To: The FOI Secretariat
Cc: Department of Health (DOH)
From: The Bloomberg Initiatives for Global Road Safety-Legal Development Programme (BIGRS-LDP) under UP-CIDS
Date: July 11, 2018
Subject: Request for electronic copies of Transport/Vehicular Crash data coming from the Online National Electronic Injury Surveillance System (ONEISS) Reports from 2007 to 2017

The BIGRS-LDP is a program of the World Health Organization (WHO) in collaboration with the Bloomberg Initiatives for Global Road Safety (BIGRS) that supports the development and advocacy for evidence-informed road safety laws and regulations to address risk factors associated with injuries and fatalities resulting from road traffic crashes through capacity-building. The overall objective of this program is to be able to contribute to the significant reduction of road traffic fatalities by the end of the United Nation's Decade of Action for Road Safety in 2020. As part of its capacity-building activities towards improving road safety in the Philippines, the program engages in developing plans and activities towards the significant reduction of road traffic fatalities, with the key stakeholders being the Department of Transportation (DOTr) and the Department of Health (DOH).

In line with this, the BIGRS-LDP, as a part of its advocacy strategy will start to conduct research and databanking activities on a regular basis on road safety, which includes consolidating reports on road crashes, injuries and deaths all over the country such as Online National Electronic Injury Surveillance System (ONEISS). The BIGRS-LDP Secretariat respectfully requests for electronic copies of vehicular crash data contained in ONEISS Reports from 2007 to 2017 from the concerned offices of the Philippine Government to consequently enrich its assistance to the latter.

Thank you very much and looking forward to your favorable response and prompt action to this request.

Respectfully yours,

Maria Fatima A. Villena
Project Manager, BIGRS-LDP
