FOREWORD

The 2006 to 2010 Vital Statistics Report – Marriages, Births and Deaths in the Philippines is a compilation of data from registered certificates forwarded by the Local Civil Registry Offices to the Office of the Civil Registrar General (OCRG) through the Provincial Offices of the Philippine Statistics Authority. Statistics contained here are facts surrounding the occurrence of the event in the country for the years 2006 to 2010.

Vital events of Filipinos occurring abroad are included in this report. Reports were obtained from the marriage, birth, and death documents forwarded by the Philippines Foreign Service Establishment (PFSE) to the Department of Foreign Affairs (DFA), Manila and in turn, forwarded to PSA.

The vital statistics system with emphasis in the registration method is also presented in this report. Statistics presented however, were not adjusted for under-registration.

The data and statistics presented will be of assistance to planners, policy makers, program managers and researchers in monitoring, evaluating and developing demographic and socio-economic programmes.

This report would not be possible without the support of the City/Municipal Civil Registrars (C/MCRs), Medical Health Officers, attendants at births and deaths, Solemnizing Officers, Consuls or Vice Consuls, Sharia'h Circuit and District Registrars, PSA Regional and Provincial Offices and Department of Foreign Affairs, together with the PSA concerned persons and entities that reported the vital events. We are very grateful for your continuing support and cooperation.

EXPLANATORY NOTES

Introduction

This Vital Statistics Report (VSR) contains vital statistics compiled from documents on vital events registered at the City/Municipal Civil Registry Offices located all over the country and in foreign Philippine embassies. It also includes documents involving civil registration matters decided upon in courts for final execution.

Vital events refer to the marriages, births, deaths, fetal deaths, and all such events that have something to do with an individual's entrance and departure from life together with the changes in civil status that may have occurred to a person during his or her lifetime. Recording of these events in the civil register is known as vital or civil registration.

Scope and Coverage

This VSR includes data compiled from the reports submitted to and received by the Philippine Statistics Authority for the period 2006-2010 on registered births, deaths and marriages from all City and Municipal Registrars of the country, from Philippine Courts which included the Shari'ah Circuit Courts on decided court cases involving civil registration and from the Department of Foreign Affairs on all registered vital events with Philippine foreign embassies involving Filipino nationals living abroad.

Vital registration is a continuous process. Hence, there is a need to establish certain cut-off period. The data presented are vital events that occurred from 2006 to 2010 but received from the LCR from January 2006 to March 2011. Events occurring in 2010 but were registered beyond March 2011 were no longer included in the generation of 2010

VSR. However, an addendum to this report had included those beyond the cut off dates of events from 2006 up to 2011 which included events that have been registered late.

The rationale in the publication of the VSR involving past data series is an attempt to fast track the updating of the vital statistics data to more current levels to provide important information in the civil status of persons as well as the generation of demographic and health indicators that may help in the assessment of health/social services enjoyed by the population. The new data series will also provide national and local executives on the level of registration of vital events at the city/municipality level as a means of monitoring the implementation of the civil registration system.

Basic Sources of Vital Statistics

The Philippine Statistics Authority maintains an Archive of Civil Registration documents. In the civil registration system there are several basic forms needed to record vital events from which vital statistics are generated. These are:

1. Marriage Contract-*Municipal Form No. 101*
2. Certificate of Live Birth- *Municipal Form No. 102.*
3. Certificate of Death – *Municipal Form No. 103.*
4. Certificate of Fetal Death - *Municipal Form No. 103A.*

A facsimile of the above forms is found in APPENDIX B.

The Vital Statistics Report contains statistical tables containing basic data on marriages,

births and deaths up to city/municipality level. Summary data are also available at provincial and regional levels for ready reference. However, due to the number of pages devoted to the production of one table, only a limited number is presented in this report. In anticipation of requests for more detailed information, unpublished tables are available upon request at the Vital Statistics Division. The limited number of published tables is a new strategy adopted to fast track the publication of back issues of the VSR. A List of Unpublished Tables on Vital Statistics is shown in APPENDIX A.

Limitation of the VSR

Act No. 3753 otherwise known as the Civil Registration Law of 1930 mandates that all vital events shall be registered. Despite this, there is still a problem of under-registration of vital events, the main reason is due to lack of awareness of the people on the importance of vital registration especially in remote areas. However, there has been an increasing awareness, especially on birth certificate because it is a requirement to enrolment in school and also in obtaining one's passport for foreign travel. Thus, the level of late registration is increasing every year. But the increasing number of late registration also poses a problem in updating the published vital statistics report in the past. Late registration data covering the period 2006 to 2010 are included as addendum in this report.

Another source of underreporting in the VSR is the late submission of reports by most reporting agencies. In the processing of vital documents, there is usually a cut-off time of inclusion. After the cut-off time, the late documents are no longer included in the current year being compiled.

Other contributing cause of late or delayed registration is also the provision of the law which gave at most one month after occurrence that the event to register it with

the LCR: for live birth – not later than 30 days from date of birth; for death or fetal death within 48 hours to Local Health Officer and the LHO shall direct the registration to the Local Civil Registrar not later than 30 days after death; for marriage, 30 days after marriage. With this grace period, there is high probability that registration may be forgotten by the parties concerned until they have a need for the document.

