Subject: [EXT]Comments for the APCD Hearing Board meeting on Friday Oct 14, 2022

ATTENTION: This email originated from outside the County's network. Use caution when opening attachments or links.

Please, no extension of the Stipulated Order of Abatement term. We need compliance with state air quality standards.

Those of us on the Nipomo Mesa have shown at least a decade of patience for our local leaders to protect the health of the residents of this area.

What if this was a slow, simmering, smoky fire? How much time would need to be spent to put it out and protect the health and safety of the local community? Particulate matter is the same, a major health issue. There are constant new studies expressing the dangers to the health of people exposed to extremely poor air quality.

I must say, who is running the show on all this? State parks? Or, scientific studies or even just observational studies how poor the air quality can be. The only good thing that can be said about 2020 is even in the windy season we had cleaner air and local residents could get out and enjoy the dunes.

Regards,
Linda Reynolds
Nipomo, Cal 93444
