

Profero Systems Jet Assist

Features and Benefits:

Introduces steam to the Single Face web prior to entry into the Double Facer.
Pre-gelatinizes adhesive allowing for higher run speeds, particular on heavy weight board combinations.
Can be utilized for special applications, such as Pre-print with unstable varnish finish when Double Facer heat must be reduced.

Ideal boost for short Double Facers

Best application is one Jet Assist for each Single Face web

Inexpensive alternative compared to heating section additions.

Can be tied into corrugator run circuits to come on or shut off automatically.