In view of the above limitations, caution is necessary in the interpretation of data, since information presented is not adjusted for under registration both for local and foreign vital events. Observed marked fluctuations in vital events for specific areas may not necessarily reflect differentials, but rather an indication of variations in registration/registered submission of events.

Responsibility in the registration of vital events

Registration of vital events is the responsibility of the Local Government Units (LGUs) through the Local Civil Registrars (LCRs) but under the technical supervision of the Civil Registrar General of the Philippine Statistics Office by virtue of the provisions of Commonwealth Act 591.

The hospitals, clinics, rural health units and similar institutions including barangay secretaries, practicing physicians, midwives, nurses, traditional birth attendants who attended births and deaths, and solemnizing officers from various religious sects and denominations who officiated the marriage ceremonies, are responsible in causing registration and shall certify to the facts of the events at the LCR Offices. The concerned parents, next of kin, contracting parties, a witness or the person who has full knowledge of the occurrence of the event shall report the event, in default of the first mentioned set of informants.

For foreign vital events, reports of births, marriages, and deaths from the Philippine Foreign Service Establishment (PFSE) are forwarded to the Department of Foreign Affairs (DFA) and in turn forwards to the Philippine Statistics Authority Registrar General.

For the Registration Process of the Civil Registration system, see APPENDIX C.

Definition of terms and concepts

The terms that are defined here are those used in the VSR. For ready reference of users, some vital statistics indicators are defined.

Vital or civil registration

➤ Is defined as the continuous, permanent and compulsory recording of the occurrences and characteristics of vital events, primarily for their value as legal documents and secondary for their usefulness as a source of statistics.

Marriage

➤ Is a special contract of permanent union between a man and a woman entered into in accordance with law for the establishment of conjugal and family life.

Live Birth

➤ Is a complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of the pregnancy, which after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached; each product of such a birth is considered liveborn.

Death

➤ Refers to the permanent disappearance of all evidence of life at any time after live birth

has taken place (postnatal cessation of vital function without capability of resuscitation).

Foreign Vital Events

➤ Refer to births, deaths, and marriages involving Filipinos that occurred outside the country.

Fetal Death

➤ Refers to death prior to the complete expulsion or extraction of a product of conception from its mother, irrespective of the duration of pregnancy. The death is indicated by the fact that after such separation, the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, and definite movement of voluntary muscles.

Early Neonatal Death

➤ Refers to death among live births during the first 7 days of life.

Infant Mortality

➤ Refers to deaths of infants under one year of age.

Perinatal Mortality

➤ Refers to the deaths of fetuses, weighing at least 500 grams or had 22 completed weeks of gestation, and of infants 7 days of age.

Maternal Mortality

➤ Refers to the death of a woman while pregnant or within 42 days of termination of pregnancy, irrespective of the duration and the site of the pregnancy, from any cause related to or aggravated by the pregnancy or its management, but not from accidental or incidental causes.

Neonatal Mortality

➤ Refers to deaths among live births during the first 28 completed days of life.

Crude Marriage Rate (CMR)

➤ Is a gross measure of the level of the relative frequency of marriages in an area for a given year. It expresses additions, by the formal means of legal marriage, being made to the married segment of the total population. This refers to the number of marriages per 1,000 mid-year population.

Crude Birth Rate (CBR)

➤ Refers to the number of live births per 1,000 mid-year population.

Crude Death Rate (CDR)

➤ Refers to the number of deaths per 1,000 mid-year population.

Infant Mortality Rate (IMR)

➤ Refers to the number of infant deaths per 1,000 live births in a given year.

Maternal Mortality Rate (MMR)

➤ Refers to the number of maternal deaths in a given year per 100,000 live births in that year.

Total Fertility Rate (TFR)

➤ Refers to the average number of children a woman would have by the time she reached age of 50, if she were to experience the Average Specific Fertility Rates of a given year.

Natural Increase

➤ Refers to the excess of births over deaths.

Crude Rate of Natural Increase (CRNI)

➤ Refers to the difference between crude birth rate and crude death rate.

Age Specific Fertility Rate (ASFR)

➤ Refers to the number of live births born to woman of a given age or age group by the mid-year female population of the same age or age group during the same year. This refers to average number of births per 1,000 females of specific age group.

Birth Order

➤ Refers to the numerical order of a child in relation to all previous deliveries of the mother.

Daily Average

➤ Refers to the arithmetic mean of birth, death or marriage occurrences per day.

Daily Index

➤ Is the increase/decrease from the overall daily average of event occurrences.

Period of Gestation

➤ Refers to the number of completed weeks which have elapsed between the first day of the last normal menstrual period and the date of delivery irrespective of whether the product of conception was live-born or born without evidence of life.

Sex Ratio

➤ Refers to the number of males per one hundred females.

Usual Residence

➤ Refers to the place where the person habitually or permanently resides.

Place of Occurrence

➤ Refers to the place where the vital event took place.

