**Subject:** [EXT]Hearing Board - Oct. 14th

ATTENTION: This email originated from outside the County's network. Use caution when opening attachments or links.

I can only hope the Hearing Board holds State Parks to the original agreement of a 50% dust reduction by 2023. The State Parks are fine finaglers. They try to dodge and restate their responsibilities. If State Parks tried as hard to meet the original agreement as they did to get it reduced or eliminated, the goal would be met. They have the resources and the money. State Parks receives a huge subsidy from the fuel tax. That's why the entrance fee to the park is artificially low. When was the last time they raised the entrance fee, even a little? The Hearing Board should hold the State Parks accountable to the original goal. An airplane pilot does not get a passing grade if he almost attempted to land the plane, but didn't. Neither should State Parks. The Hearing Board was created to protect the air and the citizens down wind. Protect our health! Protect the air! Air pollution is a slow killer. Everyone deserves clean air. It is possible to reduce the dust. Make State Parks reduce it.

Ed Harris
