**Subject:** Keep océano dunes SVRA open please!!  
**Date:** Sunday, March 18, 2018 9:55:13 PM

---

To whom it may concern,

I'm writing this email to you in the hopes to try and persuade you to investigate further the validity of silica coming from the océano SVRA. I would like a non bias group to conclude this investigation. It seems that the people who want the dunes to close are leading the investigation. This group has not made all of their findings public and makes us questioned if there is larger scheme behind it. I don't want the dunes to close as it apart of our life.

The dunes are a special place for my family and I. We make at least 5-6 trips a year. We have been coming since 2007. Most of the time it's at least 3 families that come together. To us this is one of the places where our kids can feel free. We have so many memories from this place and I want to continue to make many more.

I don't want to sound selfish and disregard the possible healths issue the opposing group are facing. I just feel like they are putting all of the blame on the dust coming from the SVRA. That is not true. The air quality is one of the cleanest. And it's not that we don't care about the wildlife, we do. But don't disregard all of the people that want to keep the dunes open. People have been coming and riding in this area since the 1970's. Why do you want to close it now? Is it because of big developers?

Please consider looking into valid non bias data that will show if the marine biological particles have any impact on quality of air. Thank you for taking the time to read this. Please keep the dunes open!

Alba Miranda