BRIEF ANALYSIS

MARRIAGE

MARRIAGE STATISTICS

❖ MARRIAGE BY PLACE OF OCCURRENCE

Registered marriages in the country showed a declining trend from 517,138 in 2006 to 506,306 in 2010, a decrease of 2.1 percent in a span of four years. However, in Table 1, there was an increase in the number of marriages to 518,998 in 2009, a registered increase of 2.4 percent from 2008 level. The reason for this abnormal increase may have been due to a slight increase in registration of marriages.

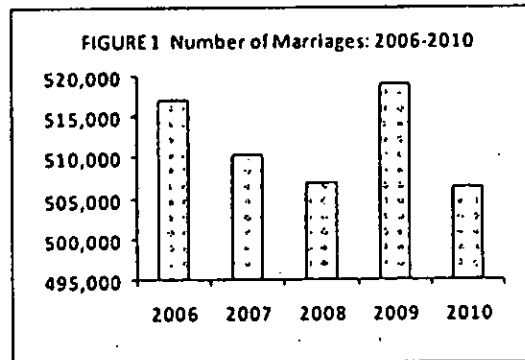

TABLE 1 Percent Distribution of Marriages by Region: 2006-2010

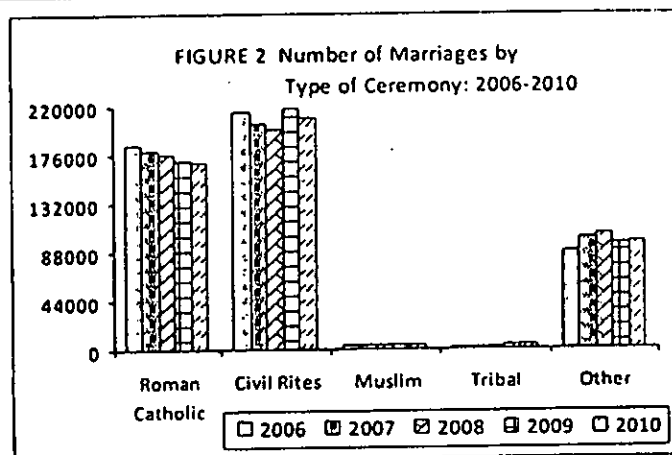

Region	2006	2007	2008	2009	2010
Philippines	517,138	510,375	506,828	518,998	506,360
NCR	15.5	14.5	14.8	13.7	13.6
CAR	2.0	2.1	2.0	2.1	2.0
Region I	6.0	6.1	5.6	5.7	5.9
Region II	4.7	4.9	4.6	4.6	4.9
Region III	12.6	12.5	12.0	11.9	11.7
Region IVA	12.3	12.3	12.0	11.8	11.9
Region IVB	2.8	3.1	2.7	3.3	2.9
Region V	5.1	5.0	5.2	6.1	6.2
Region VI	7.7	8.0	8.1	8.1	8.3
Region VII	7.2	6.8	6.9	6.7	7.0
Region VIII	3.3	3.7	3.2	3.3	3.9
Region IX	3.3	3.5	3.8	4.6	4.0
Region X	5.6	5.0	6.1	4.9	5.0
Region XI	4.5	4.8	5.1	5.6	5.8
Region XII	3.7	3.8	4.1	4.1	3.6
Caraga	2.1	2.4	2.4	2.5	2.8
ARMM	1.5	1.5	1.4	1.0	0.5

Four in ten marriages occurred in the National Capital Region (NCR), in Region III and in Region IVA, where 40.4 percent of the total registered marriages were accounted for. NCR reported the highest occurrence of marriages during the five-year period. Only Region III and ARMM showed declining trends in total marriages for the five-year period from 12.6 percent in 2006 to 11.7 percent in 2010 and 1.5 percent in 2006 to 0.5 percent in 2010, respectively.

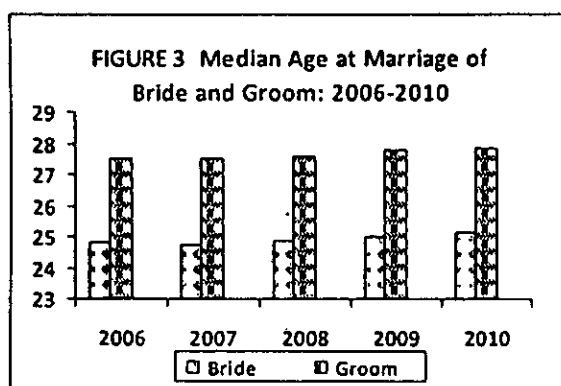

Source: Philippine Statistics Authority

❖ TYPE OF CEREMONY

Marriages performed through civil rites got the highest proportion although the trend was going down. However, in 2009 the proportion of civil rites had increased surpassing the 2006 level. Marriage rites performed in the Roman Catholic churches also revealed a decreasing trend, although in 2009, there was a slight increase, see Figure 2.

