions were calculated in 1988. Depending on the source in question, this situation could lead to substantially reduced or increased emissions. In our case, we believe the factors used by the Minnesota Pollution Control Agency to generate NSSM emission estimates exaggerate gaseous emissions from our electric arc furnaces.

II. The 25 Ton Per Year De Minimis Emission Rate is Unfair

In providing an exemption for sources emitting less than 25 tons per year, the MPCA is in effect stating that only large sources occupy their attention. Clearly this is not the case. The legislature has stated

that fees must be imposed, in part, to recover expenses incurred in addressing requests from the general public. Such expenses are rightfully spread across all sources independent of their size. Therefore, we do not believe a de minimis threshold should be set on the basis of pollutants emitted. Every source emitting quantifiable amounts of pollutants should be assessed. If a de minimis fee is to be imposed, the MPCA should apply it on sources required to have an Air Emission Facility permit.

III. Conclusion

We believe that by addressing these comments the Emergency Fee Rules will be improved. If you have questions regarding our comments do not hesitate to call me.

Sincerely,

Robert S. Evans II

National Grain and Feed Association

August 5, 1991

Mr. Mark Strange
Air Quality Division
Minnesota Pollution Control Agency
520 Lafayette Road
St. Paul, Minnesota 55155

Dear Mr. Strange:

On behalf of hundreds of member facilities located in Minnesota, the National Grain and Feed Association submits these comments concerning Minnesota's proposed Emergency Rules Relating to Air Quality Permit Fees.

The National Grain and Feed Association is a voluntary association of grain and feed firms with some 1,300 member companies ranging in size from the smallest country elevator to the largest grain and feed complex. Included in our membership are country and terminal elevators, merchandisers, processors and exporters covering the wide spectrum of the grain and feed industry. In addition, there are 40 state grain and feed associations affiliated with the National Grain and Feed Association whose membership includes more than 10,000 grain and feed companies nationwide.

We wish to focus on three major concerns we have with the proposed rules:

-- First, the proposed rules would impose fees for fiscal 1991 based upon emissions calculated for calendar 1988. Many facilities have undertaken significant pollution abatement efforts to reduce the level of particulate matter being emitted into the atmosphere over the past several years. Additionally, many facilities have been closed or are operating on a much reduced level of operations. To assess the fee based upon stale data is unreasonable and unfair to those who have made significant investments to reduce regulated pollutants and will not reflect current reality.

Assessing fees based upon data that are three years old is bound to miss several new sources of pollution. This means that these newer sources will be given a free ride at the expense of those who are included. We believe that to avoid this situation, the Minnesota Pollution Control Agency should base the total fee assessment upon 1990 Emission Data rather than the out-of-date 1988 data.

-- Second, in reviewing the list of facilities to be included in the program, we noticed several ommissions of pollution sources which we don't understand. For example, private automobiles were not included, yet automobiles are a significant source of air pollution. If the Pollution Control Agency has been tasked to generate funds to pay for its pollution control effort, we believe that all significant pollution sources should be asked to pay their fair share rather than focusing on a limited industrial sector.

1201 New York Avenue, N.W., Suite 830 ● Washington, D.C., 20005 ● (202) 289-0873

-- Third, we agree with the Minnesota Pollution Control Agency's decision not to impose fee caps. Agriculturally related facilities tend not to be significant sources of pollution. Additionally, because of the intense competitive nature of the grain handling industry, operating margins are thin under the best of economic times. In our view, fee caps would penalize disproportionately less significant sources of pollution while benefitting larger sources. Again, we believe that grain elevators, feed mills, and grain-based processing plants would be subsidizing other sources of pollution. This would be economically unfair and unreasonable.

Conclusion

Our comments are unfortunately abbreviated because of the short time frame allowed for comments under this emergency rulemaking. We believe this is a dangerous precedent and we hope it will not be the basis for future rulemakings of this importance. All interested parties need and deserve sufficient time to fully consider all of the issues involved in order to make informed comments.

If you have any questions, please feel free to call me at (202) 289-0873. Thank you for this opportunity to submit our views.

