CO-OP PRIMARY
THE BENEFITS

OWNED BY YOU.
RIGHT BY YOU.

INTRODUCTION

Co-op Primary offers Ambient and Fresh suppliers options to have their products delivered into Co-op and Nisa depots promptly and cost effectively.

Options include:

- storage solutions
- picking small case volumes
- collecting pre-picked pallets

Co-op Primary facilitates daily deliveries into all Co-op and Nisa depots.

BUSINESS USE

WHAT DOES CO-OP PRIMARY OFFER?

- An extensive national network using Co-op Depots and 3rd party hauliers
- Cross docking (pre-picked supplier pallets, collected and taken to a consolidation hub for onward delivery)
- Warehousing solutions:
    - Storage & Picking options
    - Factory clearance
    - Stock held – less frequent deliveries/fuller pallets/daily deliveries out
    - Break Bulk picking – pallets with total order volumes, received and picked for each depot

BUSINESS USE

WHAT DOES CO-OP PRIMARY OFFER?

Costs can be tailored for each supplier:

- Load rate from supplier direct to depot
- Pallet rate (collection, cross dock & delivery)
- Cost per case (storage, picking & delivery)
- Picking cost and pallet rate for delivery

Supports Co-op's environmental goals:

- Use of double decked trailers for deliveries (less carbon per pallet - 44 pallets versus 26 on a standard trailer)
- Less delivery vehicles into depots and vehicles on the road (average week using Primary 785 vehicles versus non-Primary 1446)
- Main 3rd party haulier fleet moving to biogas diesel (resulting in zero carbon deliveries)

BUSINESS USE