❖ AGE OF BRIDE AND GROOM

Women, in general, marry at an earlier age than men. As can be seen in Figure 3, the median ages of brides and grooms showed an increasing trend, and a high proportion of brides got married between the ages 23-24, while grooms at ages 27-28. The median age was slightly increasing for both bride and groom as follows: bride from 23.4 in 2006 to 23.7 in 2010 or a slight increase of 1.4 percent and the groom from 27.2 in 2006 to 27.8 in 2010, an increase of 2.2 percent.

It was further observed that the peak age of bride marrying was at age group 20-24, while that for the groom was at ages 25-29 (Figure 4a and 4b). Marriages involving teenage brides were four to five times more

than teenage grooms. On the other hand, grooms who settled down at age 50 and over were two to three times higher than women in the same age group (Table 2).

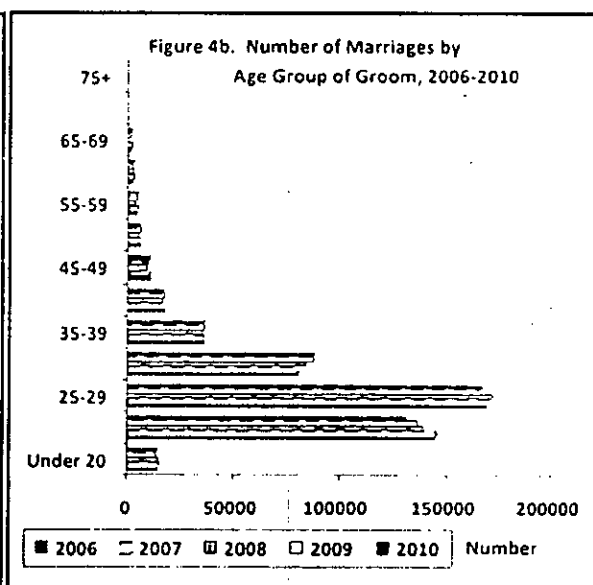

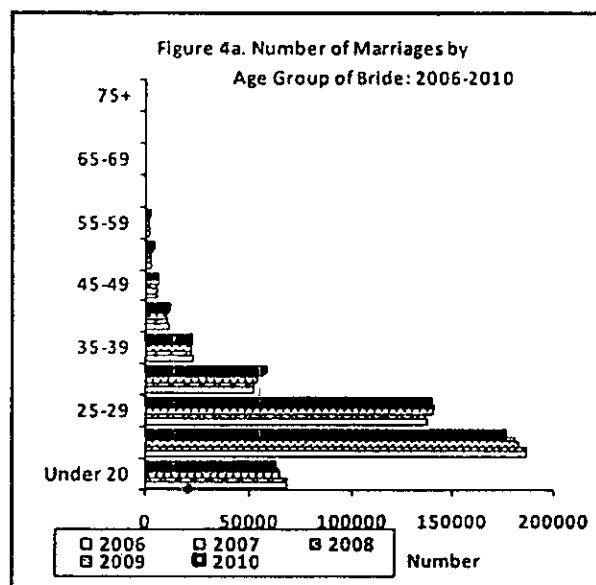

TABLE 2 Percent Distribution of Marriages by Age Group of Bride and Groom: 2006-2010

Age Group	2006		2007		2008		2009		2010

❖ NATIONALITY OF BRIDE AND GROOM

Most marriages contracted between Filipino brides and grooms showed an increasing trend from 95.6 percent in 2006 to 96.37 percent in 2010.

Intermarriages of Filipino brides with foreign nationals were observed to be minimal and the trend was decreasing

from 3.89 percent in 2006 to 3.10 percent in 2010. The proportion of Filipino grooms marrying foreign nationals was insignificant between 0.3 to 0.4 percent of the total grooms during the 5-year period, 2006-2010, see Table 3 below.

BIRTH

BIRTH STATISTICS

❖ TOTAL REGISTERED LIVE BIRTHS

The total registered live births in the country showed an erratic trend for the period 2006-2010. The highest number of registered live births occurred in 2008 at 1.78 million, with 7.3 percent increase from the figure of 1.66 million recorded in 2006. However, in 2009 the number of births decreased by 2.2 percent but rose by about 2.1 percent in 2010. This erratic trend was also true for births from the usual place of residence of mothers. The difference between the two sets of figures was the number of births to Filipino citizens that occurred in foreign countries for the period 2006 to 2010, see Table 4 below.

Male births outnumbered female births, with sex ratio ranging from the lowest 108.2 males per 100 females in 2009 to the highest 108.7 males per 100 females in 2007, see Figure 5 above.

TABLE 4 Registered Live Births by Place of Occurrence and Place of Usual Residence of the Mother by Region: 2006-2010

❖ BIRTHS BY PLACE OF OCCURRENCE AND PLACE OF USUAL RESIDENCE OF THE MOTHER

At the national level, the two data sets were almost the same. The only difference lay in the number of births occurring in foreign countries which were included among the registered births in the country. The difference was only 1,549 births in a span of 5 years, see last column of Table 4A. Looking at the differentials between the place of birth by occurrence and the place of birth by usual residence of the mother by region, 7 out of 17 regions reported positive figures for the number of births by place of occurrence compared to negative figures for births attributed to usual residence of the mother. This finding implied that mothers opted to give birth elsewhere than their usual place of

residence probably for better health care facilities and social services. The National Capital Region showed the highest differential in the number of births registered by place of occurrence (101,231 births in 5 years) than the number of births reported by usual residence of the mother. Second in positive differential was Region X with 6,718 births in five years while the region that ranked third was CAR with 2,860 births. The fourth ranking region was Region XI with 2,647 births. All the other regions with positive differentials reported insignificant numbers, which meant that very few mothers gave birth outside their region. These regions were: Regions II, VII and XII.