Sincerely,

Thomas C. O'Connor

Governing Air Quality Permit Fees
Minn. Rules Parts 7002.0400 to 7002.0450

AFFIDAVIT OF ADDITIONAL DISCRETIONARY MAILING THE NOTICE OF INTENT TO ADOPT EMERGENCY RULES

STATE OF MINNESOTA)
) ss.
COUNTY OF RAMSEY)

KELLY STOUGH, being duly sworn says:

I hereby certify that on the 5 day of JULY, 1991, at the City of St. Paul, County of Ramsey, State of Minnesota, I mailed the attached Notice of Intent to Adopt Emergency Rules, Emergency Rules, MPCA's Informational Statement and the MPCA's 1988 Emissions Inventory List by depositing in the State of Minnesota Central Mail System or in the United States mail for first class mailing a copy thereof, with postage prepaid, to all persons and associations on the aforementioned mailing list.

Kelly Stough

Subscribed and sworn to before me
this 12th day of July 1991.

July , 1991

Ms. Maryanne Hruby
Executive Director
Legislative Commission to Review
Administrative Rules
State Office Building, Room 55
100 Constitution Avenue
St. Paul, Minnesota 55155

Dear Ms. Hruby:

Re: Proposed Emergency Rules Governing Air Quality Permit Fees (Minn. Rules Parts 7002.0400 to 7002.0450)

The Minnesota Pollution Control Agency (MPCA), Air Quality Division, is proposing to adopt emergency permit fee rules in response to the 1991 Minnesota Legislature. If adopted, the proposed emergency rules will assess permit fees, based on the tons emitted of sulfur dioxide, nitrogen oxide, volatile organic compounds and particulate matter, to fund the state air quality program and provide the resources to implement the requirements of the 1990 Clean Air Act Amendments in Minnesota.

In reviewing Minn. Stat. §§ 14.29 to 14.36, which governs emergency rulemaking, there is no mention of submitting a copy of the rule or Informational Statement to the Legislative Commission to Review Administrative Rules (LCRAR). However, in reviewing Minn. Stat. Section 14.115, Small Business Considerations in Rulemaking, subd. 8 states that the LCRAR must review the implementation of Section 14.115 and in doing so, provide a biennial report on the implementation of that part. The MPCA felt that due to the fact small businesses would be affected by the emergency rule the MPCA would provide you with a copy of the rule and the Informational Statement for your review.

If you have any questions please contact me at 296-7712.

Sincerely,

Norma L. Florell

TO: Interested and Affected Parties

SUBJECT: Changes to Proposed Emergency Rules Governing Air Quality Permit Fees (Minn. Rules Parts 7002.0400 to 7002.0450)

A copy of the amended draft emergency fee rule is enclosed. In response to the letters that were received during the comment period, three modifications have been proposed and are summarized below:

1. The title of the emergency rule will change from Air Quality Permit Fees to Air Quality Emission Fees. Similarly, references in the rule to "permittee" or "permittees" is replaced with "person" or "persons".

2. The 1990 emissions inventory will be used instead of the 1988 inventory as the data source on which fees will be based. Numerous comments were received stating that the use of the 1988 emissions data was unfair because it failed to recognize that several companies have made major efforts in pollution control since 1988, and many plants have ceased operation. There are also air emission sources that have begun operation since 1988 which would not have paid a fee under the original draft of the rule.

Since the 1990 emissions inventory data is not yet available, a dollar per ton figure is not included in the rule. When the 1990 emissions data becomes available (sometime in January, 1992), the total amount of money that the Air Quality Division will be collecting ($3,567,368) will be divided by the total number of tons per year of PM-10, SOx, NOx, and VOC that are in the 1990 inventory to arrive at the final dollars per ton figure. Invoices will be sent in January 1, 1992, instead of October 1, 1991.

3. The Minnesota Pollution Control Agency (MPCA) will be required to respond in writing to each air quality fee appeal within 60 days of receipt of the appeal.

The MPCA will be requesting board adoption of the emergency fee rule at the August 27, 1991, board meeting. This meeting is open to the public.

If you need additional information regarding the rulemaking process or the August 27, 1991, board meeting, please contact Norma Florell at (612) 296-7712. If you have any questions about the proposed emergency fee rule, please contact Mark Strange at (612) 296-9711.

