Subject: [EXT]Comments for APCD Hearing Board Meeting

ATTENTION: This email originated from outside the County's network. Use caution when opening attachments or links.

Dear Hearing Board,

The Stipulated order of Abatement has been agreed to by all parties and exists for one fundamental reason: Particulate matter (PM) from the dunes is a proven critical public health issue and MUST be abated as has clearly be stipulated!

Evidence surfaces on a regular basis that demonstrate how detrimental continued PM exposure is to the human body; thus ANY reduction in compliance targets should be rejected out of hand. State Parks needs to be held accountable to what has been clearly stipulated. Please deliver a zero tolerance message for yet another delay tactic.

Any proposed extension of the Stipulated Order of Abatement term is unacceptable since it would delay compliance with state air quality standards. Again, this is a health issue! Public health overshadows recreation! As a resident on the Mesa, I ask that you ensure compliance with state air quality standards will be met by the end of 2023.

Thank you,

Dorothy Hines
Mesa Resident