TABLE 4A Differentials in the Number of Births by Usual Residence of the Mother and by Place of Occurrence: 2006-2010

REGION	Place of occurrence minus Usual Residence of Mother					TOTAL 2006-2010

Regions with negative differentials in Table 4a indicated that more mothers had given birth outside their region of usual residence. The region of preference could be in

neighboring regions where health facilities were available or in areas where the parents of expectant mothers or relatives

reside, refer to regions with positive differentials.

Region IVA had reported the largest negative differential with 84,071 births in a span of 5 years (Table 4a). These were the extent of mothers giving birth outside their

usual residence. Second in rank was Region III with negative differential of 10,970 births and third in rank was Region I. The negative differentials of the other regions may be considered insignificant.

❖ ATTENDANT AT BIRTH BY PLACE OF OCCURRENCE

More than two-thirds of the total birth deliveries were medically attended for the five-year period. It is worth noting that births attended by medical professionals was increasing through the years from 68.2 percent in 2006 to 75.8 percent in 2010,

while births attended by traditional birth attendants (TBAs) or "hilots" was decreasing from 31.0 percent in 2006 down to 23.5 percent in 2010 (Table 5).

TABLE 5 Percent Distribution of Births by Place of Occurrence and by Attendant at Birth, Philippines: 2006-2010

Percent Distribution of Attendants at Birth						
Year of births	Total births Philippines	Percent	Health Professionals	Traditional birth attendants	Others	Not Stated
2006	1,663,029	100.0	68.2	31.0	0.7	0.1
2007	1,749,878	100.0	69.6	29.7	0.6	0.1
2008	1,784,316	100.0	70.9	28.4	0.6	0.1
2009	1,745,584	100.0	74.0	25.4	0.6	0.0
2010	1,782,981	100.0	75.8	23.5	0.7	0.0

*Excludes births from foreign countries

All regions except ARMM showed an increasing trend on births attended by health professionals. NCR showed the highest proportion of births attended by health professionals among regions, wherein for every ten births that occurred in NCR, nine births were attended by health professionals. Region III and Region II also

showed high proportions of births that were medically attended. On the other hand, there were six regions in 2006 wherein less than half of births that occurred in their area were medically attended. These were Regions IVB, V, VIII, XII, ARMM and Caraga (Table 5a).

In terms of births attended by TBAs, ARMM showed the highest proportion, followed by Caraga. The least number of births

attended by TBAs occurred in NCR with less than 10 percent (Table 5b).

❖ BIRTHS BY AGE GROUP OF MOTHER

As shown in Table 6, the peak age of childbearing was at ages 20-24. About three out of ten babies were born to mothers belonging to the age group 20-24 for all years except in 2006 wherein the peak age was at age group 25-29, after which childbearing decreased as age had increased.

It can also be noted in this table that there was an increasing trend in the number of births occurring to teenage mothers (aged 19 and below). From 154,119 (9.3 %) births in 2006, it increased to 207,898 (11.7%) births in 2010. With this increasing trend,

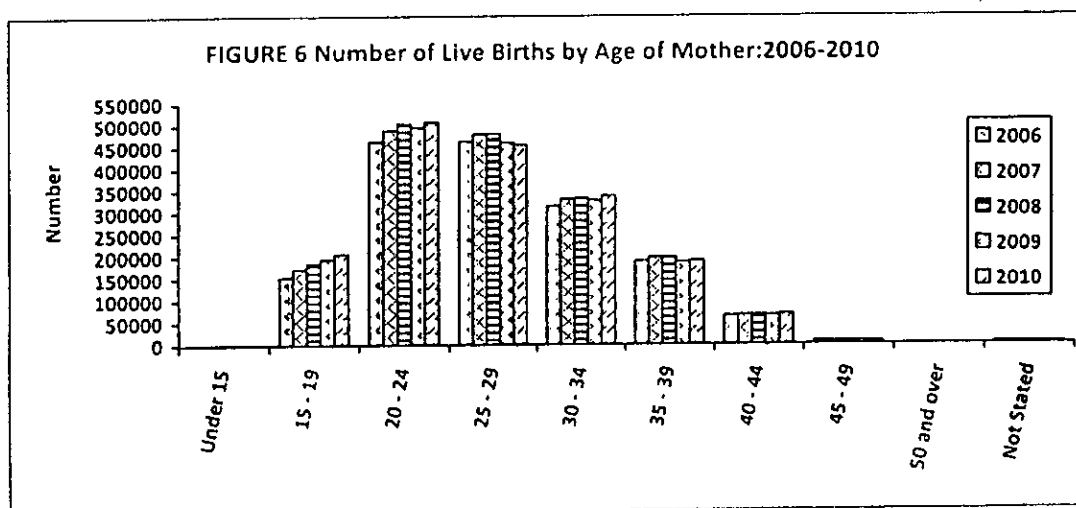

government programs should focus on these ages on how to delay the beginning of childbearing since these are the ages wherein mothers are more likely to have complications during labor which result in higher morbidity and mortality for themselves and their children.