August 16, 1991

To: Persons that Commented on the Proposed Emergency Rules Governing Air Quality Permit Fees (Minn. Rules Parts 7002.0400 to 7002.0450)

Re: Changes to the Proposed Emergency Rules

Thank you for commenting on the above proposed emergency rules. The Minnesota Pollution Control Agency (MPCA) will be requesting board adoption of the emergency rules at our August 27, 1991, board meeting. A copy of the board item is enclosed for your review. All comments received by the MPCA during the 25 day comment period have been addressed in the board item.

In response to comments received, the MPCA will propose three changes to the emergency rules. Those changes are reflected in the attached copy of the board item and summarized below.

1. The title of the emergency rule will change from Air Quality Permit Fees to Air Quality Emission Fees. Similarly, references in the rule to "permittee" or "permittees" is replaced with "person" or "persons".

2. The 1990 emissions inventory will be used instead of the 1988 inventory as the data source on which fees will be based, therefore changing the date for invoices to be sent from October 1, 1991, to January 1, 1992.

3. The MPCA will be required to respond in writing to each notification of error within 60 days of receipt of the notice.

If you need additional information regarding the rulemaking process or the August 27, 1991, board meeting, please contact Norma Florell at (612) 296-7712. If you have any questions about the proposed emergency fee rule, please contact Mark Strange at (612) 296-9711.

Sincerely,

Lisa J. Thorvig

STATE OF MINNESOTA
POLLUTION CONTROL AGENCY

In the Matter of the Proposed Emergency Rules Governing Air Quality Permit Fees Minn. Rules Parts 7002.0400 to 7002.0450

FINDINGS OF FACT, CONCLUSIONS, AND ORDER ADOPTING RULES

The above-entitled matter came on for decision before the Minnesota Pollution Control Agency (MPCA) on the 25th day of June, 1991. After affording all interested persons the opportunity to present written and oral data, statements and arguments to the MPCA, in accordance with statutory requirements regarding the adoption of emergency rules, after considering the MPCA's Informational Statement, after considering all of the evidence adduced upon the records, files and proceedings herein, the MPCA, being fully advised in the premises, hereby adopts the following Findings of Fact, Conclusions, and Order Adopting Rules:

FINDINGS OF FACT

1. Notice of the Minnesota Pollution Control Agency's intent to adopt the above-entitled emergency rule was published in the State Register on July 8, 1991, and was sent by mail to all persons on the list maintained by the MPCA pursuant to Minn. Stat. § 14.30, (1990), on July 5, 1991.

2. Copies of the emergency rule and Informational Statement were sent to the Chairs of the House Appropriations and Senate Finance Committees on July 1, 1991, pursuant to Minn. Stat. § 14.305 and 16A.128, subdivision 2a.

3. Copies of the emergency rule and Informational Statement were sent to the Legislative Commission to Review Administrative Rules on July 3, 1991.

4. The Informational Statement was prepared prior to mailing and publication of the notice, and was made available to the public.

5. All persons were given the opportunity to submit comments on the emergency rule for 25 days after notice of proposed rulemaking. The 25 day comment period, as set out in the notice, expired on August 5, 1991.

6. No requests for notice of submission to the Attorney General were received by the MPCA.

7. During the comment period the MPCA received 18 written comments and one verbal comment. The MPCA finds that three modifications to the emergency rule are justified by the record in this proceeding, as follows:

a. Omitting Certain References to "Permit" and "Permittees"

i. The MPCA amends the title to Minn. Rules pts. 7002.0400 to 7002.0450 as follows:

"Emergency Rules Relating to Air Quality ~~Permit~~ Emission Fees"

ii. The MPCA amends Minn. Rules pt. 7002.0430, LATE PAYMENT. as follows:

~~"The permittee~~ A person required to pay the fee by part 7002.0420 [Emergency] shall pay a late payment fee of 20 percent of the payment due for failure to make payment within 30 days of a payment date. The ~~permittee~~ person shall pay an additional ten percent of the original payment due for each 30-day period or portion of that period that the payment is late."

iii. The MPCA amends the last sentence of Minn. Rules pt. 7002.0450, NOTIFICATION OF ERROR, as follows:

"If the division chief finds that the assessed fee was in error, the overpayment shall be refunded to the ~~permittee~~ person or credited to the ~~permittee's~~ person's account."

