

Download Logo - Long Name (15 characters or more)

RGB Color Pallet
Green: 0/146/63
Blue: 0/124/195

Notes:

Before opening the Long Name Word file you will need to install the downloaded font that was included in this package. You will need to install the font Angelina before creating your logo.

For Windows

Open your Windows folder, open sub-folder Fonts, click on File and select "Install New Font". Go to the folder where you have saved the downloaded font, select the font, and click on OK.

Depending on the length of your business/organization name you may need to adjust the font size of the third line to fill width (A). The third line should not exceed this width.

Do not modify RGB color builds or substitute fonts.
