The Duterte administration has accomplished much in its first full year in office in 2017. The President's decisive leadership, plus the strong collaboration among various government agencies, has resulted in the attainment of many of the priorities set out by the national government in the last twelve months.

As we move forward to the President's second full year in office, we expect a more robust year ahead especially with the approval of the 2018 General Appropriations Act and the Tax Reform for Acceleration and Inclusion Act that would see greater investments in infrastructure modernization and human capital formation.

Together, let us help the current administration lay down the foundation of a peaceful and prosperous Philippines that we all deserve.

“Let us work together and lay a new foundation upon which a better Philippines can be reconstructed. Help me build a better tomorrow.”