These modifications are needed and reasonable because they help clarify that the fees being charged by the MPCA are for the emission of regulated air pollutants and not for action on a permit, and that the fees are due annually, regardless of whether a permit or permit amendment is applied for during the year. Changing the above language will also help emphasize to persons required

to obtain an air quality permit that applying for and obtaining the permit is a separate process from the payment of this fee.

These modifications do not constitute a substantial change to the proposed emergency rule because they do not change the effect of the rule and merely clarify the rule.

b. Replacing 1988 Inventory with 1990 Inventory

i. The MPCA amends the first sentence of Minn. Rules pt. 7002.0400, APPLICABILITY, as follows:

> "Parts 7002.0400 to 7002.0450 [Emergency] apply to all emission facilities that were subject in ~~1988~~ 1990 to the emission inventory reporting requirements of part 7005.1870, subpart 4, and to indirect sources."

ii. The MPCA amends Minn. Rules pt. 7002.0420, EMISSIONS FEE, as follows:

> "Subpart 1. Annual Fee On Certain Pollutants. The owner or operator of all emission facilities that were subject in ~~1988~~ 1990 to the emissions inventory reporting requirements of part 7005.1870, subpart 4, shall pay an annual emissions fee ~~of $7.59~~ per ton of sulfur dioxide, nitrogen oxide, PM-10, and volatile organic compounds emitted from the emission facility, except that the fee shall not include an assessment for each of these pollutants for which the emission facility did not emit 25 tons or more. The tons of sulfur dioxide, nitrogen oxide, PM-10, and volatile organic compounds emitted from a source shall be the amount calculated by the division chief, based on the information reported by the owner or operator under part 7005.1870, subpart

4, for the ~~1988~~ 1990 emissions inventory and were required to be submitted to the division chief before ~~January 1,~~ May 15, 1991.

Subp. 2. Calculation of Fee Per Ton. The commissioner shall calculate the amount of the fee due per ton of pollutant by dividing $3,567,368 by the total tons of emissions subject to the fee under subpart 1, as determined by the 1990 emissions inventory. For example, if the emissions under the 1990 emissions inventory were the same as those reported under the 1988 inventory, the fee per ton would be $3,567,368 divided by 469,935 (the total tons of emissions in 1988 subject to the fee under subpart 1), or $7.59 per ton. The commissioner shall calculate the fee per ton as soon as the data in the 1990 emissions inventory is finalized.

Subp. 3. Indirect Sources. Indirect sources shall pay an annual fee of $400 through the year in which construction is completed or compliance with all permit provisions is documented, whichever is later."

iii. The MPCA amends the last sentence of Minn. Rules pt. 7002.0430, PAYMENT OF FEE, as follows:

"The division chief shall not send invoices to persons earlier in the calendar year than ~~October 1~~ January 1, 1992."

These modifications are needed and reasonable because they result in a fee based upon a more recent source of information: the 1990 emissions inventory rather than the 1988 emissions inventory. As a result, the fee will more

accurately reflect current emissions of the pollutants in question. Several commenters to the proposed emergency rule commented that their emissions have been reduced since the 1988 inventory as a result of pollution control efforts. Other companies stated that they had facilities that had shut down, or drastically reduced hours of operation, since 1988. In addition, commenters noted that the grain handling industry had unrepresentatively high emissions because the United States government eliminated much of its grain inventory in that year. Still other comments were received complaining that sources that have begun operation since 1988 would not be charged a fee under the proposed rule. The modifications above, basing the fee on the 1990 emissions inventory instead of the 1988 inventory, are made to address these inequities to the extent possible.

