---

Hello, I am writing this email in hopes to get some action done with what's been going on with the dunes, this battle has become so ugly and people are being bullied and paid off obviously. I love the Oceano Dunes and would hate to see it closed down over lies.

The OHV community has taken the blame for too long, please I ask you to investigate the validity of silica coming from the SVRA and what impact does the marine biological material coming from the ocean have on all the air monitoring data?

What percentage of dust is coming from the SVRA?

We want answers. Thank you.
