It's a major disappointment that State Parks is proposing only a 12% PM10 reduction for next year. We need to quickly get to the 50% reduction. If State Parks doesn't have a plan, I suggest that your Hearing Board:

- Immediately shut down riding in 100 acres, and continue shutting down an additional 100 acres per year until State Parks achieves a 50% PM10 reduction.

Please don't let this historic opportunity slip away. Our good health depends on you.

Sincerely Yours,
Art Herbon
