Notes:

- (1) Enrollment refers to the total enrolled members for a specified period of time.
- (2) Not all HMOs submitted information pertaining to the number of its members.
- (3) HMOs are not required to disclose the names of its members. Anyone can avail two or more coverage from different HMOs, thus, a member of an HMO may also be a member of another HMO.
- (4) Coverage provided to employees by an employer or by an association to its members is classified under Corporate/Group account while coverage bought not through an employer or association is classified under Individual account. Corporate/Group accounts might present figures on a per contract basis instead of disclosing the total number of members enrolled on the corporate/group account.
- (5) For the year 2017, some of the data gathered do not distinguish between Corporate/Group accounts and Individual accounts.