The median age for childbearing showed a decreasing trend from 27.3 in 2006 to 26.9 in 2010.

TABLE 6 DISTRIBUTION OF BIRTHS BY AGE GROUP OF MOTHER: 2006-2010

Age Group	2006	2007	2008	2009	2010
Total	1,663,029	1,749,878	1,784,316	1,745,584	1,782,981
Under 15	766	1,013	1,116	1,113	1,324
15 - 19	153,353	172,269	185,411	194,549	206,574

Median Age	27.3	27.2	27.1	27.0	26.9

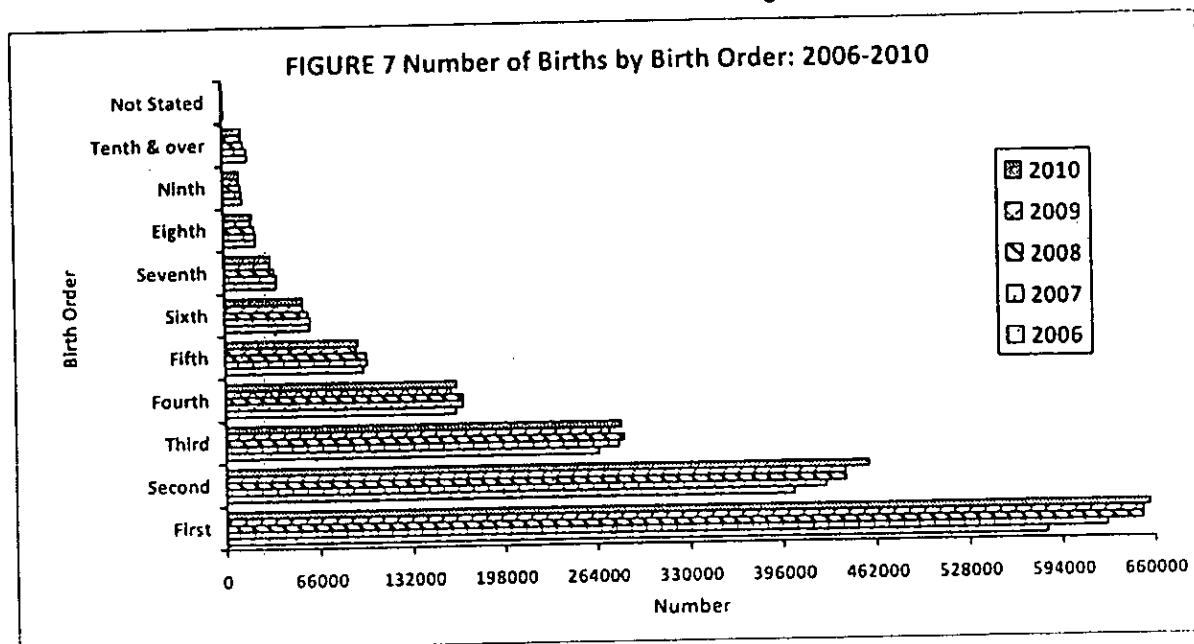

FIGURE 6 Number of Live Births by Age of Mother:2006-2010

❖ BIRTH ORDER

First born babies had the largest proportion of live births accounting for more than one-third of all babies born in the country for all years.

These were followed by those babies whose birth orders were second which accounted for about one-fourth of the total babies for all years. Mothers aged 20-24 had the highest number of first-born babies.

If we correlate this to the number of marriages that occurred during the corresponding period, the ratio of births to the number of marriages in percent was 77.18 percent. This meant that for every 77 marriages registered, there were 100 first borns registered. What was the implication of this finding? On the average, there were more births that

were registered than marriages registered, which may have indicated that the excess in the number of births may have reflected the extent of legitimacy of births. It also indicated that legal marriages may not have been registered on time, or both reasons may have contributed to the difference.

TABLE 7 Ratio of Total Marriages to Total First Born Registered by Year, Philippines: 2006-2010

Year	Total Marriage	Total first born	Ratio
2006	492,666	582,763	84.5
2007	490,054	625,887	78.3
2008	486,514	651,159	74.7
2009	492,254	650,935	75.6
2010	482,480	655,979	73.6
Average 2006-2010	488,794	633,345	77.2

DEATH

DEATH STATISTICS

❖ DEATHS BY USUAL RESIDENCE

Registered deaths in the country showed an increasing trend from 441,036 in 2006 to 488,265 in 2010, an increase of 10.7 percent in a span of four years.

Males outnumbered females but the sex ratio showed a decreasing trend from 141.4 males per 100 females in 2006 to 137.2 males per 100 females in 2010.