Because the MPCA is switching from the 1988 inventory to the 1990 inventory, it cannot provide in this emergency rule the exact fee per ton of emissions that will have to be paid. This amount cannot be calculated until after the 1990 emissions inventory is finalized, on approximately January 1, 1992. The MPCA is therefore adding to the rule the formula by which the fee will be calculated, along with an example based on the 1988 emissions inventory to illustrate the formula and give persons subject to the fee a general indication of what the amount is likely to be. (The formula is the same one by which the fee per ton was calculated under the rule as noticed; the only change is that the 1990 emissions inventory will be used instead of the 1988 emissions inventory). Use of a formula is needed and reasonable because it facilitates the switch to using the 1990 emissions inventory, because an exact fee/ton cannot be calculated yet, because it does not leave the MPCA with any discretion in calculating the fee, and because it provides as much notice as possible to those subject to the fee.

These changes are not "substantial" because they do not affect a new class of persons who would not have been expected to comment on the rule as noticed. The "class" of persons affected by this rule are those who emit over 25 tons per year of the identified air pollutants. While the proposed change shifts the focus of the rule to the more recent emissions inventory, the agency is not materially changing the class of persons who pay the fee. The vast majority of those who reported under the 1990 inventory also reported under the 1988 inventory. The few who reported under the 1990 inventory but not the 1988 inventory should not be considered a separate class of persons, since there is no reason to believe they differ as a group from the emitters who reported under both inventories (i.e., that they emit different pollutants in different quantities, or that they represent different sizes or types of facilities).

These changes do not raise any new substantive issues that were not already raised by the original proposed emergency rule in such a way as to invite public reaction. The emergency rule made clear the agency's intent to base the fee on the data of an emissions inventory, and there were only two logical options: the 1988 inventory and the 1990 inventory. The data in both inventories was provided by the emitters themselves, so they knew these two alternative sources of data were available to the agency. Indeed, because the 1990 inventory is more reflective of current emissions than the 1988 inventory, it would seem to be the more logical choice to the public, who would be unaware of the timing considerations that initially led the agency to choose the 1988 inventory.

For these reasons, the public could reasonably have expected discussion and controversy over the issue of which inventory to use, and to comment accordingly. The fact that the single most commented-upon issue, both in

writing and verbally, was the choice of an emissions inventory is evidence that the public felt invited to comment upon this issue.

c. Adding Deadline for Agency Response to Notification of Error

The MPCA amends Minn. Rules pt. 7002.0450, NOTIFICATION OF ERROR, as follows:

> "A person who thinks that the fee assessed under part 7002.0420 [Emergency] is in error shall provide a written explanation of the person's position to the division chief along with the assessed fee. The division chief shall, within 60 days of receiving the person's written explanation, either notify the person that the fee assessed was not in error and will not be refunded, or, if ~~If~~ the division chief finds that the assessed fee was in error, the overpayment shall be refunded to the ~~permittee~~ person or credited to the ~~permittee's~~ person's account.

This modification is reasonable because it gives the Division Chief sufficient time to review the emissions report and the overpayment argument of the person paying the fee. It also addresses the concerns of one commenter by letting the person challenging a fee know when to expect a response to the challenge and provides some finality to the agency review process. (Note: the change from the term "permittee" to "person" is explained in part 7.a. above.)

This change is not substantial because it simply makes it clear that the review process already established in the rule as noticed must be completed within 60 days. It does not raise substantive new issues or affect new classes of people.

8. The above-captioned rule amendments are needed and reasonable. (5)

CONCLUSIONS

1. The MPCA duly acquired and has jurisdiction over this proceeding.

2. The MPCA published and served due, timely, and adequate notice of the intent to adopt the rule amendments without a public hearing.

3. All relevant legal and procedural requirements of statute and rule have been complied with.

4. The modifications to the emergency rules are supported by the record and do not result in a substantial change in the emergency rules.

ORDER

NOW, THEREFORE, IT IS ORDERED, that the attached amendments to the emergency rules governing Air Quality Emission Fees, Minn. Rules pt. 7002.0400 to 7002.0450, are adopted pursuant to the authority vested in the Minnesota Pollution Control Agency by Minn. Stat. § 116.07, subd. 4 (1990).

(9)

MINNESOTA POLLUTION CONTROL AGENCY

Dated: 8-27-91

Cynthia C Jepsen

for Charles W. Williams

Commissioner

This change is reasonable because it makes the title more accurately reflect the nature of the fee being imposed. This change is not substantial because it does not change in any substantive way the effect of the rule.

