---

Dear Alyssa,

Following are my written comments regarding Petition 17-01:

Dear Hearing Board Members,

The Stipulated Order of Abatement conceived by State Parks, California Air Resources Board and the Air Pollution Control District is inadequate. It clearly ignores the health and safety of people. How can anyone with a clear conscious feel good about a 30% solution?

The agreement does not establish a nuisance under the Health and Safety Code and completely ignores the Lung Association's documented concerns plus the public comments of health professionals also seem to be dismissed.

People living in the area appear to be collateral damage in which an inter-agency quest to get along produced a tepid agreement that does NOT protect the health and well-being of human beings.

Please pay close attention to and careful consideration of your requested public's submittal of a well thought out vision of a plan that WOULD reduce emissions to background levels. At the very minimum, for the health of those who directly are at your mercy, please embrace one of the more substantial options laid out in the original Abatement Order.

Thank you, Dorothy Hines
