

Applications Included :

Communications: Email, including integrated IM and voice & video chat, and calendar
Collaboration: Drive (word processing, spreadsheet, and slides), sites, groups, and video

Storage Capacity :

Gmail and Drive storage unification (announced on Monday, May 13) with G Suite into a single 30GB combined storage quota across Gmail, Drive and Google+ Photos.
Each user can store up to 16TB of email by purchasing additional storage licenses.
Sites – 10GB plus 500MB per user for shared storage

IMAP and POP :

Integrate email with popular programs like Apple Mail and Microsoft Outlook

Email, Calendar, Drive, and Sites Uptime :

99.9% uptime SLA

Administrator Control Panel :

Usage reports, disk space usage, and account provisioning (no preset account limit)

Provisioning API :

Manage user accounts and synchronize G Suite users with your own user management system

Reporting API :

View and generate reports (e.g. usage data, user information, and stats) using your own reporting system.

Authentication :

G Suite provides a complete and secure user authentication system for all applications. For enhanced security, you can use a Single Sign-On (SSO) service, which allows you to tie your own authentication system to the G Suite web-based login.
