## TECHNICAL DATASHEET

| | |
|---|---|
| **APPLICATIONS** | BINDING & PUBLISHING · HANG TAGS & LABELS · LUXURY PACKAGING · STATIONERY |
| **SURFACE** | Water based Acrylic |
| **BASE** | Recycled leather fibres |
| **DECORATION BY** | Foil stamping and silk screen printing.<br>Subject to test before using. Please consult us. |
| **TESTS** | Please consult us. |
| **MIN. QUANTITY SPECIALS** | 500 m |
| **PRODUCTION TIME** | ~3-4 weeks |
| **ROLL WIDTH** | ~145 cm |
| **ROLL LENGTH** | ~45 m |
| **SHEETS** | On request |
| **NET WEIGHT** | ~380 gsm |
| **THICKNESS** | ~0.40 mm (20% tolerance) |
| **TYPE OF PACKAGING** | 1 roll per carton |
| **SIZES OF PACKAGING** | ~146 × 25 × 25 cm |
| **INNER CORE Ø** | ~5 cm |
| **GROSS WEIGHT** | ~26 kg |
| **NET WEIGHT** | ~25 kg |
| **CUSTOMS DECLARATION** | Leatherboard |
| **TARIFF NUMBER** | 4115.0000 (Switzerland) / 4115 1000 000(European Community) |
| **ENVIRONMENTAL DATA** | REACH COMPLIANT · PIW · OEKO-TEX® CONFIDENCE IN LEATHER LEATHER STANDARD 20170K1025 AITEX Leather goods tested for harmful substances www.oeko-tex.com/leatherstandard |

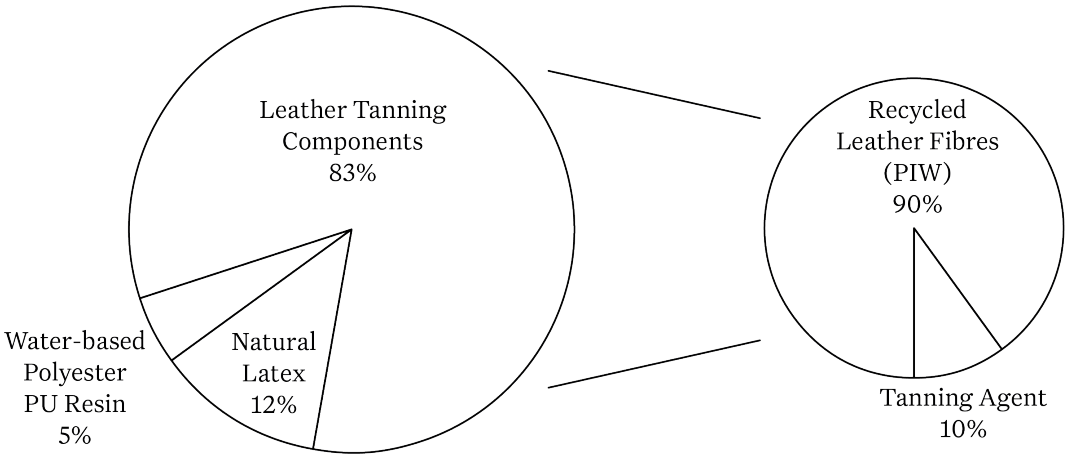
## ENVIRONMENTAL DATASHEET

### PRODUCT COMPOSITION

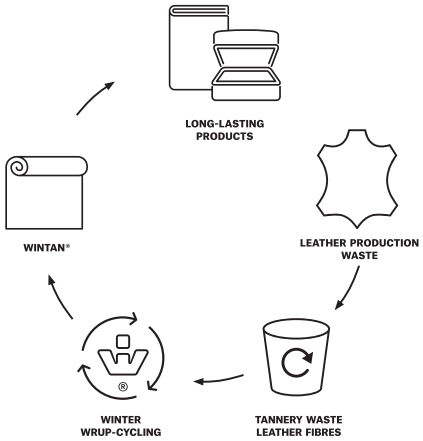


### WINTER WRUP-CYCLING

Winter Wrup-Cycling revives recycled materials into high-quality coverings. This upcycling process has been developed by Winter & Company. It allows to recycle valuable raw materials, ensures that they are used for high-quality products and do not end up as waste. Winter Wrup-Cycling was applied to the production of Wintan® Elda.

Tannery waste fibres are transformed into a durable cover material. The surface finish of Wintan® Elda consists of a fully aqueous, acrylic coating, directly applied through a knife over roll process. Low risk chemicals ensure the lowest environmental impact, whilst at the same time creating an attractive and sustainable new material.

Winter Wrup-Cycling reduces the environmental impact further by manufacturing long lasting cover materials.



### WASTE EQUIVALENT

The use of tannery waste is an effective way to reduce the environmental impact. The recycling process produces a new product in a continuous roll form, true to the characteristics of real leather. At the same time saving a significant amount of waste that would otherwise have gone to landfill.

~40 kg (dry fibre) Tannery Waste = 1000 m Wintan® Elda
