**Subject :** Coconut Sap Sugar Production in Laguna, Philippines

**To :** pcaarrd@pcaarrd.dost.gov.ph

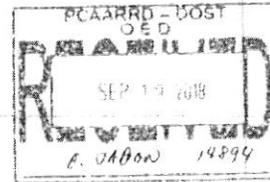

Good evening, I, Bricks F. Magdales, together with Heaven Leoneth Kabigting, Bachelor of Science in Agricultural and Applied Economics undergraduate students of the University of the Philippines- Los Baños, would like to request for a copy of secondary data about the coconut sap sugar production here in the Philippines for research purposes in our course, AECO 160.

Our research topic is the on Analysis of Factors Affecting the Production of the Coconut Sap Sugar in Tiaong, Quezon. We have already shortlisted some farms nearby Laguna who produces coconut sap sugar. To further expand the scope of our research, we humbly ask for the data regarding farms.

Thank you for accommodating and helping us. Have a good day.

Sincerely,

Bricks F. Magdales

*last Sept. 21, 2018*  
*This has been answered through personal discussions with Mr. Bricks Magdales and I referred him to PCA-Lucena, Ms. Rosita Lancela for the data their group needs for their course AECO 160 in preparation for "thesis problem"*
