As a Central Coast Native I want you to know my input on this issue. Let me start by saying that the Oceano Dunes has been a family tradition for going on 4 generations now. We celebrate birthdays, anniversary's and even Celebrations of life out in the dunes.

Before you shut it down it is your personal responsibility to ensure that you have done an extensive investigation into all possible causes and that you have also reviewed all data to be true & accurate and that you have not over looked or ignored pertinent information. Information like where is the silica really coming from? What impact does the marine biological material coming from the ocean have on all the air monitoring data?

The APCD is very transparent in their bias toward the off-roading community. This is public land for ALL to enjoy, that includes bird watchers, fishermen and off-roaders. I also find it very concerning that you continue to take away things that bring money and work into these communities and yet are constantly looking for more funding.

The problem did not occur until the Guadalupe dunes were closed down and the trees were removed on the mesa.

As a resident of the State of California and the County of San Luis Obispo and a tax payer I demand that you answer these questions.
