Subject: Oceano Dunes SVRA
Date: Friday, March 16, 2018 4:02:09 PM

This is in response to the State Parks/County deal that may possibly put an end to recreation at Oceano State Dunes. I understand that the State Parks and County Air Pollution Control District have agreed to a settlement that would supposedly reduce air pollution from Oceano Dunes SVRA.

I feel it is crucial that the facts behind this supposed reduction in air pollution be validated. Exactly how was it determined that the use of the SVRA contributes to the area's air pollution? How much of the air pollution is simply a natural cause from ocean winds? What impact does the marine biological material coming from the ocean have on air monitoring data? Who is behind this push to stop the recreational use of this SVRA? Until all these questions are answered and it is clear that this is not just another fabricated report written to support some biased environmental viewpoint, then please do not allow this measure to pass.

My family and I have personally used Oceano Dunes on several occasions. We have always been impressed by the dedication of the families there to "due no harm". We need public lands for our families and friends to enjoy, not to have the use of these lands taken away without due process.

Please make sure the "facts" used in behind the environmental reports are accurately verified before we lose yet another opportunity to enjoy our public lands.

Thank you,
Janet Snyder