The top three regions in terms of the number of deaths were in Luzon, wherein the National Capital Region ranked first, followed by CALABARZON and Central Luzon which ranked second and third, respectively. The order in rank for these three regions was the same for the years 2006-2010. These three regions had a percentage share of around 40 percent of the total deaths in the country, and these were the only regions that contributed more than one-tenth of the proportion of deaths each. On the other hand, ARMM had the lowest number of registered deaths in the country all throughout the five-year period and the only region that contributed less than 10 percent share of the proportion of deaths.

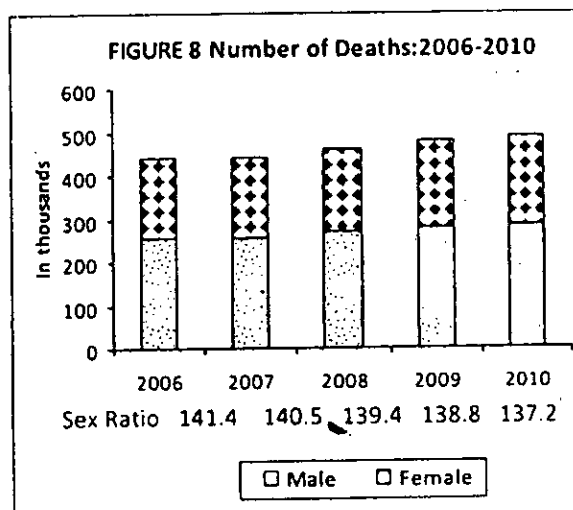

TABLE 8 Registered Deaths by Place of Occurrence and Place of Usual Residence of the Deceased by Region: 2006-2010

❖ DEATHS BY PLACE OF OCCURRENCE AND USUAL RESIDENCE OF THE DECEASED

About one-third of the regions in the country had registered number of deaths by place of occurrence greater than the place of usual residence. This implied that there were people who opted to temporarily migrate to places where there were available or better health care facilities and social services. The National Capital Region showed the highest number of deaths that occurred by place of occurrence rather than the number of deaths by place of usual residence of the deceased. This was indicative of better

hospital/health facilities in NCR than the other regions.

Regions with negative differences in Table 9 indicated that there were more deaths outside the region of usual residence of the deceased. The region of preference could be in neighboring regions where health facilities were available.

On the other hand, Region IVA had the largest negative difference (see Table 9).

TABLE 9 Differentials in the Number of Deaths by Usual Residence of the Deceased and by Place of Occurrence: 2006-2010

REGION	Place of occurrence minus place of usual residence of the deceased					TOTAL
	2006	2007	2008	2009	2010	2006-2010

❖ INFANT DEATHS

Registered infant deaths showed a slight increase from 21,764 in 2006 to 22,476 in 2010.

It was noted that there were more male infants than female infants dying from the sex ratio of lowest 137 male infants per 100 female infants dying in 2009 to the highest 144 male infants per 100 female infants dying in 2007.

The top two regions in terms of high proportion of registered infant deaths were NCR and Region IVA, and these were the only regions that contributed more than 10 percent of the total infant deaths in the country each (Table 7). On the other hand, ARMM had the lowest number of registered deaths in the country all throughout the five-year period and the only region that contributed less than one percent share of the proportion of infant deaths.

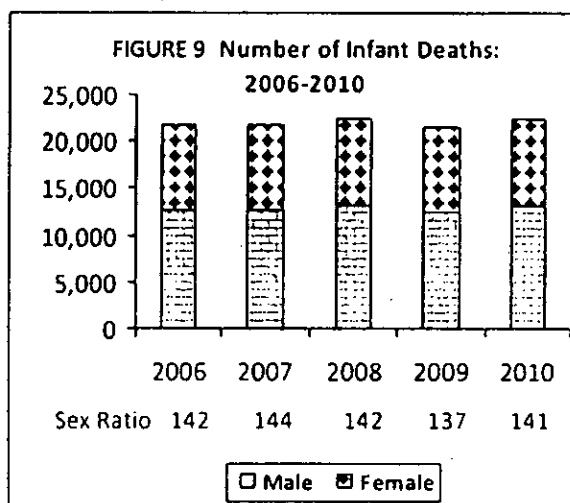

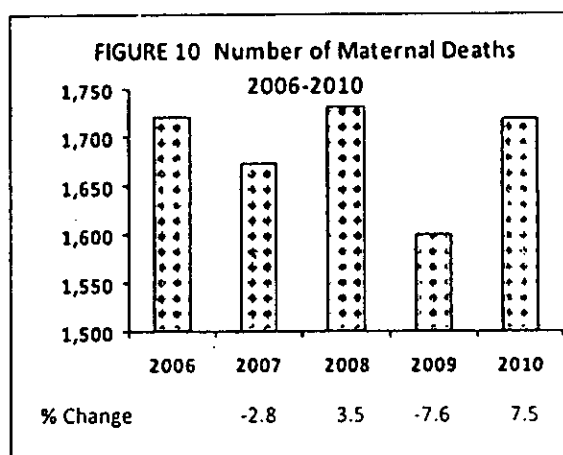

TABLE 10 Percent Distribution of Infant Deaths by Usual Residence of the Mother and by Region: 2006-2010

❖ MATERNAL DEATHS

Maternal deaths are deaths that occur to women while pregnant or within 42 days of termination of their pregnancy, irrespective of the duration and the site of the pregnancy, from any cause related to or aggravated by the pregnancy or its management, but not from accidental or incidental causes. A total of 1,719 maternal deaths were recorded in the country in 2010, an increase of about 7.5 percent from the 2009 record of 1,599.

