Hi I'm Brad

I want to say that I had been going to Oceano dunes since I was very young about 6 or 7 year old. When I heard about dune being reduce in size or closed down to off road uses because of Mesa residents claiming health issue. But I discovered the people that moved to Mesa (told by their neighbors) had said it causes ther health issue because of sand dunes sand being kicked up and blown onto them.. well their neighbor told me that they are

trying to shut down not because of health it is that they want to control the town. Honestly I'm not sure if it's true but the real truth is when mobile estates & home estates were being built & sold they were warned of wind and dust is normal including after the trees were being cut down will be worse. Also most people with bad health & respiratory issue were not great before moving to there.

I have allergies and I got no issues grant it may not be same as them but they were informed of this area.

I moved over here in Oceano and never had issue with sand dust and I drive on routes all over due to my job as technician.

I am asking you to keep the dunes open for all dune riders as it has long history of families that came here for many years as it was started way back in 1900 with horse drawn buggy and wagon then onto vehicles that had grown to great history.

It is a historical Oceano dunes for over 115 some years.

My grandson loves the beach and it keep family fun alive as we also teach them how to be good

neighbors, riders and understand all laws, caring about this areas.

Plus once you close this place it will have very high economy change for worse on a lot of business.

As for Bird like snowy plovers , I can say they are not threaten birds and we all watch out for it bit they had been 10's time more populated than it was..

Please keep the Oceano dunes open so we have place to ride our toys and family gatherings and camping.

We or I continue help people how to great time and help each

other as always in past.

Please keep our beach open as nature has intended and not reduced. As for others want to close the beach down stop destroying the natural and plant trees down that was for controlling any wind & dust Oh by the way ,,are they also wanted the farms close down too as they are worse for dust and chemicals when farming. Are they doing same to them as Oceano dunes if not then it should be same as equals.

Thank you for listening and hopefully understand.

Brad