III. Conclusions:

The MPCA staff believes that the proposed emergency rules are needed and reasonable. Based on the comments received during the comment period and the informational meetings, the MPCA staff believes that the MPCA Board should adopt the emergency rules with the changes set forth in the attached Findings of Fact, Conclusions, and Order Adopting Rules.

IV. Recommendation:

The staff recommends that the MPCA Board adopt the attached suggested staff resolution and Findings of Fact, Conclusions, and Order Adopting Rules.

SELECTED STAFF RESOLUTION

BE IT RESOLVED, that the Minnesota Pollution Control Agency hereby approves and adopts Minn. Rules pts. 7002.0400 to 7002.0450 governing emergency rules relating to Air Quality Emission Fees, under the authority set forth in 1991 Minn. Laws ch. 254, art. 2, § 37 (to be codified as Minn. Stat. § 116.07, subd. 4d(c) and (f)), as published in the State Register, Vol. 16, July 8, 1991, pages 64 to 66, with the changes specified in the attached Findings of Fact, Conclusions, and Order Adopting Rules.

BE IT FURTHER RESOLVED, in the event that the Office of the Attorney General disapproves the rule based on substantial change, Minn. Rules pt. 2010.1000, subd. D, (1991) that the Commissioner of the Minnesota Pollution Control Agency is authorized to sign and renotice the Minnesota Pollution

Control Agency's intent to adopt the attached proposed emergency rule governing Air Quality Emission Fees, to all persons who have registered their names with the Minnesota Pollution Control Agency for that purpose and to publish the notice and the proposed emergency rule in the State Register, and to perform any acts incidental thereto, and if no significant changes are made to the rule in response to the public comment period, the Commissioner is further authorized to resubmit the rule to the Office of the Attorney General for review.

BE IT FURTHER RESOLVED, that the Commissioner of the Minnesota Pollution Control Agency is authorized to make any form changes in the rule that the Revisor of Statutes requires the Minnesota Pollution Control Agency to make in order to obtain the Revisor's Certificate as required by Minn. Stat. § 14.07, subd. 2 (1990).

BE IT FURTHER RESOLVED, that the Commissioner of the Minnesota Pollution Control Agency is authorized to sign the Findings of Fact, Conclusions, and Order Adopting Rules and further is authorized to modify the rule if necessary to obtain the approval of the rule by the Attorney General and to perform the necessary acts to provide that the rule shall have the force and effect of law.

CERTIFICATE OF AGENCY's AUTHORIZING RESOLUTION

I, Charles W. Williams, do hereby certify that I am the Commissioner of the Minnesota Pollution Control Agency (MPCA), an agency duly authorized under the laws of the state of Minnesota, and that the following is a true, complete, and correct copy of a resolution adopted at a meeting of the MPCA duly and properly called and held on the 27th day of August, 1991, that a quorum was present at said meeting, that a majority of those present voted for the resolution and that said resolution will be set forth in the minutes of said meeting and has not been rescinded or modified:

BE IT RESOLVED, that the Minnesota Pollution Control Agency (MPCA) hereby approves and adopts Minn. Rules pts. 7002.0400 to 7002.0450 governing emergency rules relating to Air Quality Emission Fees, under the authority set forth in 1991 Minn. Laws ch. 254, art. 2, section 37 (to be codified as Minn. Stat. § 116.07, subd. 4d(c) and (f)), as published in the State Register, Vol. 16, July 8, 1991, pages 64 to 66, with the changes specified in the attached Findings of Fact, Conclusions, and Order Adopting Rules.

BE IT FURTHER RESOLVED, in the event that the Office of the Attorney General disapproves the rule based on substantial change, Minn. Rules pt. 2010.1000, subd. D, that the Commissioner of the MPCA is authorized to sign and renotice the MPCA's intent to adopt the attached proposed emergency rule governing Air Quality Emission Fees, to all persons who have registered their names with the MPCA for that purpose and to publish the notice and the proposed emergency rule in the State Register, and to perform any acts incidental thereto, and if no significant changes are made to the rule in response to the public comment period, the Commissioner if further authorized to resubmit the rule to the Office of the Attorney General for review.

