ATTENTION: This email originated from outside the County's network. Use caution when opening attachments or links.

Please do not grant an extension of the Stipulated Order of Abatement (SOA). This has been agreed to by all parties who have the common goal of reducing the particulate matter from the dunes because it is a proven critical public health issue.

There is no lack of evidence that continued high levels of particulate matter exposure is detrimental to humans. Reductions in compliance targets cannot be tolerated. Please stop the continuing attempts to delay compliance with state air quality standards.

As a resident on the Mesa, I ask that you ensure compliance with state air quality standards will be met by the end of 2023, i.e. stay the course with the existing SOA.

Thank you,

Elizabeth Manak
Mesa Resident
