---

Why is it that our Dunes are the "only" ones open to vehicles in the entire state?

Could it be that all other costal communities have already discovered the health hazard that Nipomo is now considering?

As residents of Mesa Meadows, in Nipomo, we are alarmed by the air quality reports and the impact on future property values and our health.

For these reasons we support the APCD air quality nuisance abatement to close our state parks to off-road vehicles.

Respectfully,

Doug Lynn