BE IT FURTHER RESOLVED, that the Commissioner of the MPCA is authorized to make any form changes in the rule that the Revisor of Statutes requires the MPCA to make in order to obtain the Revisor's Certificate as required by Minn. Stat. § 14.07, subd. 2 (1990).

BE IT FURTHER RESOLVED, that the Commissioner of the MPCA is authorized to sign the Findings of Fact, Conclusions, and Order Adopting Rules and further is authorized to modify the rule if necessary to obtain the approval of the rule by the Attorney General and to perform the necessary acts to provide that the rule shall have the force and effect of law.

IN WITNESS WHEREOF, I have hereunto subscribed my name this 27th day of August, 1991.

for Cynthia C. Jepsen
CHARLES W. WILLIAMS
Commissioner

STATE OF MINNESOTA
POLLUTION CONTROL AGENCY

In the Matter of the Proposed Emergency Rules Governing Air Quality Permit Fees Minn. Rules Parts 7002.0400 to 7002.0450

DECLARATION OF COUNSEL

I, Barbara Freese, Special Assistant Attorney General, do hereby declare that I have examined the above-captioned rules and the supporting rulemaking record, and that, based on my examination, the Administrative Procedure Act and Minnesota Rules ch. 2010 have been followed.

While the Administrative Procedure Act apparently does not apply the substantial change prohibition to emergency rules (see Minn. Stat. § 14.31, allowing modifications to emergency rules if they are supported by the data and views submitted to the agency), Minn. Rules § 2010.1000(D) (1991), does prohibit substantial change from the proposed version of an emergency rule. For the reasons set forth in the "Request to Adopt Proposed Emergency Air Quality Permit Fee Rule" submitted to the MPCA Board (the Board Item) at pages 4 - 6, and in the Findings of Fact, Conclusions, and Order Adopting Rules, I do not consider the changes made from the rule as proposed to be substantial. As noted on the record at the August 27, 1991 MPCA Board meeting, the MPCA staff sent notices to all persons in the 1990 inventory (copy attached) stating that the Board would be considering the staff proposal to base the fee on the 1990 inventory; no one attended to comment on this change, indicating that they did not consider it a significant change, or that they had already expressed their views during the public comment period.

For Attorney General billing purposes, the four-digit docket client code is 0701.

TO: Interested and Affected Parties

SUBJECT: Changes to Proposed Emergency Rules Governing Air Quality Permit Fees (Minn. Rules Parts 7002.0400 to 7002.0450)

A copy of the amended draft emergency fee rule is enclosed. In response to the letters that were received during the comment period, three modifications have been proposed and are summarized below:

1. The title of the emergency rule will change from Air Quality Permit Fees to Air Quality Emission Fees. Similarly, references in the rule to "permittee" or "permittees" is replaced with "person" or "persons".

2. The 1990 emissions inventory will be used instead of the 1988 inventory as the data source on which fees will be based. Numerous comments were received stating that the use of the 1988 emissions data was unfair because it failed to recognize that several companies have made major efforts in pollution control since 1988, and many plants have ceased operation. There are also air emission sources that have begun operation since 1988 which would not have paid a fee under the original draft of the rule.

Since the 1990 emissions inventory data is not yet available, a dollar per ton figure is not included in the rule. When the 1990 emissions data becomes available (sometime in January, 1992), the total amount of money that the Air Quality Division will be collecting ($3,567,368) will be divided by the total number of tons per year of PM-10, SOx, NOx, and VOC that are in the 1990 inventory to arrive at the final dollars per ton figure. Invoices will be sent in January 1, 1992, instead of October 1, 1991.

3. The Minnesota Pollution Control Agency (MPCA) will be required to respond in writing to each air quality fee appeal within 60 days of receipt of the appeal.

The MPCA will be requesting board adoption of the emergency fee rule at the August 27, 1991, board meeting. This meeting is open to the public.

If you need additional information regarding the rulemaking process or the August 27, 1991, board meeting, please contact Norma Florell at (612) 296-7712. If you have any questions about the proposed emergency fee rule, please contact Mark Strange at (612) 296-9711.

Sincerely,

Lisa J. Thorvig
