Subject: Oceans Dunes Impact on Air Quality
Date: Sunday, March 18, 2018 8:55:36 PM

The recent agreement reached by State Parks, the California Air Resources Board and the Air Pollution Control District is insufficient. It does not reduce emissions to background levels. It does not establish a nuisance under the Health and Safety Code, despite communities around the dunes having the worst air quality in the nation several times a year.

There are better solutions to these problems, as suggested by particulate-impacted residents and the original abatement order. Please consider these more stringent abatement options in reviewing the recent agreement.
