Subject: Keep Pismo Beach Open!
Date: Sunday, April 22, 2018 4:10:54 PM

Please consider scientific data when rendering your decisions on the fate of the ever popular Oceano Dunes OHV park.

The wind that creates the dunes also creates the sand in the neighborhoods front yards. This is a perfect example of "Not in My Backyard". The dunes and off road area were there long before the new housing developments.

If local schoolchildren are having respiratory issues, please be careful to discover if it is due to living by a windy beach, versus living where atvs ride.

There have been weekends where the winds were so severe we had to stay in our tents. Obviously, this is mother natures fault, not dirt bikes or a quads. This has been a family tradition for us for the past 35 years, and we hope to continue this tradition with our grandchildren someday.

Thank you for your consideration,
Lisa
