---

Ca State Parks representative,

It has come to our attention that State Parks has been misled into a deal with the San Luis Obispo County Air Pollution Control District (APCD) with false data. And this deal will result in the phase out of all recreation activities in Oceano Dunes State Vehicular Recreation Area over the next five years.

We insist this bad deal responsibly be put on hold until such time that State Parks has real and accurate information to base its decision. We expect you to fully obtain and evaluate accurate data of silica coming from the SVRA due to recreational use. And what percentage occurs naturally from wind-blown particulate and marine biological material coming from the ocean have on all the air monitoring data?

Properly reported and evaluated, we believe it will be discovered that APCD's motives extend beyond air quality, rather it is an assault on Californians that do not fit their agenda.

Until accurate data is obtained and evaluated, the Oceano Dunes SVRA should remain open for use for all Californians.

Thank you,

Joe Cornell

Californian & avid off-road recreator