Among regions the most number of maternal deaths was recorded in Region IVA, followed by NCR and the third in rank were Regions V and VII.

APPENDIX C

CIVIL REGISTRATION SYSTEM: THE REGISTRATION PROCESS

Introduction

Act No. 3753, known as the Civil Registry Law of 1930 has mandated that all vital events that marked the entry and departure of a person in his lifetime and the changes in his/her civil status shall be registered. The registration method is defined as the continuous, permanent and compulsory recording of the occurrences and characteristics of vital events, primarily for their value as legal documents and secondary for their usefulness as a source of statistics.

Under Commonwealth Act (CA) No. 591, the Bureau of Census [now Philippine Statistics Office - (PSA)] is mandated, among others, to carry out and administer the provision of Act No. 3753.

Under this Act, the head of the NSO is also the Civil Registrar General (CRG) who gives orders and instructions to the city/municipal civil registrars with reference to the performance of their duties as such. The CRG in this regard is empowered to prepare and issue implementing rules and regulations on civil registration and to prepare and order printed the necessary forms for proper compliance.

The Civil Registration System maintains an Archive of registered vital documents on the civil status of persons. This is repository of all civil registry documents where certifications to the public are issued for legal and other purposes.

Place where to register the event

As a general rule, the place of registration is at the Office of the Local Civil Registrar (OLCR) of the city or municipality where the vital events occur. However, for Muslim marriages, registrations are done in the Shari'ah Circuit Courts while vital events involving Filipinos that occur in foreign country are registered in Philippine Foreign Service Establishment (PFSE) in the country of occurrence or if not available, to the nearest PFSE.

Out of town reporting of vital event occurs when the documents presented to the office of civil registrars, which is not the place of occurrence, not for registration but to be forwarded to the OLCR where the event occurred and where it should be registered.

Appropriate Forms to use

The civil register consists of certificates (see Appendix B) and the registry book. It also includes the actual copies of the registrable court decisions and the legal instruments concerning the civil status of persons. The certificates are loose-leaf forms in a set of four copies except for the Certificate of Foundling which is in a set of three.

Person who will report the event

The informant is the one who reports the event for registration and who gives information to be recorded in the civil register.

In case of live birth, the law requires the hospital or clinic administrator or his representative if the birth occurred in the hospital or clinic. If the birth occurred elsewhere, the attendant who may either be a physician, nurse, license midwife or traditional birth attendant makes the report. In default of the hospital authority, or the attendant, the responsibility of reporting the births devolves upon either or both parents or upon a person who has full knowledge of the facts of birth and filiation of the child.

For death, the report shall be made by the hospital or clinic administrator if the person dies in the hospital or clinic, or by attending physician or by the nearest relative or by any interested party who has knowledge of the occurrence of death. In all cases, the report shall be submitted to the Local Health Officer (LHO) who shall direct and order the C/MCR to enter the death in the civil register.

In case of marriages, the solemnizing officer is required by law to report the event. In default of the solemnizing officer, the duty is lodged upon the contracting parties.

Period when to report the event

Live births shall be reported for registration to C/MCR not later than thirty (30) days from the date of birth.

Death or fetal death shall be reported to Local Health Officer (LHO) within forty eight (48) hours from the time of death and the LHO shall direct or cause the registration to the C/MCR not later than thirty (30) days from date of death.

Marriages that require the issuance of marriages license shall be reported to C/MCR for registration not later than fifteen (15) days from date of marriage. However, marriages that do not require a license such as marriages at the point of death (Article 27); marriages in remote places (Article 28);

marriages between members of ethnic cultural community (Article 33); and marriages between men and women who have lived together for at least five (5) years (Article 34), shall be reported not later than thirty (30) days after date of marriage.

Any report made to the OLCRs beyond the reglementary period are considered late and can be entered only in the civil register after the informant complies with the requirements for delayed registration.

Operative act of registration

The C/MCR sees to it that appropriate form is used; form is properly and completely filled-up; and proper attachments are submitted. In case, the entries are found incomplete, the C/MCR has to require the person concerned to fill up the document completely or to correct the entries.

When the document is accepted for registration, the date of receipt is recorded in the space provided and the documents received for the day are entered immediately in the appropriate civil registry book, assigning therein the corresponding registry number. After registration entry/entries found erroneous can only be corrected through RA 9048, except sex, nationality, age and status which require court approval.

Distribution of registered documents

Upon registration, the C/MCR distributes the copies accordingly: the first copy to the informant; the second copy to the Civil Registrar General; the third copy is retained by the LCR; and the fourth copy to the attendant or solemnizing officer, as the case may be.

The CRG copy is permanently filed in the Civil Registry Archive after the documents are encoded to generate vital statistics published in the VSR.
