Subject: [EXT]State Park Public Works Plan

ATTENTION: This email originated from outside the County's network. Use caution when opening attachments or links.

The State Parks keeps dragging it's feet in completing the Public Works Plan. States Parks should be held accountable.

The dust control measures outlined SHOULD be completed by July 31, 2021. These dust control measures should be completed, not just undertaken. This is just another tactic State Parks uses to delay implementing dust mitigation measures that protects public health.

The plan references achieving goals while minimizing impacts to recreational activities. What about achieving goals while minimizing impacts to Public health?

I always believed parks were to be enjoyed, not destroyed (by off-road vehicles).

The Oceano Dunes State Vehicular Recreation Area has been a paradise while the park has been closed to vehicles. It is peaceful, serene and beautiful. A place where families can walk the beach without having high anxiety from loud, fast dune buggies. It has been a wonderful respite from the pandemic.
