---

What a disappointment to learn of the agreement put together by State Parks and the APCD is not one to protect the lives of the citizens of South SLO county.

My health is being impacted and I have to alter the time I go out to recreate, work in my yard, or even walk around the block! Why are the people of South County being treated like we do not matter? Are the tax dollars and money we spend living here not enough to expect clean air?

How many more hearings, and APCD meetings do people have to attend to make it clear something needs to be done now, not a dribble of 30% in 5 years.

Totally unexceptable. This is the best these two agencies can do since these hearings started in 2017????
